Mid Ulster Local Development Plan 2030 - Preferred Options Paper, Public Consultation Report

Purpose: To provide members with a summary of the responses received in relation to the Local Development Plan 2030 - Preferred Options Paper public consultation.

Content: This report provides:

- (i) An overview of the Local Development Plan 2030 - Preferred Options Paper and its purpose
- (ii) An outline of the Local Development Plan 2030 Preferred Options Paper consultation process
- (iii) A summary of consultation body and public responses received in relation to the main subject areas within the POP and the SA/SEA process and consideration of them.
- (iv) Conclusion and Next Steps

Recommendation: That the members note the findings, agree the recommendations and agree that this report shall be used to inform subsequent policies and proposals in the Local Development Plan.

Introduction

The purpose of this report is to provide members with a summary of the responses received in relation to the consultation on the Local Development Plan – Preferred Options Paper and supporting documents, which ran for a period of 12 weeks beginning November 7th 2016 and ending 5pm January 27th 2017. This report will also outline the purpose of the Preferred Options Paper, the main aspects of the consultation process and a summary of the responses from the consultation bodies and the public and consideration of the issues raised. Attached to this report are a series of appendices which summarize the comments made by the consultation bodies, the written representations, comments made at public meetings and workshops and the planning department consideration of these. The findings from this report, along with all the responses received will inform the preparation of the Local Development Plan.

Background

Mid Ulster District Council are required to prepare a Local Development Plan (LDP) for Mid Ulster to guide development in the District up to 2030. The LDP comprising two documents; The Plan Strategy; and The Local Policies Plan, when adopted will replace the Cookstown Area Plan 2010, Dungannon and South Tyrone Area Plan 2010 and Magherafelt Area Plan 2015 - upon adoption of both documents.

The Council began development plan preparatory work in 2015, and to date has published its Timetable, Statement of Community Involvement (SCI). A significant number of background preparatory papers and policy review papers have been prepared as well as a Sustainability Appraisal/Strategic Environmental Assessment Scoping Report. As part of the plan preparatory process a project management team (steering group) was set up which informed the preparation of the scoping report and also then informed the consideration and evolution of the

The Preferred Options Paper – Consultation

The publication of the Preferred Options Paper (POP) on November 7th 2016, commenced the first formal stage in the preparation of Mid Ulster District Council's Local Development Plan. And gave organizations, statutory consultation bodies, businesses, and members of the public the first opportunity to be involved at an early stage of the preparation of the Local Development Plan. Although the plan process is now a two stage process with a Plan Strategy followed by a Local Policies Plan only one POP is produced during the process.

The POP is a consultation paper used to promote debate on issues of strategic significance which are likely to influence the shape of future development within Mid Ulster. Its intention is to stimulate a wide-ranging, yet focused, debate and encourage feedback from a wide variety of interests. With any representations or views received as a consequence of its publication to be considered whilst formulating the Draft Plan Strategy and those relating to the Local Policies Plan held over until the second stage in the process.

The POP proposed strategic guidelines for accommodating growth across Mid Ulster, together with housing allocations and policies. It also explored how the creation of new jobs and prosperity can be facilitated and how our environment can be enhanced and infrastructure improved. It provided a series of maps showing where possible constraints on development could be introduced and indicated directions of growth for the towns.

The POP has been subject to a Sustainability Appraisal (SA), including the Strategic Environmental Assessment (SEA) and an Equality Impact Assessment (EQIA) Progress Report has also been compiled. Whilst the requirement to carry out a SA and SEA are distinct, it is possible to satisfy both these requirements through a combined appraisal process and it is this joint approach which the Council has adopted. The SA/SEA is a continual process which runs parallel with the preparation

of the Local Development Plan (LDP). An SA/SEA Interim Report (consisting of SA/SEA Scoping Report and assessment of alternatives) was published under separate cover alongside the POP.

The SA/SEA performs a key role in providing a sound evidence base for the plan which will play an important part in demonstrating if a development plan document is 'sound'. A central function of the SA/SEA is to highlight any significant negative effects that land use change and development, brought about by the policies and proposals contained within the proposed Local Development Plan, may have on the district in terms of their social, economic and environmental impacts. Comments received and consideration of these is also contained within this report.

Consultation Details

The consultation ran for a period of 12 weeks between November 7th 2016 and January 27th 2017 and was publicised through the following channels:

- A **Public Notice** was issued in the Mid Ulster Mail, the Tyrone Courier, the Tyrone Times, the Co Derry Post, the Impartial Reporter, the Mid Ulster Observer, the Dungannon Observer and the Belfast Gazette and on the Mid Ulster District Council website (www.midulstercouncil.org) for two consecutive weeks. This notice stated:
 - (i) The Council's intention to prepare a Local Development Plan, accompanied by a Sustainability Appraisal, including Strategic Environmental and Equality Impact Assessments;
 - (ii) Publication of the Prepared Options Paper inviting comment within 12 weeks;
 - (iii) Details of community meetings, exhibitions and pop-in information sessions;
 - (iv) Publication of the initial stages of Sustainability Appraisal, incorporating SEA, and invite comment as considered necessary.
- The POP and related Easy Read Guide was **published** on the Mid Ulster District Council website also made available at the Council Offices in Magherafelt, Dungannon and Cookstown and hard copies provided upon request.
- A **Press Release** was issued in the Mid Ulster Mail, the Tyrone Courier, the Mid Ulster Observer, the Dungannon Observer, the Derry Post, the Impartial Reporter, the Tyrone times and the Belfast Gazette about the intention to prepare a new plan, drawing attention to the Preferred Options Paper and the public consultation.
- A **Launch and Exhibition** was held in The Burnavon Theatre and Arts Centre in Cookstown on November 7th 2016 to announce the publication of the Preferred Options Paper.

- **Public Meetings and Exhibitions** with drop in sessions were held in the District towns of Dungannon, Cookstown, Magherafelt, Coalisland and Maghera. And in a number of other locations distributed across the Mid Ulster District. Appendix 6 details the locations of all the List of Public Meetings and Exhibitions and summarizes the issues raised at each.
- We also write to **Elected Members** and **MLA's** (Department Ministers and Junior Ministers) providing them with a copy of the Preferred Options Paper.
- We wrote to 1,754 **local community groups** and **section 75 groups** as listed in our Statement of Community Involvement. They were given the opportunity of a meeting with a planning officer to record their views.
- In addition to the public meetings a number of focused meeting were facilitated with local groups and some were held in conjunction with the consultation on the draft community plan. A summary of the comments made at these are contained at Appendix 6.
- Engagement with the 'Consultation Bodies' has been a key part of the consultation on the POP and SA/SEA Interim Report. The responses from the consultation bodies are summarized at Appendix 5 and consideration of the comments is also provided.

Consultation Responses to the Preferred Option Paper

The remainder of this report is structured to reflect the subject areas contained within the POP and in line with the questions contained within each subject. The comments of the various consultation bodies are summarized generally as are the public responses and then the planning consideration and recommendations are provided.

In total 657 written representations were received within the 12 week consultation period. The issues raised within them are summarised at Appendix 7 and they are divided into Plan Strategy representations and Local Policies Plan representations. All written representations have been acknowledged and some have requested meeting and these will be facilitated as we progress with the preparation of the Draft Plan Strategy.

Members attention is also drawn to the fact that we received 29 'late' representations outside of the 12 week consultation period which is set down in legislation as being the maximum period for consultation on the POP. These representations have been recorded as 'late' representations and are summarized at Appendix 9. In addition a number of pot-pop consultation meetings were requested and facilitated by planning officers and the general detail of these are contained within the 'late' representation section.

Plan Vision and Objectives

Q. Do you agree with the vision and plan objectives set out?

Consultation Bodies Response

All adjoining Councils note the Plan objectives.

The Department of Infrastructure (DfI) support the suggested plan objectives however suggest that MUDC should consider developing a vision that is locally distinct. DfI Planning highlight the need to ensure that the objectives support the achievement of the vision of our LDP and are integrated with regional policy and guidance and advise that they should be capable of being delivered, measured and monitored; and should be supported by the preferred options set out within the POP. The test of soundness is highlighted by DfI in the context that that a plan should set out a coherent strategy from which its policies / allocations logically flow.

DfI: Transport (Western Division) advise that growth should be targeted where the infrastructure is in place or planned. DfI: Water and Drainage state that the LDP should include a commitment to adhere to the principles of Sustainable Water- A Long Term Water Strategy (2015-2040) and that wastewater treatment capacity should be a key consideration when zoning land for development. DfC Historic Environment Division wish to see specific reference to the built environment within the objectives.

The Natural Heritage Division (NED- DAERA) raise concern regarding the objective to accommodate growth within the countryside proportionate to the extent of existing rural communities.

Northern Ireland Housing Executive (NIHE) would like to see two new objectives included; one relating to the reduction of poverty, inequality and deprivation and the other relating to the improvement of health and well-being.

Consultation body responses from those representing the renewables sector are generally supportive of the plan objectives in respect of renewable energy and climate change. They have however raised some concern regarding the link between the objectives and the approach to dealing with renewables in terms of constraints. The Renewables Infrastructure Group (TRIG) raised concern that the link between tackling climate change through enhanced use of renewables has not been acknowledged.

Most of the consultees were in general agreement with the objectives with only minor changes suggested in relation to specific wording.

Response from the Public

In the main there is significant support for the plan objectives with 19 representations supporting either a particular plan objective or the objectives overall. Three representations supported the objective to provide 11,000 new homes. Five representations agree with the objective to build Cookstown, Dungannon and

Magherafelt as the economic / transportation hubs and as the main service centres (objective 1). However one respondent queries how objective 1 can be delivered in view of the HGI allocation which appears to favor rural areas. The Royal Society for the Protection of Birds (RSPB) have stated that the objectives need to be reassessed to ensure that they relate to the Local Development Plans (LDP) actual function and remit otherwise the purpose of the LDP is compromised and flawed.

A total of 6 representations supported the objectives to consolidate the role of local towns/ villages and to accommodate sustainable growth in the countryside. Three representations, including one from the NI Renewables Industry Group, welcome the positive environmental objective to reduce vulnerability to climate change and two of these state that this should be reflected more in the role of renewable energy.

Three representations supported the objective to facilitate the creation of 8,500 new jobs by 2030. However they state that these objectives should focus more on facilitating and supporting growth and development of the industrial sector, particularly in construction and manufacturing and that more emphasis should be placed on facilitating mineral development given the prevalence these industries in the Mid Ulster District. Dalradian Gold Ltd state that as the POP recognises the dependence on minerals for employment in the Mid Ulster District, more should be done to facilitate minerals development. One representation, from Ross Planning Consultants, suggests that the creation of jobs and wealth should be the top priority for the plan. An individual representation welcomed the objective which recognises the importance of self-employment and home working particularly in the rural areas.

An individual representation welcomed the objective to recognise the needs of both growing families, carers of the elderly and disabled by accommodating development which allows people to remain in their own communities (objective 5). However three representations considered that there was insufficient evidence to support inclusion of such an objective.

The public have generally welcomed the plan objectives with only minor changes suggested in relation to specific wording. Feedback from the public meetings / exhibitions was largely positive. The general consensus from such meetings was that the Preferred Options Paper was 'common sense' and that the approaches within it tailors policies to the local community and the rural area.

Consideration

The role and function of the LDP for Mid Ulster is to provide a 15 year plan framework to support the economic and social needs of the District in line with regional strategies and policies, while providing for the delivery of sustainable development. The POP has identified numerous objectives to achieve this and these have been clearly categorised into social themes- accommodating people and creating places; economic themes- creating jobs and promoting prosperity; and environmental themes- enhancing the environment and improving infrastructure.

The suggested LDP vision shares the vision of the Regional Development Strategy

(RDS) and the Community Plan. It is considered that the vision could be tailored and expanded further to reflect the spatial objectives and growth strategy so that it complements the Community Plan but is distinct as an LDP vision, and in doing so addresses the comments made by DFI. We propose that the vision could be tailored to recognize the strengths of the Mid Ulster District in terms of being a strong, dynamic business base and as a place rich in natural and built heritage. We welcome that DFI are supportive of the plan objectives and note advice that we may wish to expand upon these objectives to ensure they can be measured / monitored. We intend to do this in the Plan Strategy (PS) by providing objective outcomes. It is intended to introduce a section within the PS to show how the LDP will address and work to achieve the outcomes of the NI Program for Government (PfG).

In terms of targeting growth where infrastructure is in place or planned the first plan objective, accommodating people and creating places, aims to build Cookstown, Dungannon and Magherafelt as economic and transportation hubs and as the main service centres. So whilst the advice of DFI is noted it is contended that the Plan is seeking to do exactly this. It is also worth noting that wastewater treatment capacity has been considered for all settlements in the district as part of the resource test.

Regarding comments from HED, the LDP aims to accommodate sustainable growth within the countryside. We will make minor changes to the proposed objectives wording to ensure the meaning of all objectives are clear. In general, the objectives aim to improve the health and well-being of communities and reduce inequality. Such matters were identified as key issues in the Growth Strategy and Spatial Framework of the POP and are reflective of the strategic outcomes of the Community Plan. The plan objective to 'encourage energy efficiencies and promote use of renewable energy' could be extended to include the linkage to tackling climate change.

We welcome the significant support received for the plan objectives. Regarding the delivery of objective 1, we have reviewed the housing monitor figures for the three hubs. In Magherafelt, Cookstown and Dungannon there is adequate provision by way of unimplemented approvals and zonings to accommodate 54% of the required housing need of 11,000. This large percentage of housing will ensure that the population grows in the hubs and cluster of hubs as per SPG 12 of the RDS.

We are aware of the high numbers employed in the manufacturing industry in the district. This had been identified as a key issue in the Growth Strategy and Spatial Framework in the POP. We also recognise the strong entrepreneurial spirit in Mid Ulster which has a higher proportion of people in self-employment than in Northern Ireland generally. Given Mid Ulster's sectoral strengths particularly in manufacturing, quarrying and the agri-food business the LDP has important role to ensure that adequate lands are provided for such economic purposes. This ties in with the action outlined in the Community Plan to ensure the LDP provides for urban and rural business growth, and industrial and employment sites at key strategic growth locations. However the POP also highlights that it is not anticipated that the manufacturing sector will grow in the coming years and this means that the Plan will need to support the growth of office based / IT type jobs to supplement any decline in the traditional employment generating industries in Mid Ulster. Therefore the Plan

promotes diversity in the range of jobs recognising the importance of employment in the primary, secondary and tertiary sectors. The POP has suggested more flexible policy regarding economic development in the countryside which would allow provision for small workshop accommodation and suggest the inclusion of Rural Industrial Policy Areas.

In relation to objective 5, accommodating development for a carer or someone availing of care, the POP has identified that 10.9% of people in Mid Ulster provide unpaid care to family, friends, neighbours or others. This coupled with figures for those living with a limiting long term illness (19.3% in 2011) in Mid Ulster and the fact that many dwellers are in excess of 50 minutes from an A&E hospital underpins the reason for this objectives inclusion in the LDP. Indeed these figures are further borne out in the Community Plan.

Sustainable development is at the heart of the RDS which aims 'to meet the needs of the present without compromising the ability of future generations to meet their own needs.' The RDS recognises that our society and economies are completely dependent on the environment which encompasses them and are therefore bound to its limits and capabilities. Therefore the Mid Ulster POP has endeavored to ensure that there is a balance between social, economic and environmental matters. In order to try and facilitate minerals development, a number of Mineral Reserve Policy Areas have been identified. Further work is necessary in relation to minerals and in particular on areas of constraint. In relation to the balance in other aspect it is considered that the POP has put forward options to protect our most vulnerable environments such as the Special Countryside Area at the Loughshore as well as Areas of Constraint on High Structures in parts of the Sperrins which is balanced with a more flexible approach to policy on the provision of small workshops in the countryside and from a social aspect the option for carers to avail of a house within the curtilage of those giving or availing of care.

Recommendation:

- **Council to expand and tailor the suggested vision to recognise the strengths and opportunities in the Mid Ulster District and emphasise the LDP's role in the protection of our most vulnerable landscapes.**
- **Council to expand upon suggested objectives to ensure clear linkage to the preferred approaches. Objectives to be augmented so they can be measured / monitored by providing outcomes and link to PFG outcomes to be included.**

Implementation of Recommendation(s)

The LDP Spatial Vision has been expanded to include the fact that we are a key industrial centre with our main strengths being in the manufacturing and agri-food sector as well as a thriving entrepreneurial spirit. We also emphasise the essentiality of utilising our considerable mineral resources whilst protecting our beautiful mountainous landscapes and peatlands from development which, if permitted, would

erode their character, heritage and scientific importance. Likewise we will protect our internationally important wetlands of Lough Neagh and Lough Beg.

The draft Strategy will include a monitoring section which will outline how we will monitor the performance of the Plan Strategy in achieving its objectives. The draft Plan now includes an expanded Spatial Planning Framework and it is the SPF's that have been expanded on rather than the objectives.

Spatial framework

Q. Do you agree with the spatial framework and the strategic planning guidelines (SPG's) set out?

Consultation Bodies Response

DfI welcomes that the Spatial Framework is based upon building hubs and clusters of hubs and highlight that consultation with neighbouring councils is vital to ensure plan proposals do not conflict with those of neighbouring councils. DfI agrees that small towns/settlements and the countryside should be supported and the level of provision they provide to their populations and rural hinterlands sustained. Regarding economic growth, DfI state that hubs/clusters of hubs are best placed to benefit and that the entire district, including rural areas will benefit from thriving hub towns. Adjoining councils have stated they note the spatial framework and SPG's. DfI highlight that there is no provision within the SPPS for the designation of DRCs therefore the council should be satisfied that such designations are based on robust evidence base and considered in combination with other policy proposals.

DAERA Natural Environment Division welcome the concept of identifying vulnerable landscapes (SPG 10) and state that SPG 8 should include reference to walking/cycling.

NIHE state the Spatial framework should ensure an integrated approach to considering the location of housing, economic uses, community facilities and services (approach set out in PfG). NIHE would like to see a sequential approach to development set out within the Spatial framework part of the plan. Regarding the restriction of allowing up to 6 houses in small settlements NIHE are of the opinion that this should be removed to allow flexibility to cater for affordable housing need or where further growth of a settlement can be considered appropriate. NIHE state that designating DRCs (SPG 7) challenge the provision of sustainable development, could undermine the ability of small settlements and villages to grow, and are not provided for by regional policy.

TRIG- Lendrums Bridge Wind Farm consider there to be an absence of spatial direction in respect of addressing climate change and in the provision of renewable energy infrastructure. TRIG raised concern that there is a disconnect between the stipulated plan objectives and spatial framework.

Response from the Public

Most representations were in general agreement with the Spatial Framework and SPG's with only minor changes suggested in relation to specific wording.

Four representations have acknowledged and welcomed SPG 4 to 'maintain and consolidate the role of villages'. Three representations considered that a small group of up to 6 houses within small settlements (SPG 5) was too restrictive. Suggestions put forward included allowing up to 10 dwellings. MAG responded suggesting that the objective should be re-worded to allow for 'small groups and groupings of small groups'.

Workspace Ltd stated that the POP did not recognise Draperstown's role as a business and employment hub.

Renewable Energy Solutions (RES) have highlighted concern that there is a disconnect between the plan objectives and the SPG's eg. The objectives include reference to vulnerability to climate change yet there is no reference made to this via a clear SPG.

One representation welcomed the importance attached to the A29 (SPG 9) and stated that the Plan should highlight the urgency of the need for a bypass around Cookstown.

Consideration

MUDC have provided all adjoining councils with a copy of the POP and all relevant accompanying information as per the Planning (LDP) Regulations 2015. MUDC have also initiated the establishment of 3 cross boundary forums to address common issues with adjoining councils concerning Lough Neagh and Lough Beg, the Sperrin's and Cross Border Matters. This engagement has enabled plan proposals to be discussed in detail to ensure that they will not conflict with those of neighbouring councils which is an aspect of the test of plan soundness.

The Council may wish to extend the Spatial Framework to clearly demonstrate the importance of having an integrated approach to considering the location of housing, economic uses and community facilities. In terms of housing and retail development, the sequential approach to development has clearly being described in the relevant topic sections in the POP, however it may be beneficial to refer to this more specifically in the Spatial Framework.

The council may wish to reconsider the maximum threshold of small groups of up to 6 houses allowed in small settlements (SPG 5). The reason for this threshold was to retain the character of these rural settlements. However considering the responses above this suggested threshold may be too restrictive. We believe that it may be more appropriate to remove a threshold number of houses and amend the wording to allow for small groups of housing tailored to the needs and character of the settlement. This specific wording will be considered further in the writing of the draft Plan Strategy. It is deemed that this approach would still be effective in ensuring housing layout proposals in small settlements which respect the existing rural setting.

The Mid Ulster District covers an area of 1714 sq.km and some of these areas, in

particular the northwest of the District, are remote. There are three existing Dispersed Rural Communities (DRC's) identified (in the Cookstown and Magherafelt Area Plans) and the POP has sought to support rural regeneration by retaining these DRCs and possibly identify new DRC's. Although not referred to in the SPPS, DRC's are included in the retained policy PPS 21. Removal of the existing DRCs would be to the detriment of the communities they serve. The existing DRCs are very low development pressure areas and the pressure has been mapped to reflect the pressure since the introduction of PPS21 and shows only 12 houses have been approved. This figure is evidence that the existing DRC policy has only resulted in very limited houses being approved in these areas. Therefore we take the view that DRC's will help sustain rural communities and will not undermine the ability of villages / small settlements to grow. We will retain the existing DRCs already designated in the Mid Ulster District for the Plan Strategy. The Plan Strategy will define DRCs and will also set out the criteria for their designation. Any possible new DRC designations will be identified in the LPP.

The POP states that the role of villages as local service centres providing opportunity for housing, employment and leisure activities will be maintained and consolidated (SPG 4). This SPG refers to all villages in the District. A Strategic Settlement Evaluation has been undertaken and for all settlements in the District. This appraised the all the infrastructure (Commercial, Productive, Skills etc) for each settlement and is available to view on the Council's website.

Recommendation:

- **Continue attending the three cross boundary forums established to ensure plan proposals do not conflict with those of neighbouring councils**
- **Extend spatial framework to clearly demonstrate integration of housing, transport and economic land uses**
- **To alter specific wording of SPG 5 so that it removes the 5 number of houses threshold and allows for small groups of housing tailored to the character of the small settlements**
- **Retain SPG 7 to designate DRCs. DRC definition and criteria within which they can be designated to be included in draft Plan Strategy.**

Implementation of Recommendation(s)

Attendance at the cross border forums continues and is ongoing. There have been a number of meetings of the three forums to date and we are working towards a Statement of Common Ground with our neighbouring councils.

The integration of housing has been demonstrated appropriately in the amplification included after the various "SPF"s. For example, SPF 2 explains that when selecting land to be zoned for housing, access to public transport will be a consideration. Likewise, SPF 8 makes clear that accessibility and access to public transport will be a vital considerations when selecting land use zonings.

The reference to the number of houses in SPG 5 has been removed. SPG 5 now refers to "small groups of houses." DRC's continue to be identified through the inclusion of

SPG 7 which also includes a list of criteria which will be used to identify potential DRC's.

Settlement Hierarchy

Q. Do you agree with the proposed settlement hierarchy? Should Tullywiggan become a new settlement?

Consultation Bodies response

There were no specific comments made regarding these questions.

Response from the public:

One representation from C McIlvar Planning consultancy suggests that a four- tier settlement hierarchy consisting of towns, local towns, villages and small settlements should be created. This representation states that many of the larger villages are acting as important service centres with employment opportunities and quantum of housing over and above that provided by other villages and should be repositioned as local towns. Suggested villages to be reclassified as local towns include: Draperstown, Moneymore, Pomeroy, Stewartstown, the Moy and Ballygawley. This representation states that the MUDC area is unique in NI as it has a high rural population resulting in larger villages servicing rural hinterlands thereby performing roles over and above smaller villages. A representation by Workspace Ltd also stated that Draperstown should be reclassified as a local town as due to its significant role as a business, community and service centre. Workspace Ltd state that although Draperstown has a population much lower than Coalisland and Maghera its level of infrastructure is more akin to that found in towns.

Individual representations received stated that Ballynakilly should remain a village; that Creagh should be re-classified as a village and support for the re-positioning of Killeen from a village to a small settlement. Two representations welcomed the re-classification of Clady to a village instead of a small settlement.

One representation requested that the Edencrannon area (beside Tullyallen) be considered as a small settlement given the existing road infrastructure, number of businesses and housing, available public sewer facilities and footpath links/ bus stop and street lighting.

Five representations were opposed to Cappagh being re-positioned from a village to a small settlement. The Cappagh Village Regeneration Group stated that this would adversely impact future sustainable growth, investment / development opportunities and would further compound deprivation in the area by making it even more difficult to access services.

The Architecture and Built Environment Ministerial Advisory Group (MAG) disagree with the proposal that Tullywiggan should become a new settlement. They also disagreed that urban villages should be identified. MAG state that there is no evidence

that urban village designations protect unique identity and that they would be better protected through Conservation Area / Area of Townscape Character Designations.

A significant number of representations were received regarding the Washingbay Area (includes Aghamullan, Derrytresk, Derryloughan and Killeen). In total 335 such representations were received, in a pro-forma style letter, which states that this area requires more development opportunities for single and groups / clusters of low density housing. The Cookstown and Western Shore Area Network (CWSAN-community umbrella organisation) stated that Aghamullan was suggested as a village during the last area plan production process however this was later overturned as local people feared the character of the area would be irreversibly changed. However CWSAN state that for many opinions have since changed by the lack of housing opportunities in the area and there is now a recognition that some sort of settlement status is needed for this general area. CSWAN suggest that Aghamullan has a good level of existing services / infrastructure to enable its designation as a village. They also suggest that settlement status should also be designated to Derrytresk and Derryloughan.

However 46 responses were also received which object to Aghamullan becoming a village settlement. These representations are concerned that Aghamullan does not have an adequate level of services to warrant a village designation and highlight that there is no public sewage system; that market forces may prevent locals from attaining future houses anyhow and raise concern regarding erosion of the existing rural character.

Consideration

We recognise there is great variance regarding the sizes and function (population no. households no, level of services/infrastructure) of villages within the District. And note the request to introduce a four tier settlement hierarchy however the designation of several new (local) towns will have implications in terms of zonings and expenditure (investment and social infrastructure by Council/Government bodies). Lands are zoned for housing and industry in towns, land is not normally zoned for such uses in villages. A Strategic Settlement Evaluation was undertaken for all settlements within the District (Position Paper 12). Taking into account the level of service provision, the potential for employment in the settlement, population size, and spatial guidance of the RDS, the Council view that Draperstown, Moneymore, Pomeroy, Stewartstown and the Moy warranted confirmation as villages. However we recognise the role of certain villages, such as Draperstown, as important employment centres. Therefore as an alternative to re-classifying them particular attention will be given to their economic development potential as certain villages will be better suited to larger scale economic development. These villages will be identified and the scale of the economic development will be addressed in the LPP. We consider that the existing towns in the Mid Ulster District; Cookstown, Dungannon, Coalisland, Magherafelt and Maghera are in terms of location well distributed across the District area.

The Strategic Settlement evaluation concluded that Ballygawley did not warrant being designated as a town. However given the strategic location, opportunities it holds in

terms of being a major road junction (accessibility/connectivity) and the existing Park and Ride Scheme available, Council considered it logical to designate Ballygawley as a growth node and therefore asked the public if it should be re-classified as a town. However only one respondent stated that it should be designated as a town. Given the absence of public support or support from the consultation bodies we deemed Ballygawley should remain as a village.

The settlement evaluation paper concluded that Creagh warranted designation as small settlement. However taking account of the responses received from the public regarding its classification we considered it could be designated as a village. The recent dismissal of the legal challenge to the Castledawson to Toome section of the A6 Dualling Scheme, in March 2017, and subsequent recent appeal, will have a bearing upon the settlement of Creagh. The scheme alignment plan shows that the new A6 road will be located much further northwards than the existing A6 road which is almost immediately north of Creagh Development limit. There is a considerable amount of existing development between the old and proposed new roads which is currently outwith the development limit of Creagh. Given the location of the new road it may be reasonable to extend the development limit to include this existing development within the limit. This issue will be addressed in the LPP. Therefore Creagh settlement may grow in size and given the existing significant level of economic / industrial businesses located here we deem it appropriate to classify Creagh as a village.

The settlement evaluation paper also concluded that Ballynakilly warranted designation as a small settlement. Ballynakilly is limited in terms of resources; it has an orange hall and a local mission hall. It has businesses located within the settlement limit including a bathroom / tile showroom and a car repair workshop. However there are two employment bases, located almost immediately north of the settlement. This includes the McAvoy Group and Quinnfresh grocery supplies. Given the proximity of these businesses to the settlement and their likely associated impact in terms of employment and housing, we consider it appropriate that Ballynakilly is classified as a village.

We have also carried out a strategic settlement evaluation on Edencrannon. The Edencrannon area consists of a filling station, pub and restaurant, funeral director business and approximately 14 houses. This evaluation concluded that although there is considerable development within the Edencrannon area, given its proximity to Tullyallen which is an existing designated settlement to the immediate north, it would not be appropriate to designate another separate settlement in this area which is predominately rural in character. The Planning Department deem that the Edencrannon area could be designated as a separate development cluster of Tullyallen i.e. the settlement of Tullyallen would comprise two separate clusters of development. This would be akin to the nearby Aghaginduff / Cabragh village which is 2km to the west and comprises of separate settlement clusters. It is proposed that this settlement could be re-named Tullyallen / Edencrannon for the purpose of the LDP.

The Strategic Settlement Evaluation previously undertaken recommended that

Cappagh warranted designation as a small settlement. Council members and council officials agreed at the 'Settlements and Dispersed Rural Communities Workshop, held in April 2015, that Cappagh could fall into the classification category of either a small settlement or village. Although very limited in terms of services, there is a large quarry plant manufacturing business located within the existing settlement limit. Considering that there is a large scale employment base within the settlement and public support for Cappagh to remain as a village, we consider it appropriate to classify Cappagh as a village.

In response to the large number of representations received regarding the Washingbay Area, the Planning Department have recently carried out a strategic settlement evaluation on the Aughamullan, Derryloughan and Derrytresk areas. Taking into account the spatial guidance of the RDS, number of existing households and the existing service provision the we consider that Aughamullan should be designated as small settlement. We consider that Derryloughan does not warrant being designated as a settlement. However given its proximity to Aughamullen it could be designated as a separate development cluster of Aughamullen i.e the settlement of Aughamullen would comprise of two separate clusters of development. It is proposed that this settlement could be named Aughamullen / Derryloughan (see appendix 4). It should be noted that the village of Brockagh / Mountjoy is located approximately 2 miles north of Aughamullan.

Having evaluated the Derrytresk area we consider that it could be identified as a small settlement. There is an existing Church, primary school and approximately 6 dwellings located at a T-junction on the Reenadeery Road. Derrytresk community centre / GAA pitch is located to the west along the Annaghmore Road. This area has a high rural population and it is considered a sustainable location to allow future development given the existing services available here. This area is also almost completely surrounded by bog land which severely impedes where development can take place. For those reasons we consider it rational that Derrytresk be identified as a small settlement. In order to ensure protection of bog lands the POP included a specific policy to address this; Policy MIN 1.

Although a representation from MAG disagreed that Tullywiggan should become a settlement, taking account the strategic settlement evaluation we consider Tullywiggan should be identified as a new settlement. Considering there is no support from either the consultation bodies or the public we will not identify urban villages, therefore Moygashel retains its current status as falling within the development limit of Dungannon town.

Recommendation:

- **Confirm a three- tier settlement hierarchy**
- **Ballygawley is to remain designated as a village**
- **Creagh and Ballynakilly are to be designated villages**
- **Aughamullen / Derryloughan and Derrytresk are to be designated small**

settlements

- Tullyallen settlement to be expanded to include Edencrannon and be re-named: Tullyallen / Edencrannon for the purpose of the LDP.
- Cappagh is to remain designated as a village
- Tullywiggan is to be identified as a new small settlement
- Complete an addendum paper to the Strategic Settlement Evaluation Paper to include findings of Aughmullen / Derryloughan and Derrytresk and reconsideration of settlements listed above.

Implementation of Recommendation(s)

The three tier settlement hierarchy has been brought forward, with Towns and Local Towns combining to form one tier. The remainder of the recommendations regarding the settlement hierarchy have been implemented and an addendum papers has been drafted in respect of the new designated small settlements.

Housing allocations and Zoning

Q. Should housing be allocated based on an equitable split of growing the hubs, consolidating the towns and villages while ensuring the rural area gets an equitable share?

What the Consultation Bodies said.

DfI view that the preferred option of an equitable split housing allocation fails to support the objective of growing the population in the hubs/ clusters of hubs as set out in the Regional Development Strategy (RDS). They state that it also fails to support the Councils own SPG 2 which is to focus growth on the three main hubs and strengthen their roles as residential centres. DfI acknowledge the need to make appropriate provision for residential development within the countryside, however raise concern that the preferred allocation of 40% of the HGI to rural areas fails to support strategic guidance (RG8 of the RDS) which seeks to manage housing growth to achieve sustainable patterns of residential development. In terms of allocation to villages / small settlements, DfI query why they receive 33% of the HGI when the evidence provided suggests that there is potential for further growth in the majority of these settlements. DfI question whether the Council has considered an option that these settlements could accommodate rural housing growth without the proposed deviation from regional policy and guidance. Regarding tests of Plan soundness DfI highlight that the Plan must present a coherent strategy from which its policies and allocations flow. They consider that the equitable split housing allocation option fails to align with / support the Spatial Framework or SPGs set out in the POP and will encourage a dispersed pattern of development in the countryside which is not a sustainable pattern of development. DfI: Transport state that housing allocation sections fails to consider

transport accessibility. DfI state that it is not evident whether this approach can be adequately supported by the required infrastructure and justified by the Sustainability Appraisal. Concern has also been raised that there is insufficient evidence provided to support the equitable split option. DfI highlight that the ability to demonstrate alignment with regional policy is a key element of the evidence required to demonstrate the consistency test of plan soundness including that the Council has taken account of the RDS.

NIHE disagree with the preferred equitable split option. NIHE state that focusing development of housing within hubs aligns with strategic RDS policy and that the housing allocation to the rural area should be limited. Reasons for this view include more sustainable transport /travel patterns, promotion of connectivity, sustains commercial / community facilities and a better connection between people and economic opportunities / health/ support services. The Housing Executive are of the opinion that rural housing, where needed, should be directed towards small settlements and villages. NIHE state that there are both environmental and social drawbacks to having dispersed rural development as this will increase reliance on septic tanks, increase reliance on the car and can increase isolation. NIHE advocate support for option 3-Urban Drive to the main towns as opposed to the preferred equitable split option.

The Natural Heritage Division (NED) have raised concern regarding the preferred option for housing allocation stating that widespread development in the rural area is not sustainable and would not be in general conformity with the RDS. NED are concerned that the equitable split option would create negative impacts for biodiversity and water quality and state that policy safeguards would be needed for this option. NED advocate support for option 2-Based on the 60% target of all new housing being located within brownfield sites within the urban footprint.

The Historic Environment Division (HED) highlighted concern that the equitable split option allowing 40% housing allocation to the rural area will potentially have significant impact on the rural historic landscape and potentially on historic assets located within it.

Response from the Public.

In general, comments were mixed regarding the preferred equitable split housing allocation option. With regard the housing allocation four representations considered the HGI figure of 10,950 dwellings for the plan period to be too low. One of these representations, from Clyde Shanks Planning Consultancy, considered the HGI to be a pessimistic underestimation and suggested that it should be increased by 10-20% to accommodate reasonable growth. Two responses state that the HGI's do not take into account local demand for housing. A small number disagree with the 'implied' reference in the POP that housing numbers cannot be delivered above the HGI indicative thresholds, stating that HGI's are not actual ceiling figures but indicators.

Ten representations, mainly from architectural / planning consultants, the RSPB and MAG, disagreed with the preferred option citing that it was an unsustainable

development option which contravenes the POP's first objective to build the main hubs and the objectives of the RDS. These representations commented that housing allocation options 2 and 3 which allowed more housing for the main towns (47% and 60% respectively) would be more consistent with the POP's wider objectives.

All three housing allocation options suggested in the POP allowed for 33% to go to the settlements (this includes Coalisland, Maghera, all villages and all small settlements). A number of representations stated this allocation tends to penalise villages / settlements that have well established facilities such as schools, shopping /community facilities and that are attractive and popular residential locations.

A small number of responses suggested that villages / small settlements should have a greater allocation than 33% which may enable those who don't meet the tests of the rural policy to still live in a rural setting where they have ties to the area. Three have commented that rural housing should be focused on (village / small) settlements rather than dotted around the countryside thereby taking the pressure of sensitive rural landscapes. Five responses suggested that 40% should be allocated to villages / small settlements at the expense of rural housing to allow such settlements be consolidated and sustained as per the POP's plan objectives.

A significant number of respondents, referring specifically to the Washingbay area, considered the preferred housing allocation was out of sync with the high rural population figures in this area.

Appendix 2 in the POP tabled the housing allocation for towns, villages and small settlements and need for additional housing land based on the preferred equitable split housing allocation. Several representations did not support that there was no need for additional housing in Dungannon based on the towns committed units still to be developed and current residual zonings.

One representation stated that the potential housing growth may be based on a statistical 'fair share', the allocations in Appendix 2 result in a disproportionate allocation to smaller settlements. Objections to no need for additional housing in the following settlements were also raised: Draperstown, Ballinderry, Churchtown, The Woods, Desertmartin, Galbally, The Moy, Benburb and Gulladuff.

A comment from Marald Prime Ltd stated that history has demonstrated that generous zonings has not resulted in an over-supply of housing or undue urban sprawl, it provides reasonable choice of locations and can help ensure that house prices remain competitive and affordable.

There were 5 responses to the query whether existing land zoned for housing should be time limited, allowing for re-zoning if not acted on or replaced by alternative land for housing. However 4 of the 5 responses against lands being time limited were from Turley's planning consultancy. One support representation stated that this was an appropriate solution and that if phase 1 housing zonings are retained there would be a risk to the provision of housing over the plan period. Colm Donaghy Architects stated that the lack of commitment to develop phase 1 lands put potential developers of phase 2 lands at a distinct disadvantage especially those with small holdings that

would not prejudice any comprehensive development objectives. One representation disagreed stating the view that lands which have the benefit of planning permission should not be de-zoned as the planning permission may have been obtained at a considerable expense to the owner.

A small number of representations queried the figures in Appendix 2 of the POP, stating that the number of committed units still to be developed and residual zoning (at 2015) in various settlements are over optimistic and incorrect.

Consideration

The HGI's are provided by the Department of Infrastructure as per direction in the RDS. They are guidance figures rather than a cap on housing development in the area or a target to be achieved.

We have endeavored to accommodate housing across the district in line with the growth strategy and taking into account the objectives of the RDS to grow the hubs and sustain the smaller towns, villages and the countryside. The preferred equitable split option allows for a balance of growth across the settlement hierarchy including the countryside thereby meeting the objectives of the RDS.

The proposed minimum 27% share of housing allocation for the hubs appears low in comparison to that for the other settlements and countryside. However we calculated the committed units still to be developed and residential zonings in the hubs, these figures were recently reviewed following a query regarding the figures presented for the Rock in the POP. As a result all settlements were reviewed and the updated figures are included at Appendix 8. These figures show that the hubs have adequate provision by way of unimplemented planning approvals and zonings totaling 5,908 units. This equates to 54% of the required housing need over the plan period. Therefore exclusive of the proposed 27% housing allocation, the current situation in Mid Ulster would allow for a majority of housing to be located within the hubs. As such, these existing circumstances in Mid Ulster would enable the LDP to reach its objective to build the hubs and therefore take account of the objectives of the RDS also and would take the allocation in the hubs close to the 60% mark referenced in the RDS, albeit not on brownfield land.

The Council has suggested allocating 33% of housing to the other settlements to ensure that they are protected and consolidated. Under this preferred option the rural area would get the remaining share with a maximum of 40% of the HGI allocation which equates to 4,270 dwellings over the plan period. Looking at the current approval rates (2012-2014) in the rural area (based on current policy in PPS21 and the SPPS) and assuming they remain constant, and extrapolating this over the plan period the rural area housing would equate to 34% of the HGI without the introduction of any variation of the planning policy in a new LDP. This 34% is based on an economy in the midst of a down turn and therefore when the economic situation see growth we wish to allow for some growth in the countryside to a maximum of 40%. This translates into a maximum of 47 additional houses per year over the period of the LDP. In the context of a HGI figure which is not a cap and in a rural district the size of Mid Ulster

this is not considered to be a significant difference from the current situation under central government planning policy and is considered justified in a Council where we wish to plan for vital and vibrant rural communities. We regards the proposed alterations to rural policy as discussed later in this paper and its likely outcome in terms of additional rural houses over the plan period to be very minor. Therefore this suggested allocation would take account of the RDS objective SFG 13 to sustain rural communities living in the open countryside. Given the size of the Mid Ulster District, 1714sqkm, we are satisfied that such additional housing can be supported by existing infrastructure.

We also wish to highlight the importance of monitoring in the LDP production process. Under the Planning (LDP) Regulations (NI) 2015 the Council must complete an annual housing land monitoring report. This report will specify the amount of housing land, the number of housing completions and any other relevant information regarding the implementation of the LDP. Therefore the Council will have up-to date information and will be able to examine if the minimum 27% of the HGI allocation is being attained in the main towns. The Council also have to undertake a review of the LDP every 5 years. If this review concludes that the 40% HGI allocation to the rural area is close to being exceeded or that the 27% to the main towns is a lot lower than desired the council can use the review process to alter the policy for rural housing or release further (phase 2) lands in the main towns. This Plan, Monitor and Manage approach will ensure that the LDP remains sustainable and balanced.

The equitable split housing allocation option has been evaluated in the Sustainability Appraisal. This approach was found to have no major positive or negative social, environmental or economic effects. The SA identified that this approach was likely to have a minor negative effect on environmental objectives in terms of improving accessibility to key services and the plans objective to maintain and enhance the character and quality of landscapes. The SA also identified that there would be minor positive social impacts through the provision of homes to meet the needs of different groups eg. housing for the elderly, social housing. Minor positive economic effects were highlighted as this allocation option would likely have a positive impact on the construction and industry related employment sectors. However it would not encourage efficient patterns of movement in support of economic growth.

As stated in the POP, a 60% housing allocation to the main towns (Option 2) or 47% (Option 3) would impose greater rural constraint than which has been imposed by the Departments current operational policy under PPS21. Such a scenario would have a detrimental effect on the vitality and viability of the rural community and conversely would mean that the LDP could its own plan objectives to protect rural communities.

Policy safeguards are suggested in both the General Principles Planning Policy and the in the specific subject policies to ensure that any proposed developments in the countryside will respect, protect and / or enhance biodiversity, and landscape character. In order to assure DfI and other consultation bodies it is important to emphasise the role of Plan Monitoring to ensure that if the development rate in the countryside did go beyond the 40% and the hubs went below a minimum of 27%, then the Plan Review at the 5 year mark would be used to review this position.

We wish to provide market certainty and protect housing land supply by retaining existing housing zonings where there is a degree of commitment to its delivery demonstrated by permissions and investment by landowners. We undertaken a full survey of the zoned housing lands to test whether the owners are willing to provide their land for future housing development. This evidence is being used to calculate if there is sufficient housing land supply. The feedback to-date is that 92% of all responses received were positive, see the response table below. The results of this feedback have also been mapped to clearly identify locations where land owners are willing to provide their land for future housing development see Appendix 3 In order to

| SETTLEMENT | NO OF LETTERS ISSUED | RESPONSES RECIEVED | POSITIVE RESPONSES | NEGATIVE RESPONSES | NON COMMITAL |
|--------------|----------------------|--------------------|--------------------|--------------------|--------------|
| COOKSTOWN | 65 | 25 | 24 | 1 | N/A |
| DUNGANNON | 59 | 18 | 16 | 2 | N/A |
| COALISLAND | 64 | 25 | 23 | 2 | N/A |
| MAGHERAFELT | 72 | 23 | 20 | 2 | 1 |
| MAGHERA | 29 | 10 | 10 | 0 | N/A |
| BELLAGHY | 23 | 9 | 9 | 0 | N/A |
| CASTLEDAWSON | 15 | 5 | 3 | 0 | 2 |
| DRAPERSTOWN | 18 | 12 | 12 | 0 | N/A |
| TOBERMORE | 12 | 4 | 3 | 1 | N/A |
| TOTAL | 357 | 131 | 120 | 8 | 3 |

ensure the adequate provision of land to accommodate the housing need over the plan period the Council may consider it appropriate to time- limit existing zoned lands.

Response Table

The reviewed figures demonstrate there is still no housing need in the three main towns and for the majority of settlements in the District. This review has identified that three additional settlements have a housing need namely the Rock, Edendork and Annaghmore.

Recommendation:

- **Retain its preferred equitable split housing allocation approach**
- **Undertake an annual housing land availability monitoring report and a review of the plan every 5 years**
- **Place a time- limit on existing land zoned for housing which allows for de-zoning if not acted upon and replacement with alternative lands for housing.**

Implementation of Recommendations

Following further consideration of consultee advice and in undertaking the SA/SEA we have reviewed our approach to our growth strategy and spatial planning framework. It is considered that economic growth will be supported by and will assist in supporting residential growth. Mid Ulster will require 11,000 new homes by 2030. At present less than 30% of the District's households are located in the three towns. Focusing growth in the three hubs means that opportunities should be provided in the Local Policies Plan for 60% of the districts' Housing Growth Indicator (HGI) to be located within the three towns. This is around double the figure of existing households living in the three towns.

In order to ensure land availability over the plan period at a level not below 30% of the districts HGI, Mid Ulster Council will ensure that additional land is made available over the plan period to meet this provision. In order to facilitate this a phased approach to land release is adopted in this Plan. In relation to the local towns the level of growth in both will be proportionate to the number of households within them in order to consolidate their role and function. Growth in villages and small settlements will be proportionate to the current size.

The recommendation that we undertake an annual housing land availability monitoring report has been carried forward and is included in the monitoring section of the Plan Strategy. Likewise, a commitment to introduce the measure of placing a time limit on zoned housing land has been given. This will be brought forward at the Local Policies Plan stage of the Plan and will be monitored as part of the ongoing plan review.

The Economy- Economic Land Allocation and Zoning

Q. Should economic land be allocated based on each of the towns receiving an equal share? (55-60 Ha. minimum in each town)

Consultation Bodies response:

DfI welcome the equal share approach affirming that it appears to accord with the RDS by focusing the supply of employment land on larger urban centres, thereby capitalising on the development opportunities provided by the combination of people, goods and available infrastructure at these locations. However they have raised concern regarding the potential zoning of industrial lands within easy access of Ballygawley / Castledawson roundabouts. DfI state these options appear to sit outside the equal share option which relates to the provision of economic development land with hub towns and seek clarity whether these matters have been subject to SA. NIHE are also supportive of the equal share allocation option and convey that the integration of land uses (housing / economic lands) is important.

Response from the public:

The majority of respondents were in favour of the preferred equal share economic land allocation. Although in agreement with this option many stated that the suggested quantum of lands were a significant under-estimation of what would be required to

meet future demand over the plan period. Three representations stated that it was logical that economic lands be apportioned pro-rata relative to the population of each of the three towns (Option 3). Several representations stated that they disagreed with the preferred option and that consideration should be given to zoning appropriate amounts of economic lands within villages. Three representations confirm their support for the concept of zoning industrial lands at Ballygawley/Castledawson roundabouts citing that their locations should be exploited for such land uses.

Two representations commented on whether there was a need to introduce new strategic land zonings in the plan strategy to provide an interim supply whilst the LDP is formulated. Invest NI state they are supportive of a variety and choice of sites. However they state it would be helpful if evidence was detailed to support a possible proposal to provide an interim supply of industrial land. Invest NI state that a parallel industrial zoning process may be nugatory. The RSPB query the reasoning of introducing new strategic land zonings in the Plan Strategy to provide an interim supply stating that such actions could prejudice the LDP process including associated HRA or SEA's.

Three representations stated that there was justifiable grounds to de-zone in order to ensure an ample supply of suitable land available to meet economic needs within the District as per the SPPS direction. Invest NI responded highlighting the importance of providing a choice and variety of sites to respond to the changing nature of business and industry. However they also state that de-zoning may have a negative impact on industrial land values in cases where the owner and purchaser can't agree on a value. This may deter landowners to release / develop land due to reduced economic viability. Invest NI also state industrial lands may not have progressed due to wider prevailing economic conditions or therefore de-zoning is a debatable issue. They state that unimplemented zoned land may be reflective of site specific characteristics e.g. land owner issues, topography and access issues.

Consideration

We welcome that DfI, NIHE and the majority of the public are supportive of the preferred equal share approach to economic land allocation. Regarding quantum, calculations resulted that 170 hectares are required over the plan period (see POP page 26). This was working on the assumption that all new jobs will be on zoned land which will not be the case. However this would ensure a degree of flexibility allowing the plan to provide a choice of sites at different locations and of different sizes to encourage economic growth.

Lands are not normally zoned for economic / industrial use in villages. The POP has put forward policies ECON 1 & 2, which would permit economic developments which are of an appropriate scale, nature and design in villages but also allow for small economic developments at the edge of villages / small settlements. This is considered to be the appropriate approach in villages and small settlements in the district.

We note the three representations who support for the zoning of industrial lands at key interchanges; Ballygawley / Castledawson Roundabouts. As discussed in the

previous section only one representation advocated support for Ballygawley to be classified as a town. Given the few responses to such suggested major planning matters we are of the opinion that industrial lands should not be zoned at key interchanges. The existing settlement limit at Ballygawley runs adjacent to both the A4 and A5 roads. There is a considerable amount of white-land within it which remains undeveloped. Some of these lands are within the I200 surface water floodplain (see position paper 12). However these lands could be drained and therefore possibly used for business / industrial use (subject to complying with all relevant planning policies). Therefore we consider that new economic land zonings are not required at this location. With reference to the DFI comments, if we were to zone economic lands at the key interchanges the chosen sites would be subject to the SA process.

The Planning Department have collaborated with the Business and Communities Department of the Council regarding availability of economic land supply in the District. This engagement has raised issues that provision of serviced sites for economic development is deficient in Dungannon and Granville and their knowledge and experience is that additional land is needed to soon to ensure that business does not leak out of MUDC to other areas. Indeed the Business and Communities Department are of the view that a recent INI survey yet to be released will show that demand for economic land at Granville is at a point where further land is needed in the short term to ensure that needs are met and that the economy continues to be supported in line with our plan objectives. We have also undertaken a recent survey of the existing industrial land in Cookstown to understand what has been developed and the amount of land that remains. This survey concluded that there is still 48 hectares of existing zoned industrial still lands available in Cookstown (these lands have no commitments in terms of planning permissions granted). It is deemed that this will be adequate to meet the industrial requirements of the town.

Given that the LPP is time-tabled not to be published until Winter 2018/19 and the evident deficiency of serviced sites in Dungannon and Granville, we wish to introduce an interim supply in the Plan Strategy. This would ensure that there is an ample supply of suitable land available to meet the economic development needs within the plan area. Any proposed new land zonings are likely to be located adjacent to / within the immediate vicinity of existing zoned industrial lands and will be subject to the Sustainability Appraisal (including SEA) and HRA.

In order to take stock of the existing situation the we also wrote to owners of zoned industrial lands which have not been developed or do not have any commitments in terms of planning permissions granted. This survey was to ascertain if they intended to develop the site and the likely time-frame within which they were likely to do so. The responses received will inform the evidence base for the LDP. Feedback to date is that 62% of all replies were positive. The results of this feedback have also been mapped to clearly identify locations where land owners are willingly to provide their land for future industrial / economic development - see Appendix 3

LDP's provide a 15 year plan framework. Although the wider economic conditions may be a factor, this may be limited to short-term durations and is unlikely to be an issue for the entire lifespan of the new Plan. The Council may wish to consider de-

zoning sites which have not progressed. This may prevent a shortfall of industrial lands from arising and ensure the LDP will offer a range and choice of sites in terms of size and location to promote flexibility and provide for the varying needs of economic activity.

Recommendation:

- **Retain its preferred approach for an equal share of economic development lands between the towns**
- **Introduce an interim supply of new strategic economic development land zonings in the Plan Strategy**
- **Place a time- limit on existing lands zoned for industry and business which allows for de-zoning if not acted upon and replacement with alternative lands for such uses.**

Implementation of Recommendation(s)

The draft Plan Strategy shows economic land being shared out equally with approximately 55-60 hectares of land zoned in each of the three main towns. The majority of this will be zoned at LPP stage. Economic sites at Granville will be zoned in the draft Plan Strategy in order to address an identified need for economic land to serve Dungannon.

The Council will look at unimplemented industrial zonings and explore the reasons why not development has occurred. As a consequence the Council may dezone industrial land and remove them from the settlement limit at LPP.

Transportation and Connectivity

Q. Should MID Ulster Council encourage a roads based approach balanced against long term encouragement of more sustainable modes of transport? Are there any locations available for additional Park and Ride schemes or other sustainable forms of transport?

Consultation bodies response:

DFI Planning state that the RDS focuses attention on how to reduce dependence on the car and change travel behaviour. They state that the Councils approach should be set within the policy and guidance framework established by the SPPS and the RDS. Whilst options may be tailored to take account of local circumstances, approaches that are clearly contrary to the regional strategic objectives of the SPPS (to reduce the need for motorised transport, encourage active travel and travel by public transport) are not to be regarded as realistic options. NIHE consider that this is a balanced approach, stating they strongly support a focus on sustainable forms of transport but highlight it's important to acknowledge the current reliance on the private car for rural communities.

Response from the public:

A representation from Workspace Ltd stated that they agreed with this preferred option. They welcome the Councils thinking regarding the rural parts of the district and that the use park and ride facilities will be encouraged. The RSPB state that the main thrust should be to support measures to improve transport sustainability to reduce carbon dioxide and other greenhouse gas emissions. They state that walking and cycling should be promoted. MAG have stated their disagreement with the Councils preferred approach to focus on roads and more sustainable modes of transport. One representation stated that the LDP can improve transportation and connectivity and that there was scope to liaise with other Councils to review connectivity between neighbouring areas. This representation identified connectivity with Omagh town as being of importance.

Consideration

As identified in the POP a significant proportion of the Mid Ulster population live outside the main hubs. The strategic settlement evaluation position paper highlighted that many villages and small settlements in the District, in particular those that are located furthest away from the main hubs, have very limited public transport provision to/ from the hubs. Therefore reliance on the private car will continue in the Mid Ulster District. The Transportation position paper identified that only 1.86% (NISRA 2015) of residents in the district who were employed used public transport to get to work. This figure clearly highlights the fact that public transport within the district is a seriously underutilised mode of transport. A representation to the POP from Translink (ref: MUPOP/257) stated that they would welcome consultation early and often in the LDP production process so that local planners can fully understand the constraints under which Translink provide services within the current public service agreement they hold with DFI. We will be meeting with Translink in due course to discuss this and further discuss our strategic approach to transportation and connectivity. Although DFI Planning consider that approaches that are contrary to the regional strategic objectives of the SPPS should not be regarded as realistic options, we consider the reduction of dependence on the car in the Mid Ulster District is not a realistic option. We consider the preferred approach to focus on roads and more sustainable modes of transport is the correct approach for the District as it will provide choice to the public. The use of public transport will be encouraged through measures such as designing for buses within our towns and settlements. Our approach will also encourage the use of Park and Ride facilities through concepts such as car-pooling and also encourage the provision of these facilities at key locations across the district. Indeed in conjunction with the Business and Communities council department we are currently investigating the possibility of a new Park and Ride facility being located beside Granville Industrial estate. This would bring the number of Park and Ride/ Share facilities within the district up to six and would further enhance transport sustainability within the District, however it is considered unlikely that Translink would be agreeable to the stopping of their express services at this location. This said the notion of a bus halt and terminus at Granville should be encouraged in order to promote connectivity to the industrial estate

from Dungannon town would be beneficial. Consultation with both Transport NI and Translink will take place in due course to establish the feasibility of this proposal and its deliverability within the plan period.

Our preferred approach will also seek to encourage the use of existing walkways and increase provision of these to ensure connectivity particularly within our towns. The design of new housing developments in a manner that can support connectivity within our towns will also be encouraged. These latter two proposals will support cycling and walking particularly within our towns.

As per regulation 10 of the Planning (Local Development Plan) Regulations (NI) 2015 Mid Ulster Council Planning Department have sent consultations regarding our POP to all adjoining councils. This has included consultation with Fermanagh and Omagh District Council. Mid Ulster District Council Planning Department has also hosted a Sperrins forum (April 2017) which was attended by planning officials and council members from adjoining councils. The issue of transport and connectivity, in particular the main A4 and A5 corridors, has been highlighted as a key issue to Fermanagh and Omagh District Council in our consultation reply to their POP.

Recommendation:

- **Council to retain its preferred approach to focus on roads and more sustainable modes of transport**
- **Council to investigate potential of a park and ride or bus halt and terminus at Granville industrial estate to increase connectivity to Dungannon town**
- **Council to liaise with both Transport NI and Translink regarding transport and connectivity throughout plan production process.**

Implementation of Recommendations

The strategic approach to transport in the draft Plan Strategy focusses on bypasses, improvements to the A29 and reductions in travel times.

We have investigated the feasibility of a park and ride stop or a bus halt and terminus at Granville but TNI have not been supportive of this concept given the existing and proposed facilities at Stangmore and Tamnamore. As well as discussions regarding this concept at Granville, ongoing consultation with TNI as a statutory consultation body and through the SEA steering group has been taking place.

Environment

DO YOU AGREE WITH THE PREFERRED OPTION TO IDENTIFY VULNERABLE AREAS AT A STRATEGIC LEVEL REINFORCED BY POLICIES TAILORED FOR MID ULSTER?

Consultation Bodies Response

NIHE have expressed support for the preferred option of designating areas of constraint on development and allowing sustainable development to go ahead outside of these areas.

NIEA welcome the concept of identifying vulnerable landscapes but are unsure of the justification used to define these areas. They recommend that the Council embarks on a process to undertake a detailed local Landscape Character Assessment using recognised methodology considering that some site work used for current designations dates back to the 1990's.

Both Mid and East Antrim and Antrim and Newtownabbey Councils have expressed interest in designations which come close to the shared boundaries including the proposed Special Countryside Area. They expressed no other views on the matter. Similarly, Fermanagh and Omagh District Council support the overall approach of promoting sustainable development including identifying AoC based on vulnerable landscapes.

Response from the Public

There were two representations which expressed direct support for the preferred option with one stating that it was important for MUDC to identify vulnerable areas, at a strategic level. Another two representations were supportive of the approach but warned that development outside the constraint areas must not cause harm to biodiversity nor should areas outside the designations become "sink holes" for development. A response from Historic Monuments Council has pointed out that in order to accurately zone designations for protection, comprehensive baseline data will be required as well as relevant expertise.

Consideration

We note the support for the preferred option. And we are continually gathering evidence for the LDP. Further desk- survey based work and field work will be carried out by the in the coming weeks to accurately zone designations for protection. The methodologies for such work will be clearly articulated to ensure a comprehensive sound evidence base for the LDP.

WHAT ARE YOUR VIEWS ON THE EXTENT OF THE PROPOSED SCA IDENTIFIED ON THE PROPOSED SPECIAL COUNTRYSIDE AREA MAP WITHIN THE NATURAL HERITAGE SECTION OF THIS PAPER?

Consultation Bodies Response

Armagh Banbridge and Craigavon District Council have stated that, given the location of the proposed SCA they would welcome a discussion of the potential impact this designation may have upon the Blackwater Valley Area. Mid and East Antrim have expressed the need to protect the Lower Bann River Corridor as well as Lough Beg.

Fermanagh & Omagh District Council have expressed their support for constraint areas based on vulnerable landscapes, in the Sperrins and Clogher Valley.

Given the more permissive options for rural development, NIEA would like to see the POP introduce buffer zones around certain environmental features of habitat quality and species conservation merit such as watercourses, woodlands, wetlands, priority habitats. This would go some way to mitigate for the more permissive options in the POP.

Response from Public

RSPB have suggested that the SCA should also include Annaghroe / Annacramp and the Blackwater Wetlands as well as Slieve Beagh, given its importance to birds of prey such as the Merlin and Peregrine. They also suggest that the SCA extends beyond the ASSI/SPA and includes Ramsar areas & the 'Seamus Heaney landscape' at Lough Neagh & Lough Beg.

Consideration

We note the calls for additional levels of protection for specific sites. In relation to the call for buffer zones to be facilitated around all habitat and species rich environmental features, it should be pointed out that policies NH2 and NH5 state that development that have unacceptable adverse impacts upon protected species/ habitats will not accord with the plan and therefore, this is deemed to be unnecessary. Policy OS 2 also states that a 10 metre biodiversity strip from the edge of main rivers must be provided as part of any development proposals adjacent to a main river.

We have hosted three forums; The Sperrins, Lough Neagh and Lough Beg and a Cross Border forum to discuss trans- boundary issues with adjoining Councils. These forums, which were held in April 2017, were useful platforms to discuss designations for protection at border areas. These issues will be discussed further at the upcoming forums in September 2017.

Recommendation

- **MUDC should continue with its approach that it is appropriate to protect its vulnerable landscapes, i.e. SCAs around the western shore of Lough Neagh but not extend it to include the wetlands to the south west of Lough Neagh or the Blackwater Valley. Other mechanisms are available to protect such landscapes.**
- **Similarly MUDC will not pursue an SCA in Slieve Beagh given that its current environmental designations provide sufficient protection to this area. Furthermore it should be noted that MUDC shares this boundary with Monaghan County Council and to date there does not appear to be any desire for a greater level of protection.**
- **Further desk surveys and field work will be carried out by planning staff to**

further refine proposed SCA and AOC.

- **MUDC should retain its strategy based upon the protection of the most appropriate landscapes however initial discussions would suggest that Monaghan County Council would not be keen to introduce a blanket ban on all development on their side of Slieve Beagh. It should be noted however that the European Environmental designations applied to this site are equally recognised in the Republic of Ireland.**

Implementation of Recommendation(s)

The proposed SCA around the western shore of Lough Neagh has been carried through and is now brought forward as part of the draft Plan Strategy. Contrary to the recommendation, it has been decided that we will bring forward an SCA on Slieve Beagh and this is also proposed as part of the draft Strategy. The reason for deciding to proceed with the SCA was that whilst there are significant levels of existing international designations which provide an appropriate level of protection, it is felt that an SCA provides a more certain level of protection against development on this visually important landscape and internationally important habitat.

Extensive field work and desk surveys have been carried out to refine the SCA and AOC boundaries and the results of this work are the proposed designations now included in the draft Strategy.

General Principles Planning Policy (GP 1)

Q. Bearing in mind the strategic policy context of the SPPS, do you agree that there are no other reasonable options to the approach to General Planning Policy for Mid Ulster and that the suggested policy wording will ensure balanced decision making for all development?

Consultation Bodies Response

DfI welcome that that GP 1 has clearly taken account of some of the core planning principles of the SPPS. They highlight concern regarding anomalies with wording, stating that policy statements must align with wording of SPPS unless there is robust evidence and rationale for an alternative approach locally. NIHE support that this policy adopts a pre-cautionary approach and suggest that it should refer to community involvement. NED suggest that the policy should include provision for development to include quality landscape design proposals including shrub planting, open space provision and blue/green infrastructure. They welcome the inclusion of “enhancement” within the policy test but raise concern that the policy test of “demonstrable harm” may be difficult to interpret in relation to habitat and species habitats. DfI: Rivers Agency raise concern that policy GP 1 does not adequately address sustainable flood risk management.

Response from the Public

A small number of representations commented positively to the proposed GP 1 Planning Policy but requested that changes were made regarding specific wording eg. the word 'enhance' in relation to landscape character. Three representations stated that this was too onerous a policy test and one which would not permit development which was otherwise acceptable. Four separate responses from Turley Planning Consultants requested that the 2-3 storey building height threshold was removed and supported the policy criteria regarding planning gain and developer contribution. One representation, from the Tyrone County GAA Committee stated that voluntary / community groups should not be liable for 'developer led contributions' to roads giving access to community facilities which GAA provides to the public at zero / minimal cost to the public purse. Invest NI welcomed the planning gain and developer contribution policy criteria, however cautioned that for public sector works wider societal benefits should be the driving force rather than profitability and this could affect deliverability. The RSPB question the need for this GP 1 policy in the format it is presented. They consider that this one size fits all policy can lead to omissions of certain important elements of policy. The RSPB also express that caution should be exercised regarding planning gain / developer contribution to avoid the interpretation that planning permission can be bought or sold.

Consideration

We note the broad support for Policy GP 1. We also note calls for the inclusion / exclusion of particular words and will take this into account together with all other comments in the further development of this particular policy. However we do not agree that this policy is onerous and will lead to the refusal of otherwise acceptable schemes given the policy clearly demonstrates commitment to approve development that meets the criteria. Community involvement is an underlying theme in the production process of the LPD. It does not require being included in the General Principles Policy which is primarily a policy test to assess development proposals against. The comments made by Rivers Agency are noted however an entire section in the plan will be devoted to flood risk policy and therefore it is not intended to reflect that level of detail in the general principles policy. We acknowledge however that policy direction regarding development relying on non- mains sewerage was not included within the POP. Criteria (g) other infrastructural requirements, in Policy GP 1 will be expanded to include policy wording on this issue as stipulated in the recommendations below.

There is an existing prevailing building height of 2-3 stories in the Mid Ulster District and the Council have a desire to retain this. However the suggested policy does allow for buildings greater than 2-3 stories. Such proposals may be requested to demonstrate, by the submission of a Design and Access Statement, that they will respect and positively contribute to the established character of the area. Nevertheless we have re-considered the matter of building heights and are of the opinion that this criteria should relate to the urban areas only as opposed to the District as a whole. Therefore the criteria regarding building heights will be removed from the

General Principles Planning Policy and will remain within Urban Design Policy (Policy UD 1).

We reviewed various subject planning policies and it was considered that many of the general considerations contained within them and which related to all development irrespective of type, could be reflected in one overall policy applying to all development. And it is considered that this streamlined approach will be beneficial to planning officers, architects / planning consultants, stakeholders and the wider general public. Any further particular important elements of policy are contained within the subject policies section eg. flooding, waste.

Policy GP 1 states that in determining an application appropriate weight will be given to proposals and/or developer contributions which include a planning agreement or which will provide local infrastructure, community facilities and other benefits which may be intended to offset the loss of, or impact on any amenity or resource. The policy does not hold any persons submitting a planning application liable for developer led contributions. The term 'appropriate weight' ensures that planning permission cannot be bought. Appropriate weight will be afforded in the decision making process however this is in conjunction with all planning applications being assessed against relevant planning policies and material considerations. The planning gain / developer contribution policy criteria test is not mandatory, however it does allow for appropriate weight to be given in relevant specific planning application proposals. It is noted that in the design of the POP a section of amplification at the end of the policy relating to when an application can be refused was lost and this was an error and should be retained as it is essential in the determination of any application and had already been agreed by Council prior to publication of the POP.

Recommendation:

- **Retain its suggested General Principles Planning Policy and expand upon it to include that developers should be encouraged to use sustainable drainage systems (SuDs) as the preferred drainage solution. Policy also to be expanded to include provision for green infrastructure / quality landscape design proposals as part of any new development. All comments relating to specific wording will be taken into account in the final drafting of this particular policy.**
- **Expand criteria (g) Other infrastructural requirements to include additional wording 'Where main sewerage is not available the applicant will be required to demonstrate that this will not create or add to a pollution problem'.**
- **Remove the suggested building height restriction from the General Principles Planning Policy. This building height stipulation will remain within urban design policy.**
- **Include section lost in error during design to explain when an application can be refused.**

Implementation of Recommendation(s)

All of the above recommendations have been implemented in the draft Strategy. The encouragement of SuDS and provision for green infrastructure and quality design are included in parts (g) and (h) of policy GP1 and the suggested building height has also been removed for GP1 but remains in the amplification of the urban design policy. Additional wording regarding sewerage infrastructure has also been included.

SOCIAL POLICIES – ACCOMODATING GROWTH AND CREATING PLACES

Housing in Settlements

Do you agree with the preferred approaches to housing policy and the suggested Policy HOU 1- Quality Residential Development in Urban Areas?

Consultation Bodies Response

NIHE would like to see a maximum density of 30 units per hectare with maximum densities being set out in Key Site Requirements. Higher densities may be allowed on sites for affordable housing. To restrict densities of affordable housing may make the provision of such housing less economically viable and would place future provision in jeopardy. NIHE also predicts a rise in smaller units for affordable housing which will lead to more demand for higher densities. NIHE are of the opinion that some flexibility should be retained in order to allow for circumstances where the 20m habitable window distance is not appropriate or not required. Also, there may be circumstances when houses need to be adapted / extended to suit the needs of elderly or disabled inhabitants and the 20m distance may limit this.

Natural Environment Division (DAERA) are supportive of the idea of a minimum separation distance between developments because it will aid biodiversity by potentially increasing garden size. They supports the aspects of policy which include separation distance and the incorporation of open space as these will aid biodiversity.

Response from Public

More than half (9 out of 16) of the responses which commented on housing densities were in disagreement with the proposed housing densities. 5 representations made the point that there was no need for housing densities because this is addressed in policy GP1 (c) where it states that new development must respect the street scene and pattern of development.

The other main reasons for opposition to the proposed densities include the opinion that they are too prescriptive and inflexible as well as the view that they should not be set in policy but should be assigned as key site requirements for individual sites which

are more flexible and appropriate to the unique qualities of each sites.

Of those in agreement with the proposed densities, one representation also made the point that key site requirements which stipulate densities are more appropriate for larger sites.

Another representation in objecting, claimed that the proposed density figures were too low to accommodate sustainable living.

There were 5 representations which whilst not expressing an opinion on a proposed density of 10-30 houses, were in support of densities which would respond to the local context.

There were only 2 representations which commented directly regarding the policy criteria stating that rear garden depths to be not less than 10 metres. Both reps argued that the policy was too rigid in this regard and that the word “normally” should be included instead of “not less than.”

Two representations stated that they supported for the principle of 20m separation distances between developments but it was claimed that there should be flexibility built into this criteria.

For example, one representation supports the idea but also goes on to say that they support the inclusion of the word “normally” in the proposed policy wording, in order to allow flexibility. Another representation says that the idea is too rigid and suggests an alternative policy wording of “ensure that neighbouring amenity is protected.” Further to this, another rep has stated that the 20m distance must be used as a starting point only, because quality residential environments can still be achieved under this distance.

Another submission argues that the overall issue of neighbouring amenity does not require a policy wording, or specific criteria because these issues can be dealt with via general planning policy.

The strongest opposition to the idea came via a representation which claimed that the criteria was too prescriptive and would limit innovative design and force developers away from Mid Ulster. A similar representation suggested that the increased level of prescriptiveness in separation distances could prevent innovative design led schemes and limit the choice available in terms of house types.

Comments regarding the provision of adequate open space for developments – one representation points out that open space is not something which is a “requirement” but rather open space is everywhere around us (“everything outside buildings”) including streets, parks and play areas. They claim that there is a lot of potential to create well designed street network incl. parks / squares / community gardens / allotments within town centres. In this case, the response could be construed as reluctant agreement with the question because they are effectively saying there is less need for an open space requirement in a more urban environment.

Two other representations express agreement although one of these representations has done this indirectly by expressing their opinion that the 10% requirement of open

space in developments over 25 units is adequate, but then go on to state that this should be reduced in town centres.

Four responses expressed agreement that 10% of land is adequate for open space provision. One representation went on to suggest that planning agreements could be used to satisfy open space requirements and another suggested that account should be taken of the proximity of public space such as parks etc.

Whilst there was relatively little comment on this issue of tandem developments with only 3 representations in total, all comments which were received expressed varying levels of opposition to the presumption against development on back land sites. One representation stated that to completely rule out back land development is erroneous because some back land development in larger urban areas can take place without negative impact on neighbouring property. The rep states that judgement should be applied in each case. Another representation expressed the opinion that in some circumstances, a more sustainable approach to housing can be adopted by allowing development via a more efficient use of urban sites. Another rep was unclear as to what the restriction on back land development actually meant, but went on to express the view that efficient use of urban sites is a sustainable way of meeting housing need.

A number of representations have stated that the option of requiring 25% of housing to be social housing on sites of 2Ha / 50 units or more is not based on any evidence. There are also assertions that this approach could have a negative impact on the deliverability of affordable housing for families. Further comments on the issue states that this should be a matter which is subject of consultation with NIHE.

Regarding residential extensions there have been equal levels of agreement and disagreement to the suggested policy wording which seeks to ensure that all extensions and alterations must be subordinate to the original building. Those who are in disagreement argue that there is no evidence to justify this shift in policy approach.

One comment made at a public meeting suggested that town centre sites be zoned specifically for residential use for elderly people. Three representations (although all made by the same planning consultant) that the policy wording new housing development should 'connect to blue and green infrastructure' be removed as there is no evidence base for it.

The case was made that the "requirement" for a landscape strategy should be removed from policy and instead, should be assessed on a case by case basis. On the flip side of the argument, another representation argued there should be a "requirement" for a landscape strategy as opposed to it being simply "encouraged."

Two representations called for the removal of the reference to "cater for the needs of families and small households" stating that these words are superfluous and could be removed without weakening policy.

Consideration

The reason densities are proposed is to ensure that there is sufficient use of land

(hence minimum 10 house per hectare) and that development is kept in character with existing densities in the towns (maximum 30 houses per hectare).

The argument that it is not necessary to have densities set out in policy because it is addressed in general policy (*“respect surroundings and have regard to pattern of development”*) is incorrect because it would result in a scenario where areas characterised by existing high density development would be left without protection from further development which may be considered inappropriate. Similarly, it could be argued that the policy wording in GP 1 is not sufficiently robust to guard against development consisting of high density housing. It should be remembered that General Principle Policy is worded to apply to all development types and not solely related to housing development.

Similarly, the argument that densities are not required because they would be more suitable if they were included in key site requirements (KSR) is not accepted. If this was the approach then, whilst there would be densities assigned for zoned sites, unzoned sites (or white land) would be left without densities being assigned in either policy or via a KSR in the LDP. This would leave these sites open to development of a potentially unacceptable nature.

Therefore the Council rejects the two main reasons which have been put forward to suggest that densities are not required in the LDP. The Magherafelt Area Plan has included densities in the KSR's for its housing zonings, while the Cookstown and Dungannon South Tyrone Plans have not. The Council may adopt the approach whereby it includes housing densities in KSR's for the incoming Plan Period.

The assigning of densities is therefore something which is required in the view of the Council. Having established the requirement, it is considered that the figures of 10 (minimum) – 30 (maximum) are acceptable because the average housing density in the District is roughly 15-25 units per Ha. Given the call in the SPPS to increase density where appropriate, without resulting in town cramming, it is felt that a maximum density of 30, which represents a slight increase in the maximum density threshold for housing in the District is acceptable. Policy HOU 1 states that higher densities may be acceptable in town centres, mixed use areas or zonings identified for social and affordable housing.

Creating Places suggests a minimum separation distance of 20m. There is a trend in MUDC of smaller separation distance than this being acceptable. We consider that in order to safeguard amenity of neighbouring houses and create quality developments, this separation distance is acceptable. The recommended flexibility is also implied in the policy wording where it suggests that the 20m separation distance is not a hard and fast rule through use of the word normally.

In relation to the idea that amenity can be covered in general principles section of the LDP, it should be noted that General Principles are designed to relate to ALL development and therefore it would be inappropriate to set out a specific separation distance which relates to ONE type of development (in this case housing), in such a policy.

General agreement to the 10% provision is noted. It is not general practice for planning policy to recommend the use of planning agreements because if the policy is correctly worded then the requirement for these agreements should not be necessary. In relation to the suggestion that account be taken of existing public open space, it is important to realise that existing public open space is outside the control of the developer and may or may not always be available in the location at which it is currently located. Therefore, it is felt that it is important to ensure a minimum of 10% open space in such developments, regardless of the proximity of public open space.

Creating Places advocated a minimum rear garden area of 70sq. metres as opposed to a depth of 10m. This approach would allow more flexibility in terms of depth to gardens. The wording of “around” is also used when referring to the preferred garden size of 70sq. metres.

However, in order to achieve the separation distance of 20m as suggested in the POP and taken from the Creating Places document, the 10m garden depth may be required, particularly in larger developments.

We consider that the 10m minimum garden depth is not too rigid. The suggested policy states that housing developments will accord with the plan where it provides adequate public and private amenity space. Therefore the policy clearly demonstrates commitment to approve development which meets the policy requirements

Back land sites or back land development involves the development of 'landlocked' sites behind existing buildings, such as rear gardens and private open space, usually within predominantly residential areas and with no street frontages. Such development can lead to back to back housing, narrow streets and densities more closely associated with inner city areas and would not be appropriate for Mid Ulster.

However, the council takes on board the view that in some cases, urban spaces can be used without harmful consequences and may even provide a sustainable solution to housing need by limiting development of Greenfield land.

Regarding social housing we would point out that while planning cannot influence house prices and affordability, social housing need could be addressed through the DM process, provided there is a corresponding policy in the LDP. On this matter, the SPPS states that;

The development plan process will be the primary vehicle to facilitate any identified need by zoning land or by indicating, through key site requirements, where a proportion of a site may be required for social/affordable housing.

There is also a requirement of the council to provide a mix of tenures in housing developments, in order to comply with plan objectives of providing a range of housing for everyone. However, consideration will be given to the 25% requirement, given that NIHE have indicated a social housing need in MUDC of 538, which equates to roughly 5% of the HGI. It should also be noted that NIHE have been consulted as a statutory consultee and they have agreed the suggested provision of 25% social housing.

The issue of current social housing need has also been considered as part of this process and NIHE have revealed that there is a current need in the area they refer to as Dungannon 1 for social housing. They feel this need is immediate in so far that it would need to be addressed in the next few years and therefore we feel that it should be addressed in the Plan Strategy if necessary. We have asked NIHE to explore whether this need can be addressed on Phase 1 housing land and we are awaiting their confirmation of this. Discussions with them are ongoing. If the need cannot be addressed on Phase 1 land then we have agreed to bring forward some Phase 2 land in the Plan Strategy to address this issue specifically in Dungannon.

Regarding zoning housing areas for the elderly, this can be done however no specific need has been identified. Council would point out that "promotion of green infrastructure is promoted in the SPPS as a means of mitigating against climate change. The SPPS also States that developments should be "integrated with broader green and blue infrastructure systems" (para.6.137). This policy therefore has support of the SPPS.

It is worth noting in relation to this point that proposed policy will "encourage" the submission of Landscape Strategy as part of a design and access statement. As proposed, there is no requirement to submit a landscape strategy.

This suggested wording catering for the needs of small families and small households is in keeping with the LDPS Plan Objective;

Accommodating People and Creating Places; to provide 11000 new homes in a range of housing capable of meeting the needs of families.....and single people.

It is therefore important that this policy is worded as such in order to ensure coherency between the plan objectives and plan policy.

Q. Should land zoned for housing be considered for development ancillary to housing? (eg. Community facilities)

Consultation Bodies Response

NIHE have expressed the view that they support the protection of land zoned for housing. However, they also agree that a mix of other uses such as community uses / services and open space may be desirable as they can increase connectivity for residents.

Response from Public

Again there were relatively few comments on this topic but those that were made were generally in support of the principle.

One representation agrees with the policy provision which limits the development of zoned housing land for non-housing uses unless exceptionally it is for a use ancillary to housing development. Another representation argues that greater mixed use

development will achieve safer & socially / economically sustainable neighbourhood. They are even supportive of other uses such as offices which in their eyes are compatible with housing.

Consideration

Support for this approach is noted.

Q. Should guidance be included at the introduction of the LDP on best practice for producing design and access statements (D&AS)?

Consultation Bodies Response

Consultation bodies had no specific comments on this although NIEA would like to see the inclusion of a biodiversity checklist in Design and Access Statements.

Response from Public

Relatively little comment on this aspect with two responses although both expressed support for the idea of including guidance on D&AS, provided they were in keeping with Development Management Practice Note 12.

Consideration

We consider that the existing guidance on D&AS, Development Management Practice Note 12 which is in the public domain, is sufficiently detailed and that separate guidance in the introduction of the LDP is not required. Biodiversity checklists are completed on relevant planning applications on a case by case basis through the development management process.

Should illustrations on addressing developments on sloping sites be included in the plan strategy?

Consultation Bodies Response

No comment on this specific issue.

Response from Public

One representation stated that illustrations would be welcome while another argued they should not be included in the Plan Strategy but should be included as part of design guidance. A further representation from a planning consultant has expressed support for policy approach option 2 which encourages a minimum separation distance of 20m, as among other things, it would provide specific guidance & distances for dealing with the more contentious sloping sites. Another representation stated that the illustrations could be included but that they should be as a starting point only, with

principles of flexible decision making still being implemented.

Consideration

We consider that the opportunity to provide examples by way of illustration will provide clarity to applicants and planning officers. The illustration will be used as best practice guidance. All applications on sloping sites will be assessed on a case by case basis through the development management process.

Travellers Accommodation

An issue came to light during the review of the POP responses which highlighted that although the POP does include a section highlighting no current need for such accommodation the POP should also include the relevant policy from the addendum to PPS12 which states that exceptionally, and without a requirement to demonstrate need, a single family traveller transit site or serviced site may be permitted in the countryside. Such proposals will be assessed on their merits.

Recommendation

- **Retain preferred approaches to housing policy and suggested Policy HOU 1 Quality Residential Development in Urban Areas.**
- **Include illustration addressing development on sloping sites in draft Plan Strategy.**
- **Best practice guidance for producing Design and Access statements are not to be included in the draft Plan Strategy.**
- **Include wording on provision of a traveler site in the countryside.**
- **Continue to engage with NIHE regarding social housing provision and particularly in Dungannon and if this immediate need cannot be met in Phase 1 land bring forward some Phase 2 land to meet this meet at the Plan Strategy.**

Implementation of Recommendation(s)

The provisions included in policy HOU 1 in the POP are carried through To Housing in Settlements Policy in the draft Plan Strategy although the policy has been restructured;

- Additional policy to protect zoned housing land and to set criteria for where phase 2 land can be developed
- Some of the prescriptive detail has been moved to amplification.

Illustration for sloping sites and appropriate separation distances has been provided,

as has the provision within policy for a travellers site in the countryside

With regard to engagement with NIHE relating to social housing, instead of identifying sites we have decided to address this issue in policy by writing criteria which allows phase 2 land to be developed in certain circumstances, one of which is for the provision of social housing.

Development in the Countryside

Do you agree with the suggested wording of the subject policy CT1?

Consultation bodies Response

DfI have highlighted concern that this suggested policy appears not to reflect the SPPS approach to cluster, consolidate and group new development within existing established buildings.

NED have raised concern with the potential wording within CT1 in relation to integration by using existing vegetation which may potentially encourage development in blocks of woodland. NED ask that a caveat to indicate a presumption against placing dwellings within woodlands be included within this policy.

NIHE have stated that they would like to see an additional criteria to avoid 'build up' or cumulative development, which has an adverse impact on rural character.

Response from the Public

The RSPB have stated that this suggested policy gives no recognition to the environmental value of the countryside. They state that the environment should be explicitly recognised as should the avoidance of sensitive areas. The RSPB highlights that the policy appears to finish mid-sentence and therefore ask to reserve the right to make further comment once having read the full policy wording.

Consideration

We are in agreement with the comments raised by DFI and will include additional criteria within Policy CT1 to ensure the policy approach is to cluster, consolidate and group new development with existing buildings. The specific wording of this additional criteria is detailed in the recommendations below. We also concur with NEDs comments and will expand the policy further to ensure the policy provides adequate protection for woodlands, see suggested wording in the below recommendations.

We are of the opinion that this suggested policy provides adequate protection to the rural character of the countryside. The policy states that all new residential development must avoid being unduly prominent and respect the rural character by complimenting settlement patterns in the locality. The suggested expanded policy will respect the key guiding principle of regional policy in the SPPS to cluster new development with existing buildings, ensure new development is sited and designed

to integrate sympathetically with their surroundings and that new development will not have an adverse impact on the rural character of the area.

The Mid Ulster LDP objectives include to provide for vital and vibrant rural communities whilst protecting the countryside in which they live by accommodating sustainable growth in the countryside and also to protect and enhance the natural environment to achieve biodiversity and quality design. We consider that suggested policy CT1 recognises the environmental value of the countryside as it includes several criteria to manage residential development including ensuring that all such developments integrate with their settings, respect the rural character, avoid contributing to urban sprawl or mar the distinction between a settlement and the surrounding countryside and be of appropriate design in terms of height, scale, architectural detail and finishes. Policy CT1 also states that special care should be given to ensure that any proposal is sensitive to environmental issues. The LDP introduces a new Special Countryside Area (SCA) around Lough Neagh and Lough Beg, Policy NH 1, where there will be a presumption against new development other than for tourism at designated nodes. This policy states that development proposals outside of the SCA, either individually or in combination with existing and /or proposed plans or projects, will only be granted if they are unlikely to have a significant effect on a European site or proposed Ramsar Site. We are therefore satisfied that the LDP recognises that in Mid Ulster we are the custodians of a large countryside area which is one of our greatest assets and some of the best nature conservation sites in the world at International, National and Local level. We believe that the suggested policies in both the Development in the Countryside section and the Natural Heritage Sections (discussed later in this report) of the LDP will provide sufficient protection to the natural environment.

We wish to highlight that the final wording of Policy CT1 was not included in the POP. This was due to a mis-print error by the design team. The proposed wording that should have been included within this policy is detailed in the recommendations below and will be included within the draft Plan Strategy. We note the request to reserve the right to comment on the policy as a whole however wish to emphasise that this can be done following publication of the draft Plan Strategy. The draft Plan Strategy is a public consultation document and is not the final plan. It will be open for public consultation, for all consultation bodies and members of the public, for a period of 8 weeks following its publication. As stated in our Statement of Community Involvement we will write to all who submitted a representation to the POP informing them of the publication of the draft plan Strategy.

Recommendation

- **Expand Policy CT1- Include an additional bullet point stating that all residential development in the Countryside shall be required to ‘cluster, consolidate and group with existing buildings unless there are environmental or operational reasons as to why this is impracticable’.**
- **Expand Policy CT1 to include additional wording that development should integrate with its setting by utilising existing vegetation and landform ‘to provide a backdrop and soften visual impact’ and avoid unduly prominent**

or artificially created sites.

Implementation of Recommendation(s)

All of these recommendations have been implemented and are reflected in the wording of policy CT1.

Do you agree with the suggested policy approach for dwellings in the countryside? Are there any other circumstances where a dwelling in the countryside should be considered? (Policy CT2)

Consultation bodies Response

DFI argue that the current policy approach to development in the countryside which is set out in the SPPS already provides a range of circumstances where dwellings can be acceptable. They also warn that the Council should be fully aware of the “quantum of developments” which may be brought forward under their preferred policy approach. DFI are concerned that the proposed approach has the potential to give rise to an increase in the level of residential development in the countryside and would not be supportive of the SPPS objective to achieve sustainable patterns of development. DFI state that where the policy deviates from the SPPS, there must be a robust evidence base to justify this and any impacts need to be fully considered in combination with other policies such as the spatial framework, transportation and provision of services.

NIEA have suggested consideration of a “vulnerable landscape” approach in relation to single dwellings in the countryside. Presumably this would involve the designating of landscapes which would be particularly vulnerable to one off residential development. They claim that this may be even more appropriate because of the proposed greater levels of flexibility which appear to be afforded to single dwellings via the approach laid out in the POP.

NIHE have stated that the policy test for a dwelling for a carer or someone availing of care is unnecessary and could be catered for under existing regional policies in both the SPPS and PPS21 which caters for a dwelling in the countryside where there are personal and domestic circumstances.

Response from the Public

The majority of responses from the public were in favour of option 2, the preferred option, which advocates a more flexible approach by adding additional circumstances in which a single dwelling may be accommodated in the countryside. Responses in support of this preferred option came from private planning consultants including C.McIlvar and Matrix Planning Consultancy, from the Ballynagilly Community group, from the Tyrone County GAA Committee and from Workspace Ltd, a Local Enterprise Agency.

There were also a considerable amount of responses which viewed current policy as too strict and unacceptable in so far as they were forcing young people to leave the rural area. These responses mainly were regarding the Washingbay area (Aughamullin, Derrytresk, Killeen and Derrylaughan).

A small number of representations requested that the policy for residential development in the countryside should revert back to the policies within a Planning Strategy for Rural Northern Ireland. In other words that certain policy criteria didn't have to be met i.e a dwelling on a farm, gap site and that the key policy tests were only if a site was acceptable in terms of integration and design. One representation states that rural dwellers may depend on family owned land for affordable housing.

A representation from the RSPB expressed support for the existing policy approach, option 1, which it claims provides a sustainable approach with sufficient flexibilities to allow for rural dwellings. MAG responded stating that making this LDP even more flexible runs the risk of creating much less sustainable rural development thereby going against the council's own objective of being the custodians of the rural landscape for future generations. MAG have also stated that dwellings in the countryside should be accommodated for people who work in the countryside and /or have lifetime family roots in the area only.

Ross Planning consultancy stated that existing policy in PPS 21 provides a sustainable basis for future development and that relaxation of the existing policy will lead to a number greater than expected number of new dwellings. They are concerned that the proposed policy CT2 provides too much scope for new housing. Another representation from FP McCann (concrete products manufacturer/supplier) stated that whilst the proposed policy was slightly more flexible than PPS 21 they requested that it should not be significantly different to those which already exist in PPS 21. Whilst they broadly welcomed the proposed relaxations in the rural policy they stated that the ability of the rural remainder to accommodate 4,380 new dwellings during the plan period is questionable.

Representations have also been received calling for a kinship or ties to the community policy test. A response from the Tyrone County GAA Committee make the case that kinship and connection to community should be important considerations in allowing people to secure new dwellings in their area. Similarly, a comment at a public exhibition stated that people should be able to live in their community instead of being forced into nearby towns and villages as this has a negative impact on local schools and football clubs. One representation suggested that a kinship policy test could should apply to families who have lived in the rural area in excess of 10 years. This sentiment was also expressed in the representations made by the people of the Washingbay Area who have called for a policy which would allow people who have strong ties to the area to live close to their families; a 'townland policy'.

Views were also expressed at a public meeting that there should be provision to allow for a dwelling for fishermen. Representations from a number of Sinn Féin Councillors also requested this provision which would see fishermen treated in a similar fashion to that of the farming community.

No specific comments were received regarding the attaching of occupancy conditions on approvals where there were personal and domestic circumstances, caring care or business enterprise cases, however there was a query as to how long an occupancy condition would be valid for.

A number of comments and suggestions were received regarding each of the policy criteria (under the sub-headings (a) to (i) as suggested in Policy CT2. These comments have been categorised below per sub heading for ease of reference.

Policy CT2- Dwellings in the Countryside

(a) Dwelling in an existing non-farm cluster

Two representations commented on this specific policy criteria. Matrix Planning Consultancy stated that flexibility should be applied in relation to a focal point as they believe the use of a cross roads or a community building is very restrictive. Another planning consultancy, 2 Plan NI, request that the word 'substantial' (buildings) be removed from the policy as it makes the policy too onerous.

(b) Dwelling infilling a small gap site

A representation from a private planning consultant proposed that the dimensions of a gap site should be increased to 45- 50 metres for a single dwelling and 90-100 metres width for sites of 2 dwellings to allow applicants to design and build a reasonable standard sized dwelling with adequate private amenity space. Another private planning consultant stated that suggested dimensions in the policy were too prescriptive, too small and do not take into account topography or other site specific circumstances. This response also suggested that for small gap sites the wording should be changed to permit a dwelling between two 'buildings' as opposed to 'dwellings' as this is too onerous. Matrix Planning consultancy suggested that the original wording in PPS 21 Policy CTY8 which refers to the 'existing settlement pattern' should be retained. Clarification was also sought as to what constitutes a road frontage building and whether the gap site is measured from building to building or plot to plot.

(c) Replacement Dwelling

Carntogher Community Association have requested that the suggested policy should encourage the retention of dwellings of vernacular merit, allowing their retention for non-domestic use to preserve such buildings as important records of the areas built heritage. The RSPB argue that the policy introduces unnecessary flexibility such as the removal of the replacement dwelling siting requirement. Planning Consultants 2 Plan NI have requested that the reference to 'substantial' be removed from the policy as it is too restrictive. C. McIlvar Planning consultants state that the term 'substantially intact' requires clarification and suggests that the essential characteristics of a dwelling should be listed. Matrix Planning consultancy also request that there should be a list of the essential characteristics (as identified in Policy HOU 13 in a Planning Strategy for Rural NI) so that there is no ambiguity. Matrix Planning also highlight that there is no reference to buildings previously used as dwellings, the redevelopment of a brownfield site or the replacement of non-listed vernacular buildings.

(d) Conversion / Re-use of Existing Buildings

A representation from Workspace Ltd argues for more flexibility in terms of the conversion / re-use of existing buildings. However this response doesn't clarify any further what additional flexibility could be adopted. MAG disagree that the suggested policy states 'steel framed' buildings are not eligible arguing that with good design such structures could be adapted for alternative use successfully.

(e) Dwelling on a Farm

Rodney Henry Architecture has requested that the one dwelling within 10 years criteria be removed to allow for other family members to obtain a dwelling. He has also stated that using existing laneways where 3rd parties are associated cause difficulties with mortgage lenders. On the other hand MAG have requested that policy wording be amended to include an 'integral access lane'. TC Town planning want consideration given to a second house on the farm within 10 years (no less than 5 years after the granting of planning permission) as an exceptional case where the site is sufficiently integrated and an existing access and services can be used. The Tyrone County GAA Committee request that more thought is given to the appropriateness of obliging new dwellings to be built as part of farm clusters. Workspace Ltd argue for a move away from obliging people to site farm dwellings close to farm clusters because modern farms are dangerous and non- family / non-residential friendly places. Planning consultants 2 plan NI request the removal of the word 'substantial' farm buildings arguing that this restrictive and could eliminate a number of small / part time farmers who would not meet this policy criteria. They also state that there is a contradiction in the latter part of this policy wording, the policy wording states that consideration will be given to a site which is visually linked to the farm and queries should this read 'not' visually linked. Matrix Planning consultancy argue that the caveat 'as verified by Darea' is too restrictive and will not include established farms that have been active for 6 years but are not registered with DAERA or that don't claim subsidies.

(f) Dwelling in a Farm Cluster

Planning consultancy " Plan NI request that the suggested policy wording 'bounded by a building on at least 2 sides' be replaced with 'site must be located within the farm holding and sited to cluster with an established group of buildings on the farm'. They feel that the existing policy wording within Policy CTY 10 and the SPPS is sufficiently restrictive and the suggested policy in CT2 (f) will place further unnecessary restrictions on rural development. Matrix Planning consultancy support this additional policy criteria stating it is a welcome addition for young farmers, siblings or those who have inherited / acquired farms with a view to farming the land. C. Mc Ilvar Consultancy also welcome this policy criteria however request regarding the minimum size a farm building will need to be in order to qualify as a substantial farm building.

(g) Dwelling to meet Personal and Domestic Circumstances

MAG argue that this policy criteria test would be open to abuse. They state that it opens doors to persons with no connection to the land / caring / work commitments in

the rural context and over time will result in low density, car dependant, rural suburban living.

(h) Dwelling for a Carer or someone Availing of Care

Both the Tyrone County GAA committee and the Ballynagilly Community group are very supportive of this suggested policy criteria stating that it recognises the central role played by carers / families. MAG also agree with this policy approach but suggest that wording is amended to read a separate 'but' attached residential unit. C. McIlvar Consultants welcome this policy but requested that it allows for a separate detached residential unit within the curtilage of the existing house provided all services and amenities are shared. At a public meeting, Francie Molloy MP for the District voiced his support for a dwelling for carers although urged caution over the policy wording. Workspace welcome the recognition of the vital importance of carers in the rural community and welcome this policy flexibility regarding housing in the countryside. Workspace Ltd argue that consideration be given to kinship links / families longterm presence only stating this would be important if the LDP is to achieve its objective of recognising the needs of both growing families and carers of the elderly by accommodating development which allows people to remain in their communities.

(i) Dwelling for a Business Enterprise

C M. Ilvar Consultants expressed support for this suggested policy criteria stating that this will allow for owners / managers of rural businesses to live on site for security reasons and will encourage home-working. They state that this will also reduce dependency on the car and travel to work elsewhere.

Consideration

As identified in the POP Mid Ulster District has a geographically dispersed population with currently a quarter of us living in the main towns, a third living in the local towns /villages and 40% of our homes located in the countryside. Although the current policy approach to development in the countryside which is set out in the SPPS / PPS 21 provides a range of circumstances where dwellings can be acceptable, we consider that this new LDP production process (Part 2 of the Planning Act (Northern Ireland) 2011 provides for the preparation of the LDP by a council for its district) will enable the Council to tailor the regional policy approach to the specific circumstances of the Mid Ulster District. We consider this tailored approach, which will be regularly monitored as stated in the published LDP timetable, will be more responsive to the local needs of the Mid Ulster District which is quintessentially a rural district.

We consider that our preferred approach and suggested policy wording for dwellings in the countryside constitutes minor adjustment to the existing regional rural policy for development in the countryside. Our policy wording, policy CT2, provides clarification on a small number of existing policy issues which we have experienced. This includes clarification on infill development, on the 10 year rule for dwellings on a farm and on a single dwelling for business use. We have incorporated a small number of additional circumstances, based on the key issues identified in the POP for the District, in which

a single dwelling may be accommodated. These include a dwelling in a farm cluster and a dwelling for a carer or someone availing of care.

We consider the additional circumstance of allowing for a dwelling in a farm cluster complies with the aim of the SPPS to manage development in a manner which strikes a balance between the protection of the environment from inappropriate development while supporting and sustaining rural communities. This is because this additional circumstance provides opportunity for additional dwellings in the countryside thereby helping sustain rural communities, but these dwellings must be clustered, consolidated and grouped with existing buildings which mitigates against potential adverse impacts upon rural landscapes which would arise from the cumulative effect of one-off, sporadic development. Whilst it is not possible to precisely quantify the number of dwellings that may come forward through this additional policy opportunity it is important to highlight that the Planning Department will be able to make an estimate of such development based on the number of these type of rural dwellings approved. The Planning Department can monitor the number of such development types approved in conjunction with all other dwelling in the countryside development types on an annual basis. Therefore if an issue arises whereby the number of dwellings in the countryside approved appears to be getting excessively high or likely to approach the 40% rural housing allocation which the LDP sets for the plan period then this situation can be addressed at the 5 or 10 year plan review stage. Thus housing in the countryside can be effectively monitored over the plan period. If such issues appear to be arising these can be remedied at any of the review stages possibly by removing the additional opportunity / opportunities for dwellings in the countryside in this policy. Therefore the monitoring and review stages of the LDP are essential in establishing how our plan objectives are being achieved and whether any changes are required.

As alluded to earlier, our policy introduces an additional opportunity to allow for a dwelling for a carer or someone availing of care. Again it will not be possible to precisely quantify the number of dwellings that may come forward under this additional policy opportunity. It is considered that the very fact that the dwelling has to be attached to the main dwelling or re-use of a building within the curtilage is a control measure in itself in that only close family groups are in the main likely to want to avail of such living arrangements. However as stated above dwellings in the countryside can be monitored over the plan period and policy changes can be made at the plan review stages, if necessary, to ensure the amount of dwellings does not exceed the 40% maximum. The LDP key issues identified that whilst the Mid Ulster District has a smaller number of people above 65 years of age than the NI average this figure is on the rise. Other key issues identified that 10.9% of people in Mid Ulster stated that they provide unpaid care to family, friends, neighbours or others and that maximum travel times to an A&E hospital was 50.39 minutes and 15.22 minutes to a GP premises. Taking into account these key issues for the Mid Ulster District we consider that allowing for dwelling for a carer or someone availing of care is an appropriate planning response to specific local needs. We consider this additional policy criteria will help to meet our LDP objective to recognise the needs of carers of the elderly and disabled by accommodating development which allows people to remain within their own communities. This policy criteria stipulates that the new dwelling must be attached to

an existing dwelling or be a change of use of an existing building within the curtilage. Therefore the policy ensures compliance with the SPPS to cluster, consolidate and group new development. This sustainable approach facilitates new development which can benefit from the utilisation of existing services such as access or drainage. An occupancy condition for an immediate family member will be used on such granted planning permissions thereby ensuring that such developments can be managed and limiting potential for the policy being exploited.

As discussed both the new additional criteria for dwellings; a dwelling in farm cluster and a dwelling for a carer or someone availing of care stipulate that such new developments must cluster and group new development with existing buildings. Therefore such developments may not put a greater strain on the provision of services such as telecommunications / power cables as these services may already be connected to the existing buildings which they shall be grouped with. We recognise that such developments could lead to increased traffic generation and car dependency in Mid Ulster and this has been examined in the accompanying Sustainability Appraisal (SA) Interim Report. Our preferred approach which includes these additional circumstances to attain a dwelling in the countryside was positive in terms of social and economic effects but scored negatively in environmental effects. However the SA concluded that the overall score was positive. Therefore we are content that our suggested policy approach for dwellings in the countryside is a sustainable approach.

As part of the countryside assessment research for the LDP a development pressure analysis assessing the cumulative impact of one-off single dwellings in the countryside was undertaken (see position paper- Development Pressure Analysis). This paper concluded that areas within Mid Ulster District that are valued for their high scenic value or natural heritage importance such as the Sperrin's or Clogher Valley have experienced less pressure for single housing developments than the remainder of the district. Therefore in response to the comments from NED, we believe that these areas are not under a significant threat of change even with the suggested new additional policy criteria and therefore that a bespoke 'vulnerable landscape' approach to single dwellings in the countryside is not necessary.

We welcome that all representations from members of the public regarding a dwelling for a carer or someone availing of care were supportive of this additional opportunity for a rural dwelling. Regarding NIHE's comments we would emphasise that the existing regional policy provisions for a dwelling in the countryside where there are personal and domestic circumstances does not cater for a carer or someone availing of care. This existing policy is quite restrictive and we consider that it does not recognise the needs of carers of the elderly which has been identified as a key issue in the Mid Ulster District.

We welcome that that the main thrust of the feedback from the public was positive and supportive of our more flexible approach regarding dwellings in the countryside and that feedback was received from a variety of interest groups including business interests, environmental interests and community interests.

As stated in our POP a return to a policy approach based on location, siting and

integration (similar to 'A Planning Strategy for Rural Northern Ireland') would result in the erection of too many dwellings and a dispersed pattern of development in the Countryside. This would be contrary to the approach of the RDS and SPPS which is to cluster and consolidate development and would not be considered sustainable. This return to a Planning Strategy for Rural NI was assessed in the SA however it returned a high number of negative scorings against the agreed sustainability objectives and was therefore ruled out as being a potential approach.

Given the large number of petition style responses (302 responses) which state that the current regional planning policy for housing in the countryside is forcing young people out of the area and the general thrust of support for the suggested more flexible policy approach, we disagree that the existing policy PPS21 / SPPS provides sufficient flexibilities to allow for rural dwellings. The suggested policy to cluster and group new dwellings, which aligns with the SPPS approach, will help ensure protection of the environment from sporadic development thereby supporting the LDP's objective of protecting the countryside. Indeed our POP contains several additional proposals and policies with the aim of protecting and enhancing the natural environment such as the proposed Area of Constraint on Wind Turbines and High Structures to the south and west of the District and the proposed Special Countryside Policy Area along the western fringes of Lough Neagh and Lough Beg.

As stated in the POP Mid Ulster has one of the most densely populated rural areas in Northern Ireland (NISRA). Our aim is to accommodate development in the countryside that supports the vitality and viability of rural communities without comprising the landscape. Therefore we deem that a 'kinship' test to live in the rural area would be unsustainable given the quantum of new dwellings it could result in considering the existing dense rural population. This approach would not be appropriate and may compromise our landscape quality thereby conflicting with our LDP spatial framework. We consider that a kinship test should only apply in special circumstances in the interests of promoting rural regeneration and in recognition of the strong sense of belonging and sense of place in certain rural areas. These areas are identified as Dispersed Rural Communities (DRC's) and are discussed in detail further below. The concept of a dwelling for a fisherman is also discussed later in this report.

In response to a query raised we can confirm that a 5 year occupancy condition will be attached to any planning applications which require such conditions. In instances where a property is re-processed we consider it appropriate that the occupancy condition would be permitted to be removed to allow for re-sale of that dwelling.

Consideration to the specific comments raised per policy criteria is presented below:

(a) Dwelling is an existing non-farm cluster

We consider the suggested wording of this policy criteria is appropriate. Removal of the criteria to locate at a focal point or the removal of the wording 'substantial' buildings may leave this policy too open to abuse and difficult to control the number of dwellings that may gain planning permission under such suggested alternatives. It should be noted that our suggested wording is actually less prescriptive than the existing regional policy CTY 2a in PPS 21.

(b) Dwelling infilling a small gap site

The issue of the dimensions of a small gap site is no longer a problematic matter for the Planning Department and therefore dimensions will no longer be stipulated in this policy. This policy wording will be updated as stated in the recommendations below. The policy states that a gap must be located between 3 substantial buildings, not between 2 dwellings and therefore we consider that this policy is not too onerous. A key policy test is that any new dwelling and defined curtilage is in keeping with the character of the existing development and therefore we agree with the suggestion that this be included in the policy wording. Policy wording to be updated for the Plan Strategy as per the recommendations below. A road frontage building is any building which is located alongside a public road, footpath or private laneway. A gap site is measured from plot to plot.

(c) Replacement Dwelling

We have included a policy for the conversion and re-use of locally important buildings of special character or interest for non-residential use. This policy was omitted from the POP in a printing error. This policy will be included in the built environment section of the draft Plan Strategy. We agree that there should be a replacement dwelling siting requirement in order to cluster development as per regional policy direction. The policy wording will be amended in the draft plan strategy as stated in the recommendations below. We consider the wording that all external structural walls must be 'substantially intact' should remain included in order to prevent over use of this policy. Otherwise numerous applications may be submitted for random stacks of rubble and could potentially result in an excessive number of dwellings being permitted in the countryside which is contrary to the objectives of our LDP. We consider that providing a list of essential dwelling characteristics would be too prescriptive and may actually prevent applications from being permitted as they don't fulfil a certain checklist. Policy amplification will be included in the draft Plan Strategy to ensure there is no ambiguity. A separate policy, located in the Archaeology and Built Environment, Policy BH 7 deals with the non-listed vernacular buildings.

(d) Conversion / Re-use of existing buildings.

Our proposed policy wording is more flexible than that of the regional SPPS policy which states that this policy applies to locally important building only (such as former school houses, churches and older traditional barns and outbuildings). Our policy does not limit development opportunities to only locally important buildings as we consider that the existing policy test is too restrictive. For additional clarification the title of this policy shall be amended to read 'Conversion / Re-use of existing non- residential buildings'. This policy is aimed at allowing the sympathetic re-use of traditional buildings in the rural area. It is felt that 'steel framed' buildings do not fall into this category. Given that Mid Ulster is a predominately rural district it will have an excessive number of rural buildings. In addition, steel framed buildings can be erected quickly under agricultural PD rights and could therefore a 'back door' means to obtaining planning permission for a rural dwelling. Therefore we consider it

appropriate that 'steel framed' buildings are not eligible under this policy as it would be open to over-use.

(e) Dwelling on a farm

As established in our sustainable development in the countryside policy review paper there are 4,155 farms in the Mid Ulster District (Agricultural Census NI 2015). In order to moderate the number of dwellings on farms it would not be appropriate to reduce the threshold to less than 1 dwelling per 10 years. However the suggested policy CT2 (criteria f) also allows for a dwelling in a farm cluster. This provides a single additional opportunity for another dwelling on a farm. This is discussed further below. We agree that the word 'substantial' farm buildings may be too restrictive and this shall be removed from the final draft of this policy. We also consider that 'farm buildings' may also be too prescriptive and will change the wording to 'buildings on the farm'. In order to correspond with regional policy in terms of clustering we consider it appropriate that the criteria states that the new dwelling should be located next to a group of buildings on the farm. The suggested policy does provide exceptions to this criteria including if there are health and safety reasons or plans for expanding the farm business then consideration will be given to a site which is visually linked to a farm. The onus will be on the applicant to provide verifiable plans to expand the farm business and the suggested policy will be revised to include that the plans must be verifiable. The current policy in PPS 21 requires where practicable access to the new dwelling should be obtained from an existing laneway. This has proven problematic in practise (health and safety reasons and financial lending difficulties) and therefore was not included within the POP.

There is no contradiction in the latter part of this policy as stated in a representation received. Any new dwelling which can not be located beside a group of buildings on the farm must then try and be located in an alternative position which is visually linked. Only in exceptional circumstances will a site be considered not visually linked to a farm. We concur that the caveat 'as verified by Daera' may unintentionally eliminate some farmers. This policy wording will be adjusted to read 'normally verified by Daera in the draft Plan Strategy.

(f) Dwelling in a farm cluster

We welcome the support for this additional policy opportunity. Some of the comments received have confused this policy criteria with that of a dwelling on a farm. For clarification this policy is an additional opportunity to get a dwelling sited at a group of buildings on a farm or at an out farm. Therefore the proposed policy approach of clustering the new dwelling beside 3 or more substantial farm buildings and that it must be bounded by a building on at least 2 sides is not actually more restrictive than the existing regional policy CTY 10 (PPS 21) as it is a separate development type of development opportunity. This additional policy opportunity will actually allow a second farm dwelling per applicant subject to the proposal meeting the stated siting criteria. We consider that it would be too prescriptive to assert what the minimum size a farm building would need to be. Instead each application will be treated on a case by case basis. The suggested policy wording clearly states that domestic garages

and small sheds will be excluded. It should be noted that this additional development opportunity can only be applied once and the wording of the policy will be updated to reflect this as stated in the recommendations below.

(g) Dwelling to meet personal and domestic circumstances

This policy criteria test already exists in regional policy PPS 21 and our proposed policy reflects this existing regional policy.

(h) Dwelling for a carer or someone availing of care

We welcome the support received for this suggested additional development opportunity criteria. We agree that the policy wording should be revised to include separate 'but' attached residential unit as this would be more transparent. It is not considered appropriate that this policy would allow for a separate detached residential unit within the curtilage of the existing house. Such a policy approach would be very open to abuse and over-use thereby conflicting with our LDP objective strike a balance between accommodating development in the countryside without compromising the landscape. As discussed earlier a 'kinship' type policy test will not be included as it could potentially result in an excessive number of dwellings in the countryside. We consider that this policy criteria test for a dwelling for a carer or someone availing of care will help us to achieve our LDP objective of recognising the needs of the carers of the elderly by accommodating development allowing them to remain in their own communities. An occupancy condition will be placed on these type of applications to ensure that such permissions are as a result of genuine cases of need.

(i) Dwelling for a business enterprise

Support for this suggested policy wording is welcomed.

Recommendations:

- **Policy CT2 (b) Dwelling infilling a small gap site- Dimensions stipulated to be removed from policy. Policy shall be updated to read: 'In a small gap site capable of accommodating up to 2 dwellings. The gap must be located between 3 substantial buildings, each with their own defined curtilage, fronting onto a road or laneway. Exceptionally a single dwelling may be permitted on a smaller gap site located between 2 dwellings, each with their own defined curtilage, fronting onto a road or laneway. All proposals must respect the existing development pattern along the frontage in terms of size, scale, siting and plot size.'**
- **Policy CT2 (c) Replacement dwelling- wording shall be expanded to include 'Replacement dwellings must be located within the curtilage of the original dwelling where practicable, or at an alternative position nearby where there are demonstrable benefits in doing so'.**
- **Amend policy (d) sub-title to read: Conversion / re-use of existing 'non-residential buildings.**

- Amend policy wording in CT2 (e) Dwelling on a farm to read: ‘The dwelling should also be located next to a group of buildings on the farm.’ The policy caveat will read: ‘normally as verified by DAERA’.
- Amend policy wording in CT2 (e) to include: Where there are health and safety reasons relating to the efficient use of the farm or ‘verifiable plans’ to expand the farm business at the existing building group(s), consideration will be given to a site which is visually linked to the farm. Wording of what constitutes ‘verifiable plans’ as per paragraph 5.42 of PPS 21 to be included in the amplification of this policy for the draft plan Strategy.
- Amplification of Policy CT2 (e) in the Plan Strategy to include that under this policy an equine business is to be afforded the same benefits as an established and active farm. Existing amplification wording (paragraph 5.43 - 5.45) of regional policy PPS 21 to be included in Plan Strategy.
- Expand policy wording CT2 (f) Dwelling in a farm cluster to read: ‘Exceptionally on farms that are not active and/or established or where permission has been obtained in the past 10 years, a dwelling may be accommodated within a farm cluster. The cluster must comprise 3 or more substantial farm buildings (excluding domestic garages and small sheds) and the site must be located within the farm holding and bounded by a building on at least 2 sides. This policy can only be applied once to facilitate a single dwelling’.
- Amend policy wording of CT2 (h) Dwelling for a carer or someone availing of care to read: ‘the dwelling is in the form of an extension to an existing dwelling to form a separate but attached residential unit, or change of use of an existing building within the curtilage to form a separate residential unit.’
- Include at end of policy CT2: ‘A 5 year occupancy condition will be used where a personal and domestic circumstances case, a caring case or a business enterprise case is presented. In instances where a property which is subject to an occupancy condition is re-processed, the removal of this occupancy condition will be permitted to allow for re-sale of the property.’ Occupancy conditions will not be placed on a case for a retiring farmer.

Implementation of Recommendation(s)

The majority of the recommendations regarding policy CT2 have been implemented and brought forward in the policy contained within the draft Plan Strategy. The changes to subtitle (d) as proposed in the Public Consultation Report have not been implemented with the criteria entitled “conversion / re use of existing buildings for residential use.” Likewise, the caveat “as verified by DAERA” has not been included in criteria (e).

Do you agree with Policy CTY3- Social and Affordable Housing? Should the number of social and affordable housing in the countryside but adjacent to or near a village or

small settlement be limited as defined in PPS 21?

Consultation Bodies Response

NIHE have stated that they would like a separate policy for affordable housing, a single policy which sets out the approach for such housing types in both urban and rural areas.

Response from the Public

No comment on this specific issue.

Consideration

The policy approach for social and affordable housing is clearly identified in the residential development in urban areas and housing in the countryside sections of the POP. Therefore we are content that a separate stand-alone policy section for social and affordable housing is not required.

Recommendation:

- **Confirm policy wording of CT3- Social and affordable housing to remain as published in the POP.**

Implementation of Recommendation(s)

Recommendation has been carried through from POP to draft Plan Strategy.

Do you agree with the principle to retain and protect our Dispersed Rural Communities (DRCs) Policy CT4?

Consultation Bodies Response

The Department of Infrastructure (DfI) has pointed out that there is no provision within the SPPS for DRC's and therefore the Council must have robust evidence to support their inclusion in the LDP. They also go on to express concern at how the 'kinship'/ connection with an area or of social / economic contribution tests within DRC policy can be defined and enforced.

NIHE does not support the principle of retaining DRC's within the District. They argue that such designations are unsustainable because they create isolation, harm well-being, challenge the growth of small settlements and also encourage increased use of the public car. They also point out that they are not provided for in regional policy. NIHE are also concerned that the requirement under DRC policy for the applicant to have a strong connection to the area or make a substantial economic or social contribution will eliminate some section 75 groups from being applicable and could by association have equality implications for those from minority racial or ethnic backgrounds and this would be contrary to the aims of the Plan.

Response from Public

There were three representations in favour of the principle of retaining the existing DRCs. Two responses favoured designating new DRC's because these designations can underpin rural vitality and viability and would assist the regeneration of rural areas. Carntogher Community Association voiced concern that the existing DRC designation was too restrictive and asked that it could be reviewed. They also request that Carntogher is given a special designation as an 'emerging Gaeltacht', and afford it flexibility in developing a range of enterprises associated with language and cultural development. A comment recorded at a public meeting voiced support for the concept of DRC's which are "organic to the area."

One representation from a private planning consultancy argued against the concept of designating DRC's because they are not in keeping with the SPPS and therefore, option 1 (remove DRC's) would be their preferred option.

One representation requested that 2 new DRCs be identified at Annahorish. One at the cluster of development at 128a Creagh Road sprawling south and west and another at the Hillhead Road and Deer Park Road junction beside Annahorish P.S and SDC trailers. Another representation has welcomed and encouraged the discussion around DRCs and suggests the 'Lough Shore' area as a potential candidate although does not go any further in designating a specific area / location. At a public exhibition in Maghera a request was made for more DRC's in the Magherafelt area, possibly around Lisnamuck.

One comment made at a public meeting queried what would constitute a contribution to the community. They queried would it apply to a local school teacher, owner of a local shop for example?

Consideration

Although there is no provision within the SPPS regional policy for DRC's there is provision within the retained policy of PPS21 which is stated as retained policy within the SPPS. Whilst there is no provision for DRC's in the SPPS, their inclusion in the new LDP would adhere to the sustainability objective of the SPPS to manage growth to achieve appropriate and sustainable patterns of development which will support a vibrant community. Mid Ulster District has 3 DRC's at present. We consider that these existing DRC's contain unique rural communities which deserve to be sustained and protected. Between 1/6/2010 and 30/09/2016 only 12 dwellings were granted planning permission within the existing 3 DRCs in the Mid Ulster District. Therefore such designations have not been the subject of excessive development pressures and we are satisfied that they should remain within the LDP.

Given that the purpose of a DRC is to promote rural regeneration we consider that the best way of doing this is stating that the applicant must make a substantial economic or social contribution to that community. Taking on board some of the comments raised we consider that the one of the suggested criteria options, where the applicant

has a strong connection to that community, could be legally challenged and should not therefore be applicable. The policy wording for Policy CT4- Dispersed Rural Communities will be updated to reflect this change, see recommendations below.

Both potential policy approach options, Option 1 to remove all reference to DRC's in the LDP and Option 2 to identify and renew new DRC's in the LDP have been subject to the sustainability appraisal. The SA ascertained that our preferred approach, Option 2, is likely to have positive social effects as it will help facilitate residential development in areas that suffer from social disadvantage. This may have other potential positive social effects including allowing more people to remain within their own communities thereby improving well-being. The SA recognises that the preferred approach will have negative environmental impacts such as increased traffic generation however it scores positively in terms of economic effects as it would facilitate economic development.

The strategic policy for DRC's, Policy CT4, will be amended for the draft Plan Strategy as stated in the recommendations below. The existing 3 DRCs in the Mid Ulster District will be retained for now until the Local Policies Plan (LPP) comes forward. The criteria for establishing DRC's is identified in the recommendations below. The suggested potential DRC candidates and exact DRC designation areas will be assessed in the LPP. The criteria for the identification of rural communities include a traditional focal point, with some physical sense of place and convincing evidence of local community activity serving a wide rural area.

Recommendations:

- **Policy wording of CT4- Dispersed Rural Communities amended to read: 'A single dwelling in a DRC will conform with the plan where the applicant can demonstrate they make a substantial economic or social contribution to that community'. Wording that the applicant 'has a strong connection to that community' to be removed.**
- **Draft Plan Strategy to include the criteria for designating DRCs along the following lines:**
 - ***association with a traditional focal point, where there is convincing evidence of local community activity; with the existence of social and recreational facilities, such as a church, hall, school, community centre or sports club;***
 - ***other facilities or services, such as a shop, public house or sewage treatment works;***
 - ***a strong community identity. This could manifest itself through a local community association, church organisation or sports club; and***
 - ***a locally significant number of dwellings that have been built over time. Although these places are not nucleated settlements, they will have to be more than just open countryside. A build-up or cluster of recently built houses will normally not be considered as fulfilling this criterion.***
- **The existing 3 DRC's will be retained until the LPP comes forward. Potential new DRC candidates / actual DRC designation areas to be identified in LPP.**

Expand policy to state: ‘This policy will be subject to review to ensure that it is a response to low development pressures and if these areas become subject to undue development pressure the policy will be removed.’

- **‘Clachan style’ development to be described in amplification of this policy as per Building on Tradition Design Guide.**

Implementation of Representations

The recommendations have been implemented with the policy wording being evident in the draft Policy and descriptions Clachan style development also being included in the third paragraph of the justification and amplification. Criteria for designating DRC’s has not been included but is contained within SP7 of the Spatial Vision part of the Strategy.

Do you agree with suggested Policy CT5- Temporary Caravans / Mobile Homes?

No comments were made on this issue and therefore the approach within the POP should be confirmed.

Should existing rural design guidance be tailored for Mid Ulster?

Consultation Bodies Response

No comments on this specific issue.

Response from the Public

One specific comment was made on this issue with the view being expressed that Building on Tradition is an effective document and that the Mid Ulster countryside is not sufficiently different to merit its own bespoke design guidance document. Another comment, whilst not expressing an opinion on the merits of bespoke guidance, expressed the opinion that Building on Tradition should be given particular attention, therefore giving tacit approval to the document in its current form without being tailored to our District.

Consideration

We consider that the Departments generic design guidance including Building on Tradition fills the design guidance void across the whole Mid Ulster District. However we believe it would be beneficial over time for design guidance to be done for particularly scenic areas such as Slieve Gallion. The actual production of the LDP would be the priority document to be published and adopted however this design guidance work could be undertaken at a later stage. Nevertheless, a devoid of design guidance for specific locations has not been unduly problematic as the Department (previously the DoE) have been operating without design guidance for certain scenic locations for years.

Recommendation:

- **Consider and decide whether existing regional design guidance should be tailored for the Mid Ulster District.**
- **Decide whether additional design guidance for specific areas eg, AONB areas should be provided following adoption of the LDP**

Dwelling for a Fisherman.

The concept of a dwelling for a fisherman was raised both at a public meeting and at a meeting with members of the Sinn Féin political party. Sinn Féin raised concern that farmers benefited in being able to obtain a dwelling in the countryside and this was not equal for other primary sector workers i.e. those who worked in the fishing community. They state that fishing is an important economic activity and employer in the Mid Ulster District.

Given that the Mid Ulster District includes the western portion of Lough Neagh and its substantial western shoreline area the Planning Department consider that the concept of a dwelling for a fisherman should be further considered.

Regional Strategic Policy & Mid Ulster LDP Objectives

As there is no provision within existing regional policy, either the SPPS or PPS21 for a dwelling for a fisherman, we must ensure that there is a robust evidence base if we are to bring forward this additional development opportunity. We must also ensure that this criteria approach can be monitored and controlled in order to ensure aligns with our plan objectives to provide for vital and vibrant rural communities whilst protecting the countryside and to promote diversity in the range of jobs recognising the importance of employment in the primary, secondary and tertiary sectors. This information is detailed below.

Key Issues to Consider

The draft Lough Neagh Fisheries Management Plan 2015 (published then by DCAL, this now is the responsibility of the Department of Agriculture, Environment and Rural Affairs DAERA) states that fishing activity on Lough Neagh is dominated by commercial fishing which is controlled by the Lough Neagh Fishermen's Co-operative Society (LNFCS). It states that locally the Lough Neagh eel fishery is worth approximately £3.2m to the NI rural economy and supports over 300 families along the Lough Shore. It is recognised as the largest remaining commercial wild eel fishery in Europe, producing 16% of total EU landings and supplying 3.6% of the entire EU market in 2007- a truly indigenous industry. The management plan states that eel fishing has been a major industry on Lough Neagh for centuries, that traditional skills are passed down to each successive generation within families and that many of the traditional methods of eel fishing are still used.

The LNFCS have secured Protective Geographical Indication (PGI) for the Lough Neagh eel, which was awarded in 2011. This award recognises the heritage, tradition

and authenticity of the best quality eels in Europe.

The LNFCS have provided the Planning Department with the following information regarding fishing activity on Lough Neagh. There are two types of commercial fishing licences / permits in operation on Lough Neagh:

- (1) An eel fishing permit and
- (2) A scale fishing permit

Both types of permits are authorised by the LNFCS. For clarification, DAERA under statutory regulations authorise licences for the operation of different categories of fishing gear such as fishing nets (technical term- fishing engine).

Eel permits

Authorisations take two distinct forms: 1) Boat Owners Licence and 2) Boat Helpers licence. All such licences are renewable each season and therefore valid only for that particular season. The vast majority of the Boat Owners licences are issued to the same fishermen year after year. EU regulations have restricted and controlled the intensity of fishing therefore no new or additional Boat Owners Licence have been issued since the early 1990s but there is a facility for the transfer of existing licences based on specific qualifying criteria which essentially facilitate the transfer of the licence to a person who has operated as a Boat Helper for an extended period of years in that same boat. Therefore it is not possible for someone with no fishing background or history of having held Helper's Licences to acquire a boat owner's licence. It is much easier to acquire a Boat Helper's licence provided that you have been nominated by the Boat Owner (all of whom are self-employed). Since boat helpers are traditionally family member then the transfer of the boat owner's licences normally takes place within families. LNFCS have indicated that therefore there is a very strong family / historic connection. For the current eel fishing season, beginning 01 May 2017 there have been 108 boat owner licences issued together with 119 helpers licences (some boats have more than one helper) i.e 227 individual fisherman.

Scale Fish Permits

A permitting system was introduced for scale fish was introduced in 2016 by the LNFCS (as the fishery owner) based on a previous record of the fishermen having held relevant DAERA licences for fishing gear. More than 250 fishermen qualified for consideration. LNFCS have no plans to add to the current list of fishermen who might qualify for a scale fishing permit. They state that this matter will be reviewed in 2020 but is already massively over-subscribed should all those who have applied take up the offer of a permit. In the year to 28th February 2017 a total of 78 commercial scale fish permits were issued plus 78 associated assistants permits i.e. 156 permits in total.

The licensing /permitting system is based on agreed criteria determined by the Management Committee of the Co-op annually. Currently the criteria includes:

- Have a DAERA licence (fishing gear)
- Name an assistant (minimum of 2 persons per boat in interests of health and safety)

- Have a boat of a minimum size (7 metres)
- To agree and abide to the Co-op's rules and regulations.

There is a degree of duplication with some individuals holding both an eel boat owners licence and a commercial scale fish permit. LNFCS have confirmed that in total (with no duplication) there are approximately **299** individuals who have been issued with one of the following; boat owners licence (eels), boat helpers licence (eels), scale fish permit (as scale fish boat owner) or scale fish assistant permit.

LNFCS confirmed that in total **142** individuals with boats licenced to fish on Lough Neagh (for both eels and scale fish). Assuming over the plan period that all of the boat owners licencee's applied for a dwelling, which is unlikely, this would only result in under 10 dwellings per annum. This equates to 1.29% of the 11,000 Housing Growth Indicator (HGI) figure allocated for the Mid Ulster District over the plan period.

The age profile of those engaged in eel fishing (i.e boat owners and helpers combined) is approximately as follows:

| Age profile | Commercial eel fishing | Commercial scale fishing | Total |
|-------------|------------------------|--------------------------|-------|
| 70 years + | 13.6% | 10.3% | 23.9% |
| 60- 70 yrs | 19.8% | 16.0% | 35.8% |
| 50- 60 yrs | 26.4% | 24.4% | 50.8% |
| 40- 50 yrs | 17.2% | 20.5% | 37.7% |
| 30- 40 yrs | 12.8% | 17.3% | 30.1% |
| < 30 yrs | 10.1% | 11.5% | 21.6% |

LNFCS have stated that because the age profile of the fishermen is now very high they wish to find ways of attracting and keeping younger people in the fishing industry in the locality. They state there is a unique cultural and heritage associated with fishing on Lough Neagh as skills and expertise have been handed down through successive generations. They have confirmed that 61% of all eel fishermen (owners & helpers) on Lough Neagh reside in MUDC area and 64% of all scale fishermen (permit holders & assistants) on Lough Neagh reside in the MUDC area. LNFCS have stated of those fishermen who live in the MUDC area 45% live in the eastern portion of postal district BT80 (to the east of both Cookstown and Drumullan area and includes Coagh and Moortown areas) and 45% live in the northern half of postal district BT71 (north of Coalisland- includes Stewartstown and Ardboe areas). A map depicting these postal district areas is in Appendix 1.

Taking into account the data and issues identified above we are of the opinion that a dwelling for a fisherman/ person new development opportunity should be introduced to the Mid Ulster District LDP. In order to ensure that the outcome of this new development opportunity can be effectively quantified and to protect the environment

from inappropriate development we are of the opinion that this opportunity should be permitted for those with a commercial boat owners (eel / scale fish) licence only.

Dwelling for a Fisherman Policy Approach Options:

To meet our objectives and address the issues outlined it is considered that there are three options to the policy approach to a dwelling for a fisherman.

Option 1- Do nothing

This option would mean as per existing regional planning policy there is no provision for a dwelling for a fisherman in the countryside and that this issue would not be deserving of a specialised policy. However as acknowledged above fishing is recognised as an important primary economic activity; an indigenous industry to the MUDC area. There is a unique cultural heritage associated with fishing on Lough Neagh as traditional skills and expertise are passed down through successive generations. It is important that such skills are retained for future generations. It could be argued that other primary sector workers such as forestry workers would be disadvantaged in this new development criteria was introduced as there is already development opportunity within existing regional policy for farmers. However forestry is not considered an issue which is specific to the MUDC area.

Option 2- A land based designation approach

This option would identify a new designated area wherein a dwelling for a fisherman could be accommodated. Given the information detailed above regarding where existing fishermen reside it is considered appropriate to identify an area along the Lough Neagh shoreline as identified in Appendix 1. The proposed SCA and any floodplain areas along the shoreline will be excluded from this new designated area. It is considered that this designated area is likely to be sustainable both socially as this is where a high percentage of the existing fishermen live who can pass down their skills to their local communities and environmentally as it will keep travel distances to and from work on the Lough to a minimum.

Option 3- Identify a Dispersed Rural Community (DRC) area wherein dwellings for fishermen can be accommodated

This option would identify a new DRC area in proximity to the Lough Neagh shoreline. This DRC area would enable dwellings for fishermen to be accommodated within it and will equally apply to others who meet the existing DRC criteria i.e where an applicant makes a substantial economic or social contribution to that community. However the Lough Neagh shoreline area is not considered a remote area. There are a number of existing settlements located in this area including Ballyronan, Ballinderry, Ardboe and Killeen. There are also numerous existing road linkages to both the north and south of the MUDC area and the M1 motorway is located near to the south of Lough Neagh. Therefore it would be difficult to identify this area as a DRC as would not comply with the strategic criteria set for identifying new DRC candidates in terms of remoteness and promoting rural regeneration. Additionally the identification of this

area as a DRC may potentially result in an excessive number of dwellings which could have potential negative environmental impacts upon Lough Neagh and its environs.

Preferred Option

Option 2 is the preferred option. It is considered that fishing is an important economic activity specific to the the Mid Ulster District (particularly eel fishing). The land based designation approach is the most appropriate approach which will facilitate new dwellings for fishermen in an area where many of the existing skilled fishermen currently reside. It is considered that this option will not have a significant impact on the environment due to the low number of dwellings, only 1.29% of the HGI figure for the plan period, likely to be permitted under this option.

As the proposed development opportunity for a dwelling for a fisherman introduces a new policy approach the suggested three options above have undergone an initial Sustainability Appraisal (SA).

In order to monitor and control the quantum of dwellings for a fisherman in the Mid Ulster District we have formulated the following policy criteria that will be used to determine any such development proposals:

- **Applicant must have resided in the Mid Ulster District for a minimum of 6 years prior to date of the application**
- **Applicant must have held a commercial eel and /or commercial scale fishing boat licence for not less than 6 years and has not obtained planning permission for a dwelling in the last 10 years from the date of the application. It should be noted that if the applicant possesses both a commercial eel and commercial scale fish boat licence (2 commercial boat licences) only one dwelling will be permitted.**
- **Special attention must be given to integration of the dwelling.**

In terms of monitoring the Planning Department will review the number of commercial boat licences being authorised over the plan period. If there appears to be a significant increase in the number of commercial boat licences being issued as an apparent result of this new policy development opportunity then the policy opportunity for a dwelling for a fisherman can be removed from the LDP at either the 5 or 10 year plan review stage. The Planning Department will liaise directly with the LNFCS to monitor the number of licences authorised as these are issued on a seasonal basis (have to be applied for and authorised each year). Another means of ensuring that this additional development opportunity would not be subject to over-use would be to attach an occupancy condition to the planning permission. However an occupancy condition is not placed on planning permissions granted for a dwelling for a retiring farmer and therefore it is not considered reasonable to apply occupancy conditions to permissions for a dwelling for a fisherman.

Recommendation

- **Include policy approach for a fisherman as per Option 2 above and within the area outlined on the map at Appendix 1.**

Implementation of Recommendation

Fisherman criteria has been included, as per the recommendation. See criteria (f) of CT2.

Health, Education and Community Uses

Q. Do you agree with policy COY 1 – Community uses?

Consultation Bodies Response

NIHE agrees with the proposals and proposed policy wording of COY 1 – Community Uses. DFI - Rivers Agency highlighted that this policy makes no reference to sustainable flood risk management.

Response from the Public

MAG stated that over and above protecting land for such use the LDP should make provision in its policy requesting future health/ education facilities are developed to integrate into their context town, contributing to a socially cohesive society / safer streets. They also made the request that all new health developments in Mid Ulster contribute to positive walkable neighbourhood environments. They agree that community uses could be located within DRCs or existing non- farm clusters in the countryside depending on their size / scale. The Specialist Joinery Group stated that the POP should have a bespoke policy for community uses in urban areas.

Tyrone County GAA Committee said the unique position of GAA in providing top quality community based facilities across the district should be recognised / acknowledged in the plan and accommodated by planning policy. Any new developments should be facilitated by planning policy.

Workspace Ltd welcomes policy COY1 wording but believes option of community use proposals in truly rural/open countryside settings should be kept open e.g. church/parish and/or GAA related projects. They state that this possibility seems recognised by Policy OS4 in PPS 8: Open Space, Sport and Outdoor recreation.

Consideration

We note NIHE's agreement with the proposals and proposed policy wording of COY 1. Flood risk management is dealt with in in the Flood risk section of the POP. The LDP will follow a precautionary and sustainable approach to the management of development and flood risk.

In response to MAGs suggestion the LDP make policy provision for future health / education facilities to be designed / developed to integrate into their context town, please note such proposals will be subject to Policy COY 1- Community Uses and

GP1 - General Principles Planning Policy, amongst other potential policies, depending on the site and specific proposal. This could include urban design policies which support good design and positive place-making thereby promoting accessibility.

We do not consider that a bespoke policy for community uses on urban areas is required. The suggested policy COY 1 outlines the relevant planning considerations for community use development proposals and these can relate to proposals irrespective of being located in an urban or a rural location.

It is recognized that there are many organizations providing community based facilities across the district. This has been appraised in detail in position paper 9: Open Space, Recreation and Leisure. This is acknowledged in the POP as it states that the District 'has a proud tradition of sports clubs already located in the countryside'. The suggested Policy OS 3 is more flexible than the existing regional policy and therefore would be more accommodating to outdoor sports provision and recreation, subject to complying with all other relevant planning criteria.

Policy OS4 refers to Indoor Sport and Intensive Outdoor Sports Facilities and states 'within the countryside small scale indoor sport and recreation facilities will accord with the plan provided: (a) it is outside a village or small settlement where there is no alternative site available within the settlement which could accommodate the development, it is located close to the edge of the settlement and is visually associated with it; (b) it is part of a farm diversification or tourism project; or (c) it involves the re-use of an existing locally important building.' However the suggested Policy OS 3 is more flexible and accommodating than the existing regional policy, it allows for outdoor sports provision and recreation in the countryside subject to complying with all other relevant planning criteria such as noise impacts.

Recommendation

- **Retain the suggested policy approach and policy wording for Community Uses.**

Implementation of Recommendation(s)

Policy has been retained as per recommendation

Urban Design

BUILDING HEIGHT POLICY

Q. Is it important to protect established built height (Policy UD 1)? Is requesting a D&AS for proposals above 2-3 storey height reasonable?

Consultation Bodies Response

NIHE notes the restriction of building heights and believe this approach is appropriate for this area, unless there are overriding reasons set out in a D & AS, or if new design guidance for settlements sets out a proposal for a taller building, e.g. at a gateway site. They state that in some instances, such as a town centre location, a minimum building height of two stories could be set within a KSR of the design guidance for settlements.

Response from the Public

MAG responded stating that it's important to protect established building height. They state that Mid Ulster towns have a relatively unified height character, although there are slight variations which add positively to character. They believe however it is important to control excesses, either inappropriately high or low.

Turleys Associates asserted that there was duplication between this policy and the General Principles Policy (GP 1) which also references building heights.

A response from the Specialist Joinery Group states that MUDC must bear in mind that some economic / employment development has operational requirements which will dictate a need for buildings over this height.

Consideration

NIHEs support for the building height policy is noted and we recognise that some employment developments require large building accommodation. It is deemed that the submission of a D & AS for any proposal greater than 2-3 stories provides sufficient opportunity for such proposals to be fully considered. As stated in the General principles section, we will remove the criteria regarding building height from Policy GP 1 and retain in this Urban Design Policy, UD 1, only in order to avoid duplication. It is considered that the building height policy relates to urban areas only and therefore is not particularly relevant to the general principles policy which is for all development proposals regardless of their location.

PUBLIC REALM

Q. Does a landscape entrance to our settlements matter? Should we consider reducing the impact from car parking by landscaping? (Policy UD2)

Consultation Bodies Response

DfI: Transport Planning and Modelling Unit stated the opportunity has been missed to address how transport can contribute to place making. They suggest that parking has the potential to contribute to place making e.g. the relocation of car parking to reduce vehicle dominance in town centres. Reference is made to the Local Transport Plan which shall be prepared in conjunction with LDPs up to 2019 as required.

Response from the Public

MAG responded stating that the policy wording should be amended to 'encourage well

designed surface car parks whose scale/ size is appropriate to the context and within which soft landscaping is purposefully designed and integrated'. They suggest that the policy wording should include that development should 'foster natural surveillance, promote personal safety and deter crime.

Consideration

Car parking is an important facility in towns in order to maintain a successful town centre. Therefore we consider it important to protect the existing town centre car parks. Presently town centre car parks are identified for protection within the Dungannon and Cookstown area plans. The suggested policy states that 'development is adequately designed to promote personal safety and deter crime'. The suggested wording presented by MAG is noted and will be considered in the final drafting of the policy.

MATERIALS AND DETAILING

Q. Should the local policies plan bring forward design requirements in relation to fenestration, materials and details? (Policy UD 3)

Consultation Bodies Response

NIHE stated they would like to see the 10 qualities or principles of urban design included in 'Living places', incorporated within an LDP policy to give them weight. These qualities include contextual, visionary and vibrant and diverse.

Response from the Public

MAG have responded stating in general that design of new development should draw upon the best local of form, materials and detailing. They caution however regarding writing design requirements into the LDP on fenestration / materials stating this would be too prescriptive and likely to stifle the very creativity that will add to vibrancy and distinctiveness. They contend that that respecting the traditional details / materials of an area matter but that this should not mean slavish transfer of such to a modern building. They believe that new and innovative designs should always be encouraged.

Turleys associates state that this policy duplicates the suggested General Principles policy in relation to form and materials.

Consideration

Existing supplementary planning guidance including 'Living Places' has been considered in evidence gathering and formation of the POP.

As the SPPS places particular importance on the careful consideration of materials and detailing in its core planning principles, we consider that a design policy stating that development should draw upon the best local traditions of form, materials and details would be appropriate. Suggested policy UD 3 states that development should respect the surrounding context and character of an area. However we acknowledge

that new / redeveloped buildings and their surroundings can have a significant effect on the character and quality of a place and can create the context for future development. And that the planning system has a positive role in making successful places through its influence on the design and materials of development. Applicants have an opportunity to demonstrate quality by providing a design and Access Statement as part of their application.

The urban design policies relate to the urban areas only. The General Principles policy relates to development proposals at any location.

SETTLEMENT SPECIFIC DESIGN GUIDES

Q. Should design guides be prepared for particular settlements after the plan is complete?

Consultation Bodies Response

No specific representation received on this question.

Response from the Public

Four representations believed there was merit in preparing design guides for particular settlements although one of these responses stated that they should be guidance only.

Consideration

It is our opinion that the production of design guidance will allow for the individuality of each settlement to be reflected and ensure that guidance is tailored to reflect these circumstances. This guidance could be contained at the introduction to each settlement within the Local Policies Plan.

Recommendation:

- **To retain 2-3 storey building height standard (policy UD 1) and policies UD 2 and UD 3 with opportunity for applicants to submit a Design and Access Statement for any proposals higher than this / any proposals where there is uncertainty regarding**
- **To retain policies UD 2 and UD 3 as set out in the POP.**

Implementation of Recommendation(s)

Policy UD 1 has been reworded to amalgamate all the elements of UD 2 & 3, which have now been removed. We have removed the restrictions on building height from

the policy wording but retained this element within the justification and amplification of the policy with an option for the applicant to submit a design and access statement as a means of demonstrating a high quality of design which could justify a higher building height.

Open space, Recreation & Leisure

Q. Do you agree with the preferred approach and Policy OS 1 regarding protection of open space?

Consultation Bodies Response

NED welcome the councils preferred option. They also welcome the inclusion of the principle of compensation for loss of open space and recommend that the land provided in compensation should be comparable to that which is lost.

Response from the Public

One representation, from MAG, stated that much of the existing open space is poor and therefore not worthy of protection. Stating that focus should be on the protection of 'high quality' open space only and that new development must create or enhance high quality open space.

Four representations all from a private planning consultant suggested that the suggested policy for the protection of open space is reworded to reflect the current policy in the SPPS.

Consideration

This suggested policy includes compensation measures such as the use of 3G sports pitches to allow for the provision of more intensive recreational uses. The intention of this policy was to ensure that the land provided in compensation is comparable to that which is lost. The policy wording will be expanded in the final drafting to ensure clarification of this.

We recognize the importance of safeguarding all open space irrespective of its physical condition or appearance, in line with the SPPS, as we feel it is in keeping with principles of environmental conservation and helps sustain and enhance biodiversity. Open space, sport and outdoor recreation are important components of life. They provide many cultural, social, economic and environmental benefits and contribute positively to physical and mental health and a better quality of life. Given this we consider it appropriate that any exception to the loss of open space be required to demonstrate substantial community benefits and ensure that there is no significant impact on open space provision, amenity, character and biodiversity of an area.

Recommendation

- Retain preferred approach regarding protection against the loss of open space
- Retain suggested policy OS 1- Protection of Open Space but expand wording to include that ‘adequate’ compensatory measures should be ‘comparable to that which is lost’.

Implementation of Recommendation(s)

Policy has been carried forward to draft Strategy and the proposed policy wording has been included.

Q. Do you agree with the approach taken in relation to the protection of River Corridors and are there any other Main Rivers to which Protection of River Corridors policy should apply, Policy OS 2?

Consultation Bodies Response

NED welcome this suggested policy.

Response from the Public

One representation proposes the removal of the “10m” requirement from the proposed policy wording. They argue that it is not appropriate to put such a specific distance on a biodiversity strip and that site specific circumstances should dictate.

Another representation, from the RSPB, welcomes the policy but suggests ‘significantly adverse impact’ is an unacceptably high threshold and it should be amended to read ‘there is no detrimental impact on biodiversity or on sensitive environmental areas and features’ & should apply to all river corridors.

Consideration

We would like to clarify that this suggested policy relates to the main rivers within the district which are: Ballinderry, Moyola, Blackwater, Bann and Owenkillew. A paragraph describing this was omitted from the published version of the POP in a mis-print error. The paragraph in question should read as follows:

‘To protect our inland bodies of water that offer important opportunities for sport and outdoor recreation; and act as a visual amenity, it is considered that the following policy, which would apply to the main rivers in the District (Ballinderry, Moyola, Blackwater, Bann and Owenkillew) is appropriate for the new LDP. It is considered that there is no alternative option to this approach for Mid Ulster’

The 10m biodiversity strip would relate only to the main rivers as stipulated above. This suggested size was taken from guidance within PPS 15, Planning and Flood Risk, and will allow access and egress (working strip) for relevant Departments / bodies i.e Rivers Agency. PPS 15 states that ‘the retention of a working strip along watercourses will have added benefits, including general amenity, enhanced biodiversity and

increased control over water pollution, the latter assisting in the implementation of the Water Framework Directive'. Therefore we are of the opinion that the suggested biodiversity strip should remain on the particular rivers identified. We agree that 'significant adverse impact' is an unacceptable high threshold and consider that 'an unacceptable adverse impact' would be a more appropriate policy test.

Recommendation

- **Retain suggested policy OS 2 but amended wording to read 'an unacceptable adverse impact' on nature conservation as opposed to a 'significant adverse impact'.**

Implementation of Recommendation(s)

Policy has been carried forward to draft Strategy and the proposed policy wording has been included.

Q. Do you agree with the suggested policy approach and policy wording regarding outdoor sport and recreation, policy OS 3?

Consultation Bodies Response

NED point out that with a more permissive approach to outdoor sports facilities, there is increased potential for conflict between floodlighting and bats which are sensitive to such development. It is also important that the policy highlights what "wildlife" will potentially be sensitive to the proposed development as this is a very general term (OS3).

Response from the Public

The RSPB responded stating that they consider this to be a weakening of existing regional policy, that the provisions do not include the requirement to demonstrate no detrimental impact on biodiversity or on sensitive areas and features. They recommend the existing SPPS/PPS8 approach is adopted.

Consideration

We consider that we have taken a balanced approach, recognising the need for Mid Ulster's proud tradition of sporting clubs in countryside locations to develop as well as putting the onus on the applicants to demonstrate that any development will not result in unacceptable levels of disturbance to people living nearby, farm livestock, and wildlife. All applications will be assessed via the general principles planning policy to ensure that potential effects on landscape character including features and sites designated for their contribution at any level and biodiversity are considered. Potential issues such as the conflict between floodlighting and bats will be highlighted in the amplification of this policy in the draft Plan Strategy. The term 'wildlife' has been taken

from PPS 2 Natural Heritage and the Wildlife Order (NI) 1985 and refers to all wild birds and certain animals (as stipulated in the Order). It also includes prohibiting the intentional and reckless destruction, uprooting and picking of certain wild plants.

Recommendations

- **Retain preferred approach and suggested policy OS 3 regarding Outdoor Sport and Recreation**
- **Highlight potential issues in the amplification of this policy to include conflict between floodlighting and bats.**

Implementation of Recommendation(s)

Policy carried through with additional reference included to impact on people instead of just on farm animals. The reference to the impact of floodlighting on bats, has been made in the Justification and Amplification.

Q. Do you agree with the preferred approach and suggested policy wording regarding indoor sport and intensive outdoor sports facilities, policy OS 4?

Consultation Bodies Response

No Response on this issue.

Response from the Public

No Response on this issue.

Consideration

The suggested policy involves a relaxation in relation to the provision of indoor sport and recreation so small scale facilities can be developed outside villages and small settlements to reflect the predominantly rural population in Mid Ulster and predominance of clubs and societies. The policy also requires that indoor sports facilities continue to be provided predominately within settlement limits and where there are no sites available a sports stadium may be acceptable close to the settlement limit. We feel that this is an appropriate approach because Mid Ulster's settlement pattern in the countryside and it has such a proud tradition of sports clubs already located in the countryside,

Recommendation

- **Confirm the preferred approach and suggested policy OS 4.**

Implementation of Recommendations

The approach and the policy have been carried through to the draft Strategy. There is a slight change in that the policy now first addresses towns and then includes a line

on other settlements rather than simply addressing “settlements” in general.

ECONOMIC POLICIES – CREATING JOBS AND PROSPERITY

Economic Development

Do you agree with the preferred policy approach- a more flexible economic development policy approach tailored to Mid Ulster?

Consultation Bodies Response

DFI advise that the suggested policy options should be set within the context of regional policy in order to be considered realistic. Where it is proposed to depart from the approach set out in SPPS & RDS, they stress the need for councils to provide evidenced justification for doing so.

In relation to Option 1 i.e. ‘Adopt existing policy’, DFI considers that the Council’s precis of the transitional operational policy in PPS4 to be a ‘misleading simplification’.

DFI advises that PPS 4 does seek to restrict the level of new building outside settlements but does not forbid such development referencing policies that permit Major Industrial Development (PED 5) & small Rural Projects (PED 6) in countryside locations subject to sustainability criteria.

DFI have expressed concerns regarding the use of a 2006 Planning Service survey of employment on industrial estates in Omagh/Strabane which suggests 50 jobs provided for every 1 ha of industrial land. They consider that more recent data, relating specifically to the Mid Ulster area, may provide greater clarity to current situation regarding employment/economic uses in district.

Response from the Public

There has been a mixed response from the general public. Although many individuals and private businesses across the district support a more flexible approach to economic development, others raise concerns that it may result in a greater potential for affecting neighbouring amenity, particularly in rural areas. Several respondents state their support for a flexible approach, subject to amenity issues being adequately considered.

One respondent, although in favour of MUDC's preferred approach, suggests that policy should include comment on the need to create significant landscape buffers at the edge of commercial / industrial sites.

Another respondent would like to see more flexible economic development zonings to facilitate employment uses such as call centres, care homes, showrooms, hotels etc. with possible mixed use residential element and not just limited to Class B Industrial and Storage Uses. Several respondents have suggested that in order to demonstrate flexibility, policy should refer to "employment" development / zonings rather than "economic" or "industrial" zonings.

It has also been suggested that, since the Mid Ulster economy is 'dominated and driven by small, indigenous business' the LDP must reflect this reality and support small business creation, survival and growth.

Workspace Ltd feels that Draperstown's role as an 'economic powerhouse' within the district has not been adequately reflected and supported by the plan.

A representation from the Oaks Centre in Dungannon that there is no specific policy for the delivery of office accommodation.

Consideration

All comments received in support of MUDC's preferred approach to economic development have been noted.

DFI have raised several points of concern. As outlined in the POP, Mid Ulster requires the creation of at least 8500 jobs over the plan period. Manufacturing industry is currently a major employer (27.5% compared to an NI average of 10.9%) although this

is not anticipated to grow in the forthcoming year. The agri-food and construction industries are also important employers. The district is characterised by 'home grown' industries and a high level of self-employment (19% of the males are self-employed compared to NI average of 14 %, 2011 Census). It is considered that the preferred approach suggested takes account of existing economic circumstances specific to the Mid Ulster District and potential areas for economic growth over the plan period. It is considered that this approach accords with Strategic Planning Guidelines outlined in the POP as well as stated plan objectives including, to recognise the importance of self-employment and homeworking, to promote diversity in the range of jobs, to accommodate entrepreneurship and to support rural businesses.

DFI have raised concerns with the misrepresentation of the current policy approach to PPS 4. We acknowledge that current policy PPS 4 'Planning and Economic development' *does* facilitate rural business start-ups in certain circumstances as per policies PED 5 and PED 6. DFI have also expressed concern with the use of 2006 figures from Omagh/Strabane district which suggests that for every hectare of operational industrial land, 50 jobs are provided. This figure has been supported by earlier studies in Craigavon and was used as a basis for quantifying industrial needs in the Cookstown and Dungannon Area plans. The Planning Department consider that our industrial base is similar to that of Omagh. However planning staff are currently undertaking further research work in terms of establishing baseline figures for the average number of jobs per hectare which are specific to the Mid Ulster District. These updated figures, if differing from the 50 jobs per hectare calculation, will be used to inform decisions on the amount of land to be zoned for economic development over the plan period the draft Plan Strategy.

We note the suggestion to include landscape buffers as a policy requirement. It is considered that this may be particularly relevant for edge of settlement/edge of RIPA locations where visual impact may be greatest. Although suggested General Principles includes a requirement to protect and/or enhance landscape character, consideration will be given to the inclusion of specific landscaping Key Site Requirements for individual sites where appropriate in either the draft Plan Strategy or LPP.

We note comments made in relation to the lack of flexibility of economic development zonings and the suggestion for economic development zonings to be referred to as 'employment' zonings to 'demonstrate flexibility and encourage growth'. A key function of the plan, as required by the SPPS, is to zone sufficient land for '*economic development*' over the plan period. Economic development uses comprise industrial, business and storage and distribution uses, as defined in part B 'Industrial and Business Uses' of the Planning (Use Classes) order (Northern Ireland) 2015. In order for the Planning Department to ensure that sufficient land is zoned for economic development it is calculated, i.e 50 jobs per hectare, for economic development use only. Our suggested policy, ECON 3 states that lands zoned for economic development (existing and proposed) will be protected from change of use to other land use classes. This safeguards lands zoned for economic use to ensure there is ample supply of suitable land available to meet economic development needs over the plan period. However suggested policy ECON 3: Protection of Zoned Land and

Existing Economic Development Sites, also includes exceptions. This policy will allow other development proposals (ie. those in a separate land use class) if it can be demonstrated that they will deliver important community and employment benefits. Another exception is that the change of use of existing economic development land, or land last used for these purposes, may be permitted where there is no need to protect it for employment purposes and where the redevelopment of the land would result in environmental benefits. It should be noted that the Planning Department have written out to all zoned industrial landowners which have not progressed or do not have commitments in terms of planning permissions. We are currently considering responses received and aim to ensure any possible future lands to be zoned in the forthcoming plan are available and deliverable. In addition it is important to bear in mind that the economy also relies on other important employment uses including those associated with the retail and service sectors which are best located within town centres. The strategy and policy approach for town centres and retailing is addressed separately in the POP within the town centre and retailing section.

One respondent stresses the need for economic policy to reflect the situation in Mid Ulster which is characterised by small, home grown businesses. This distinguishing feature of the Mid Ulster district has been acknowledged in the POP and associated policy review/position papers. At pre-POP councillor workshops there was general consensus that current regional policy fails to recognise the importance of home grown industries and businesses in term of local employment generation and economic prosperity. This forms the background to our suggested policy approach and we have incorporated more flexible tailored economic policies in the POP which seek to facilitate economic development provided proposals comply with general planning principles such as environmental, noise, amenity and traffic impacts.

We acknowledge comments made in relation to Draperstown village and the role it plays/can play in terms of job creation. In terms of villages generally, the POP sets out to maintain and consolidate their role as local service centres providing opportunity for housing, employment and leisure activities in keeping with the scale and character of individual settlements (SPG 4). Although paragraph 6.86 of the SPSS states that 'within villages and small settlements, the LDP will not normally zone land for economic development purposes' paragraph 5.24 states that 'The Local Policies Plan may bring forward local site specific designations (e.g. zonings and policy areas) associated policy criteria and KSR's consistent with the Plan Strategy. Whilst the main industrial zonings will be located in the hubs we recognise the importance of industry and economic development, both existing and proposed, in supporting the vitality of rural communities. Indeed Industrial Land Use Policy Area's are already designated in Draperstown (Magherafelt Area Plan 2015) and our Strategic Settlement Evaluation Position Paper acknowledges the considerable quantum of industry and business uses located within this village. The Planning Department recognizes that within some villages/small settlements one large employer can be important, and in other villages / small settlements where there has been a very active economic community the settlements themselves can act as a key economic driver.

Recommendations

- **Retain the suggested preferred approach to Economic Development Policy.**
- **Use information gathered from industrial landowners to determine deliverability of existing economic zoned sites.**
- **Reallocate for alternative use existing economic development sites where the potential future use for economic development purposes is not considered realistic.**
- **Range / type of economic development uses that will be acceptable within zoned industrial designations will be specified in the LPP eg. by use of Key Site Requirements.**

Implementation of Recommendation(s)

The approach from the POP is mirrored in the draft Plan Strategy. The exercise regarding the deliverability of existing economic zonings is ongoing and economic zonings will be brought forward in the Local Policies Plan with the exception of an interim supply in Granville, which will be included in the draft Plan Strategy. Zonings brought forward will be accompanied by Key Site Requirements.

Do you agree with Policies ECON1- Economic Development in Settlements and Policy ECON2- Economic Development in the Countryside?

Consultation Bodies Response

DFI requests clarification on the Councils proposals in relation to the provision of workshop developments within the countryside; workshop accommodation in association with a dwelling; proposals for offsite expansion of existing rural enterprises & those for small economic enterprises on edge of settlement locations. They advise that in the interests of rural amenity/ sustainability objectives the level of new building outside settlements should be restricted and are concerned that this approach may not be consistent with regional policy. They advise that more detail is required to determine alignment with SPPS.

NED are concerned with the proposed relaxation of rural economic policy. They advise that if this approach is pursued then certain mitigation measures should be implemented; sensitive quality design which takes account of landscape character and biodiversity, size restrictions, limits on growth allowed on a site, control of advertising, landscape proposals to mitigate visual impacts.

NED welcome the policy proposal of re use of existing buildings in the countryside although they would recommend that protection of species which are currently using the buildings is highlighted in policy.

NIHE agree with policy ECON 1 and ECON 2 in so far as it relates to workshop development and farm diversification projects. They would like to see a sequential approach to the location of land zoned for economic development where settlements are first explored and location outside of limits are considered in exceptional circumstances.

Response from the Public

There has been a mixed response to the issues raised. Policies that support the expansion of rural businesses, accommodate workshop style development in rural areas and allows for small enterprises on edge of settlement locations have been either welcomed, or welcomed as long as local amenity is not unacceptably affected. Others are directly opposed to a more relaxed approach in rural areas due to the increased risk of nuisance and bad neighbourliness.

One respondent believes there should be no floorspace restriction on small workshop accommodation, where it can be demonstrated that development can still take place appropriate to the scale and nature of the use provided. Workspace Ltd have also expressed concerns with the suggested size restriction. At a meeting with Cookstown and Western Shore Area Network, concern was raised that the 100sqm floor-space was too small given that engineering was the prevalent business type in the district. It was stated that many businesses, particularly in the western Lough Shore area, where either engineering businesses or related spin-off / sub contract engineering works which would require larger floor-spaces.

The Ministerial Advisory Group (MAG) agree with the suggested removal of floor space restrictions within settlements to a degree, suggesting that proposals for economic development in towns should be facilitated in cases where the 'size/scale/form/massing can be integrated into the existing context without being detrimental to town character'.

MAG also suggest that the 'the centre of a settlement' should be considered as a location for the development of a small rural community enterprise centre or economic development prior to rural locations in the context of policy ECON 2 and would also like to see greater consideration given to 'countryside setting and biodiversity quality' in the context of major industrial proposals in rural areas.

RSPB have expressed concern that suggested policy does not contain a requirement to demonstrate that there is no detrimental impact on biodiversity or sensitive areas and features.

Invest NI have requested clarity on how we proposes to test proposals under policy ECON 2 where it states that proposals will need to be 'firm and not speculative'.

One respondent doesn't agree that policy should remove floor-space restriction in settlements but rather each case needs to be considered on its own merits and space restrictions applied to ensure that multiple units are not amalgamated to produce larger units.

The use of the word 'small' in the context of small rural enterprises / centres was queried at a public exhibition.

Consideration

We note concerns raised by DFI. It is acknowledged that regional policy advocates a restriction on rural economic development for sustainability and amenity reasons. The SPSS states that the guiding principle of policies for economic development in the countryside is to facilitate proposals likely to protect the rural economy and support rural communities, while protecting or enhancing rural character. The SPSS also advises that it may be appropriate to include additional policies specific to issues pertaining to a plan area, depending upon the Councils objectives and local circumstances. It is considered that our suggested preferred approach and accompanying policy ECON 1 and ECON 2 takes into account local economic circumstances particular to the Mid Ulster District i.e. home grown industries and high self employment levels as referred to earlier, and accords with the POP's Strategic Planning Guidelines (SPG's) and objectives to accommodate entrepreneurship and innovation. All new development proposals will be assessed via the general principles planning policy to ensure impacts upon neighbouring amenity are limited and that appropriate consideration is given to potential effects on the environment. Like all other suggested policies, economic policies continue to be assessed against agreed sustainability objectives on an ongoing basis as part of the SEA/SA process.

It is considered that issues raised around signage, landscape, design, conservation can be addressed via the suggested general principles planning policy GP1. In relation to size restrictions, it should be noted that a 100 sq.m size limit has been proposed for small workshop development. This size limit is considered appropriate in terms of encouraging new rural business start-ups and protecting amenity. Applicants can then apply for expansion within the curtilage of an established economic development use and this will be assessed on a case by case basis. We always have the ability to control issues such as over-development which affects amenity through determining applications using the general principles planning policy. We are in agreement that the protection of species re use of existing buildings in the countryside is important and this issue will be highlighted in the final drafting of policy ECON 2 in the Plan Strategy.

We note support from MAG regarding the removal of floor space restrictions within settlements, Policy ECON 1. It is considered that the suggested policy wording, in tandem with general principles policy, will ensure that 'size/scale/form and massing' and 'town character' will be given due consideration in economic development proposals within settlements.

We consider that a sequential approach in policy ECON 2 for small community enterprises / centres would be too onerous a policy test for applicants. This policy does state however that where practicable an edge of settlement location will be favoured. We consider that this more permissive policy approach, within which impacts on amenity will still have to be considered, will encourage more start-up businesses in the rural area.

Comments from RSPB and MAG regarding lack of reference to biodiversity interests are noted. We are satisfied however that, although not explicitly stated under policy ECON 2, all other planning policies would remain relevant i.e for example, General Principles (1)Biodiversity as well as relevant Natural Heritage Policies, thereby

ensuring that natural heritage issues are addressed and considered. That being said, there is a possible inconsistency in that suggested policy ECON 1 references General Principles Policy whereas suggested policies ECON 2, 3 and 4 do not. The General Principles Planning Policy will be amended to state that all applications / development proposals will be assessed via this policy to ensure clarity.

Regarding the comments that it may be difficult to provide adequate tests for whether or not proposals are 'firm and not speculative' as stated under policy ECON 2 we consider that the submission of a business plan by the applicant may be considered sufficient to demonstrate a 'firm' proposal. This will be clarified in the amplification of this policy in the draft Plan Strategy.

It is considered that concerns raised regarding the lack of a floor space restriction within settlements and potential amalgamation of multiple units can be addressed on a case by case basis and controlled by suitable planning conditions.

The wording small rural enterprises already exists in current regional policy PPS 4; Policy PED 6- Small Rural Projects. This existing policy does not define a floorspace limit for what constitutes being defined as small. To date this has not been a problematic issue for the Planning Department and therefore we do not believe it necessary to be overly prescriptive in setting an exact threshold to quantify 'small'.

While not raised by any representations it is considered that the economic policy should continue to include the provision within Policy CTY8 of PPS21 which allows for consider the infilling of such a small gap site with an appropriate economic development proposal including light industry where this is of a scale in keeping with adjoining development, is of a high standard of design, would not impact adversely on the amenities of neighbouring residents and meets other planning and environmental requirements.

Recommendation.

- **Confirm the preferred approach and suggested policies ECON 1 and 2**
- **Provide clarification in the amplification of Policy ECON 2 to state that a business plan can be used to demonstrate a firm economic development proposal**
- **Expand wording of Policy ECON 2 to include reference to protection of species which are using buildings (regarding re-use of existing buildings in the countryside)**
- **Include consistent referencing to the General Principles Policy within economic policies or place a statement at beginning of the general principles policy emphasizing that all applications / development proposals will be determined in accordance with this policy.**
- **Include infill aspect of Policy CTY8 of PPS21 in ECON2 in relation to economic development.**

Implementation of Recommendation(s)

As mentioned above, the approach from the POP has been mirrored in the draft Plan Strategy with the inclusion of criteria for an appropriate economic use in a small gap site. . Amplification to ECON 2 includes reference to the need to protect species which may be using buildings. The amplification also includes the fact that a business plan can be used to demonstrate how the development in question constitutes a firm proposal.

With regard to the recommendations relating to the general principles section, reference has been made at the start of policy GP1 which indicates that all applications for development will be subject to the provisions of that policy.

Do you agree with suggested Policy ECON 3 – Protection of Zoned land and Existing Economic Development Sites?

Consultation Bodies Response

No response received.

Response from the Public

MAG recommends that suggested policy ECON3 should include 'place-making & social cohesion' benefits as well as community/employment benefits' and include at end of policy environmental 'and/or agricultural cultivation' benefits.

Specialist joinery group welcomes the simplified policy approach to policy ECON 3 although suggests that exception to policy should read 'community and/or employment benefits'.

Although Invest NI welcomes Policy ECON 3 regarding 'community and employment benefits' they consider the change of use provision within 'settlements' appears be a relaxation of PPS/SPPS and suggests that the test for determining need should be suitably robust.

Consideration

It is considered that community/employment benefits may also encompass 'placemaking and social cohesion' benefits and that environmental benefits may also encompass 'agricultural and cultivation benefits' without the need for either to be explicitly stated in policy as suggested. We consider the existing wording to be appropriate and not unduly prescriptive.

It is considered that amending policy wording to read 'community and/or employment benefits' as suggested by the Specialist Joinery Group would result in a significant relaxation to policy, contrary to the aims of the SPPS. We believe the suggested wording is more appropriate as it will allow for both community and employment benefits as opposed to only one or the other.

We consider the suggested policy to be appropriate as it allows for sufficient protection of existing zoned land while still allowing for scenarios where the land could be developed for an alternative use provided that important community and employment

benefits can be demonstrated. We are in agreement that this would be a more flexible approach than that of the SPPS, however such proposals would only be permitted where it can be clearly demonstrated that there is no need to protect any such lands for employment purposes. We also concur that the test for determining need should be robust.

Recommendation

- **Retain Policy ECON 3 for draft Plan Strategy**

Implementation of Recommendations

Policy has been brought forward

Do you agree that the existing policy approach provides suitable protection from incompatible land uses to existing industrial sites? (Policy ECON 4)

Consultation Bodies Response

No response received.

Response from the Public

Although Invest NI welcomes policy ECON 4 it suggests that for purposes of clarity the phrasing of the proposed policy should include 'new or expanded' development in the vicinity of an existing or approved economic use, as per the SPPS.

Consideration

We consider the suggested wording 'a proposal for development in the vicinity of an existing or approved economic use' is appropriate in itself. The suggested additional wording is not required.

Recommendation

- **Confirm suggested policy ECON 4 for draft Plan Strategy**

Implementation of Recommendations

Policy has been brought forward

Do you agree with the principle that the Plan should contain Rural Industrial Policy Areas (RIPA's)? In addition to the suggested candidates are there any other candidates which you think should be considered?

Consultation Bodies Response

DFI consider there to be a lack of clarity regarding the reason for designating/identifying Rural Industrial Policy Areas for e.g, whether these are to consolidate existing development or whether further opportunities would be provided. They have expressed concern that such designations may further hamper the uptake of economic development land within hub settlements. They suggest that the approach appears to conflict with SPG 2 in POP which seeks to focus growth in 3 main hubs & 'strengthen their roles as administrative/trade/employment & residential centres. DFI reminds us that in order to be considered sound the LDP should set out a coherent strategy from which policies and allocations logically flow.

Response from the Public

All of the representations received regarding RIPA's were in support of this concept and several requested that their lands be included as RIPA's.

Quarry Plan, who have responded on behalf of 10 companies related to the mineral industry, suggests that mineral development projects should be included as candidate RIPA sites given the significant contribution they make to the economy and their rural location.

At one of the public meetings, the inclusion of Fivemiletown as a candidate Rural Industrial Policy Area was queried by one respondent, as in their view there was little rural industry in or around it to justify such a designation.

Consideration

The Planning Department notes the concerns raised by DFI. The primary aim of the RIPA is to protect existing industrial, business and storage and distribution uses in rural areas. We consider it appropriate to designate RIPAs as this recognizes the importance of clusters for the expansion of rural industry and of allowing an opportunity to expand rural business and employment uses. It is contended that their inclusion reflects the local needs of Mid Ulster which is characterised by 'home grown' industries and high self-employment (19% of the males are self-employed compared to and NI average of 14, 2011 Census). This approach accords with SPG 6 which sets out to 'accommodate development within the countryside that supports the vitality and viability of rural communities'.

We consider that the suggested RIPA candidates: The Creagh and the area around Sandvik (between Ballygawley and Cabragh) to be two strategically important locations where there is a considerable amount of existing industry. We suggest utilizing these existing clusters and identify these two locations in the Plan Strategy as RIPAs. Given the number of representations requesting their lands to be considered as candidate RIPAs we consider that these should be appraised and if found suitable be identified in the Local Policies Plan. The criteria for identifying / designating RIPAs

will be set out in the Plan Strategy.

We note the suggestion by one respondent to include mineral development projects as potential RIPA's. However it should be noted that we recognise the important role of quarries in terms of their contribution to the economy and will endeavor to ensure they are being facilitated subject to compliance with all relevant planning policies. Quarrying is considered to be a distinct in land use in terms of economic development and specific policies for this development type is dealt with in Minerals section of the POP.

Recommendation.

- **Identify criteria within the draft Strategy for the identification and designation of Rural Industrial Policy Areas (RIPA's).**
- **Designate lands at Sandvik and Creagh as RIPA's in the draft plan Strategy**
- **Appraise and potentially identify other potential RIPA candidates in the LPP.**

Implementation of Recommendations

Criteria for designating RIPA sites has been included in the Plan Strategy as part of SPF 6. Having considered potential Strategic RIPA sites, it has been decided that designations should be brought forward at Sandvik and Desertcreat. A significant proportion of land in and around Creagh is located within the Q100 flood plain and therefore a designation will not be brought forward here. Other non-strategic RIPA sites will be brought forward in the LPP. A supplementary technical paper on RIPA's is published on Mid Ulster Council's website alongside the draft Plan Strategy.

Town Centres and Retailing

Q. DO YOU SUPPORT A TOWN CENTRE FIRST APPROACH FOR MID ULSTER?

Consultation Bodies Response

Northern Ireland Housing Executive have expressed support for the proposed retail strategy which implements the town centre first approach, as well as the proposed planning policies. In addition, they would also like to see more housing being encouraged in the town centres.

With regard to adjoining councils, Derry and Strabane District Council have acknowledged that the proposal to put town centres first is in line with the SPPS.

Response from the Public

Support for the town centre first approach was expressed by Dungannon Regeneration Partnership, who argue that this approach will help ensure the vitality of the town centre and would be in keeping with the SPPS as well as Magherafelt Town Centre Forum who also expressed their support as did Matrix Planning Consultancy.

There is also support from individual representations for the town centre first approach,

with some adding that within town centres, the Primary Retail Core (PRC) should be the preferred destination.

The Oaks Centre in Dungannon make the additional argument that areas designated as District Centres should be considered as special cases and whilst there is a town centre first approach, these areas should still be viewed as places wherein retail development should be both protected and promoted. They also argue that in Dungannon in particular, given the steep topography of the area around the edge of the town centre, some sites in this area may not be capable of being developed. In such cases, there should be a “modified sequential test” which would see sites away from the edge of centre being developed.

The Henderson Group pointed out the need for local convenience shopping which is extremely important in non-town centre locations to be acknowledged within the POP.

Consideration

The responses to the proposed town centre first approach contained within the POP are positive. No representations were in opposition to this approach with the general consensus being that it will promote vitality in town centres and is in line with regional policy.

With regard to the suggestion of an exception for District Centres and specifically the Oaks Centre in Dungannon it is important to note that the town centre first approach means that Dungannon town centre is afforded priority when it comes to retail development. Regeneration of Dungannon town centre is considered to be a priority. The fact that the Oak Centre is presently a District Centre in the extant Area Plan means that retail is protected there at present and would continue to be in the new local development plan. According to the SPPS, District / Local centres are designed to protect the retail offer within them. Extensions in these areas only being permitted where no impact will be had on town centre and the area should be complimentary to the town centre. By creating an exception to the town centre first approach which would allow retail development to locate freely in local / district centres, then the role of these locations would become more significant and could threaten or challenge the role of the town centre as opposed to being complimentary in nature.

It is not felt that issues of topography in Dungannon are so insurmountable that the town centre first approach (which would see edge of centre being the next preferred location) should be set aside for a “modified sequential test.” This is not an issue that has been raised by any other representation. Each application will be assessed on its own merits and the strengths and weaknesses of each site will be considered on an individual application by application basis.

The need for local convenience shopping outside of town centres is understood. However, the policy thrust of town centre and retail policy is to preferably have retail proposals located within town centres and this is supported by the SPPS. The POP seeks to make provision for the acceptability of smaller retail development outside the town centre and stipulates an acceptable threshold for such development. Crucially however, there is flexibility afforded within the relevant policy for retail development

which is over the threshold providing it does not have a significant adverse impact on a neighbouring settlement or existing retail.

Recommendation

- **Proceed with town centre first approach;**
- **Existing District Centres to remain as designated in the extant Area Plan and therefore they continue to be protected with only minor extensions to such permitted on its merits and provided it is demonstrated there is no impact on the town centre.**

Implementation of Recommendation(s)

A town centre first approach has been carried through into the retail policies of the draft Plan Strategy. The policies show that retail development in a Primary Retail Core or in a Town Centre will accord with the Plan. Outside these areas, a need must be established and it must be demonstrated that there will be no impact on the Town Centre.

A District Centre designation at the Oaks Centre is retained in the Plan Strategy as per the boundaries in the Dungannon and South Tyrone Area Plan.

Q. IS THE PROPOSED RETAIL STRATEGY THE CORRECT APPROACH FOR MID ULSTER? DO YOU AGREE WITH THE PROPOSED RETAIL HIERARCHY?

Q. DO YOU AGREE WITH THE INTRODUCTION OF A DISTRICT CENTRE AT SWEEP ROAD COOKSTOWN?

Consultation Bodies Response.

The retail hierarchy is acknowledged by Causeway Coast and Glens Borough Council and no objection is expressed toward it. Derry and Strabane District Council interpret that the Retail Hierarchy places out of town retail outlets ahead of edge of centre supermarkets and that this seems to be at odds with the policy wording of suggested policy RE 3.

Response from the Public

Responses from planning consultants also made the point about policy RE3 being at odds with the Retail Hierarchy, the same point which was made by Derry and Strabane District Council.

In terms of the retail hierarchy Dungannon Regeneration Partnership disagree with the designation of the Oaks Centre as a District Centre even though they are in agreement with the principle of designating local and district centres across the Plan Area in general. They do not outline their reasons however, simply state that they do not support the Oaks Centre being designated as such. Cookstown Town Centre Forum do not support the designation of a District Centre at Sweep Road and stated that it should be left as it is and not designated. The reason for this lack of support focuses on their opinion that there is limited capacity for growth at the site.

Some Planning Consultants also did not support the designation of a district centre at Sweep Road because it does not have “sufficient range of shops and non-retail services.” They cited PAC report 2013/C001 to support this argument.

An individual representation from a local landowner also expressed disagreement at the designation of a District Centre at Sweep Road, arguing that the main arterial road into the town is in need of regeneration and the placing of a District Centre at Sweep Road will be barrier to regeneration of the Chapel Street and Church Street areas while another individual representation also argued against the designation because of the need to protect the town centre.

One individual representation argued that more flexibility is needed in the retail hierarchy in order to allow more services to be located in the rural area in order to enable settlements (specifically Cappagh) to meet the day to day needs of residents.

Consideration

Derry and Strabane District Council along with some planning consultants interpret the retail hierarchy as being at odds with policy RE3. In response to this, the “out of town retail outlet centre” element of the hierarchy relates specifically to the Linen Green in Moygashel / Dungannon as a stand-alone site which has important links with the town’s heritage. Therefore, this aspect of the retail hierarchy does not mean that out of centre locations are to be favoured over edge of centre locations, as the representations seem to be suggesting. It is felt that clarity is needed on the specific point of the Linen Green and the most appropriate way to do this is to remove it from the retail hierarchy and its status would remain as it is currently i.e. an out of town retail for a specialist market where the conditions attached to its grant of planning permission continue to restrict how it develops.

There is a distinct lack of support for the designation of a District Centre at Sweep Road in Cookstown with all representations on the matter being in opposition. One reason for not supporting it is that there is little or no room for the site to grow or expand. However, the principle of designating a District Centre is to protect existing retail which is on offer within the site and to ensure that the site remains in a complimentary nature to the town centre, not to grow or expand and be in competition with the town centre (as suggested in one representation). The designation of a District Centre could of course have the effect of containing the area so that it does not start to compete with the town centre.

This same argument can be used to ease fears that the designation will have a negative impact upon other parts of the town, namely the Chapel Street / Church Street area.

There are credible arguments put forward in opposition to a District Centre at Sweep Road and it is therefore considered that the Plan should not take this approach forward without the support of the town centre forum and wider public. The District Centre at the Oaks Centre exists within the extant Area Plan and while one representation states that it should not be designated, there is no credible evidence or justification provided for this position.

Recommendation

- The District Centre at the Oaks Centre Dungannon remains in the retail hierarchy as set out in the POP however scope for major expansion is not provided for.
- The Retail Hierarchy should be amended to remove the status of the Linen Green within it. The Plan should recognise that the Linen Green does exist and that it provides out of town shopping to a specialist market in and therefore out of town planning controls apply to it and any proposal to expand would be assessed in line with such policy.
- A District Centre at Sweep Road Cookstown should not be designated on the basis that there has been no support put forward for such a designation.

Implementation of Recommendations

A District Centre at the Oaks will not be brought forward as part of the Plan process. The Linen Green has been removed from the retail hierarchy in order to remove any appearance or interpretation that it would receive special or favourable standing. Applications for the extension of the Linen Green will be treated in line with Out of Town Centre Policy.

No District Centre designations will be imposed at Sweep Road, Cookstown as part of the Plan process.

Q. SHOULD LOCAL AND VILLAGE CENTRES BE DESIGNATED?

Consultation Bodies Response

The consultation bodies expressed no views in relation to this specific issue.

Response from the Public

Dungannon Regeneration Partnership supports the designation of local and village centres although did not give any reason for this. Matrix Planning Consultancy also supported the designations.

Square Holdings Ltd made the argument that Moygashel should be designated as a local centre.

The Henderson Group in their representation argue against the designation of local or village centres, stating that villages in themselves were already acting as a centre in the wider rural context.

Consideration

We note the views of Henderson Group and Dungannon Regeneration Partnership in relation to whether or not the LDP should designate local or village centres. We also note the support for Moygashel to be designated as a local centre. Since these are matters for the Local Policies Plan further consideration will be given to this issue for the second stage of the process.

Recommendation

- **The Local Policies Plan will consider whether there is a need to identify a local or village centre in any settlement in Mid Ulster and if such a centre/designation is appropriate then tailored policy will be provided for that centre/designation.**

Implementation of Recommendation(s)

No local centres will be brought forward as part of the Plan process.

SHOULD EXISTING TOWN CENTRE BOUNDARIES BE EXTENDED AND IF SO WHERE?

ARE THERE ANY OPPORTUNITY SITES WHICH SHOULD BE INCLUDED WITHIN TOWN CENTRES?

Consultation Bodies Response

The consultation bodies expressed no views in relation to this specific issue.

Response from the Public

Cookstown Town Centre Forum suggested that the town centre could possibly be extended in order to ensure that some retailers weren't disadvantaged in terms of grants and funding.

Dungannon Regeneration Partnership request that Railway Park be removed from the town centre. In relation to designating Opportunity Sites within the Town Centres, DRP believe there is no value in doing this as there is no incentive for town centres to be developed, hence the reason that only 2 out of 8 opportunity sites in the extant Area Plan have been developed thus far in Dungannon.

Magherafelt Town Centre Forum would support a review of the town centre and would like to be involved in that process.

An individual representation proposed a site at the rear of 18-20 Scotch Street, Dungannon as an opportunity site which they suggest could also be included in the PRC.

Consideration

It is apparent that there is some support for reviewing and amending the town centres in each of the three main hubs and this is something which will be addressed. Retail studies and related town centre health checks will be carried out on behalf of the council in advance of the Local Policies Plan and these, along with comments and representations received to the POP will help to inform the designating of town centre boundaries. It is not considered that town centres should be designated simply to enable retailers to avail of funding but that footfall, land use typologies, car parking availability, among other things will be the main considerations. In addition, and to ensure consistency, it is recommended that the town centres in all 5 towns be reviewed

for the preparation of the Local Policies Plan

Additionally site specific case/ opportunity sites will be assessed for the preparation of the Local Policies Plan.

Recommendation

- **Review the town centre boundaries in the 5 main towns for the Local Policies Plan and further engagement will take place with the town centre and regeneration partnerships/forums in undertaking this exercise.**
- **Retail studies and town centre health checks to be carried out to inform the review of boundaries.**

Implementation of Recommendation(s)

This process is ongoing as part of the Local Policies Plan.

ARE YOU IN AGREEMENT WITH THE EXTENT OF THE PRIMARY RETAIL CORES (PRC)?

Consultation Bodies Response

The consultation bodies expressed no views in relation to this specific issue. Causeway Coast and Glens Borough Council has noted the designation of them but express no opinion them.

Response from the Public

An individual representation proposed a site at the rear of 18-20 Scotch Street, Dungannon as an opportunity site which could also be included in the PRC. This would involve the extension of the existing PRC and indeed a slight extension of the proposed PRC as well. This representation therefore, is supportive of the proposed extension to the PRC but would support and argue for a further extension.

The same representation also appears to ask for a more general expansion of the PRC in Dungannon to include various opportunity sites within the town centre. They argue that this will bring about a larger retail offering with more choice and depth.

Cookstown Town Centre Forum also expressed the view that the PRC in Cookstown might be extended to include Station Square at Molesworth Street, Coagh Street, Orritor Street, Union Street and potentially extend it further along the Burn Road.

Matrix Planning Consultancy expressed their agreement with the proposed Primary Retail Core's shown in the POP.

Consideration

General consensus would suggest that the PRC's should be expanded and this is something which is being proposed in the POP. Some representations would like to see the PRC's of the various towns expanded even further, with specific reference to individual sites. In order to address this it is recommended that the PRC's as

suggested in the POP are brought forward in the Plan Strategy as a temporal measure and we will then look holistically at the PRC's along with the town centre boundaries and opportunity sites for the LPP.

No representations were received which requested that areas be removed from any of the proposed PRC's.

Recommendation

- **Proceed with proposals for PRC's suggested in the POP as a temporal measure and review these further in the round with the town centre boundaries and opportunity site for the Local Policies Plan.**

Implementation of Recommendation(s)

Primary Retail Core designations for the three main towns and two local towns have been brought forward as part of the draft Plan Strategy.

SHOULD A SEQUENTIAL TEST I.E. PRIMARY RETAIL CORE, TOWN CENTRE, EDGE OF CENTRE BE ADOPTED?

Consultation Bodies Response

The consultation bodies expressed no views in relation to this specific issue although as highlighted earlier there was support for the town centre first approach.

Response from the Public

The Ministerial Advisory Group (MAG) have expressed their support for the sequential approach to town centre / retail development.

As already mentioned, the Oaks Centre in Dungannon have argued for what they call a "modified sequential test." They are of the opinion that topography issues make some edge of centre sites in Dungannon less desirable and therefore development should be facilitated at town centre and edge of town centre locations as well as at the Oaks Centre.

Consideration

There have been no objections to the adoption of a sequential test for town centre / retail development, just a suggested modification in the case of Dungannon. The issue of topography in Dungannon requiring a modified sequential test has already been addressed earlier in this section and is not felt to be an insurmountable issue which would require deviation from the main policy approach. It is therefore recommended that the sequential test be included in the draft Plan Strategy.

Recommendation

- **Confirm inclusion of a sequential test of Primary Retail Core, Town Centre, Edge of Centre within the policy in the Plan Strategy.**

Implementation of Recommendation(s)

The sequential approach is clearly outlined in Planning Policy included within the draft Plan Strategy, particularly RE1 and RE4. This is evident both in the policy wording and in the Justification and Amplification. The Justification and Amplification for RE 4 even contains a default distance threshold of what can be considered as an edge of centre location.

SHOULD SHOP UNITS WITHIN THE PRIMARY RETAIL CORE (PRC) BE PROTECTED?

Consultation Bodies Response

Northern Ireland Housing Executive (NIHE) has expressed agreement with the proposed wording in all the policies and one of these is RE2 which seeks to protect against significant loss of retail and a proliferation of non-retail uses in the PRC. No other consultation body expressed views in relation to this specific issue.

Response from the Public

The Ministerial Advisory Group (MAG) have requested that policy allows residential uses within the Primary Retail Core including LOTS the re use of vacant shop units. They also request that the presumption against the loss of ground floor shop units in the PRC is set aside when there are chronic issues of retail vacancy and dereliction.

Dungannon Regeneration Partnership are supportive of the provision of RE 2 but would argue for the removal of the criteria which does not allow more than 3 non retail uses at ground level and that the area overall is tending to be dominated by non-retail uses.

Magherafelt Town Centre Forum support the protection of the Primary Retail Core, whilst Matrix Planning Consultancy also support the protection of shop units within the PRC.

One individual representation whilst not advocating support for protection of shops in the PRC did say that new retail development should be focused upon the PRC.

Consideration

No responses suggested that shops should not be protected within the primary retail core. Magherafelt Town Centre Forum and Matrix Planning Consultancy both expressed agreement while MAG and Dungannon Regeneration Partnership were not in disagreement but would like to see some flexibility added into our policy wording.

The proposed policy does not protect all shops in the PRC in a “blanket ban” style policy approach which would see all proposals for changes of use from shop to non-retail development refused planning permission. It does allow some small scale development of this nature providing there is not a significant loss of retail floor space nor a contribution to a proliferation of non-retail uses.

In the PRC, MAG would advocate the availability of town centre living in schemes such as LOTS as well as the re use of vacant shop units. Town centre living in schemes

like LOTS would be acceptable in the town centre and the PRC. However, to allow the re use of shop units for residential accommodation at ground floor level would be unacceptable and would result in a significant loss of retail space. MAG's other suggestion that non retail units in the PRC may be acceptable in cases where there is a "chronic issue of retail vacancy & creeping dereliction" are not applicable to either of the main hubs in Mid Ulster-there is no evidence of this being the case in Mid Ulster.

Dungannon Regeneration Partnership made the argument that two of the criteria which must be met in order for non retail development in the PRC to be acceptable, should be removed and therefore make the policy more flexible. However, it is felt that the removal of the suggested criteria would result in a considerably weakened level of protection for retail uses in the PRC and could conceivably allow a trend to develop whereby non retail uses are dominant in the PRC. It is therefore considered that shop units should be protected by this policy.

Recommendation

- **Include policy which protects shop units in the PRC.**

Implementation of Recommendation(s)

This has been implanted in the draft Plan Strategy as Policy RE 2.

ARE THERE ADEQUATE CONSTRAINTS ON RETAIL DEVELOPMENT OUTSIDE OF TOWN CENTRES?

Consultation Bodies Response

NIHE has expressed agreement with the proposed wording in all the policies and one of these is RE3 which seeks to limit development outside of town centres. No other consultation body expressed views in relation to this specific issue.

Response from the Public

The Oaks Centre agrees that in general there are adequate constraints on development outside of the Town Centre, but as mentioned before, they go on to make the argument that the Oaks Centre is a special case.

Dungannon Regeneration Partnership (DRP) agrees with the aim of constraining development outside town centres but argue that the policy needs to be more vigorous in order to avoid impact on town centres. For example, they believe that any development outside the town centre with floor space of over 150sq. metres should be subject to a retail impact assessment.

Henderson Group have put forward the argument that the tests for retail development outside of a town centre should only apply to large comparison stores or major convenience retail. Local convenience retail outside of town centres should be acceptable in their opinion. They state that "constraints on locally accessible, convenience retailing outside of town centres are wholly inappropriate."

Consideration

DRP suggest that policy to protect town centres should be made more rigorous in order to provide better protection. The only method they propose for doing this is to lower the threshold for the requirement of a Retail Impact Assessment. Para. 6.283 of the SPPS states that "All applications for retail or town centre type developments above a threshold of 1000 square metres gross external area which are not proposed in a town centre location and are not in accordance with the LDP should be required to undertake a full assessment of retail impact as well as need." Therefore, the provision in RE 3 which states that Retail Impact Assessment applies to sites over 1000sq metres is in line with regional policy.

In response to Henderson Group's representation, local convenience shopping will be acceptable in out of town centre locations and this has been made clear in other policies (e.g. RE4, 5, 6) as has been acknowledged by Henderson's. If the retail proposal is over a certain size threshold (100sq. metres) then it will have to assess all available sites in town centre or edge of centre locations as these are the preferred destinations for retail in line with the "town centre first" approach, or outside of towns (villages, small settlements) it will have to prove that there will be no impact on existing retail or neighbouring settlements. No evidence has been brought forward to suggest that the parameters within the suggested policy should be altered and therefore it is recommended that it should remain in the draft Plan Strategy as suggested in the POP.

Recommendation

- **Proceed with proposals within the POP in relation constraints on development outside of the Town Centre.**

Implementation of Recommendation(s)

The proposals in the POP have been carried forward into the draft Plan Strategy, especially the threshold of 100 sq. metres and the need for an assessment of sites available within the Town Centre as well as the 1000 sq. metre threshold for Retail Impact Assessment which has been carried forward into the draft Plan Strategy.

SHOULD THE THRESHOLD FOR THE SUBMISSION OF A RETAIL IMPACT ASSESSMENT BE SET AT 1,000 SQ. METRES?

Consultation Bodies Response

NIHE has expressed agreement with the proposed wording in all the policies and one of these is RE 3 which states that the threshold is 1,000 sq. metres, so agreement can be assumed in this regard. No other consultation body expressed views in relation to this specific issue.

Response from the Public.

The Oaks Centre and Dungannon Regeneration Partnership (DRP) disagree with the

proposed threshold. The Oaks Centre assert that the figure is arbitrary and no longer based on any evidence, although they themselves have failed to provide any evidence as to why it is no longer an acceptable figure. DRP want the threshold lowered significantly to 150 sq. metres in order to provide more protection to town centres. It is assumed that their logic being that lower threshold for retail impact assessment will discourage developers from applying for out of centre development.

Consideration

There appears to be equal levels of agreement and disagreement with the proposed threshold for retail impact assessment of 1,000 sq. metres.

The Oaks Centre's view that it as an arbitrary figure no longer based in evidence, is easily countered with the fact that the figure is in line with regional policy and therefore not arbitrarily assigned by MUDC. It would appear that DRP seek to lower the threshold to protect the town centre by discouraging developers away from out of centre sites and this is not considered to be an appropriate reason for amending the threshold.

Neither of those in disagreement have given any credible reasons as to why the threshold of 1,000 sq. metres should not be used and because of this coupled with the threshold being in line with the SPPS, it is felt that the 1,000 sq. metres threshold is appropriate and should be included in the draft Plan Strategy.

Recommendation

- **Adopt 1000 sq. metre threshold for Retail Impact Assessment in line with regional policy and note in our policy that where development is above 1000sq.m they are required to submit an RIA in addition to undertaking an assessment of alternative/available sites.**

Implementation of Recommendations

The 1000 sq. metre threshold for Retail Impact Assessment has been carried forward into the draft Plan Strategy.

ADDITIONAL ISSUES FOR CONSIDERATION - NOT ADDRESSED BY KEY QUESTIONS.

100 SQUARE METRES FLOORSPACE FOR SMALLER RETAIL DEVELOPMENT.

The single biggest additional issue which was raised the unacceptable nature of the 100sq. metre "threshold" for small retail development outside of town centres, for neighbourhood shops and for retail development in villages and small settlements.

Policy RE 3 states that development outside a town centre over 100sq. metres will be required to assess alternative sites nearer or in the town centre. Policy RE 4 states that neighbourhood shops will be acceptable in mixed use areas providing they do not exceed 100sq. meters floor space while RE 5 states that development over 100 sq. metres will only be permissible where it can be demonstrated that it will not impact negatively on existing retail or a neighbouring settlement.

The Henderson Group have repeatedly made the argument that in shops of this size are no longer feasible. They point out the success of the large forecourt with associated supermarket / hot-food / deli / coffee dock etc. and argue that Mid Ulster must be aiming to encourage convenience retail outside the town centres, in villages and small settlements. They claim that the average size of a modern spar is 3-4,000 square feet (270-360 sq. metres), thus showing the inappropriate nature of the 100 sq. metres stipulation in policy.

Workspace have also supported them in questioning the wisdom of this threshold.

Consideration

MUDC are aware of the need for small convenience retail in small villages / settlements and would therefore point out that the 100 sq. metre threshold is **not** considered to be a cap after which development will be considered unacceptable.

The SPPS states that proposals for shops in villages and small settlements must be consistent with the aim, objectives and policy approach for town centres and retailing, meet local need (i.e. day-to-day needs), and be of a scale, nature and design appropriate to the character of the settlement

With regards to the threshold for small shops in mixed use areas of towns, the POP seeks to make provision for the acceptability of small "neighbourhood shop" type development outside the town centre and it is felt that the threshold is acceptable for this type of development. In small settlements and villages, the policy does not rule out the acceptability of retail development over this threshold, provided there is no significant impact on neighbouring settlements.

Therefore, the type of development alluded to by Henderson Group is not considered to be necessarily unacceptable. The policy simply asks that the developer prove the development will not impact negatively on neighbouring settlement or existing retail in the settlement. Given that the policy does not stop other sizes of development but does ask them to demonstrate impact then it is recommended that the figure suggested remains.

Recommendation

- **Retain the 100 sq. metres floor space criteria, after which development will be required to demonstrate an assessment of alternative sites, or in smaller settlements, will be required to demonstrate no impact on neighbouring settlements.**

Implementation of Recommendation(s)

This has been brought forward as part of the draft Plan Strategy.

OFFICE DEVELOPMENT IN TOWN CENTRES

An issue was raised by Altus Planning in relation to office development (Use Class

A2) and where they would be considered within our POP suggested policy and whether an exception should be considered for office development at a District Centre along the lines of the preference given to them in town centres.

Consideration

Currently office development is considered within the context of policy contained within the Rural Planning Strategy. We note the comments made on office development and are of the opinion that our suggested policy for Town Centres and Retailing should be expanded to include policy for office development. We do not however feel that a particular exception should be applied generally to district centres for office development as major financial and office development is best and most sustainably located within town centres where they can benefit from public transport and the facilities contained therein. Smaller scale office development could be located within district centres in line with the suggested policy below. As a result of this it is recommended that the topic of Town Centres and Retailing is entitled 'Retailing, Offices and Town Centres'.

Recommendation

- **Planning policy should be included for office development along the following lines:**
 - **Major financial and professional office development should be located in the town centre. Smaller scale offices could be located in a variety of locations including district and local centres, mixed use areas and on economic development zonings unless specified otherwise (KSR's) in the Plan. The conversion of residential houses in residential areas to offices will normally not be acceptable.**

Implementation of Recommendations

This policy has been brought forward with similar wording to that recommended, as policy RE 3.

Minerals

THE QUESTIONS POSED WITHIN THE POP ON AREAS OF CONSTRAINT FOCUSED ON THE FOLLOWING:

- **WHETHER THERE SHOULD BE AREAS OF MINERAL CONSTRAINT;**

- *TO WHAT EXTENT THEY SHOULD COVER THE DISTRICT;*
- *OPINION ON OUR PREFERRED OPTION FOR THE LOCATION OF THE AREAS OF MINERAL CONSTRAINT.*

Consultation Bodies Response

Department for the Economy have welcomed the consideration given by the Council in relation to policy for mineral development. However they recommend further consideration to these areas in consultation with GSNI and consideration of the associated policy taking into account the issue of valuable minerals. They note that our preferred option (Map 3 in the POP) of the Areas of Constraint may require some modification to exclude additional important areas of both hard rock and sand and gravel resources without significant determinant, in their opinion, to our identified vulnerable landscape areas. They note the MUDC hold the main areas of sand and gravel resources in NI and consideration should be given to any future requirement for increased production. DfE have provided information on the mineral resource potential in Mid Ulster and this information has been used to inform the maps within this Minerals section. The Department for the Economy (DfE) have recommended that the Council should discuss the extent of Areas of Constraint with the minerals industry and with GSNI. They state that it may be possible to further refine the boundaries of the designations. The need to consult with GSNI and DFI as well as the industry in general is also put forward by the minerals industry (not a statutory consultation body) as well.

The Department of Infrastructure note the preferred option in relation to minerals and in particular the proposal to identify Areas of Mineral Constraint and Mineral Reserve Policy Areas. They suggest that the Council should follow the plan making policy of the SPPS which they interpret as the identification of areas most suitable for minerals development. They also draw attention to our intention to write to the Minerals Industry and state that their good practice is that the gathering of evidence should be completed prior to the generation of options.

The Department of Agriculture, Environment and Rural Affairs (DAERA) – Natural Environment Division (NED) express agreement with option 2 which will see the designation of ACMD's. They argue that this option will provide the greatest protection for sensitive areas and certainty for developers. NED have stated that where the designations are being considered, a detailed look at sites of nature conservation must be considered.

Fermanagh and Omagh District Council welcome the approach to protect more vulnerable landscapes such as Sperrins AONB from mineral developments and have expressed the view that they are in agreement with protection being afforded to the Sperrin AONB. Derry and Strabane District Council and Antrim and Newtownabbey Districts have expressed an interest in the designations as they constitute a cross boundary issue, whilst Armagh Banbridge and Craigavon Council have stated that further discussion on minerals is necessary in order to ensure a consistent approach.

Derry & Strabane and Antrim & Newtownabbey councils have noted the proposed

designations because of the shared boundary between the two districts but have made no comment as to the acceptability of the proposed designation.

Response from the Public

The Public response included a significant level of objection to the idea of Areas of Constraint on Mineral Development as suggested within the POP. Given that the majority of representations on the topic were received from or on behalf of the minerals industry, this may not be totally unexpected.

QuarryPlan, on behalf of 10 companies from the mineral industry, clearly expressed their opposition by stating that their clients do not support the preferred option within the POP.

QuarryPlan along with other operators from the industry argued that there is a lack of adequate evidence to enable the decision to be taken to zone Areas of Constraint. QuarryPlan for instance stated that there was insufficient evidence regarding permitted reserves within the District, something which would need to be known before deciding whether or not to restrict development in certain areas.

QuarryPlan (with the aid of Mullin Design Associates) have also argued that the “vulnerable landscapes” which have been used by the council to justify the proposed ACMD’s in the POP are severely flawed. They argue that they appear to have been based on NILCA 2000 which is out of date (circa 20 years old) as well as on guidance for wind energy development which is not relevant to minerals development. They also point out that the Council have failed to specify which specific aspects of minerals development it is that the “vulnerable landscapes” are particularly vulnerable too and what makes minerals development more harmful than other types of development such as residential, agriculture etc. This view is also expressed by Dalradian Ltd.

Various individual representations also referenced the PAC report into draft Magherafelt Area Plan (and other Plans) which stated that the imposition of ACMD’s was flawed and they argue that nothing has changed in order to render this position incorrect.

The minerals industry have put forward the view that while Mid Ulster has valuable scenic landscapes, there is no evidence to suggest that these are under pressure from development and therefore there is no need to designate ACMD’s as existing designations are adequate to achieve protection. Similarly arguments have been made by planning consultants that sensitive areas already benefit from protection under other designations / legislation and therefore ACMD’s are not needed. This opinion was also voiced in another individual representation which stated that regional policy already provides stringent environmental protection.

Representatives from the peat industry also voiced their opposition to the preferred option of the LDP containing ACMD’s, although it would seem that their opposition is more based on the proposed mapping of the ACMD’s rather than the principle of ACMD’s themselves.

Having said this, QuarryPlan have also stated that “prima facie” the minerals industry are in agreement with the need to designate areas of constraint and have also stated that they would not support Option 1 which would see no ACMD’s being designated and every application being assessed on its own merits as in their opinion, this could lead to “consultee led approach” where those with the expertise in a certain field ultimately become the decision makers.

Dalradian agree with the imposition of ACMD’s because this is the approach advocated in the SPPS although they are keen to stress that not all environmental designations should be subject to ACMD status. Similarly, an individual quarry operator in the District has also voiced his agreement with the need to control extraction although he also asks council to consider the importance of Mid Ulster in being the main supplier of sand and gravel in NI.

There is an overall concern in the representations regarding a perceived failure to balance the economic considerations of ACMD’s and a perceived lack of baseline data on current supply, demand and future reserves.

The argument has also been made that there has been no evidence provided of the level of damage which has previously been caused to the proposed ACMD’s by virtue of the lack of a designation, and therefore, there is no justification for imposing designations in these areas instead of just keeping the existing designations.

The industry has also argued that not all environmental designations should simply be designated as areas of constraint. There has been no assessment of key sites within the designations which may be suitable for development. They argue that the Council should re assess the ACMD’s with this in mind. One operator objected specifically to areas of constraint being located in the AONB, because there are significant resources available in this area.

As well as the industry, representations from planning consultants make a similar argument to one made in the previous section when they say that using Areas of Constraint to protect environmental designations within Mid Ulster is wrong as they already have enough environmental protection. They argue that ACMD’s should just be used as regional tools to protect regionally important areas such as the Glens of Antrim, the Mourne’s etc. Planning consultants also express the view that the massive increase in ACMD’s is likely to bring an end to extraction and this is not an appropriate response to the problem of facilitating development whilst also protecting the environment.

In terms of site specific responses, one operator argues that he has recently invested in his site with a view to long term operation and diversification and therefore requests that his site is not included. He also argues in general that operators who have invested in their sites and whose supply has ran out or is running out, should not be included in the ACMD. Another operator argues that there cannot be any robust landscape evidence to support the exclusion of areas around Lough Fea and the inclusion of lands further west and therefore this is not a genuine option.

There was also one representation which calls into question the accuracy of maps

2&3, claiming there is a degree of ambiguity shown between them.

DO YOU AGREE WITH THE PREFERRED OPTION OF KEEPING MINERAL RESERVE POLICY AREAS BUT AMENDING THE BOUNDARY OF THE ZONINGS?

Consultation Bodies Response

Department for the Economy welcomes the proposal to include Mineral Reserve Policy Areas (MRPA's) within the POP and looks forward to working with the Council in this regard. Fermanagh and Omagh District Council appear to be supportive also, stating that our Mineral Reserve Policy Areas are very similar to their Mineral Safeguarding Areas.

Response from the Public

The industry has expressed some degree of support for the broad principle of designating Mineral Reserve Policy Areas. However, there appears to be some disagreement over the extent of the designated areas, the level of consultation involved in arriving at them and areas which have not been protected.

A representation from a prominent member of the industry points out that the proposed MRPA's were designated over 10 years ago and have been actually reduced in the POP. This seems illogical and would suggest that there is less need for protection of minerals now. They argue that the amount of reserves which are required have not been established and also point out that there are no areas of protection proposed for sand and gravel which is of great importance to the District.

Specifically referring to the individual designations, they make the point that 2 out of the 3 proposed designations are owned by one operator and this may create an unfair advantage for that operator. They also point out that the site at Derraghadoan is unlikely to be worked throughout the plan period and part of it is also located in Dungannon Golf Club, both of which make the designation illogical. Similarly, the factory which the Coalisland designation is designed to serve has closed and is unlikely to re-open thus raising questions over the need to retain this designation.

The representation suggests that as opposed to modifying the existing designations, the Council should work with the industry to establish what the requirements are and then protect the resources which can meet those needs. This is also borne out in another representation which states that lack of consultation is a "fundamental flaw."

Another representation from a broad spectrum of the extraction industry calls for a "systematic approach" to designating MRPA's and points out that current operational sites are probably of more value to the economy than the proposed MRPA's.

The industry have also pointed out that there has been no mention of valuable minerals being protected in any of the MRPA's as well as arguing that the council should seek to protect existing sites of extraction where there is potential for further extraction.

SHOULD THE MINERALS POLICY FOR MID ULSTER INCLUDE A SPECIFIC POLICY FOR THE EXTRACTION OF VALUABLE MINERALS?

Consultation Bodies Response

Department for the Economy recommends that the POP should include a specific position on high value metalliferous and energy materials which reflect more fully the minerals strategy in the SPPS & in the Planning Strategy for Rural NI. To do this would also “future proof” the POP because the potential for new minerals in the future will be ever evolving.

Response from the Public

A representation from the industry has called for the continuation of MIN 5 from the PSRNI, a planning policy which dealt specifically with valuable minerals. They argue that to fail to continue this policy will lead to a policy void and will result in conflict with the SPPS. They also go further and argue for the protection valuable minerals such as gold, which has been mentioned in the position papers but not mentioned in the POP. They say that consultation with GSNI is needed in this regard.

SHOULD THE EXTRACTION OF VALUABLE MINERALS BE TREATED AS AN EXCEPTION WITHIN AREAS OF CONSTRAINT ON MINERAL DEVELOPMENT?

Consultation Bodies Response

Department for Economy point out that para. 6.157 of the SPPS states that there should not be a presumption against the exploitation of valuable minerals in any area and therefore strongly recommends that there is an exception in areas of constraint for the exploitation of valuable minerals.

Response from the Public

One representation from the industry supports valuable minerals be treated as exception in ACMD's as this is the approach advocated in the SPPS and any other approach is in direct conflict with SPPS.

DO YOU AGREE THAT THERE SHOULD BE EXCEPTIONS MADE WITHIN THE AREAS OF CONSTRAINT ON MINERAL DEVELOPMENT WHERE THE PROPOSAL INVOLVES A MINOR EXPANSION OF AN EXISTING WORKS OR WHERE A BENEFIT WILL BE PROVIDED TO THE LOCAL ECONOMY?

Consultation Bodies Response

Department for Economy agrees that there may be merit for exceptions in Areas of Constraint where minor expansion/extension of existing mine/quarry/pit extends the life of that development.

Response from Public

One operator makes the point that operators who are nearing the point where their reserves are running out but who have invested in their sites should not be prohibited from expanding their existing operation or from exploiting new resources in the locality. This point appears to be being made in relation to such developers not being included

in the ACMD in the first place. However, the concerns could also be taken as support for exceptions being allowed within an ACMD for expansion of existing workings.

Another representation argued that plan should allow for bespoke small extraction of traditional building stone as required for the repair of traditional buildings and features and for occasional repair of some of NI's key historic buildings.

DO YOU THINK THAT ON SITE PROCESSING OF MATERIALS SHOULD BE ALLOWED WITHIN AN AREA OF CONSTRAINT ON MINERAL DEVELOPMENT, IF IT CAN BE DEMONSTRATED THAT THERE WILL BE LIMITED ENVIRONMENTAL IMPACTS?

Consultation Bodies Response

As mentioned earlier, the Department for the Economy made a recommendation that the POP takes a specific position on valuable minerals and that part of this should also include information on site processing. Although they do not provide an opinion on whether on site processing should be allowed in an Area of Constraint.

Response from Public

A representation from the peat extraction industry states that on site processing should be facilitated where it is temporary in nature and where restoration can be carried out without harm being caused, as is the case within the peat industry which regularly involves on site processing over and above extraction in order to prep the material for removal.

Another representation from the industry disagrees with the prohibiting of onsite processing because they argue that on site processing can limit the impact of traffic on air quality by helping to reduce the need for travel because materials can be processed on site.

A group of quarry operators in one representation make the point that restricting on site processing in ACMD's may be prejudicial to sites who currently carry out processing but who are not in the ACMD but may find themselves within the new ACMD's proposed in the POP.

DO YOU AGREE WITH THE SUGGESTED WORDING OF SUBJECT POLICIES MIN 1, MIN 2 AND MIN 3?

In terms of response from the consultation bodies, none of the adjoining councils provided any input in the form of recommendations on policy wording. However, Armagh Banbridge and Craigavon Borough Council and Derry and Strabane District Council expressed a desire to work with MUDC in formulating minerals policy in order to ensure a consistent approach.

MIN 1

Consultation Bodies Response

The Department for the Economy argue that a distinction should be made between exploration for, and extraction of, unconventional hydrocarbons, such as shale gas, and conventional oil and gas because the scale / methodologies of these are quite different and raise different sustainability issues. Natural Environment Division (NED) from DAERA have stated that the policy test of “special attention” being paid to accommodating species and protecting biodiversity is not sufficient to ensure a halt to biodiversity loss and they also express concern that the policy test of “prejudice the essential characteristics” would not be sufficient for considering impact on designated sites and that the term “integrity” is more ecologically appropriate

Response from Public

In line with views expressed by NED a representation from RSPB also expressed concern at the term “prejudice” in relation to impact upon the essential characteristics of designated sites. They argued that this test doesn’t accord with the tests for impact including those designated by EU directives. They have also expressed concern at the policy test of “special attention” being paid to accommodating species and protecting biodiversity which they claim is vague and open to interpretation. RSPB are also of the opinion that the policy test in relation to peat extraction should be strengthened in line with the English NPPF. They have said that they would like to see peat extraction phased out for consumer gardening by 2020 and for commercial horticulture by 2030. To this end, they have proposed the following policy wording in relation to peat extraction;

Planning permission will not be granted for peat extraction from new or extended sites or to renew extant permissions.

They have also recommended some small changes to criteria on restoration proposals and have stated that they agree with the approach taken in relation hydrocarbon extraction.

Representation from members of the peat industry in Mid Ulster expressed general support for the policy but would seek to amend it slightly to accommodate peat and with the emphasis on adequate restoration. They feel that the policy at present only focusses on quarrying and forgets about the peat industry.

The quarrying industry have requested clarification over the term “special attention.” They are unsure as to what it means. For instance does it mean that there must be removal / relocation of species? They have also queried the need for the policy wording regarding impact from blasting, chemical/biological agents.

MIN 2

Consultation Bodies Response

Department for the Economy have queried the term “short term extraction.” What exactly does this mean? They state that it seems illogical to place an arbitrary time limit on a mine when that time limit may well be below the life span of the mine in

question.

Response from Public

Representations from the industry make the point that the reference to “short term extraction” should be removed. One company in particular argue that it would be difficult to attract investment if the imitations of “short term extraction” were in place. Other industry members have queried what is meant by “short term” and say that amplification is needed here.

Further representations from the industry also make the point that there should not be a presumption against expansion of existing enterprises as these should be judged on site specifics of each case.

There are also calls for more amplification to be provided on the term “limited” in the context of criterion (b); “it can be demonstrated that there will be limited environmental impacts.” These calls have been made from the industry and from environmental groups who claim that more amplification is needed in order to ensure the test is sufficiently robust. A representation from the industry suggests alternative policy wording in this regard to read; “it can be demonstrated that there will be no unreasonable environmental impacts.”

Representations of environmental concerns have suggested that criterion d) should include the provision that restoration proposals should “enhance biodiversity wherever possible.” They also suggest that the policy wording relative to hydrocarbons should spell out exactly the wording from the SPPS.

MIN 3

Consultation Bodies Response

No specific comment on policy wording for this policy.

ADDITIONAL ISSUES FOR CONSIDERATION - NOT ADDRESSED BY KEY QUESTIONS.

EVIDENCE BASE UNRELIABLE - MUDC FIGURE CALLED INTO QUESTION

The quarrying industry have placed serious doubt over the figures representing the value of the minerals industry which are presented in the POP and in position papers. They argue that this evidence base is unreliable and that this in turn renders the POP and SA/SEA inaccurate.

HYDROCARBON EXPLORATION AND EXTRACTION

The Department for the Economy have pointed out that the exploration of hydrocarbons is a separate and different process to the extraction of hydrocarbons

and has different methodologies and impacts. They argue that such a distinction has not been made in the POP.

Consideration and Response on Minerals

Taking on board all of the issues raised by the consultation bodies and the public we consider the key points raised to be as follows:

1. The plan should identify areas suitable for mineral development;
2. There is objection to Areas of Constraint on Mineral Development based on a) an absence of up-to-date landscape assessment and that b) account has not been taken of the location of resources for the mineral industry.
3. The current policy does give satisfactory recognition to high value minerals such as metals nor does it give sufficient recognition to the potential for oil and gas.
4. There is a lack of clarity in relation to peat extraction.
5. The position in relation to Lough Neagh extraction is to be clarified.

Our consideration of these key points, and the public consultation comments received are as follows:

1. **Areas for Mineral Development** - In relation to minerals the Strategic Planning Policy Statement (SPPS) states that *inter alia* LDP's should identify areas which should be protected from minerals development because of their intrinsic landscape, amenity, scientific or heritage value (including natural, built and archaeological heritage). The SPPS goes on to say that in preparing their LDP councils may also identify areas most suitable for mineral development within the plan area. It is our view that the advice offered by DFI has placed emphasis only on the areas suitable and has not noted the difference in the word whereby the SPPS says we should identify areas to be protected but uses the word may in relation to identifying areas most suitable for mineral development. Our POP has put forward Mineral Reserve Policy Areas and we recognise these areas as being locations where minerals may be exploited, subject to meeting all relevant planning policy criteria. The points made by the industry questioning the logic of the two individual designations at Derrgahadoan and Coalisland are noted. The ownership of the sites is not something which the Council considers to be relevant as a planning consideration. Overall, while there appears to be a very general level of support for the idea of Mineral Reserve Policy Areas, there is some disagreement about the approach of modifying the existing boundaries of the designations, with the industry calling for a systematic approach in designating the MRPA's, involving more consultation with the industry and with GSNI as well. The council notes this response.

Taking on board the comments made regarding the areas of constraint it is proposed that we map our Areas of Constraint on Mineral Development against The Mineral Resources Map of Northern Ireland which can then be included within the Plan. This conceptual map is included at Appendix 1. The extent of mineral

reserves in Mid Ulster is widespread and particularly prevalent in the upland areas. We have also mapped the location of the quarries in Mid Ulster (based on the information available to us) and this is shown at Appendix 1. Looking at the map of the quarry location and comparing this with our conceptual map of the ACMD it is considered that we will have limited impact on the mineral industry. It is considered that a mapping of the ACMD based along the lines of this conceptual map would allow opportunity for mineral extraction and expansion. We would therefore propose that the identification of areas suitable for mineral development, outwith the ACMD area, should come from the industry in accordance with their needs and in line with the relevant planning policy including the criteria set out in the mineral policy.

2. ***Objection to Areas of Constraint on Mineral Development***

a) Whilst we are of the opinion that it is appropriate to use the Northern Ireland Landscape Character Assessment 2000 since the landscape will not have changed it is recognised that development pressures, particularly from wind turbines, will have had an impact on the landscape. In order to address this in further work is well underway to carry out an updated Landscape Assessment by the development plan and environment team planning officers.

b) In drawing the ACMD lines for the preferred option within our POP account was taken of the Mineral Industry operators within our district and indeed large areas were excluded from the ACMD in recognition of the large existing works. With regard to the argument put forward by Quarry Plan and other operators that there is insufficient evidence to support the designation of ACMD's, it should be noted that in parallel with the public consultation on the POP we have given the mineral industry an opportunity to provide information with regards to their existing extraction rates, existing reserves as well as their anticipated demand until the end of the plan period. The detailed feedback from the minerals industry is attached at Appendix 1. We contacted a total of 43 operators and received responses from 16 operators which deals with 21 active mineral sites. So whilst the figures do not give us the total picture in the district they give us some information to draw a reasoned conclusion that, if we are to exclude one current quarry from the existing sand and gravel figures (Lafarge) given that the figures presented by them are less reflective of the picture painted by the other sand and gravel quarries, additional permissions for reserves would be needed to continue in the long term. We do of course have figures in relation to the operation by Emerson's at Lough Neagh and also in relation to 'land banks' in the district which do not currently benefit from planning permission. We can also see from the figures that the hard rock quarries will also require the ability to obtain additional permissions to continue in the long term.

In looking at the where resources are located throughout the district there is an argument that the Area of Mineral Constraint is too large in relation to where important mineral reserves are located. It is our view that by reducing the extent

of the ACMD to the areas of intrinsic landscape, amenity, scientific or heritage value adequate protection can be provided whilst providing adequate access to mineral reserves for the industry. It is therefore recommended that the conceptual map at Appendix 1 be taken forward and that further detailed work be undertaken to establish more precise boundaries. The identification of more definite boundaries will be informed in part by the additional landscape work that is currently underway as well as further engagement with DfE.

3. **Valuable Minerals** - With regard to valuable minerals we recognise that the suggested policy within our POP does not give recognition to metalliferous mineral occurrences and we are aware that there are valuable minerals within our district. The metalliferous mineral occurrences within our district have been plotted on a separate map and table at Appendix 1. DfE advise us that in our district metalliferous minerals are known to occur in three geological settings – the Pre-Cambrian Dalradian Metamorphic rocks, the Tyrone Igneous Complex (TIC) and Carboniferous sedimentary rocks. They also advise that gold may occur as gold-bearing quartz veins, as stratabound mineralisation (both in the Dalradian), or as igneous rocks of the TIC. They note that there may be potential for the discovery of gold deposits in the Sixtowns areas. DfE also advise that there may be additional potential for lead, copper and zinc deposits within the Clogher Valley.

If we are to proceed with an ACMD along the lines of the Conceptual Map at Appendix 1 then we would be including a number of the valuable mineral occurrences within the area of constraint such as gold, platinum iron and copper iron sulphide. If we are to proceed on this basis then it is our view that the policy approach as suggested in the POP does not rule them out in terms of extraction but does recognise that they would have to demonstrate limited environmental impacts, short term extraction, no on site processing and adequate restoration proposed as well as demonstrating the important benefits to the local community.

With regard to the advice provided by DfE on valuable minerals they recommend that our policy takes a specific position on valuable high value minerals and also on energy minerals which is consistent with the position of the SPPS and the PSRNI. In order to align with the SPPS an exception for high value metals could be added into the policy wording. However it is considered that the scale of the areas covered by the proposed ACMD is such that we do not feel that in the lifetime of the plan such a carte blanche exception is needed, albeit it is recognised that the map at Appendix 1 shows that potential gold occurrences in the district would fall wholly within the ACMD. As already stated however if they are able to demonstrate compliance with our policy then the plan would not rule out such development. It is highly likely that such proposals coming forward would in any event be dealt with by DfI who would be a liberty to determine what weight it attached to our policy versus any overriding regional interests.

Oil and Gas – Within ACMD's stricter tests should apply to such development.

We do not have a policy for exploration as opposed to excavation due to the provisions of permitted development. We therefore suggest that a policy be brought forward in the event that there was an absence of PD which would facilitate exploration of energy minerals. Under PD at present the provisions for exploration are fairly wide ranging. Accordingly we do not feel there is a need for a policy for exploration of minerals other than energy minerals which would facilitate exploration based on their merits and where appropriate restoration is proposed. A policy along the following lines is recommended: ***“In the event that hydrocarbon exploration identifies the possibility of commercially viable reserves of oil or gas or lignite, applications for planning permission to sink wells for the purpose of appraising the nature or extent of the discovery will be considered in the context of the long term suitability of the site for production purposes.”***

4. ***Lack of reference to Peat*** - The reference to peat which is included in the proposed policy is in line with the provisions within the SPPS regarding peat (PARA. 6.158). Therefore it would be difficult to strengthen this policy, without significant evidence of damage being caused to the existing peatlands in Mid Ulster. There has been thought given to a separate policy or approach to peat extraction in Mid Ulster however it is felt that there is little evidence to support this and especially in light of the fact that the SPPS deals with peat in the same context as other minerals. Peat extraction is however seen a mineral development and the ACMD will apply to it and therefore in that context no separate policy is necessary other than to explain this in the amplification. Outside of ACMD's peat for sale would only be allowed as part of an overall proposal to protect a bogland and its valuable conversation interests along the line of Policy MIN1 of the Rural Strategy.

5. ***The position in relation to Lough Neagh extraction is to be clarified*** – Our view on Lough Neagh is not dealt with in the POP. Given that an application is with DFI for extraction in the Lough, which would provide a long term supply if permitted, it would be appropriate given the status of the Lough as a RAMSAR site and an area of significant environmental importance, to designate it as part of our Area of Constraint on Mineral Development (ACMD) (See Appendix 1).

6. ***Other issues:***
 The terms “prejudice the essential characteristics” and “special attention” appear to be controversial and have been highlighted by two environmental groups as being unclear and / or inadequate. A representation from the quarrying industry has also expressed uncertainty over the term “special attention.” The wording “prejudice the essential characteristics....” is in line with the wording of the SPPS and therefore might be easier to justify. However, the Council notes the level of concern expressed regarding the words “special attention” and the apparent vagueness which they embody and will consider this specific wording with DFE/GSNI in the further consultation with them.

With relation to the need for a specific policy on blasting and chemical / biological agents, it is dealt with in Policy MIN1 whereby the developer is required to demonstrate no significant risk.

Exceptions being made for “short term extraction” within ACMD’s is in keeping with the provisions of the SPPS (6.164). However, the Council notes the point that there may be more amplification required in order to ensure that this policy test is sufficiently robust.

In relation to the point about a presumption against expansion within the ACMD, it should be noted that, in line with the SPPS, there is a presumption against **all** minerals development within the ACMD. However, the POP has made provision for exceptions which may be permitted and one of these is the expansion of existing works, thus endeavouring to enable existing development to continue to operate and grow where this is appropriate.

An issue was raised regarding whether Rural Industrial Policy Areas would apply to Minerals Development sites. We do not consider this to be the correct approach to this matter and suggest that wording be included in Policy MIN 1 to state that ***“Where there are existing quarries, outside of an Area of Constraint and outside areas in close proximity to ASSIs, national nature reserves, areas which have been or are able to be designated, scheduled or listed because they contain features of archaeological or historic interest, favourable consideration can be given to a directly related industry such as cement / concrete works or glass manufacture.”***

Recommendations on Minerals

- **Reduce the land based area of the ACMD and include Lough Neagh within the ACMD along the lines of that set out in the map at Appendix 1.**
- **Include in draft Plan Strategy, amplification on the terms “short term extraction” and “limited environmental impacts.”**
- **Introduce a policy hydrocarbon exploration.**
- **Continue to undertake the Landscape Assessment which will in part be used to inform the final lines of the ACMD’s**
- **Confirm the policy approach of MIN 1, MIN2 and MIN3 of the POP subject to some clarification with the relevant amplification and inclusion of wording in relation to related industry for MIN 1.**

All of the above recommendations and consideration of Minerals is subject to further engagement with DFR/GSNI following agreement of this report.

Implementation of Recommendations

The policy approach to Minerals as laid out in the POP has been restructured to provide more clarity for case officers and developers. The approach to MRPA’s

remains largely the same as does the general approach to mineral development. In relation to policy on AMCD, the restructuring and rewording of policy has meant there is no longer a requirement to expand on the terms “short term of extraction” and “limited environmental impacts.” Policy on valuable minerals has been added in order to address the availability of valuable mineral deposits such as gold, copper and zinc in our district. The policy on valuable minerals also includes reference to hydrocarbon exploration and extraction.

The ACMD designations have been reduced in line with ongoing field work based on protecting areas of intrinsic landscape amenity and heritage / scientific importance. The ACMD designation which was proposed on Lough Neagh has not been carried through to the draft Plan Strategy. We consider that it would be unwise to impose an ACMD on Lough Neagh whilst a regionally significant application is being considered by DfI. Pending the outcome of that application, the status of Lough Neagh may be reviewed as part of the Plan review. It should also be remembered that Lough Neagh is recognized for its scientific value as an ASSI in the extant Area Plan.

Given the proliferation of disused mines in parts of our district and the need for this to be addressed in policy, an additional policy relating to surface development above disused mines shafts has also been included (MIN 6).

The criteria regarding related industry close to existing quarries has been included in policy ECON 1.

In relation to valuable minerals it is important to note that we have reconsidered our recommendation on them and our draft PS will now include a policy on this matter.

SUMMARY OF REPSONSES RECEIVED FROM MINERALS INDUSTRY TO DATE

KEY FACTS

OPERATORS CONTACTED – 43

RESPONSES RECEIVED FROM – 16

ACTIVE MINERALS SITES COMMENTED ON – 21

(2 OPERATORS [3 QUARRIES] SENT REPLIES BUT DID NOT SUPPLY ANY DETAILS OF YEARLY EXTRACTION, RESERVES, DEMAND ETC.)

QUARRIES NO LONGER IN USE – 3

SITES WITH ENOUGH RESERVES TO MEET PROJECTED DEMAND – 3

AGGREGATES (SAND AND GRAVEL) FROM OPERATIONAL QUARRIES

| YEARLY EXTRACTION RATE (TONNES PER ANNUM) | ANTICIAPATED DEMAND OVER PLAN PERIOD | REMAINING RESERVES (TONNES) |
|---|--------------------------------------|-----------------------------|
| 2.3 MILLION | 31 MILLION | 43 MILLION |

AGGREGATES (SAND AND GRAVEL) FROM LOUGH NEAGH

| YEARLY EXTRACTION RATE (TONNES PER ANNUM) | ANTICIAPATED DEMAND OVER PLAN PERIOD | REMAINING RESERVES (TONNES) |
|---|--------------------------------------|-----------------------------|
| 260,000 | 4.5 MILLION | 100 MILLION |

AGGREGATES (SAND AND GRAVEL) LAND BANKS, STILL SUBJECT TO PERMISSION BEING GRANTED

| YEARLY EXTRACTION RATE (TONNES PER ANNUM) | ANTICIAPATED DEMAND OVER PLAN PERIOD | REMAINING RESERVES (TONNES) |
|---|--------------------------------------|-----------------------------|
| 250,000 | 3.25 MILLION | 3.5 MILLION |

PEAT

| YEARLY EXTRACTION RATE (CUBIC METRES) | ANTICIAPATED DEMAND OVER PLAN PERIOD (CUBIC METRES) | REMAINING RESERVES (CUBIC METRES) |
|---------------------------------------|---|-----------------------------------|
| 35,000 | 1,040,000 | 306,000 |

HARD ROCK

| YEARLY EXTRACTION RATE (TONNES PER ANNUM) | ANTICIAPATED DEMAND OVER PLAN PERIOD | REMAINING RESERVES (TONNES) |
|--|---|--|
| 430,000 | 5.6 MILLION | 4.75 MILLION |

Tourism

Q. Do you agree with the proposed Tourism Opportunity Zones (TOZ's) and Tourism Conservation Areas (TCZ's)?

Consultation Bodies Response:

Derry and Strabane District Council stress that any proposed TCZ within the shared resource of the Sperrins AONB should be the subject of engagement with them.

SSE- Electricity object to the designation of further TCZ's. SSE state that the introduction of additional TCZ's within the Sperrins AONB could result in a reduction of visitors to the area. SSE are of the opinion that the designation of further TCZ's in the absence of a proper evidence base would have a detrimental impact on the economic development of the plan area as a whole.

Response from the Public:

There was a mixed response regarding this question. Ballynagilly Community group were supportive of the extension of TCZ's and proposed TOZ's. Jungle NI requested to be designated as a special tourism designation to facilitate and encourage future development of the Centre. Carntogher Community Association requested the Carntogher area be considered as a TOZ. Cappagh Village Regeneration Group said Cappagh / Atmore area should be included as a TOZ / TCZ due to its rich cultural heritage and tourism potential. Four representations, from the MAG, RSPB, Liam Ward Planning Consultants and TC Town Planning Consultants, highlighted the importance of Seamus Heaney HomePlace / Heaney country as a tourism asset. MAG suggested Seamus Heaney HomePlace established as a cultural hub from which other aspects of cultural tourism extend and TC Planning wanted more tourism sites and heritage features in south Derry intrinsically linked to Seamus Heaney. Three representations from David Dalzell, RSPB and Liam Ward identified Lough Neagh as an important tourist asset. David Dalzell said appropriate development can help to promote it and fund the conservation of valued landscapes. RSPB said its south-west corner should be considered as a TCZ, with a vision for how the wetlands there can be transformed to meet this objective. RSPB also said Lough Beg should be considered as a TCZ given the significance of the landscape to Seamus Heaney HomePlace; that its landscape should be included as a tourism asset, where the tourism brand can be built upon the legacy of Seamus Heaney. They said it has particular tourism appeal, as could other 'honey pot' sites if created around Lough Neagh where wetlands are close to the main transport routes used by tourists to link Titanic Belfast and the Fermanagh Lakes. They said the destinations being developed by the Council as part of the Seamus Heaney HomePlace (Long Point, Lough Beg, and Toner's Bog), in addition to, Washing Bay/Derryloughan at Lough Neagh should be included within the list of Mid Ulster Tourism Locations.

At the POP consultation exercise, public meeting in Pomeroy (Rowantree Centre), a lady from Pomeroy Development Projects Ltd requested Pomeroy Forest be identified as a TOZ given its playpark had recently been upgraded and there are on-going improvements works / schemes aiming to re-develop an existing derelict forestry

school in it, as an educational Centre for children (subject to funding). One member of the public at a public exhibition in Cookstown raised Moneymore's lack of promotion (high no. of listed buildings within village) as a local tourist destination in comparison with those identified as existing / potential TOZ's. MUDCs Tourism Forum suggested both Carntogher area because of its strong cultural links and Lough Fea as possible TOZ's. One representation from David Dalzell Planning Consultants raised concern that the tourism map was too prescriptive and may prevent the creation of tourist facilities in particular regarding sites lying within the proposed SCA. Workspace Ltd have stated that the TCZ's are located within marginal areas where communities may be struggling economically and shouldn't be used to constrain needed developments.

MAG advocated support for the proposed TOZ's and TCZ's stating that they are well placed, well considered and culturally sustainable. But then also said this region has a much broader cultural heritage than shown, that TCZ's should extend to include all vulnerable landscape areas (Growth Strategy Map). And also to the collective Ulster Plantation related historic urban settlements (and their setting), Dungannon, Magherafelt, Draperstown, Moneymore, The Moy; and also Cookstown which has a high collective heritage value in its urban plan and the relatively intact concentration of listed buildings along its main street. A response from the Cookstown and Western Shore Area Network advocated support for the tourism nodes identified in the SCA but suggested that the Battery also be included as an opportunity zone.

Consideration

Mid Ulster District Council have engaged with Derry and Strabane District Council and other adjoining Councils via a forum to discuss the Sperrins at Magherafelt Council offices in April 2017. Tourism was one of the topics discussed in detail at this forum. As evidenced in the Councils Position Paper 8; Tourism, the tourism industry in Mid Ulster is relatively small. We therefore wish to adopt a sustainable approach to tourism through designating TOZ's and TCZ's to promote existing assets. The introduction of a TCZ in the Sperrin's will ensure that special care is given to ensure any proposals respect and are sensitive to the character of the local landscape, wildlife and heritage assets. The proposed policy for TCZ's allows for the re-use of existing vernacular buildings for tourism accommodation. Therefore we are of the opinion that a TCZ designation in the Sperrins, one of the nine key destinations as designated in the draft Tourism Strategy for NI, will assist in the promotion of tourism in the area by helping to conserve its key environmental and historic assets.

The purpose of TOZ's are to identify potential tourism growth areas. The Seamus Heaney offer is one of the three strategic strands in the Councils recently published 'Our plan to develop tourism in Mid Ulster to 2021'. The £4.2m Seamus Heaney HomePlace at Bellaghy opened in 2016, with plans to develop literacy and heritage trails into the local landscape to place connections referenced in Seamus Heaney's poems and literature. The vision of this plan is to 'integrate the Seamus Heaney HomePlace and Heaney experience into the wider tourism offer in Mid Ulster, NI and the Island of Ireland'. Therefore although HomePlace benefits from being within Bellaghy's settlement limits its literacy and heritage trails leading out into the

countryside, and could be considered a candidate TOZ site. Further exploration of this issue with the Tourism and Culture and Arts Departments is needed to understand and explore whether these trails could be considered as a TOZ or if indeed only should or none at all. This consideration is ongoing. If we decide not to go the direction of a TOZ for them we will want to flag Seamus Heaney up as a hub and gateway to send people out to explore the local area.

Following consideration of the feedback on the POP consultation we consider the following further list of locations as potential TOZ's and recommend that they be explored further for the Plan Strategy:

- Carntogher Area (strong cultural links)
- Cappagh / Altmore
- Pomeroy Forest
- The Battery (Loughshore Area)

The POP introduces a Special Countryside Area (SCA) around Lough Neagh and Lough Beg which operates a presumption against new development other than for tourism at designated nodes. As the SCA focuses on the most sensitive and at risk designated areas it would be inappropriate to designate either Lough as a TOZ. Lough Neagh and Lough Beg however have tourism nodes identified in the POP and these should be confirmed following investigation of the exact boundaries to be adopted.

It should be noted Lough Fea and Lough Fea Blanket Bog, an area just to its north, are located within an existing TCZ in the current Cookstown Area Plan. Both are Sites of Local Nature Conservation Importance (SLINCI's), and both are located within a wider Area of Outstanding Natural Beauty (Sperrins AONB). Therefore due its sensitive nature, Lough Fea should not be re-designated as a TOZ. Instead it should remain a TCZ which as part of our preferred approach to Tourism we would see brought forward in the new Local Development Plan.

The Jungle NI is listed as one of Mid Ulster's Tourism Locations in a table on the Tourism Map, where it is also identified. It is more appropriate for Jungle NI to remain listed in this table and identified on the map as a tourism location rather than as a TOZ, as it already exists and there is enough scope in policy for it to expand.

Similarly to Seamus Heaney HomePlace benefiting from being located within Bellaghy, Moneymore village benefits from being a settlement, and as TOZ's are only needed where we are introducing constraints to tourism development it is not necessary here.

Like Moneymore the collective Ulster Plantation related historic urban settlements (and their setting), benefits from being settlements and as mentioned above as TOZ's are only needed where we are introducing constraints to tourism development it is not necessary here either.

With regards Carntogher, it should be noted that it is designated in the current Magherafelt Area Plan as a Dispersed Rural Community (DRC). And in the Preferred Options Paper as part of the preferred option for Housing in the Countryside we have

suggested carrying forward the existing DRC's to the new Local Development Plan alongside policy wording, (Policy CT4 – Dispersed Rural Communities) that would allow for tourism facilities within them. For that reason Carntogher DRC does not need to be designated as a TOZ but it may be worth looking at whether or not it warrants having its boundary extended to allow for tourism growth in the wider area through the use a TOZ. This would need further investigation.

On the topic of DRC's, we have recognised policy TOUT3 –Tourist Accommodation should be amended to correlate with Policy CT4 – Dispersed Rural Communities, by clearly stating that, *'Development of tourist accommodation on unzoned land within the settlement and Dispersed Rural Communities will accord with the Plan provided it does not conflict with the Local Policies Plan and its land use zonings'*.

The Broughderg and Davagh Upper DRC which is designated in the current Cookstown Area Plan. The Preferred Options Paper suggested carrying forward existing DRC's to the new Local Development Plan however it also suggested this area be designated as a TCZ. Hence a conflict exists between the existing DRC and proposed TCZ. In this instance it is not the policy presumption in terms of tourism development in DRC's that needs corrected but rather the tools to show the policy is in its favour. Hence the Broughderg and Davagh Upper DRC, should be removed from the list of proposed TCZ's and Tourism Map.

Cappagh and the neighbouring Altmore areas rich cultural heritage and tourism potential, as highlighted by Cappagh Village Regeneration Group, alongside their emphasised potential in the regeneration of Cappagh Pond and Altmore Reservoir, would need to be explored further to establish whether we could justify a TOZ or TCZ in this area.

With regards Pomeroy Forest there is a recently approved outline planning application for the demolition and clearance of the existing abandoned forestry school and its replacement with a new forestry building in the Forest. If this building is to be used as an educational centre (teaching school children / others about biodiversity /trees / plants) this may be a potential tourism growth area. Pomeroy Developments Projects have indicated that that they intend to develop the forest further in terms of camping / glamping. This location hosts a 'Santas Magical Forest' event each December. The playpark has recently been re-developed and there are existing walking paths through the forest. Therefore Pomeroy Forest may be a good candidate for a TOZ and this should be explored further.

With regards The Battery it has an existing quay and public bar, its location is used for both fishing and pleasure boats. The Lough Neagh Rescue Lifeboat Station is also located here. The Council's Tourism Plan identifies Lough Neagh as a key issue stating it offers outdoor recreation opportunities but suffers from a lack of developed product and difficulty of access issues to the water. The Tourism Plan also identifies outdoor activities, such as canoeing and angling, as one of its three strands / themes. The Battery unlike similar areas identified as existing and proposed tourism nodes within the loughshore on the Preferred Options Paper Tourism Map, benefits from having areas located within the settlement limits of Moortown. That said, given the significant number of representations referring to the untapped potential of Lough

Neagh the Council may wish to explore the possibility of widening the area around the Battery for tourism development through the use of a TOZ.

Q. Do you feel that a flexible plan led approach is the correct option?

Consultation Bodies Response:

NED have raised concern that the preferred approach in relation to tourism will see development in the most sensitive environmental areas and that the proposed policy would be too lax to ensure appropriate protection.

Response from the Public:

Three representations, all from private planning Consultants advocated support that the flexible plan led approach is the correct option. The Historic Monuments Council also support the flexible plan led approach. TC Planning stated that this approach would enable the tourism industry to thrive. The RSPB highlight that the POP does not refer to sustainable tourism as set out in the SPPS (6.254). They stress that the SPPS objective is to 'facilitate sustainable tourism in an environmentally sensitive manner'.

Consideration

Support for the flexible plan led approach is noted. The proposed approach to tourism is considered to be appropriate. The flexible plan led approach will facilitate tourism development of an appropriate nature, location and scale within TOZ's and elsewhere (outside settlements, TCZ's and the SCA). The proposed TCZ's will safeguard natural and built heritage assets from inappropriate development. It is considered that this will allow Mid Ulster to expand in a sustainable manner and therefore aligns with the SPPS ethos of sustainable tourism development. However for clarity it is recommended that the first objective for tourism be revised from, 'facilitate tourism in an environmentally friendly manner,' to, 'facilitate sustainable tourism in an environmentally sensitive manner,' as per the SPPS.

Q. Do you agree that planning policy in Mid Ulster should allow more flexibility in relation to major tourism and where tourism is run in conjunction with an existing facility i.e. no limitation to self-catering accommodation, Policy TOU 2?

Consultation Bodies Response:

There were no comments regarding this specific question.

Response from the Public:

MAG suggest rather than encourage the construction of large resorts, of questionable long term sustainability, a more sensitive approach would be to use existing natural / built heritage as a major tourist offer. They refer to Tourism Ireland research which

states that built / natural heritage are two primary elements that make a place distinctive and that visitors to heritage attractions stay twice as long as other visitors and spend twice as much. MAG recommend that there needs to be control of all development that caters for Tourist economy particularly when this is located in / adjacent to the tourist product.

Consideration

The comments from MAG are noted. The suggested major tourism development policy, TOU 2, relates only to proposals where it has been demonstrated that it will be of exceptional benefit to the regional tourist industry and economy. The Council may wish to adopt a more rigorous policy wording regarding accommodation in the policy re-write to ensure that appropriate protection is afforded to any locations proposed. It is considered Policy TOU 3 - Tourist Accommodation in its current form is too liberal and could be abused, therefore we should define tourist accommodation.

It is suggested tourism accommodation on unzoned land within the settlement and Dispersed Rural Communities which will accord with the Plan be defined as 'hotel and self-catering accommodation provided it does not conflict with the Local Policies Plan and its land use zonings.'

Tourism accommodation within Tourism Opportunity Zonings which will accord with the plan be defined as, 'hotels and self-catering accommodation of at least 3 units provided it can be demonstrated that special attention has been given to the integration of the site and any natural or built heritage features including the landscape character of the area.' It is not considered necessary to define special attention, it will be the same as in conservation areas.

Q. Should planning policy in Mid Ulster be less prescriptive in terms of hotel / guesthouse / hostel development at edge of settlement locations?

Consultation Bodies Response:

There were no comments regarding this specific question.

Response from the Public:

MAG responded stating that planning policy should encourage hotel / guesthouse / hostels developments within settlements as a priority as opposed to edge of settlement locations.

Consideration

The comments from MAG are noted. However, as identified in the Tourism Position Paper, tourism levels / expenditure in Mid Ulster is very low. Therefore in order to facilitate the district's opportunity for growth, the more flexible plan approach is considered to be prerequisite. The proposed tourism accommodation policy states that

special attention should be given to the character of the local landscape, wildlife and heritage interests and in all cases development must be sensitive to its setting and achieve a high degree of integration.

Q. What are your views on motel development at the interchange locations of Castledawson, ballygawley and Stangmore Junction, Dungannon?

Consultation Bodies Response:

There were no comments regarding this specific question.

Response from the Public:

MAG disagree that policy should allow for Motels at key transport corridors. They state that motels should be located in or at the edge of settlements so that guests can avail of other facilities / services in the settlement. They state that this would lead to the equivalent of out of town shopping centres and create a car dependent context for visitors and locals alike.

Consideration

The Councils Tourism Position Paper identified that overnight trips in Mid Ulster for the purposes of business is higher than the rest of Northern Ireland. Motel accommodation may be a key aspect relating to this. Key to our policy on motel development is that we are not proposing they are located anywhere along the transport corridors but rather at the interchange locations where they will work to serve the settlements. We are not putting them on the main roads but in easy to reach locations. We will investigate this issue further at the LPP stage.

Recommendation

- Proposed TOZ's identified in the POP alongside those newly identified in this report are to be assessed on the ground to establish the extent of their designation.
- Policy wording TOU 3 should be expanded to read '*Development of hotel and self-catering accommodation on unzoned land within the settlement and Dispersed Rural Communities will accord with the Plan provided it does not conflict with the Local Policies Plan and its land use zonings. Within Tourism Opportunity Zonings the development of hotels and self-catering accommodation of at least 3 units will also accord with the plan provided it can be demonstrated that special attention has been given to the integration of the site and any natural or built heritage features including the landscape character of the area.*'
- Remove Broughderg and Davagh Upper DRC as being a designated TCZ.

- That the first objective for tourism be revised from, ‘facilitate tourism in an environmentally friendly manner,’ to, ‘facilitate sustainable tourism in an environmentally sensitive manner,’ as per the SPPS.
- Continue to engage with the Tourism and Culture and Arts section of the Council to establish if a TOZ should be associated with any of the Seamus Heaney trails.

Implementation of Recommendation(s)

The proposed Tourism Opportunity Zones which currently form part of the draft Strategy are the result of on the ground assessment which has taken place over the last 6 months.

The suggested policy wording contained within the recommendations has been included in Policy TOU 3 and the wording of the first tourism objective has been reworded in the manner proposed so that it is now based more closely on the SPPS and is incorporated in the “Regional Context” and “Our Tourism Strategy” paragraph of this chapter in the draft Strategy.

In line with the recommendations, Broughderg and Davagh Upper DRC is no longer zoned as a Tourism Conservation Zones, as shown in the maps in the draft Strategy.

Whilst we have not designated TOZ’s on the Seamus Heaney Trails, our Tourism Strategy has referred specifically to them as cultural assets which are key to us being able to open up our countryside to tourists.

Agriculture and Forestry Development

Q. Do you agree that the policy approach to allow for new buildings to be constructed on active and established farms/ forestry holdings will facilitate growth, provide sufficient scope to meet the needs of the farmer and protect the countryside?

Consultation Bodies Response

NED stated they are concerned that the more permissive approach to agricultural development will lead to increased ammonia production. They also stated they are concerned about the impact Policy AFR1 will have on ancient woodland, and as such would like MUDC to consider the inclusion in policy of a provision that development should not be located on ancient woodland.

Response from the Public

A representative Ballynagilly Community Preservation and Heritage Group said they are supportive of the removal of the requirement to demonstrate need when applying to build a new agricultural shed; as long as the development is subject to other planning considerations

Ross Planning Consultants responded agreeing with the policy approach for

agriculture and forestry development, that a more flexible approach is needed. However, in general said policy should focus new building at the site of existing clusters of buildings.

The RSPB referring to agriculture, forestry & rural development generally, stated that in order to main sustainable patterns of development and use of materials and resources both within urban and rural areas, they recommend existing buildings, should be utilised in the first instance, unless there are exceptional circumstances to allow otherwise. And that, consistent with existing strategic policy, these exceptional circumstances should be clearly articulated.

The RSPB also commented that none of the Agriculture, Forestry and Rural Development policies contain a requirement to avoid detrimental impact on the environment. They state such presumptions in favour of development need to be framed within the context of being subject to normal planning considerations to avoid misinterpretation.

Consideration

The preferred policy approach to agricultural and forestry development and subsequent Policy AGR1: Agriculture and Forestry Development provides greater flexibility, allowing the opportunity for new agriculture buildings to be constructed without the need to demonstrate the re-use / conversion of existing buildings first. This is consider the correct approach as it caters for a rural district like Mid Ulster where agriculture has a strong presence. By recognising the individual needs of Mid Ulster's rural communities and providing sufficient scope to meet the needs of the farmer we believe this approach and policy will facilitate growth.

The SA / SEA Interim report has identified that there may be potential negative impacts by facilitating the development of intensive agricultural operations such as poultry production and associated adverse impacts of ammonia production. However this report stated that although this preferred option may have broadly negative environmental effects, it is considered that these are not likely to be significant.

There is no needs test in Policy AGR1 but we recognise large scale proposals can have adverse impacts and we should therefore put a test on that and recognise it in policy. We could do this by keeping Policy AFR 1 as it is, but adding the line that:

'Proposals for intensive farming and animal husbandry it will be necessary to demonstrate that the proposal will not have a significant adverse environmental impacts particularly in terms of ammonia production.'

NED's request to consider development impacts on ancient woodland is noted and is be considered under a separate policy

With regards NED's second comment, that Policy AFR1, should include within it provision that development should not be located on ancient woodland, please note that the POP is to be read in its entirety, as such it is considered the Natural Heritage Policy NH5 - Other Habitats, Species or Features of Natural Importance, provides adequate protection to ancient woodland. Policy NH5 states, 'Proposals for

development which are likely to result in the unacceptable adverse impact on, or damage to Other Habitats, Landscape Features, Species or Features of Natural Heritage Importance (which includes ancient woodland), shall not accord with the LDP unless the benefits of the proposed development outweigh the value of the habitat, species or feature. In such cases, appropriate mitigation and/ or compensatory measures will be required unless the benefits of the proposed development outweigh the value of the habitat, species or feature. In such cases, appropriate mitigation and/ or compensatory measures will be required.'

Regarding the RSPB's comments that the policy does not contain a requirement to avoid detrimental impact on the environment, it is highlighted that this issue is covered in the General Principles Planning Policy under the Landscape Character criteria test. Depending on the proposed development other relevant subject planning policies may also be considered including Archaeology and Built Heritage; and Natural Heritage policies, which provide protection to the built and natural environment.

Q. Should all buildings be required to group with existing farm clusters?

Consultation Bodies Response

There was no specific response to this question.

Response from the Public

One representation from Ross Planning Consultants whilst agreeing with the option for agriculture and forestry development, said in general, policy should focus new buildings at the site of existing clusters of buildings.

Consideration

Regarding development in the countryside the SPPS promotes a policy approach 'to cluster, consolidate, and group new development with existing established buildings, and promote the re-use of previously used buildings. This sustainable approach facilitates essential new development, which can benefit from the utilisation of existing services such as access and drainage, whilst simultaneously mitigating the potential adverse impacts upon rural amenity and scenic landscapes arising from the cumulative effect of one-off, sporadic development upon rural amenity and landscape character. The suggested policy AFR1: Agriculture and Forestry Development states that new developments must be located next to an existing building on the holding and not appear incongruous to the rural setting. And that only in exceptional circumstances an alternative site away from existing buildings may be considered where there are demonstrable business reasons, health and safety reasons or a need to protect the amenity of nearby residents to site away from an existing building. It is considered, this policy ties-in with the SPPS approach to cluster development. However upon reconsideration of Policy AFR 2: Farm Diversification we consider it appropriate that additional wording be added that where there are exceptional circumstances and a new building may be permitted it should where possible cluster with the existing farm buildings.

Q. Do you agree with the policy approach that existing buildings should be utilised in the first instance to facilitate farm diversification and / or should it allow for new buildings?

Consultation Bodies Response

NED responded stating that Policy AFR 2: Farm Diversification should highlight the potential for impact upon species such as roosting birds and bats that could be located within old agricultural buildings.

Response from the Public

MAG agreed with the policy approach to farm diversification that existing buildings should be utilised in first instance. The RSPB stated in general that in order to maintain sustainable patterns of development and use of materials and resources both within urban and rural areas, they recommend existing buildings, should be utilised in the first instance, unless there are exceptional circumstances to allow otherwise. And that, consistent with existing strategic policy, these exceptional circumstances should be clearly articulated.

The Ballynagilly Preservation and Heritage Community Group welcomed the commitment to continue to facilitate farm diversification schemes. The Tyrone County GAA Committee responded that the Plan and its associated policies should support farm diversification in all its many forms.

The RSPB replied that none of the Agriculture, Forestry and Rural Development policies contain a requirement to avoid detrimental impact on the environment.

Consideration

NED comments that Policy AFR 2 should highlight the potential for impact upon species such as roosting birds and bats that could be located within old agricultural buildings are noted. However we do not consider this to be necessary as these issues are already considered as part of the development management process. If species such as roosting birds and bats are located within old agricultural buildings this will be identified by the case officer during a proposals initial site inspection as part of the development management process and where necessary an Environmental Impact Assessment would be triggered.

Regarding the RSPB's comments that the policy does not contain a requirement to avoid detrimental impact on the environment, it is highlighted that this issue is covered in the General Principles Planning Policy under the Landscape Character criteria test. Depending on the proposed development other relevant subject planning policies may also be considered including Archaeology and Built Heritage; and Natural Heritage policies, which provide protection to the built and natural environment.

Q. Should the farm diversification proposals involving new buildings be limited in size?

Consultation Bodies Response

There was no specific response to this question.

Response from the Public

MAG responded stating that diversification proposals involving new buildings should be limited in size.

Consideration

In considering whether farm diversification proposals involving new buildings should be limited in size, the key question is, if they were to be, what should the floor space restriction be? At present, as a suggested floor space area has not been put forward it is considered best that farm diversification proposal involving new buildings remain to be assessed under normal planning considerations such as scale and character, which can act to restrict their size. Within the suggested farm diversification policy it states the scale and character of any new buildings must be in keeping with the established rural character. All proposals will be also be assessed against the General Principles Planning Policy which includes nature and scale of development; siting, design and external appearance; and landscape character criteria tests.

Q. Should proposals for farm diversification have to demonstrate that they will be run in conjunction with the farm?

Consultation Bodies Response

There was no response to this question.

Response from the Public

A response from Workspace Ltd welcomed the facilitation of farm diversification however stated that the requirement for the new activity to run in conjunction with the farm is too restrictive and may be counter-productive regarding farm diversification.

Consideration

Comments regarding the requirement for the new activity to run in conjunction with the farm being too restrictive and that it may be counterproductive regarding farm diversification are noted. However this policy has been aligned to that of the SPPS which states 'provision should be made for a farm diversification scheme where the farm business is currently active and established (for a minimum 6 years) and, the proposal is to be run in conjunction with the agricultural operations of the farm.' This is consider the correct approach.

Q. Should the conversion and re-use of existing buildings be restricted only to 'locally

important buildings’?

Consultation Bodies Response

The Department for Communities, Historic Environment Division (HED) replied stating that regarding rural development and non-listed vernacular buildings they would advocate the retention and sympathetic conservation of such assets where this would secure their upkeep & retention.

NED commented that Policy AFR3: Conversion and Reuse of Existing Buildings for Non-Residential Use should highlight the potential for impact upon species such as roosting birds and bats which could be located within such old buildings.

Response from the Public

MAG responded in agreement that the conversion / re-use of existing buildings should be restricted only to 'locally important buildings'. The Ballynagilly Community Preservation and Heritage Group commented welcoming the reuse of older traditional barns for non-residential use.

The RSPB state that none of the Agriculture, Forestry and Rural Development policies contain a requirement to avoid detrimental impact on the environment.

Consideration

From the outset it should be noted the wording in the Preferred Options Paper of Policy AFR 3 – Conversion and Re-use of Existing Buildings for Non-residential Use, is incorrect. A misprint in publishing resulted in its wording being a duplicate of previous policy AFR 2, when it should have read, 'The conversion and re-use of locally important buildings of special character or interest (such as former school houses, churches and older traditional barns and out buildings) for non-residential use will conform with the plan provided that the proposed conversion is sympathetic to the character of the existing building and any new use will secure its up keep and security.'

Furthermore upon reconsidering Policy AFR 3 – Conversion and Re-use of Existing Buildings for Non-residential Use, it was considered it would be more appropriately placed under the Built Heritage section and as such is recommended to be repositioned.

Within the countryside there are a range of locally important buildings of special character or interest. In some cases the original uses of these buildings have ceased. We wish to ensure that policies within the LDP will help secure their retention in the interest of cultural and historic interests.

Existing policy in PPS21 allows for the conversion and reuse of existing buildings for non- residential use. It however stipulates that the existing building must be of permanent construction. This criteria has been expanded in the SPSS to cover a range of locally important buildings of special character or interest (such as former school houses, churches and older traditional barns and out buildings). We are of the opinion that a policy to facilitate the conversion of any building within the countryside may be

open to abuse and could result in land uses incongruous to the rural setting. Therefore deem the suggested policy to limit the reuse of buildings for non-residential purposes to locally important buildings the correct approach.

As stated above all proposals involving the re-use / conversion of buildings will be assessed through the development management process and the potential impacts upon roosting species will be considered as part of that process.

Regarding the RSPB's comments that the policy does not contain a requirement to avoid detrimental impact on the environment, it is highlighted that this issue is covered in the General Principles Planning Policy under the Landscape Character criteria test. Depending on the proposed development other relevant subject planning policies may also be considered including Archaeology and Built Heritage; and Natural Heritage policies, which provide protection to the built and natural environment.

Recommendation

- **Confirm preferred approach and Policy AFR 1 but expand to include additional wording for *'Proposals for intensive farming and animal husbandry it will be necessary to demonstrate that the proposal will not have a significant adverse environmental impacts particularly in terms of ammonia production.'***
- **Include in both policies AFR 1 and AFR 2 that new buildings should where possible be clustered with existing buildings. Only in exceptional circumstances an alternative site away from existing buildings will be considered.**
- **Retain Policy AFR 3 but reposition it in Archaeology and Built Environment section of the Plan Strategy.**

Implementation of Recommendations

Policy AFR 1 with the proposed additional policy wording has been included in the draft Plan Strategy. The wording has also included allowances for siting the development away from a farm holding for environmental reasons as well as in the case of new farm enterprises. Both AFR 1 & AFR 2 make it clear that the first preference would be to cluster buildings with existing buildings but that exceptionally, this might not always be the most suitable course of action.

Policy on the conversion / re use of existing non listed buildings is successfully incorporated into HE 13. Non vernacular conversions can be assessed under AFR 2 while conversion of vernacular buildings can now be assessed under Historic Environment Policy.

ENVIRONMENTAL POLICIES – PROTECTING HERITAGE AND PROVIDING INFRASTRUCTURE

Archaeology and Built Heritage

Q. Does the policy in relation to regional and local archaeological remains and their settings go far enough to ensure their preservation or protection, BH 1?

Consultation Bodies Response

The Department for Communities, Historic Environment Division (HED) stated concern that the proposed policy reduces the level of protections afforded to regional and local important archaeological remains and their settings. They state that the terms “regional significance”, “regional importance” and local “local importance” are fundamental in existing policy. HED highlight concern that an exception for public utilities had been included within the policy and state that this is not in keeping with PPS6 where exceptions are only permitted for proposals of overriding importance to the NI context. They raise concern that the drafted policy has potential to conflict with the Historic Monuments and Archaeological Objects (NI) Order 1995 in terms of statutory requirements for Scheduled Monument Consent.

Response from the Public

The Historic Monuments Council responded stating that the policy wording is confusing, that it implies that ASAs only are of regional importance and highlights certain types of development rather than taking a principle-led approach. They recommend that input is sought from HED.

Consideration

The suggested policy aims to protect and preserve archaeological remains of both regional and local importance. The proposed exception is for an essential public utility to serve the local community only which will have minimal impact on a site of regional importance. We consider that this is to be a pertinent exception as it may aid local communities but still ensure control over inappropriate development in areas of regional archaeological importance. We wish to clarify that, as per the SPPS, archaeological remains of regional importance include monuments in state care, scheduled monuments and areas of significant archaeological interest (ASAs). The suggested policy clearly states that development proposals that would adversely impact upon archaeological remains of regional importance or the integrity of their settings will conflict with the plan. Our suggested policy approach to include an area of constraint upon an existing ASA i.e the Beaghmore stone circles area will protect and conserve specific ASA settings from inappropriate development that would detrimentally impact on the value of the statutorily protected assets. The Planning Department, as per Regulation 10 of the Planning (LDP) Regulations (NI) 2015, have consulted with HED regarding our preferred approach and suggested policies. Their comments have been considered in this summary document.

Q. Do you agree with the policy approach to Archaeology: Assessment, Evaluation and Mitigation, Policy BH2?

Consultation Bodies Response

HED are concerned that this suggested policy, as worded, is contrary to international conventions in relation to the protection of Built Heritage Assets.

Response from the Public

The Historic Monuments Council have raised concern over the amalgamation of two existing regional policies into one. They consider that this is likely to lead to confusion and have an adverse impact on archaeological remains and obligations under international conventions. A separate representation received advocated support for the suggested policy wording.

Consideration

We have amalgamated existing regional PPS 6 Planning policies BH3- Archaeological Assessment and Evaluation and Policy BH4- Archaeological Mitigation into one policy. We consider that this is a more streamlined approach which makes it more straightforward for planning officers and members of the public to deal with. None of the actual wording in either of the existing policies has been lost / deleted when these policies were amalgamated into the one policy. Therefore the suggested amalgamated policy will not have an adverse impact upon archaeological remains and obligations under international conventions.

Q. Is the preferred approach and suggested policy BH3 taken in relation to Historic Parks, Gardens and Demesnes sufficient to ensure that their character is not harmed?

Consultation Bodies Response

HED agree with adopting the existing policy approach as the preferred approach. They expect that in further drafting of this policy sufficient explanatory text will be included akin to PP6 / SPPS.

Response from the Public

One response from a private planning consultancy stated that an overly restrictive approach to development must be avoided as appropriate development can often be more readily accommodated within an established landscape setting of an estate than the open country.

Consideration

We welcome the fact that HED are supportive of the existing policy approach being

adopted. We consider that our suggested policy is not overly restrictive as it states that development that does not harm the character, intrinsic value or conservation of a historic park, garden and demesnes will accord with the plan.

Q. Do you agree with the policy approach and suggested wording of policy BH 4- Listed buildings?

Consultation Bodies Response

HED welcomes the preferred approach however considers that the suggested policy fails to provide adequate protection for any proposed changes to Listed Buildings and their settings. HED recommend that the existing policy framework as set out in both the SPPS and PPS 6 are adopted.

Response from the Public

MAG have responded stating that the suggested policy wording should include demolition of a listed building will conflict with the plan unless there are exceptional reasons as 'assessed against PPS 6 criteria'.

Consideration

The exceptional reasons as to why a listed building may be permitted to be demolished will be included within the amplification of this policy in the draft Plan Strategy. These will align with the exceptions as identified in PPS 6. We note the comments raised from HED regarding adequate protection. Following submission of their consultee reply, the Planning Department have recently met with HED to discuss further the issues raised. This meeting was generally positive and we consider that the issues raised by HED are not insurmountable and relate mainly to specific policy wording. HED were concerned that changing policies would lead to confusion. However we consider that amalgamating the existing policies regarding listed buildings into one overall policy, would simplify matters (there are 5 existing regional policies relating to listed buildings in PPS 6). We note HEDs concern regarding policy detail possibly becoming diluted when policies are amalgamated. We note that for this particular policy details regarding the use of traditional building materials and techniques and architectural details may have been diluted. Therefore we will engage further with HED on the final detailed wording of the policy given their expertise in this area.

Q. Do you agree with the preferred approach and suggested wording for policy BH 5- Advertisement on Built Heritage Assets, BH 5?

Consultation Bodies Response

HED notes the proposed option to amalgamate existing regional policies and advise that the new policy must provide the same level of protection as currently afforded by PPS 6 Policy BH 9- The Control of Advertisement on a Listed Building. HED suggest

that the policy title should be carefully considered as the term 'Built heritage Assets' includes assets other than Listed Buildings, and buildings in a Conservation Area or Area of Townscape Character.

Response from the Public

No comment received.

Consideration

For clarification, we have stated in our POP, page 90, that built heritage assets includes Listed Buildings, buildings in a Conservation Area or Townscape Character Area. Our suggested policy wording provides the same level of protection as existing policy BH 9 but also includes additional criteria including that the display of an advertisement on built heritage assets must maintain the overall character and appearance of the area and must not prejudice public safety.

Q. Do you agree with the preferred approach and suggested wording of Policy BH 6- Conservation Areas?

Consultation Bodies Response

HED notes concern regarding the amalgamation of Policy BH12 and BH 14 in PPS 6 as each policy addresses separate considerations; BH12- the appropriateness of new development in a conservation area and BH 14 the consideration of demolition in a conservation area. However HED acknowledge that these policies should be updated to reflect legislative changes as per the Planning Act (NI) 2011 and strategic policy as per the SPPS.

Response from the Public

MAG responded stating that the suggested policy should state that exceptions to allow demolition of an unlisted building within a conservation area should be assessed via the criteria for demolished listed buildings as per PPS 6. They state that where conservation area consent for demolition is granted that this should be subject to findings of a thorough conservation management plan. MAG agree that a Design and Access Statement should accompany development proposals for change of use, alteration or extension and/or new development in a conservation area.

Consideration

We note HEDs concern regarding policy detail possibly becoming diluted when policies are amalgamated. We note that for this particular policy details regarding the scale, form, materials and detailing of the development may have been diluted. Therefore we will engage further with HED on the final detailed wording of the policy given their expertise in this area.

Q. Do you agree with the preferred approach and suggested policy BH 7 regarding non-listed vernacular buildings and industrial heritage?

Consultation Bodies Response

HED recommends that parallel consideration is given to the review of Policies CTY4- the conversion and reuse of existing buildings, PPS21. They suggest that policy CTY3- replacement Dwellings in PPS21 relating to non-listed vernacular dwellings should also form part of the consideration. In the interests of policy clarity they suggest it may be appropriate to amalgamate both policies.

Response from the Public

Carntogher Community Association agrees with this suggested policy approach stating that it will preserve vernacular buildings and other heritage assets that are significant but not worthy of being listed. Another representation welcomed this policy stating that it would see the reuse of buildings which form an important element of Northern Ireland's industrial heritage. This respondent stated that such properties may offer employment opportunities i.e. through the provision of workspaces / offices.

Consideration

We consider that non-listed vernacular buildings are buildings of character which display local traditions of architecture and design and are an important part of our heritage and regional identity. Therefore we believe that our suggested policy which introduces flexibility allowing for new extensions to be permitted to encourage the retention and reuse of these buildings. We already have an amalgamated policy, Policy CT2- dwellings in the countryside which addresses both replacement dwellings and conversion / re-use of existing non-residential buildings. However we consider that the proposed policy ARF3- Conversion and re-use of existing buildings (which was located on the agriculture, forestry and rural development section of the POP) could be amalgamated with policy BH 7. This policy is regarding the conversion and re-use of locally important buildings of special character or interest such as former school houses / churches / traditional barns / outbuildings. The stipulation stating conversion to a 'non-residential' use shall also be removed. Therefore the Policy title of BH 7 and the wording will be expanded to include policy AFR3 as stated in the recommendations below.

Q. Do you agree with the preferred approach and suggested wording of Policy BH 8- Areas of Townscape (ATC's)/ Village character.

Consultation Bodies Response

HED welcome the preferred approach to require all demolition proposals in an ATC to include appropriate arrangements for the redevelopment of the site. HED advise that the retention of existing policies in relation to archaeology and built heritage as articulated in PPS6 and SPPS, and for maintaining compliance with international conventions on the protection of heritage to which the UK is a signatory.

Response from the Public

No comments received.

Consideration

The suggested policy wording replicates that of the SPPS and therefore we consider that the policy will comply with international conventions on the protection of heritage.

Q. Do you agree with the preferred approach and suggested policy BH 9- Enabling Development for the Conservation of Significant Places?

Consultation Bodies Response

HED welcome the preferred approach which proposes to adopt the existing enabling development for the conservation of significant places policy as outlined in the SPPS and PPS 23.

Response from the Public

No comment received.

Consideration

The support for this approach is noted.

Q. Do you agree with the suggested policy BH 10- Local Landscape Policy Areas (LLPAs)

Consultation Bodies Response

HED commented that LLPAs (and ATCs) have a key role in the protection and enhancement of historic landscapes.

Response from the Public

The RSPB welcomes the retention of LLPAs but suggests that additional wording should be included- providing it does not harm the intrinsic 'environmental value' and character of assets within it and adheres to local policy guidance. Two representations requested that the extent of LLPAs in Magherafelt be reduced.

Consideration

We welcome support for the suggested LLPA policy and agree that the additional wording 'environmental value' could be included within the policy wording. The final drafting in the draft Plan Strategy will include this additional wording.

Q. Should Mid Ulster District Council prepare a local list of non-designated heritage assets.

Consultation Bodies Response

HED welcomes MUDCs consideration of the preparation of a list of non-designated heritage assets in their local area. HED advise that they have published 'Historic Buildings of Local Importance – A guide to their identification and protection (May 2017)' which may assist District Councils should they wish to develop their own bespoke policies.

Response from the Public

One representation from Carntoghter Community Association agreed that MUDC should prepare a list of non- designated heritage assets stating that it would be very useful in assisting planners give consideration to vernacular buildings / other heritage assets that are significant but not capable of being listed.

Consideration

We consider that the creation of a 'local list' of heritage assets is an effective way of providing additional protection for buildings and structures that are valued by the local community. The preparation of a 'local list' would provide an opportunity for MUDC and the community to work in partnership. The actual production of the LDP would be the priority document to be published and adopted however this 'local list' work could be undertaken at a later stage.

Q. What are your views on the designation of additional Areas of Significant Archaeological Interest (ASAI's) within Mid- Ulster?

Consultation Bodies Response

DfC HED identify and propose ASAI's. They have recently reviewed ASAI's and they have informed us that they propose that the ASAI for Beaghmore will now extend into the Fermanagh and Omagh District Council area and also further north in our district. They have also advised that both Creggandevsky and Tullyhogue have now been identified as ASAI's and they propose that they be brought forward. The maps for the 3 areas are included at Appendix 2 and the Statement of Significance compiled by HED are attached for Beaghmore and Creggandevsky at Appendix 2. They advise that the Statement for Tullaghogue will follow shortly. Given the importance or archaeological assets to the culture and identify of our district and the fact that they make up important strand of our tourism vision it is recommended that the new ASAI's (or parts thereof) are confirmed in the Plan Strategy and that policy for them is brought forward taking cognizance of the Statements of Significance from HED to inform the policy.

Response from the Public

No comment.

Consideration

Given the importance of archaeological assets to the culture and identity of our district and the fact that they make up an important strand of our tourism vision it is recommended that the new ASAI's (or parts thereof) are confirmed in the Plan Strategy and that policy for them is brought forward taking cognizance of the Statements of Significance from HED to inform the policy.

Recommendation

- **Include exceptional reasons as to why a listed building may be demolished in the amplification of policy BH 4- Listed Buildings**
- **Amalgamate policies BH 7 and AFR3 wording and retain this amalgamated policy in this Archaeology and Built Heritage section. Amend policy title to read 'Non Listed Vernacular Buildings, Industrial Heritage and Conversion and Reuse of Existing Buildings'. Remove stipulation stating for 'non-residential use' (in existing policy AFR 3).**
- **Consider creation of a 'local list' of non-designated heritage assets following adoption of the LDP**
- **Engage further with HED on the final detailed wording of the policy given their expertise in this area.**
- **It is recommended that the new ASAI's (or parts thereof) are confirmed in the Plan Strategy and that policy for them is brought forward taking cognizance of the Statements of Significance from HED to inform the policy.**

Implementation of Recommendations

This section has been titled "Historic Environment" instead of "Archaeology and Built Heritage." Accordingly, policies are now suffixed with "HE" instead of "BH." Policies have also been restructured to better align with regional and strategic policy so references made in the recommendations above to policies may now refer to differently named AND numbered policies. For instance, BH 4 is now HE 10. The justification and amplification for HE 10 includes a list of criteria / information which must be complied with / supplied in order for the demolition of a listed building to be acceptable. Engagement has been ongoing with HED regarding policy wording and work is also ongoing on a local list of non-designated heritage assets.

The conversion of non listed vernacular buildings can now be assessed under policy HE 13, even if it constitutes part of a farm diversification scheme. The reference to "residential use" has been removed.

Maps have been provided in the draft Plan Strategy for ASAI designations at Tullaghoge, Creggandevskey and Beaghmore as well as corresponding policy being provided in HE 1.

Natural Heritage

International Designations

Q. Do you agree that a Special Countryside Area (SCA) should be introduced along our Loughshore (see map below) to restrict all forms of development (apart from new development within Tourism Nodes) to protect one of our most important and sensitive environmental assets?

Q. Do you agree an SCA should only be introduced at the Lough Shore of Lough Neagh and Lough Beg?

Consultation Bodies Response

There is significant support for the SCA along the Lough Shore within the Public Sector, whereas there was a more mixed response from the Private Sector (in terms of consultation bodies).

DfC, NED, welcome the concept of an SCA to aid with protection of international and national designated sites. NED, support and agree with preferred options in the POP which relate to protected species, local and national designations and other habitats, species and features. NED welcome the consideration of an AONB policy.

Department for Infrastructure (DfI) notes that the key environmental measures reflect the content of the SPPS, however the three options presented provide a limited interpretation of the environment and mainly focus on natural environment issues. DfI encourage the Council to ensure all aspects of 'environment' are given adequate consideration within the 'Growth Strategy', including the preferred option for the patterns of development presented and impacts of climate change such as flood risk & mitigation.

DfI notes that the SPPS advocates a presumption in favour of sustainable development being inherent in the plan, and state that with regard to the Environment Strategy there is no differentiation between Options 2 and 3 – it is not clearly set out. DfI clarify that the SA should inform the choice of preferred option – clear links and justification needs to be set out. In addition, consideration with regard to impacts of other growth strategy policies needs to be articulated in terms of outcomes for the Environment. DfI stress that it is vital that Council is satisfied that the policy options brought forward are fully assessed against social/economic/environmental considerations & in combination with other draft policies (i.e. Housing, Transport, Economy, Tourism) – to assist in providing a coherent approach to the development of the Plan Strategy of the LDP.

Renewable energy and Utility bodies had various views with regard to the protection of the Lough Shore. They suggested that a blanket exclusion of all Natura 2000 Areas runs contrary to EU guidance and legislation.

Response from the Public

General support for the protection of the Lough Shore. There is support for Environmental Option 3 and for the identification of vulnerable landscapes at strategic level. A number of public representations suggested amended wording and rephrasing of draft Natural Environment Policies.

Consideration

All concerns and comments have been considered. Specific consideration of the SCA designation is set out in the growth strategy/spatial framework section of this report.

SCAs & Areas of Constraint

Q. Do you agree that the use of an SCA and Areas of Constraint on Minerals Development and on High Structures is the correct approach to protecting our most vulnerable landscapes?

Q. Do you agree with the preferred approach to the protection of our most vulnerable landscapes?

Consultation Bodies Response

There was general agreement among consultation bodies that this was the right approach. NED, agree with preferred Option 2 however there are concerns with regard to terminology and specific wording. NED highlighted that the suggested tests for Minerals development are not strong enough, particularly 'special attention' and 'prejudice' – i.e. not sufficient to justify negative impacts on internationally and nationally designated sites. There is support for the identification and protection of vulnerable and sensitive landscapes including historic context. The concern of HED is focused on the justification for the identified areas of constraint i.e. robust evidence base and methodology. There are strong concerns with regard to rural development, particularly single dwellings – i.e. lack of a coherent vulnerable landscape approach.

There is concern with regard to the lack of policy for 'Mitigating and Adapting to Climate Change' and 'The Importance of Ecosystem Services' in terms of Mitigating and Adaptation measures and assessing the impact of development – i.e. identify sustainable approaches to the protection of the natural environment.

NED raised concern that the draft Tourism Policies are not appropriate in that there is potential to allow inappropriate development in the most environmentally sensitive areas. Clarification regarding justification for Tourism Policies is needed i.e. detrimental impact on designated natural assets. There is also concern with regard permissive approach to agricultural development, i.e. Permitted Development rights and juxtaposition with designated / protected natural assets.

It is noted that there is no policy for identified ancient woodland areas, it is recommended that there is specific policy for such designations.

NED, raise serious concerns with regard to renewable energy tests in that they do not reflect the RDS or SPPS specific wording or policy 'tests'. In addition, NED

recommend the inclusion of a test which states that ‘no development within active peatland unless there are imperative reasons of overriding public interest’. Furthermore they note that wind energy development under 15m will be inappropriate in certain areas of Sperrin’s AONB. Further consultation and clarification needed.

Renewable energy and Utility bodies had various views with regard to the protection of the Lough Shore. They suggested that a blanket exclusion of all Natura 2000 Areas runs contrary to EU guidance on wind energy development as set out The Habitats Directive – MUDC needs to take account of EU legislation clearly and accurately. There is also a lack of detail with regard to the positive aspects of all types of renewable energy, particularly with regard to climate change and ecosystem services – this needs to be acknowledged. Concerns were raised regarding the apparent disconnect between Plan Objectives and the Spatial Framework, particularly the spatial direction for addressing climate change and provision of renewable energy infrastructure. Do the draft policies fully take account of the UK Climate Change targets for emissions cuts?

Other private sector suppliers support the imposition of Areas of Constraint and welcomes that exceptions will be considered where it is demonstrated that the proposal is of regional importance or where a ‘not spot’ is identified.

Response from the Public

Mixed response from public representations. There is support for Environmental Option 3 and for the identification of vulnerable landscapes at strategic level. A number of public representations suggested amended wording and rephrasing of draft Natural Environment Policies and draft designated areas at international/national/local level.

Consideration and Recommendation

All concerns and comments have been considered. Specific consideration of the SCA designation and also on Minerals ACMD’s and AoC’s are set out in separate sections of this report.

Natural Environment Strategy

Q. Does the strategy provide sufficient protection, enhancement and conservation of our Natural Heritage?

Consultation Bodies Response

Mixed response to draft strategy, i.e. Public vs Private interests.

DfC, NED welcome the proposed natural heritage strategy and spatial framework in terms of the concept of identifying vulnerable landscapes but are unsure of the justification used to define these areas – i.e. methodology and evidence base. It is recommended that the Council undertake a detailed local Landscape Character Assessment using recognised methodology. SPG 8 does not mention walking or cycling yet these are specifically referred to in the plan objectives.

There is concern with regard to the preferred option for housing allocation – widespread development in the rural area is not sustainable and would not be in general conformity with SPPS and RDS. The preferred option would create negative impacts for biodiversity and water quality. NED suggest Option 2 should be adopted.

There is widespread support for the presumption in favour of sustainable development. NED suggest the introduction of buffer zones around environmental features of habitat quality and species of conservation merit, i.e. a mitigation measures.

NED, welcome the river corridor policy and the inclusion of compensation for loss of habitat and/or species – this policy needs further detail with regard to mitigation measures and justification.

Response from the Public

Mixed response from public representations. The following comments have been noted – development opportunities are required in the Mid Ulster area to retain young people, a strong community, local shopping, cultural associations & schools to protect Mid Ulster's vitality, community identity and sustain the rural community. To achieve the vision for Mid Ulster equality across the region is imperative, allowing for future growth whilst taking into account its rich natural and built heritage.

There is support for Environmental Option 3 and for the identification of vulnerable landscapes at strategic level. A number of public representations suggested amended wording and rephrasing of draft Natural Environment Policies.

Consideration

All concerns and comments have been noted and considered with other separate sections of this report. As part our evidence gathering in relation to the environment further work is underway with regard to landscape Assessment of the district and this will be utilized to inform in part the various environmental designations coming forward.

Protected Species

Q. Do you agree with the preferred approach to the protection of Protected Species?

Consultation Bodies Response

NED comments relating to the proposed Open Space Policies likely having a detrimental impact upon Protected Species have been addressed within the Open Space, Recreation and Leisure section of this report.

Response from the Public

Mixed response from public representations. A number of public representations suggested amended wording and rephrasing of draft Natural Environment Policies.

Council Consideration and Response

All concerns and comments have been noted and considered. We will engage further with NIEA NED on the final detailed wording of the policy given their expertise in this

area.

Recommendation

- **Engage further with NIEA NED on the final detailed wording of the policy given their expertise in this area.**

National Designations

Q. Do you agree with the preferred approach to the protection of National Sites?

Consultation Bodies Response

There is support from NED for the preferred approach of the council for the protection of national sites as the use of special areas of constraint would be difficult to achieve and areas would be different for different types of proposals and features of the site.

Response from the Public

Mixed response from public representations. A number of public representations suggested amended wording and rephrasing of draft Natural Environment Policies.

Council Consideration and Response

All concerns and comments have been noted and shall be considered. We will engage further with NIEA NED on the final detailed wording of the policy given their expertise in this area.

Recommendations

Confirm the policy approaches as highlighted within the Preferred Options Paper and liaise with NED when finalizing the wording of the policy.

Local Designations

Q. Do you agree with the preferred approach to the protection of Local Sites?

Consultation Bodies Response

NIEA, NED welcomed the integration of Sites of Local Nature Conservation Interest into Local Sites policy. HED suggested however that policy text should again include mitigation and compensation.

NIHE, would like to have the existing NH4 Policy, clarified to show that it is a natural environment value of a site not its economic value that is the key policy test.

Response from the Public

Mixed response from public representations. A number of public representations suggested amended wording and rephrasing of draft Natural Environment Policies.

Council Consideration and Response

All concerns and comments have been noted and shall be considered. We will engage further with NIEA NED on the final detailed wording of the policy given their expertise in this area.

With regards NIHE concerns relating to the clarification required as to whether Policy NH4 relates to the economic value of a site MUDC would comment that the policy refers to the wider environmental, economic and social value of the site.

Recommendations

Confirm the policy approaches as highlighted within the Preferred Options Paper and liaise with NED when we carry out further drafting of policy following this meeting.

Area Of Outstand Natural Beauty (AONB) and Areas of High Scenic Value (AOHSV)

Q. Do you agree with the preferred approach to the protection of Other Habitats, Species and Features of Natural Importance?

Q. Do you agree with the preferred approach to the protection of Areas of Outstanding Natural Beauty?

Consultation Bodies Response

NED, stated their strong support for these policies. NED note that the most sensitive features of AONB's & AOHSV's can still be impacted upon by development under 15m in height. There should still be overarching policy for ensuring such development is acceptable. NED, suggests rewording AONB and AOHSV policy, There is concern with regard to some policy 'tests' and mitigation measures in that they are not adequate enough to protect the special interest of the designation.

Renewable Energy and Utilities bodies raised concerns stating that no evidence has been provided to demonstrate that development of wind turbines has had a detrimental impact on the intrinsic value of an AONB. Therefore some private bodies disagree with the introduction of an Area of Constraint. More detailed consideration with regards to such areas must be given – i.e. a robust evidence base and justification – impact of renewable energy, high structures and Mineral Development.

Response from the Public

Mixed response from public representations. A number of public representations suggested amended wording and rephrasing of draft Natural Environment Policies.

Consideration

Structures under 15m within an Area of Constraint will still be required to comply with all other relevant policies and therefore it is considered that this specific policy does not need to be expanded. This can be explained in the amplification to the policy.. The concerns of NED in relation to the wording of the AONB Policy within the POP is noted however this has been closely aligned to phraseology contained within the

SPPS.

Recommendation

- **Proceed with the proposed AONB policy approach highlighted within the POP.**

Implementation of all Recommendations

Comprehensive comment has been received from NIEA (NED) in the drafting of the wording of the natural heritage policy section of the draft Plan Strategy and these comments have been taken on board. In terms of national designations the preferred approach from the POP has been carried forward. The same applies to the preferred approach for local designations which has been carried through to the draft Plan Strategy. Although in relation to Local Designations, the policy wording has been strengthened from “could effect” to “significant adverse impact” and the requirement for mitigation and / or compensation has been built in.

The AONB preferred approach to the POP has been carried through to the draft Strategy.

Flood Risk

Q. Do you agree with the suggested strategic approach to flood risk?

Consultation Bodies Response

DfI- Rivers Agency stated they agreed with the preferred strategic approach to flood risk issues affecting Mid Ulster. They state that the LDP should be in compliance with the approach to flood risk in the SPPS.

DfI- Water and Drainage Policy Division state that consideration should be given to the implications of Sustainable Water- A Long Term Water Strategy (LTWS) This strategy aims to ensure that land-use planning decisions are informed to help minimise flood risk and to make space for surface water management in development plans. The LTWS states when considering zoning suitable lands through LDPs, large surface water drainage schemes such as lakes, wetlands and wet woodland could be created to meet future drainage needs of the development in the area and can also provide environmental and recreational value.

The RSPB state that where floodplains are prevented from functioning, due to artificial flood banks, consideration should be given to the removal of strategically targeted flood banks, to allow the floodplain to function properly, and manage the risk posed downstream. They believe landowners should receive ecosystem service payments, made through a joined up approach between, for e.g. water companies; tourism providers; flood risk managers & environmental farming schemes.

Referring to water quality NED stated that given the SPPS comments on Water Quality, the POP should contain a designated water quality section which considers the Water Framework Directive and the NI River Basin Management Plans. This would

address land zoning, rural development, run off from agricultural development, SUDS etc.

Response from the Public

A representation from Workspace Ltd stated that the Council's thinking on the topic of flood risk is timely and appropriate. They state the LDP should simultaneously recognise climate change factors which increase flood risk also have significant detrimental economic impacts on core local business activities e.g. farming & minerals. Tyrone County GAA committee responded stating they supported the Councils thinking on this subject.

The RSPB stated that MUDC's Flood Risk Strategy omitted a number of key actions which are essential to the management of flood risk within the plan area as articulated at regional strategic level, and required within policy at local level. These include; a strongly worded policy which clearly and robustly prevents new development in areas known to be at risk of flooding, or that may increase the risk of flooding elsewhere, a policy to promote sustainable development through the retention and restoration of natural flood plains and natural watercourses as a form of flood alleviation and an important environmental and social resource and promoting an integrated and sustainable approach to the management of development and flood risk which contribute to: the safety and well-being of everyone; the prudent and efficient use of economic resources; the conservation and enhancement of biodiversity; and the conservation of archaeology and the built heritage.

Consideration

The suggested Flood Risk Strategy is to manage development so as to reduce the risks and impacts of flooding. One of the key objectives identified in the strategy is to apply a precautionary approach to development in areas that may be subject to flood risk. Suggest Policy FLD 1: Fluvial Floodplains states that development within fluvial floodplains identified as subject to a 1 in 100 year fluvial flood risk will not accord with the plan. Therefore as most types of development within the floodplain is not acceptable the existing natural floodplains will remain unaltered. This policy states that land infilling, which involves permanently elevating a site to an acceptable level above the flood plain in order to facilitate development will not be acceptable within the fluvial floodplain, where displacement of flood water would be likely to cause flooding elsewhere. We consider that the suggested precautionary approach to development in areas that may be subject to flood risk presently or in the future as a result of climate change predictions is a sustainable approach.

We have taken account of the LTWS in our evidence gathering for this flood risk topic. This was considered in our policy review paper- planning and flood risk (April 2016). Both our position papers and policy review papers were published on the Councils website to accompany publication of our POP.

In response to RSPBs comments, the drainage of agricultural land is ultimately a matter for Darea and whilst natural drainage and natural floodplains would be sensible

in NI, in Mid Ulster most areas sit outside floodplains and therefore it is difficult to see the benefits of such a policy. This approach would be inappropriate unless it was coordinated by DAERA.

In response to the comments from NED regarding water quality, we are aware that the POP did not include specific policy concerning development relying on non-mains sewerage. The General Principles Planning Policy GP 1 will be updated to include this as stipulated in the recommendations below.

Do you agree with the preferred option and potential policy wording for development within river flood plains, policy FLD 1?

Consultation Bodies Response

DfI Rivers responded stating that in respect of all flood risk management the underlying principles is that all policies should ensure that proposed development does not cause any increase in flood risk to the development or elsewhere. They state that for defended areas, flood defences should be constructed to an appropriate standard as defined by Rivers Agency. They state that the policy does not require mitigation for exceptions and that the policy does not state that for all exceptions approval is subject to the applicant submitting a satisfactory Flood Risk Assessment. They highlight that some existing exception have not been included such as water compatible development, sport and recreation facilities and mineral extraction. They state that the criteria for development of over-riding regional importance needs to be defined to prevent inappropriate development being declared as such. They state that specification is required for Flood Risk Assessments. They believe that justification and amplification is required to avoid conflicting interpretations of the core policy.

Response from the Public

One representation stated that they are supportive of the proposed flooding policy which they believe mirrors the provisions of PPS 15. Ross Planning Consultants said generally that the floodplain policy as existing is reasonable although there is a need to allow the Council to be pragmatic and to allow proposals which will have negligible impacts / or the impacts can be mitigated against.

The RSPB said to manage floods economically and sustainably, they believe there is a need to look to new approaches, including better warning systems, more floodplain storage, tighter controls on building on floodplains, and better land management. Therefore they fully support the Council's overall presumption against development within river floodplains. However, in terms of the list of permitted activities they stated that positioning more properties in floodplains can increase flood risk, which may, in turn, require creation of more flood defence structures. The intensification of use of previously developed land could allow increased development in high flood risk areas with minimum flood defences where (i) risk is likely to increase in the future with climate change, resulting in the need for more hard flood defences and (ii) the existing flood defences are already reducing the capacity of the flood plain to carry out its function.

They suggest, therefore, a presumption against the development of previously developed land within settlement limits, even if the appropriate 'current' minimum standard of flood defence has been met. The RSPB also state that the final paragraph within Policy FLD 1 should be amended to include the following additional wording- where flood protection and/ or management measures are 'identified in a Flood Risk Assessment' in order to facilitate a 'valid' exception.

Additionally, RSPB said the requirement for a Flood Risk Assessment should be included within Policy FLD 1, including the requirement when a site is close to the margins of the flood plain as depicted on the Strategic Flood Map and a more accurate definition of the extent of potential flooding is required.

Consideration

It is considered that their preferred approach and suggested policy which states that development will not be permitted within the 1 in 100 year fluvial flood plain, unless it constitutes as an exception, is correct. This approach will ensure sufficient protection is provided and through consultation with Rivers Agency, appropriate mitigation may be sought and where development is located within a known flood plain, a Flood Risk Assessment will be required. The Planning Department will consult with Rivers Agency to ensure that any proposals within defended areas are acceptable and that flood defences are constructed to an appropriate standard. We are of the opinion that existing policy in PPS 15: Planning and Flood Risk places a burden of justifying the need for a development proposal within a floodplain on the developer as a Flood Risk Assessment is required. It is considered that any such development proposals received can be adequately assessed through the development management process wherein consultation with Rivers Agency will take place. We note comments from Rivers Agency that some of the existing exceptions have not been included and agree that these should be included. The suggested policy FLD 1 policy worded will be updated to reflect this amendment. The suggested policy will also be updated to include where flood protection and/or management measures 'are identified in a flood risk assessment'.

We consider that flooding is not generally a significant problematic issue in the Mid Ulster District in comparison to other areas with Northern Ireland. Therefore we consider it appropriate that the suggested policy allows for development upon previously developed land which is already protected by existing flood defences as identified by Rivers Agency. All applications for such proposals will be assessed on a case by case basis.

Recommendation

- **Confirm the preferred option for Policy FLD1.**
- **Expand the wording in suggested policy FLD 1 to include the following exceptions to development in a fluvial floodplain- Water compatible development, use of land for sport and outdoor recreation, amenity open space or nature conservation purposes and the extraction of mineral deposits and necessary ancillary development**

- **Expand FLD 1 policy wording to include where flood protection and/or management measures are required 'as identified in a flood risk assessment'.**
- **Expand Policy GP 1, criteria (g) other infrastructural requirements to include additional wording 'Where mains sewerage is not available the applicant will be required to demonstrate that this will not create or add to a pollution problem'.**

Implementation of Recommendations

The policy approach from the POP has been continued into the draft Plan Strategy. Additional exceptions have been added to FLD 1, as per the recommendations, for water compatible development, outdoor sport & recreation and extraction of minerals. The policy has also been expanded to include the requirement for submission of a Flood Risk Assessment. The GP1 policy has included the need to address sewerage / infrastructural requirements.

Q. Do you agree with the wording of the potential policy for the protection of flood defence and drainage infrastructure, policy FLD 2?

Consultation Bodies Response

DfI: Rivers stated this policy should refer to drainage infrastructure as defined by River's Agency and that it should include reference to a 5m to 10m working strip being required to facilitate maintenance and repair. They state that justification and amplification is required to avoid conflicting interpretations of the core policy.

Response from the Public

RSPB supports Policy FLD2, provided permission can still be granted for redevelopment that replaces hard with soft flood defence mechanisms e.g. in certain cases to breach flood defences to allow flooding of low-lying land for managed retreat purposes. The RSPB also suggest amended wording to include the council will not permit development that would impede the operational effectiveness of flood defence and drainage infrastructure or 'hinder access for maintenance purposes'. They state that the dimensions of the Rivers Agency working strip should be contained within the policy; 'The working strip should have minimum width of 5 metres, and up to 10 metres where considered necessary, and be provided with clear access and egress at all times'.

Consideration

We agree that reference to maintenance should be included with the policy wording. The suggested wording will be updated to reflect this in the draft Plan Strategy. A suggested working strip of 5m to 10m will be included for clarity in the policy amplification in the draft Plan Strategy.

Recommendation

- **Confirm the suggested policy FLD 2 but expand wording to include**

development that would impede the operational effectiveness and ‘maintenance’ of flood defence and drainage infrastructure.

- **State in the policy amplification (in draft Plan Strategy) that a 5m-10m working strip would be considered appropriate.**

Implementation of Recommendation(s)

Although FLD 2 is now re-titled FLD 3, the preferred approach has been carried through and the policy wording updated as recommended. The stipulation of 5-10 metre working strip has been included in the justification and amplification.

Q. Do you agree with the preferred approach and potential policy wording regarding development and surface water (fluvial) flood risk, Policy FLD 3?

Consultation Bodies Response

DfI: Rivers highlighted that it does not state that where there is both fluvial and surface water flood risk, fluvial flood risk should take precedence. They state a specification is required for Drainage Assessment and that justification and amplification to avoid conflicting interpretations of the core policy.

Response from the Public

RSPB queries policy wording stating “where a drainage assessment is not required but there is potential for surface water flooding as indicated by the surface water layer of the Strategic Flood Map, it is the developer’s responsibility to assess the flood risk and drainage impact and to mitigate the risk to the development and any impacts beyond the site” can be effectively regulated / monitored to ensure compliance. They also made the comment, that given peatlands are internationally recognised as important for water storage, they hope policy FLD 3 is reflected in the assessment of plans to extract peat from lowland and raised bogs in NI, and that the precautionary approach will be adopted. They state where planning permission is granted subject to the undertaking of mitigation measures, a planning agreement to facilitate their long-term management may be required.

Consideration

If a development proposal is located both within a fluvial floodplain and a surface water floodplain it will be assessed against both relevant policies FLD 1- Fluvial floodplains and FLD 3- Development and surface water (pluvial) flood risk. Suggested Policy FLD 3 clearly identifies a specification for when a Drainage Assessment is required eg. for a development site in excess of 1 hectare. The policy wording regarding developers responsibility existing in regional policy PPS 15 (also Policy FLD 3). To date the impacts of this policy wording has not been a problematic issue for the Planning Department and therefore we consider that it is retained. A specific policy for extraction of peatland will be included within the minerals section of the draft plan strategy.

Recommendation

- **Confirm the preferred option for Development and Surface Water (Pluvial) Flood Risk**
- **Confirm the suggested Policy approach of Policy FLD 3**

Implementation of Recommendation(s)

The policy approach of FLD 3 has been carried through to the draft Plan Strategy although it has now been repositioned in the suite of policies and referred to as FLD 2

Do you agree with approach to the artificial modification of watercourses and the potential policy wording of FLD4?

Consultation Bodies Response

DfI:River's Agency commented that justification and amplification is required to avoid conflicting interpretations of the core policy.

Response from the Public

The RSPB support the policy approach to the artificial modification of watercourses. Although they raise concern that canalisation of any form can disrupt the connectivity and interaction between wetlands, riparian zones and rivers.

Consideration

We welcome the support for this policy approach and suggested policy wording. Justification and amplification will be included in the Draft Plan Strategy. We are of the opinion that the suggested policy approach in Policy approach FLD 4- artificial modification of watercourses, is the correct approach as adopts a strict approach to any development proposals which require the artificial modification of a watercourse. All planning applications received for the artificial modification of watercourses will include consultation with the relevant bodies i.e. Rivers Agency, Inland Fisheries (DAERA).

Recommendation

- **Confirm the suggested policy approach of Policy FLD 4**

Implementation of Recommendation(s)

The approach and wording of FLD 4 have been carried through to the draft Plan Strategy although it is now repositioned in the suite of policies and referred to as FLD 5.

Do you agree that the option to have no policy in relation to development proximity to reservoirs is the correct approach for Mid Ulster?

Consultation Bodies Response

DFI state they note the Councils preferred option in relation to development in proximity to reservoirs - Option 3: Adopt no policy. However they draw the Councils attention to para 6.127 of SPPS which states that 'LDPs must take account of the potential risks from flooding over plan period & beyond as this is likely to influence decisions on such matters as the zoning of land for development / designation of land for open space. Flood risk may also be a consideration in the definition of settlement limits & in decisions concerning the designation of new settlements'.

DfI: Rivers disagreed with the option not to have a Local Plan Policy dealing with reservoir flood risk. They advised that the Council should have one and it should comply with paragraphs 6.119 to 6.122 of the SPPS. They said, that should the Council draft a Local Plan Policy to deal with flood risk from Controlled Reservoirs, then justification and amplification will be required to avoid conflicting interpretations of the core policy.

DfI Rivers commented that the creation of new reservoirs for hydroelectric generation schemes which are capable of impounding 10,000 cubic metres or more of water above natural ground level will require compliance with the Reservoirs Act (Northern Ireland) 2015. Such lakes will be considered "Controlled Reservoirs" and this may have cost implications for reservoir owners. This may also result in restrictions on future development within the inundation zone of the Controlled Reservoir.

Response from the Public

One representation agreed with the POP's preferred option to have no policy in relation to development in proximity to reservoirs.

The RSPB said they are concerned with this approach, given the number of reservoirs in Mid Ulster. They stated that Rivers Agency should provide the Reservoir Development Management Maps as a matter of urgency until such times, the Regional Strategic Policy contained within the SPPS should apply.

Consideration

Existing regional policy in PPS 15, Policy FLD 5- Development in Proximity to Reservoirs, remains controversial and DfI have undertaken to review it. It is likely that by the time the LDP comes forward an alternative policy will have been agreed thus it is proposed that a holding policy will be placed in the LDP which could be revised as a result of representations received at a later date (after publication of the draft plan strategy). The wording of this holding is stated in the recommendations below.

Recommendation

- **Include a holding policy within draft plan Strategy stating ‘that development within a flood inundation area of a controlled reservoir will be in conflict with the plan except where it has been demonstrated through a Flood Risk Assessment that appropriate controls are in place to ensure that there would be no significant risk to the development.’**

Implementation of Recommendation(s)

Policy has been included in the draft Plan Strategy (FLD 4) regarding the unacceptable nature of development that is proposed within a Flood Inundation Area, unless demonstrated otherwise by a Flood Risk Assessment.

Do you agree with the policy approach to SuDS?

Consultation Bodies Response

NED stated they promote the use of SuDS and state that there may be certain areas where development would cause damage to water quality and wherein the local species are highly sensitive to such impacts. SuDS would be preferable in these location and would allow development to occur.

Response from the Public

The RSPB referring to SuDs welcomed Mid Ulster’s commitment to maintain the SPPS Regional Strategic Policy for Flood Risk. They state that SuDs should be promoted within new developments, along with retrofits to existing developments when assessments prove the need.

Consideration

In managing development, particularly in areas susceptible to surface water flooding, we consider it important that the use of SuDs should be encouraged. In order to further promote this issue we have decided to include a policy of encouragement towards using SuDs options and will now place this policy within the General Principles Planning Policy. This will bring the use of SuDs more to the forefront and could potentially result in more applicants / developers deciding to implement such systems. The desired outcome is to promote the use of SuDs as the preferred drainage solution which, as stated in the SPPS, has shown to be more effective than traditional piped drainage in reducing surface water flooding as well as providing other environmental, economic and social benefits.

Recommendation

- **Expand Policy General Principles, GP 1, to state that ‘proposals involving SuDs schemes will be given favourable consideration and developers will be encouraged through a Flood Risk Assessment to consider SuDs options.**

Implementation of Recommendation(s)

GP1 has not stated that development involving SuDS will be given “favourable consideration,” rather it states that development proposals should be encouraged to use SuDS as preferred drainage solutions.

Waste

Q. Do you agree with the preferred approach to the subject of waste management?

Consultation Bodies Response

DFI acknowledges that a Joint Waste Management Plan has been prepared by MUDC, Omagh & Fermanagh Council & ABC Borough Council and welcomes setting up of this forum. DfI reiterates the importance of the NI Waste Management Strategy.

Response from the Public

One representation suggests there is no reason why the suggested policy approach cannot accommodate the policy provisions of PPS11: Planning and waste Management as amended by the SPPS. This could provide all the various tests relating to flooding, built and natural heritage, roads matters etc.

Consideration

We consider that the preferred option is more streamlined than the existing policy in PPS 11. This approach emphasises the positive role waste management can play in providing employment, investment and improving health and well-being. This option makes no reference to flooding, built heritage and natural heritage and road safety as these criteria are considered within separate general policies in the general policy section of the plan.

Recommendation

- **Continue to deal with these issues in the general principles section of the Plan.**

Implementation of Recommendation(s)

General Planning Principles such as flooding, built heritage, land improvement continue to be omitted from Waste Management policy and dealt with via General Principles policy.

Q. Do you agree that the concept of ‘land improvement’ should be removed from policy within the mid ulster LDP, Policy WM1? If not explain why.

Consultation Bodies Response

No response on this issue.

Response from the Public

One representation suggests that land improvement provisions should be retained within the policies for waste management.

Consideration

The SPPS makes no reference to the issue of land improvement i.e. the disposal of inert waste by its deposition on land and the council at policy review stage established that there were issues with the existing Policy WM4 of PPS 11 relating to Land Improvement schemes. Such issues included that the policy wording requires that *'only the minimum quantity of fill necessary to achieve the proposed improvement shall be deposited'*, this been problematic in that it is difficult to assess and enforce with regard to land improvement. It is considered that proposals for land improvement schemes would be assessed against the suggested General Principles Planning Policy.

Recommendation

- **Continue to deal with these issues in the general principles section of the Plan.**

Implementation of Recommendation(s)

General Planning Principles such as flooding, built heritage, land improvement continue to be omitted from Waste Management policy and dealt with via General Principles policy.

Q. Do you agree that the suggested policy wording addresses the waste management hierarchy laid down in the waste framework directive? If not how should it be amended?

Consultation Bodies Response

No response on this issue

Response from the Public

One representation suggested that the word "need" for waste collection / treatment facilities and waste disposal in the proposed policy wording be removed. A second representation supports the council's thinking subject to the word 'timely' being added to policy WMU1 (VI) so it reads as follows:

*In the case of waste disposal the proposal includes suitable, detailed, **TIMELY** & practical restoration & aftercare proposals for the site.*

Consideration

The SPPS states in para 6.316 that a presumption in favour of waste collection and treatment facilities, and waste disposal (land filling and land raising) will apply where a **need** for such development is identified through the Waste Management Strategy and the relevant Waste Management Plan. In the case of Waste Water Treatment Works (WWTW's) **need** must be demonstrated to the satisfaction of the Department or relevant authority.

Through our obligation to take account of the SPPS we feel that in this instance the case of need should remain within this policy.

We note and agree with the request to include 'timely' within the policy wording. We will consider how best to include this in the policy re-write of WM1: Waste Management-General Policy.

Recommendation

- **The case of need should remain within Policy.**
- **Reword policy WM1: Waste Management – General Policy going forward in the Plan Strategy to include the word “timely”**

Implementation of Recommendation(s)

The case of need is still included in Waste Management policy at policy WM 1 and is expanded upon in the Justification and Amplification.

Telecommunications, Overhead Cables and High Structures.

Do you agree with the imposition of “Areas of Constraint on Wind Turbines and High Structures”?

Note

Only those comments that relate specifically to 'Areas of Constraint' in the context of Telecommunications, Overhead Cables and High Structures are included in the summary below. Comments submitted regarding 'Areas of Constraint' in the context of Renewable Energy have been summarised under the Renewable Energy topic.

Consultation Bodies Response

NIE (Northern Ireland Electricity), SONI (System Operator for Northern Ireland) and ESB (Electricity Supply Board) do not agree with the imposition of 'Areas of Constraint on Wind Turbines and High Structures'. NIE believe it will;

- Increase cost to customers of developing the electricity network in order to meet economic growth demands in local areas
- Increase cost to individual customers wishing to connect and /or alter existing connection in order to expand their business

- Add time delays associated with reinforcing the network and connecting customers.

NIE and ESB are concerned with the practical implications of introducing a 15 metre height restriction and the consequential economic impact. For example, NIE feel it may result in needing more poles because of shorter span lengths and necessitate more underground cable works. NIE also feel it will result in greater visual impacts and an inconvenience to landowners as more poles would need to be placed in the middle of fields rather than along field boundaries.

NIE fear that different planning requirements in different councils, when it comes to network infrastructure, will only add complexities and cost to the planning process and would instead prefer to see common planning policy across NI.

ESB suggest that statutory undertakers should be exempt from Area of Constraint policy in the context that the overall planning framework already provides a robust framework for ensuring that all standards are met. Similarly, SONI requests that policy exceptions within Areas of constraint should also include any development by 'a licensed transmission system operator'.

SONI considers that the imposition of a blanket 15 metre height restriction on all overhead cables (as proposed), does not consider the safety or site specific requirements associated with overhead transmission lines and if adopted has the potential to restrict SONI's ability to fulfil its statutory licence obligations. It states that the purpose of the proposed policy, which appears to be to protect sensitive landscapes, 'may therefore have unintended consequences on the security of electrical energy supply across the entire region.' SONI believes that the preferred approach conflicts with the SPPS (Para 6.238) and the RDS (section 2.10), as well as Regional Guidance 5 and Strategic Framework Guidance 6.

NED (NIEA) while welcoming 'Areas of Constraint' have queried why they don't align with vulnerable landscapes as identified in MUDC Landscape Assessment Paper. They suggest that there should be justification as to why these areas differ spatially and what evidence was used to justify a smaller area.

Adjoining councils Causeway Coast & Glens borough Council, Derry and Strabane District Council and Fermanagh and Omagh District acknowledge that the proposed Areas of Constraint are an area of common interest and highlight the need for a joined up approach in the interests of consistency.

Response from the Public

Many respondents have stressed the need for a good electricity distribution network to support new homes and businesses in rural areas in particular. There is also a general consensus that the Mid Ulster area suffers disproportionately from poor broadband and mobile provision and that this increasingly impacts on local 'personal, social, educational and business life'. There is a strong desire to see a flexible & innovative response in the LDP to address this issue. One local community group responded saying that it 'wishes to see tighter controls on high structures'. The proposed Area of Constraint was an issue discussed at a few public consultation

meetings following publication of the POP. The general consensus at these meetings was that the proposed Area of Constraint was a good idea.

RSPB welcomes the suggested coordinated approach to addressing strategic infrastructure. They suggest however that any spatial approach should be undertaken at the regional level, and should have regard to a more comprehensive list of criteria beyond landscape and visual impact.

One respondent has requested for further clarity in policy to ensure that the areas of constraint on high structures will not apply to plant machinery used for onsite processing of minerals.

Consideration

Both NIE and RSPB have raised concerns with the potential for inconsistencies across districts, with RSPB stating that they prefer a spatial approach be taken at regional level in relation to strategic infrastructure. The suggested policy takes account of the SPPS which sets the strategic direction for councils to bring forward operational policies within their LDP's. Paragraph 5.23 states that Councils may bring forward additional strategic policies and proposals, zonings and designations specific to issues pertaining to the plan area. Paragraph 6.75 provides the policy context for designating Special Countryside Area's and/or local policies (such as Areas of Constraint) to help protect identified sensitive landscapes from inappropriate development. In the interests of ensuring cross-council consistency MUDC recently set up a number of forums to discuss cross boundary issues with adjoining councils. At the forum established regarding the Sperrins, the proposed Area of Constraint was a key issue discussed. There will be continued engagement with the adjoining councils throughout the plan making process.

SONI considers that the imposition of an AoC conflicts with the SPPS and the RDS and that the blanket 15 metre height restriction has the potential to restrict its ability to fulfil statutory licence obligations. It has also been suggested (SONI and ESB) that statutory undertakers and licensed operators respectively should be made exempt from AoC policy restrictions. We contend that the principle of an AoC accords with both the RDS and the SPPS as it aims to facilitate the development telecommunications/utilities infrastructure '*whilst keeping environmental impact to a minimum*' as stated in paragraph 6.238 of SPPS. The limited extent of the suggested AoC and the inclusion of an exception within suggested policy for consideration of proposals of regional importance, can ensure that important electricity network infrastructure is provided throughout the district without detriment to the environment.

Notwithstanding, we recognise the practical difficulties that transmission operators may face when introducing new electricity infrastructure within a proposed AoC. In a recent meeting, representatives from SONI advised that new infrastructure would typically reach heights of 21-25 metre, well above the suggested 15 metre height restriction for AoC's'. In order to facilitate this type of development where it is necessary, it is suggested that an exception is built into suggested policy wording to facilitate all essential electricity transmissions and also supply to address the concerns of NIE and ESB, up to a maximum height of 25 metres.

The potential adverse economic and social impacts raised by both SONI and NIE are noted and can be factored into the ongoing sustainable appraisal of options going forward. Although landscape protection is enshrined in the existing policy framework, as argued by ESB, it is considered that there are certain areas within the district that would benefit from added protection due to their high sensitivity.

We note the concerns and queries in relation to the methodology employed for determining the extent of the proposed AoC. The AoC, as indicated in the POP, is an indicative area largely based on a desktop analysis. Further detailed site surveying will be carried out to determine the exact extent of the proposed AoC prior to the publication of the draft Plan Strategy. The final methodology used to inform the draft AoC will also be made available to ensure clarity.

The POP acknowledges that there is poor mobile and broadband provision within Mid Ulster and this was one of the main issues emerging from the Community Plan consultation. Strong connectivity to data services is vital to help keep businesses competitive and to ensure that rural communities in particular do not feel isolated. Within AoC's consideration will be also given to proposals that are located within a known 'not spot'. The proposed policy therefore aims to facilitate the required telecommunications infrastructure in the appropriate locations, and in locations where it is needed most.

We note concerns raised by quarrying operators FP McCann that the 15 m height restriction within 'Area of Constraint on wind Turbines on High Structures' may also apply to quarry plant machinery. In order to address some of the concerns of the minerals industry it is recommended that the policy be updated to clarify that it is 15m from original ground level. Therefore where quarry plant is located within a worked out quarry area, which is the case in many sites, this would allow some flexibility since the plant would be situated at a level below the original ground level. If the plant is at original ground level and above 15m in an AoC then this policy would apply. In addition, since the final line of the AoC has not been finalised we are not in a position to confirm how many quarries would fall within it.

Recommendations

- **Further develop the methodology used to inform Areas of Constraint and carry out further site surveying to determine their extent.**
- **Reword and amend layout of policy to remove potential ambiguities in relation to what constitutes a 'High Structure'.**
- **Include scope within policy for allowing all essential electricity transmissions within Areas of Constraint. Suggested policy wording is as follows;**

'Subject to the above considerations, telecommunications development, overhead cables and high structures will normally be restricted to 15 metres in height above original ground levels in 'Areas of constraint on Wind Turbines and High Structures'.

Exceptions may be considered where it is demonstrated that it is:

- ***an essential electricity transmission or supply which if not provided for would result in demonstrable hardship;***
- ***telecommunications apparatus to serve a recognised 'not spot';***
- ***for a farm structure essential for the operation of agriculture in the area;***

Where the above exceptions apply a 25 metre height restriction will be applied and the applicant will be required to demonstrate that they have given full consideration to the landscape sensitivity of the area.

Higher structures will only be considered if it is demonstrated that the proposal is of regional importance.'

Implementation of Recommendation(s)

Further work on the AOC methodology was carried out including desk top surveys which preceded the final phase of field work and consisted of visiting all places where the AOC line would be located. The policy has been reworded to clarify that the height of a high structure is measured from original ground level. The recommended wording to allow scope for essential works has been included in policy TOHS 1.

Should telecommunications development and overhead cable development be permitted up to 15m in "Areas of Constraint on Wind Turbines and High Structures"?

Consultation Bodies Response

NED (NIEA) consider that there are certain parts of the Sperrin's AONB, where the introduction of any structure would be inappropriate due its 'relative wildness'. They suggest that these areas be protected by a Special Countryside Area designation wherein development would only be permitted in exceptional circumstances.

Response from the Public

No responses were submitted by the public on this issue.

Consideration

NED advise that there are certain parts of the Sperrin's AONB which warrant stricter development controls such as a Special Countryside Areas. We feel that the AoC is appropriate approach to protect the areas referred to by NED. It is felt that this approach provides a balance between ensuring that the important and sensitive landscapes are protected while also allowing for a balance of appropriate development to serve the needs of these areas. The policy as worded does not simply imply a presumption in favour of structures up to 15m but rather states that they will be subject to the detailed criteria listed in the policy and normally restricted to 15m subject to meeting that criteria.

Recommendation

- **Take forward the policy approach as suggested in the POP with the above exceptions included.**

Implementation of Recommendations

The preferred approach has been taken forward with exceptions allowed as per TOHS 1. The most remote and wildest parts of the Sperrins are protected by a Special Countryside Area.

Do you agree with the potential policy wording? If not tell us what you would change?

Consultation Bodies Response

NED takes issue with the policy test requiring overhead cables to follow '*natural features*' of the environment as they feel this may result in the loss of biodiversity such as woodlands or hedgerows. They suggest overhead cables should be required to follow '*manmade features*' and that this be reflected in policy.

Response from the Public

One respondent suggests that the policy should include guidelines regarding the councils approach to undeveloped extant permissions for single rural dwellings that are, or will be, directly affected by the route of such overhead cables.

Consideration

We note NED's concerns, on biodiversity grounds, with the requirement for overhead cables to follow '*natural features*'. This part of the suggested policy mirrors that of existing relevant policy PSU 1 'Overhead Cables' as contained in 'A Planning Strategy for Rural NI'. Minimising visual impact is a key consideration when assessing proposals for overhead cables, hence the requirement to be located beside natural features. Such proposals normally traverse open countryside, where manmade influences may be minimal and the potential for visual intrusion is high. In light of NED's concerns however, it is considered that the policy should be re-worded to say that the cables should take into account the natural features rather than follow them.

We note the suggestion to introduce guidelines where extant permissions may be affected by proposals for overhead powerlines. It is considered that potential land-use conflicts can be satisfactorily resolved through the development management process and associated statutory requirements. If however guidance was deemed necessary on this issue, it would be considered appropriate for this to come from DFI to ensure consistency across council areas.

Recommendation

- **Reword policy to state that in the case of overhead cables the chosen route should "*take into account*" the natural features of the environment.**

Implementation of Recommendation(s)

Upon reflection, this has not been implemented, policy TOHS 1 states that in the case of overhead cables, the chosen route should “follow” the natural environment as opposed to “take into account”. The wording of the POP has been carried through and the recommended wording has not been implemented. This is the approach of existing policy contained within the PSRNI and there is no evidence to suggest that this has caused undue harm to existing hedgerows or habitats.

Renewable Energy

Q Should an area of constraint on wind turbines and high structures be introduced in Mid Ulster District?

Consultation Bodies Response.

There has been a mixed response from consultation bodies to the suggested introduction of an Area of Constraint (AoC). Responses have been received from Government Departments, adjoining councils and electricity licence holders.

Northern Ireland Housing Executive (NIHE) give their support to the introduction of Areas of Constraint. Natural Environment Division (NED) of NIEA also support the idea of introducing Areas of Constraint (AoC) although they have queried the methodology used to define them. They also believe that there are certain parts of the Sperrin's AONB, where the introduction of any wind energy development (i.e. even that which is less than 15m in height as allowed for within suggested AoC's), would be inappropriate given landscape sensitivities.

The Department for Infrastructure (DFI) neither support nor oppose the introduction of AoC's. They do however emphasise the importance of a joined up approach across neighbouring councils, particularly when it comes to introducing spatial designations, to ensure that plan proposals do not conflict with those of neighbouring councils.

DFI also highlight that the SPPS states a 'cautious approach to renewable energy development proposals will apply within designated landscapes which are of significant value, such as AONBs'. They have queried whether the proposed restriction of 15m in height for turbines within Areas of Constraint of Wind Turbines/High Structures refers to hub height or blade height and have sought clarification on the definition of 'regional importance' as per suggested Renewable Energy policy wording RNW1.

Adjoining councils Causeway Coast & Glens borough Council, Derry and Strabane District Council and Fermanagh and Omagh District and Glens acknowledge that the proposed Areas of Constraint are an area of common interest, highlighting the need for a joined up approach in the interests of consistency.

The Renewable Industry, including SSE Electricity, Brookfield Renewable, ORA More Energy Ltd, The Renewable Energy Industry Group Ltd (TRIG) and Gaelectric

Developments strongly oppose the introduction of an Area of Constraint. They support the retention of the existing criteria based policy approach as contained within PPS 18 Renewable Energy (Suggested Option 1) which they feel affords adequate protection to environmental assets.

SSE are of the opinion that there is no evidence to inform the POP that would justify a policy based approach 'embargoing wind energy development within AONB's or other sensitive landscapes. They argue that the methodology used in the formulation of the MUDC Landscape Assessment is not adequately described, clear or robust and is therefore not fit for purpose.

Several respondents believe there is a disconnect between the stated plan objectives and the spatial framework. Some respondents have also suggested that an Area of Constraint could have an adverse economic impact in terms of job creation in the renewable industry.

Response from the Public

The suggested introduction of Areas of Constraint has been broadly supported by private individuals who responded to the Preferred Options Paper. One respondent, although in favour of an AoC, believes that a 15m height restriction within AoC's would render the turbines 'useless' (for domestic use only) and has suggested a 30 meter height restriction to be more appropriate.

The Conservation Charity RSPB have indicated their support for the introduction of Areas of Constraint.

R.E.S. Ltd, 'The worlds largest independent renewable energy company' and Northern Ireland Renewables Industry Group (NIRIG) which represents the views of the renewable electricity industry in Northern Ireland, consider that the introduction of AoC's would be both highly restrictive and unnecessary and that the existing policy framework remains fit for purpose. NIRIG consider that MUDC's suggested approach doesn't have regard to varied characteristics of the Mid Ulster area or other material planning factors, which may indicate that a windfarm development would otherwise be acceptable. They encourage MUDC to reflect the criteria based approach as contained within the SPPS.

RES Ltd believes that the POP places greater emphasis on the protection of visual and physical resources than the economic and environmental benefits of renewable energy. They expressed concern about the 'negative connotations that appear to be applied to wind energy' and advised that the targets referenced in the POP are now out of date.

RES also argues that the introduction of an Area of Constraint could lead to a proliferation of small turbines which cumulatively would have a worse effect than one large well designed/sited single turbine.

Planning Consultants Canavan Associates believe that the Councils preferred approach would not only severely restrict wind energy development, but also the development of 'telecommunications, grid infrastructure, biomass, power storage, as well as existing facilities (quarries etc)'.

Consideration

MUDC notes the support for Areas of Constraint from NED, RSPB, NIHE and a large number of private respondents.

NED have highlighted that there are certain parts of the Sperrin's wherein all renewable energy development should be avoided. MUDC will continue to work with NED, in advance of the plan Strategy, to help identify those areas which are particularly sensitive to development.

MUDC acknowledges the strong opposition to proposed AoC's, from the Renewable Energy industry in particular, and their prevailing preference for existing policy PPS 18 to be retained. It is our view however, that whilst the current policy approach has assisted in the achievement of renewable energy targets, the opportunity exists to streamline and tailor policy to the specific circumstances of Mid Ulster. This includes the introduction of an Area of Constraint which, in our view, helps create the correct balance between renewable energy development and the protection of our most important landscapes and assets. It is considered that this approach is in line with SPPS objectives, including in particular paragraphs 5.23 and 6.75, which allow for the introduction of appropriate designations and policies to ensure that highly sensitive landscapes are protected from inappropriate development.

We note the concerns and queries in relation to the methodology employed for determining the extent of the proposed AoC. It should be noted that the AoC, as indicated in the POP, is an indicative area largely based on a desktop analysis. Further detailed site surveying will be carried out imminently to determine the exact extent of the proposed AoC prior to the publication of the draft Plan Strategy. This will involve site visits and use of Viewshed (digital terrain technology) which has been sourced by the Councils IT Department to assist us with this work. The final methodology used to inform the draft AoC will be made available to ensure clarity and transparency to the public and it will be informed in part by the additional landscape assessment work which is currently underway.

In response to DFI's comments, it should be noted that in the interests of cross-council consistency and in line with legislation and guidance, MUDC has set up a number of cross boundary forums (Lough Neagh, the Sperrins and Cross Border) with neighbouring Councils who have a common interest in the suggested AoC and other suggested designations. The first meeting of the forum took place at the end of March and a follow up meeting took place in September. This close collaboration is ongoing and will continue throughout the plan-making process to ensure that we are in a position to demonstrate soundness at the independent examination.

In response to DFI queries about the suggested maximum height for turbines within the AoC's, it can be confirmed that the 15 metre height restriction refers to the height of the turbine hub. This accords with Environmental Assessment determination thresholds as contained within Schedule 2 of the Planning EIA Regulations (NI) 2015

In terms of proposals of 'regional importance', in the context of suggested Renewable

Energy policy RNW 1, this relates to the type of applications listed in Column 2 of the Planning (Development Management) Regulations (NI) 2015 and as prescribed for the purpose of section 26(1) of The Planning Act (NI) 2011.

Given the limited extent of the proposed AoC and the increasing average height of turbines applied for in recent years, it is considered unlikely that the suggested AoC would result in a proliferation of small turbines, as suggested by RES. In any case, each application will be considered on its own merits, including consideration of any potential cumulative impacts. It is also worth noting that the MUDC Rural Pressure Analysis position paper suggests that, apart from a several small pockets, those areas proposed as AoC have generally experienced less pressure for wind energy development than the rest of the district over recent years.

MUDC would disagree with the suggestion that MUDC is ‘under-planning’ for energy consumption for the forthcoming plan period by relying on out-of-date targets. The suggested approach takes account of international and national commitments on both renewable energy and greenhouse gas emissions and aims to facilitate and support a diverse range of renewable energy developments. It also takes account of RDS Regional guidelines i.e. to deliver a sustainable and secure energy supply (RG 5) and to conserve and protect and, where possible, enhance our built heritage and natural environment. The 2015 PFG targets (i.e. 20% of all electricity to be generated from renewable sources) are cited in the POP to highlight emerging trends and performance at a regional level and have been considered in our background preparatory papers. The contribution of renewable energy to the local economy has been widely acknowledged in the POP. The retention of a permissive renewable policy approach outside of AoC’s, will continue to facilitate employment in the green economy sector while at the same time facilitate renewable energy targets being met.

It is therefore recommended that the AoC approach be taken forward in the draft Plan Strategy and that further work is now undertaken to identify the exact line of the area.

Recommendation

- **Take forward the principle of an Area of Constraint on Wind turbines and High Structures in the draft Plan Strategy and carry out further work to determine its full extent.**
- **Amend suggested renewable policy wording as follows;**
 ‘Subject to the above considerations, renewable energy development will normally be restricted to 15 metres to hub in ‘Areas of constraint on Wind Turbines and High Structures’. Exceptions will only be considered where it has been demonstrated that the proposal is of regional importance and essential to meet the regions energy targets.’

Implementation of Recommendation(s)

The principle of an Area of Constraint on Wind Turbines and High Structures (AOCWTHS) has been brought forward and accordingly, a line has been identified to from the boundary of this designation. The policy does not include the recommended wording regarding exceptions to the AOC rule being allowed for renewable

development of regional importance or to meet regional targets. This is because of the evidence which shows that regional energy targets are on course to be met. Therefore, the need to build such an exception into policy is unproven.

Q. If an Area of Constraint on Wind Turbines and High Structures (AoC) was introduced what area should it cover within Mid Ulster

Consultation Bodies Response

Brookfield Renewable considers that the suggested AoC is too extensive and goes beyond the 'High Sperrins' to include less sensitive areas, such as Beltonanean and Ballynagilly that have already been developed for wind energy.

TRIG (The Renewable Energy Industry Group Ltd) suggest that **if** AoC's are to be introduced, that they should include scope for expansion of wind farms already located within them.

Response from the Public

It has been suggested by one individual that the Area of Constraint should also include the 'Pomeroy area' and possibly extended to include the whole Mid Ulster district.

RES suggest that **if** AoC's are to be introduced, that they should include scope for expansion of wind farms already located within them.

Canavan Associates who oppose the introduction of an Area of Constraint, have also queried the inclusion of the Beltonanean & Ballynagilly areas. They consider that these 'Outlier hills and Fringes' of the AONB have already been 'altered' by wind energy development, are less sensitive and should not be included within the AoC.

NIRIG believe that the introduction of an Area of Constraint is inconsistent with local decision making on wind energy within AONB's, specifically referring to wind farm approvals at Brockaboy, Cnockadun, and Dunbeg.

Consideration

MUDC welcomes all responses in relation to the suggested extent of an AoC within Mid Ulster. As referred to above, further detailed site surveying will be carried out to determine the exact extent of the proposed AoC prior to the publication of the draft Plan Strategy. The methodology used to define the AoC will also be fully recorded.

The suggested inclusion within policy for scope to expand existing windfarms within AoC's is noted however to include such an exception would contradict the purpose of the AoC. Any application coming forward to expand an existing windfarm would be considered in the context of the prevailing policy at that time and if located within an AoC that policy would apply to it.

At least one respondent feels that the 'Pomeroy area' should be included in the proposed 'Area of Constraint'. It is acknowledged that Pomeroy and surrounding areas, particularly to the north and east along the main Omagh to Cookstown Road, have experienced a higher degree of development pressure in the form of wind energy

in comparison to other parts of the district over recent years. This area however falls outside the area defined as vulnerable landscapes in the MUDC Landscape Assessment and due to its topographical nature, retains a greater capacity to limit the visibility of high structures. It should be noted however that proposals for wind energy development outside of designated AoC's will be considered on their own merits, taking into account all relevant criteria including potential cumulative impacts.

A blanket ban on renewable energy development across the District, as suggested by one respondent, would not just be unreasonable but contrary to Departmental policy and advice.

It is therefore recommended that further detailed site work is now undertaken to identify the exact line of the area of constraint and that further discussions on this matter take place within the cross boundary forums.

Recommendation

- **Undertake further detailed work to determine the exact extent of the proposed Area of Constraint.**

Implementation of Recommendation(s)

The principle of an Area of Constraint on Wind Turbines and High Structures (AOCWTHS) has been brought forward and accordingly, a line has been identified to from the boundary of this designation.

Q. Are there other options than the two shown to be considered?

Consultation Bodies Response

There have been no suggestions for an alternative policy approach to renewable energy development from the consultation bodies. Where the Councils preferred option was opposed by those in the Renewable Energy Industry, it was done so in favour of alternative option 1 contained in the Preferred Option Paper i.e. retaining the existing policy PPS 18 Renewable energy.

Although DFI did not suggest alternative policy options, they advised that whatever policy option is taken should clearly relate to the proposed objectives & this linkage should be adequately demonstrated in order to show consistency/coherence of approach.

Response from the Public

No alternative options were suggested by any of the respondents.

Consideration

It is noted that all responses were supportive of either one of the two options suggested within the Preferred Option Paper and that no alternative options have been suggested.

DFI's comments advice on consistency and coherence is also noted.

In terms of the way forward it is recommended that Preferred Option 2 be progressed within the draft Plan Strategy.

Recommendation

- **Take forward Preferred Option 2 'A More Sensitive Approach'.**

Implementation of Recommendation(s)

This approach has been adopted with the introduction of AOCWTH's on our most visually prominent ridge lines, where restrictions will be placed on wind turbines, not to mention Special Countryside Area's where all development will be resisted.

Q. Should a minimum separation distance be introduced between a wind turbine and occupied property?

Consultation Bodies Response

DFI have raised concern with the suggested 500m separation distance as they believe it may place a more onerous restriction on proposals for smaller turbines.

Response from the Public

There is broad support from members of the public for the 500 metre separation distance to be applied to all wind energy development. RSPB and one other respondent believe that this distance should even be extended given the increasing sizes of turbines. Others believe that the separation distance should be confined to wind farms only and not single wind turbines as this is more 'in line with the provisions of the SPSS'.

Many are in favour of the preferred approach as it offers more weight to views of neighbours by requiring all wind turbines to be located 500m from occupied dwellings unless there's agreement from those residents falling within the 500m. One respondent however, believes that the principle of neighbourhood agreement may lead to residents holding wind energy to ransom and should therefore be removed. In their view, potential amenity issues can be satisfactorily addressed under suggested policies RNW1 and GP1.

Siting a recent High Court judgement, one respondent believes there is now a clear link between wind energy development and property devaluation. In this particular case the High Court ruled that a local wind farm caused nuisance damage to neighbouring families.

Consideration

DFI have raised concerns that the 500 m separation distance may place more onerous restrictions on smaller turbines. One of the key issues emerging from MUDC workshops prior to the publication of the POP is the potential adverse impact of single turbines on residential amenity in terms of dominance and proximity. It is likely that

this issue can be linked to the increased average size of wind turbines in recent years. This upward trend is likely to continue given the average size of turbine blades being manufactured in Europe today is 50 metres in length (European Wind Energy Association). MUDC contends that applying a 500 metre set back distance to single commercial wind turbines will help address amenity issues while at the same time provide greater certainty for all stakeholders involved in the planning process. The requirement for neighbourhood consent for those turbines to be located within 500 metres of a property is seen as a way of providing flexibility that may suit certain circumstances.

It is also noted that in its recently published 'Preferred Draft Approach' to its Review of the 2006 Wind Energy Development Guidelines, the Irish Government has recommended mandatory minimum setback of 500 meters between a wind turbine and any residential property (or 4 times the tip height). Similar to our own rationale, this is seen as a way of striking a balance between facilitating future wind energy projects, while simultaneously addressing the genuine concerns of local communities in the areas where wind farm developments are proposed.

In the absence of evidence from DFI on their concerns it is recommended that this suggested minimum separation distance continue to be included in the policy contained within the draft Plan Strategy.

One respondent cited a recent High Court Judgement which it believes raises the issue of property devaluation and neighbourhood compensation in terms of wind energy development. It is considered that the specific circumstances of this case do not set a precedent for similar developments in other areas. The potential issue of property devaluation in proximity to a proposed development is not, of itself a material planning consideration. Rather, it is consequential upon the loss of amenity by way of for example, noise and dominance, which are taken into account when considering the acceptability, or otherwise of development. Paragraph 2.3 of the SPPS states that 'The basic question is not whether owners and occupiers of neighbouring properties would experience financial or other loss from a particular development, but whether the proposal would unacceptably affect amenities and the existing use of land and buildings that ought to be protected in the public interest'.

Recommendation

- **Include a minimum separation distance of 500 metres between a wind turbine and occupied property as suggested in the POP and amend policy wording to read as follows;**

'A separation distance of 10 times rotor diameter or 4 times the tip height (whichever is greater) between a wind turbine and an occupied property, with a minimum distance of not less than 500m will generally apply.

Implementation of Recommendation(s)

A separation distance of 10 times rotor diameter or height to hub (whichever is the greater) has been included although it has not been limited to a minimum distance of

500m and has not been included as part of policy wording. It is included in amplification as opposed to in policy wording and this is in line with best practice from other parts of the UK, where the idea of separation distances has been introduced.

Another reason for not imposing the minimum separation distance of 500m is that evidence demonstrated how to do so would be virtually rule out any new turbines across the whole district apart from our most sensitive areas and this would place too great a burden on the district's ability to accommodate new wind energy development.

The rationale behind the separation distances included in the draft Plan Strategy is laid out in the Supplementary Paper on Renewable Energy, published on the Council's website.

Q. Should new development be encouraged or required to demonstrate passive solar design and include solar panels or other Passive Solar techniques to generate renewable energy?

Consultation Bodies Response

There has been no specific response from consultation bodies on this particular issue.

Response from the Public

Specialist Joinery Group take the view that requiring new developments to demonstrate passive solar design might deter potential development generally. In their opinion passive solar design should only be encouraged and not insisted upon as part of any development.

Ulster Architectural Heritage Society (UAHS) have raised concerns with the potential visual issues associated with introducing renewable energy technology into traditional buildings.

Consideration

MUDC notes all comments made on this issue. The relevant policy context for the suggested policy wording can be found paragraph 3.13 of the SPPS which advises that the planning system should help mitigate and adapt to climate change by 'requiring the siting, design, layout of all new development to limit likely greenhouse gas emissions and minimise resource and energy requirements'. Paragraph 6.319 of the SPPS also states that LDP should 'facilitate' the integration of renewable energy technology into the design, siting and layout of new development and 'promote' greater application of the principles of Passive Solar Design.

MUDC recognises that whilst it is important that our policy welcomes design initiative it should not act as a deterrent to investment in the District (as suggested by one respondent) given that passive design is already taken into account during the Building Control process and through the issuing of energy rating certificates. Equally, it should not give a carte blanche to designs which could be detrimental to heritage or amenity.

As regards comments from UAHS on the potential visual impacts associated with renewable technologies on 'traditional' buildings, it should be noted that these issues

would also be considered in the context of other relevant built heritage policies within the Plan. These policies will provide adequate safeguards to ensure the integrity of traditional buildings are not compromised by such developments.

Taking the above into account, it is recommended that the suggested policy is reworded so that innovative design solutions based on the principles of Passive Solar Design and use of Renewable Technologies is facilitated and promoted through the planning process.

Recommendation

- **Amend suggested policy wording to read as follows:**
‘Innovative design solutions based on the principles of Passive Solar Design and use of Renewable Technologies will be given favourable consideration, where appropriate’.

Implementation of Recommendation(s)

This has not been included in policy RNW 1. Policy GP1 states that new development should “have regard” to the principles of passive solar design in order to conform with the Plan. This is not a direct statement of the acceptability or otherwise of the proposal as a whole because this will be dependent on more than simply the incorporation of passive solar design.

Q. Should policy encourage and/or facilitate the re-use, refurbishment, repair and repowering of existing renewable energy development, with decommissioning/recycling of structures seen as a last resort?

Consultation Bodies Response

RES, TRIG (The Renewable Investment Group) and SSE consider that the circular strategy of ‘Re-use-Remanufacture-Recycle’ should be a fundamental consideration in future planning policy and decisions, ensuring that an asset can be ‘refurbished, repaired and repowered and as a last resort decommissioned’. They consider this to be particularly important given that many wind energy projects will approach the end of their 25 year lifespan during the plan period. TRIG have commented that that the LDP should embrace the advantages of repowering renewable energy projects.

Response from the Public

No response received from the public on this issue.

Consideration

MUDC notes the level of support from the Renewable Energy Industry in relation to a new policy that supports refurbishment, repairing and repowering of wind energy development. Detailed representation has been submitted on behalf of TRIG and the contents of it have been fully considered in drafting this report and recommending the way forward. They had made a request for a meeting and while a number of dates have been offered the meeting has not yet occurred. It is intended that the meeting

will still be facilitated shortly and prior to the draft Plan Strategy coming forward to allow them opportunity to clarify their comments. While in principle favourable consideration can be given to the re-use, refurbishment, repair and repowering of existing structures, it is true that this may not always be possible and in any case, all developments will need to be decommissioned at some point in the future.

Recommendation

- **Bring forward a policy that requires the decommissioning of all structures but also facilitates/encourages the re-use, refurbishment, repair and repowering of existing renewable energy development. The following wording is suggested;**

‘In relation to developments such as wind farms and solar farms, applicants will be required to provide details on the decommissioning, including proposals for site restoration. In such cases the following planning condition can be used;

‘Within 12 months of the cessation of electricity generation at the site or upon the expiration of this permission whichever is sooner, all structures and access tracks shall be removed and the land restored in accordance with a scheme to be submitted to and approved by the Council prior to the commencement of any decommissioning works, unless otherwise agreed by the Council in writing.’

Favourable consideration will be given to the re-use, refurbishment, repair and repowering of existing renewable energy development in order to prolong the lifespan of developments such as wind farms and solar farms.’

Implementation of Recommendation(s)

As recommended, policy wording regarding favourable consideration being given to re-use, refurbishment and repair has been included. Consideration of the impacts of decommissioning has been included in the third paragraph of policy RNW 1 and the wording of the corresponding planning condition has been inserted into the Justification and Amplification.

Additional Renewable Energy Issues

Other issues have been raised to the renewable energy topic which do not fall neatly under the questions posed in the POP. These issues will also be given careful consideration in advance of the draft Strategy.

NIEA, for example, have raised the issue that, unlike paragraph 6.224 of the SPSS, the policy section does not include any unacceptable impacts test, and that this should be included. MUDC contends however that these ‘unacceptable impact tests’ are already contained within both suggested policy and related POP policies such as, General Principles (P.31), Archaeology and Built Environment (P.84) and Natural

Heritage (P.95).

NIEA also support the inclusion in policy of a test which states that *“no development within active peatland unless there are imperative reasons of overriding public interest”*. Having met with NIEA since they provided their comments it has become clear that this specific issue is something particular to renewable energy and in relation to carbon storage and it is therefore recommended that this would be included within the renewable policy within the Plan which would accord with the SPPS.

There has been several comments received suggesting that the POP misrepresents the potential damage caused by wind energy development and focuses too much on the negatives. The potential adverse impacts of wind energy development are currently highlighted in the SPPS and PPS 18. SPPS recognises that within sensitive landscapes, ‘it may be difficult to accommodate renewable energy proposals, including wind turbines, without detriment to the region’s cultural and natural heritage assets’. Given its nature, its contribution to renewable energy generation (91% of renewable electricity in 2015 came from wind energy-DETI) and public feedback on this issue, it is considered important to highlight potential adverse impacts that may arise from wind energy. Conversely, the positive impacts of wind energy are also acknowledged in the POP (P116) particularly in terms of creating employment and helping to achieve sustainable development.

Although not raised in any representation, it is also considered appropriate to reaffirm within Plan Strategy policy the SPPS’s cautious approach to renewable development proposals within designated landscapes which are of significant value. It is suggested that this cautious approach would not only apply to the Sperrins AONB but also to the Clogher Valley ridge line.

Recommendation

- **To add the following wording in relation to Renewable Energy Development generally;**

‘A cautious approach will be given to development proposals within the Sperrins AONB and the Clogher Valley Ridge line’. The Clogher Valley Ridge Line will be defined as that contained within the proposed Areas of Constraint.
- **To add the following wording in relation to Wind Energy Development specifically;**

‘No development within active peatland unless there are imperative reasons of overriding public interest’

Implementation of Recommendation(s)

The recommended policy wording has been included in policy RNW 1 as has the criteria regarding peatland, which is included at part (iv) of RNW 1.

Renewable Energy Strategic Policy Review by Department for Infrastructure

It should be noted that DFI is currently undergoing a review of the regional strategic policy in relation renewable energy. MUDC has formally fed into this process by responding to a 'Call for Evidence' in early 2016. Many of the key points raised by MUDC in response to this consultation process are similar to issues raised by respondents to the POP, including;

- Affording greater policy weight to neighbouring amenity, particularly in relation to visual dominance, and a request for a minimal separation distance be set.
- Provide greater clarity on the difference between 'community' benefits and 'economic' or 'social' benefits. It is Mid Ulster Councils opinion that planning agreements should be used to secure community benefits.
- Supporting the review of ETSU 97 guidelines as is undertaken by the DFI.
- Provide greater clarification on how the economic and environmental impacts of renewable development is determined.
- The need for an updated Northern Ireland Landscape Character Assessment in liaison with local authorities.

It is considered that the suggested Renewable Energy and General Principles policies contained within the POP seek to address many of the concerns listed above, including issues surrounding neighbouring amenity and planning agreements. also currently working on an updated Landscape Character Assessment which will highlight key intervening changes to the our landscapes since the original Northern Ireland Landscape Character Assessment was completed in 2000. Many of the issues raised such as the review of the ETSU 97 guidelines do however, have regional implications and MUDC has formally fed into this process as part of the 'Call for evidence'

Transportation

Q. Do you support the approach taken regarding new transport schemes, walking & cycling?

Consultation Bodies Response

NIHE would like to see greater emphasis on active travel, sustainable modes of transport including walking and cycling as well as focus on reducing reliance on private car.

Response from the Public

One representation agreed with the approach taken regarding the new transport schemes, walking and cycling but wish to encourage creation of bike pick up facilities, surface bike parks (as opposed to car parks) and support carpooling business and vehicles supported by electric car only.

At the Public meeting on 5th December in Galbally Community Centre, Francie Molloy MP raised concern of the proposed line of the Dungannon by-pass. He felt that the By-pass could be better accommodated to the West of the town and should be

indicated as so on the Development Plan Maps.

Consideration

We believe that it is important to ensure that land needed to facilitate a new transport scheme, such as a road scheme, improvements to pedestrian or cycle networks, or a public transport scheme and associated facilities, is protected from development that would prejudice its implementation. Such lands will be identified in the LDP.

The Council have and will continue to engage with Transport NI throughout the LDP production process to ensure any new roads / public transport proposals are identified and any lands for these purposes are protected.

In relation to Dungannon By-pass, the line on the map is not a proposed route for the by-pass. It is merely there to identify a need for a by-pass. We note the comment regarding the location of the by-pass and will be liaising further with Transport NI regarding the by-pass issue.

Recommendation

- **Continue to protect land required for new transport schemes and identify such lands in the LDP.**
- **Continue to engage with Transport NI to ensure any lands required for new roads/public transport proposals are protected.**
- **Liase with Transport NI regarding the issue of Dungannon By-Pass.**

Implementation of Recommendation(s)

Policy TRAN 1 has been included in the draft Plan Strategy to protect land proposed for new transport schemes. The identification of land to be protected for such schemes will be the result of ongoing engagement with TNI and will not be shown in the Plan Strategy but will be included in the LPP.

Q. Do you agree with the preferred approach in relation to dis-used transport routes to apply a blanket ban until specific routes are identified?

Consultation Bodies Response

NED state they prefer the permanent blanket ban approach (option 2 in POP), in relation disused transport networks as this would protect corridors within the countryside. NED are of the opinion that the preferred approach suggests that purpose for protecting these corridors long term is to provide transport, not value for access and recreation.

Response from the Public

The three responses from the public were supportive of the preferred approach. One representation has advocated that lands for future rail infrastructure and re-opening

former rail lines should be designated. One of these representations welcomed the possibility of the LDP reviewing rail links into the district. This representation stated that the reuse of former routes would greatly improve connectivity and offer a different choice of public transport.

At the public meeting in Pomeroy on 30th November 2016 (POP consultation) the re-use of old railways was discussed. Ideally people would like the old railway to be reinstated and running again however the general consensus/expectations were that this is unlikely to happen.

Consideration

We consider our approach to apply a blanket ban on dis-used transport routes until they have been appraised in relation to their potential as a transport route including walkways and cycle ways is the correct approach. The approach proposed would allow for open recreational use, such as pathways, cycle ways or nature conservation. The purpose of policy is to recognise that old railway lines provide a potential resource for new transportation routes including walkways and cycleways which are of recreational benefit. These can also be rich in biodiversity and industrial heritage and worth protecting in their own right as historical greenways. Thus the notion of a blanket ban would appear to be supported by NED and other respondents. The old railway lines and canal routes can be seen on the attached map (Appendix 1). There would be a ban on development which will effect these routes unless there is a recreational use which will not prejudice its future use for transport purposes including reinstatement of railways, roadways and cycle ways.

Recommendation

- **Apply blanket ban until specific routes are identified with the exception of uses for recreation, nature conservation or tourism for routes that have no prospect of re-use and have already been prejudiced by piecemeal development.**

Implementation of Recommendation(s)

This recommendation has been implemented by the inclusion of policy TRAN 2 in the draft Plan Strategy.

Q. Do you agree with the approach taken in relation to the protection of Public Car Parks?

Consultation Bodies Response

No comments received in relation to this issue

Response from the Public

One representation disagreed with protecting existing car parks policy approach, suggesting the policy should be re-worded to encourage development of multi-storey car parks and redevelopment of surface car parks where proposals will create mixed

use developments including mixed tenure residential uses. They also feel that protecting existing car parks run counter to any policies that seek to reduce car usage, they recognise the need to accommodate cars in towns however protection of such is also unsustainable socially, environmentally and economically.

Another representation supported the preferred option with the caveat, that Mid Ulster Council should undertake an audit of car parks in Cookstown, Magherafelt and Dungannon to determine day usage and develop appropriate strategies.

Consideration

The SPPS requires the council to provide a car parking strategy which will ensure adequate car parking within town centres. We aim to do this by protecting existing car parks from development unless it can be demonstrated that any replacement car-park can be placed in a convenient location in terms of accessibility and of a similar scale within the town centre. The suggested policy would allow for the development of a multi- storey car-park in the town centre. Given that Mid Ulster has a high reliance on the private car, which is explained by the high proportion of rural dwellers within the District, it is important that the existing car-parks in town centres are protected. Mid Ulster's towns act as important service centres to the districts large rural hinterland. Public transportation provision to / from the main towns from villages, small settlements and the rural area is extremely limited (see Strategic Settlement Evaluation position paper). Therefore many of those living out-with the main towns rely heavily to the private car to travel to/from the main towns and existing car-parking provision within town centres requires protection to accommodate this issue.

The Council has recently commissioned a private consultant to develop a MUDC Off-Street Car Parking Strategy and Action Plan. This strategy assesses and evaluates existing car parking provision. It also assesses the current operating model and future needs and demands. Once complete, this will document will form part of the evidence base for the LDP.

Recommendation

- **Continue with proposed Policy for protecting existing car parks**
- **Consider the MUDC Off – Street Car Parking Strategy once complete going forward in the LDP.**

Implementation of Recommendation(s)

This recommendation has been implemented by the inclusion of policy TRAN 3 in the draft Plan Strategy.

Q. Do you agree with the approach taken in regard to access onto protected routes, which recognises the importance of efficient movement in the interests of road safety and the economy?

Consultation Bodies Response

No comments received in relation to this issue

Response from the Public

A representation from MAG raised concerns on 3 aspects:

- Regarding allowing provision of Motorway Service areas at 12 mile intervals, which can be very large structures and as written appears to give a defacto approval to motorway service station even in a case where there is no motorway.
- Suggested that instead of allowing 'motorway' service areas allow for something smaller scaled which would be more appropriate in terms of size and scale.
- Suggested rewording of policy: residential development in order to create a quality residential environment within a settlement & create better connectivity and permeability with surrounding urban areas and other neighbourhoods. LDP should lead re-creation of interconnected networks.

A representation from Translink stated that they would like to see limited change to this policy given the potential impact on safety as well as journey times, an exception may be where there is potential to develop a strategic park and ride scheme.

One representation supported the POP's acknowledgement that there is no real evidence to support tightening protected routes policy. However, this representation stated they would like the POP to go further and remove protected routes policy within all settlements.

Consideration

The figure of 12 miles came from Policy IC15 of the Planning Strategy for Rural Northern Ireland. This policy considered it reasonable to expect a driver to travel at least 12 miles along the main traffic route network before reaching a petrol/service station. There has been no evidence presented to suggest otherwise that this distance is too small. The suggested policy wording clearly states "provision of motorway service areas where there is no existing or approved facilities for 12 miles along that road". Therefore if there is no motorway planning permission cannot be granted for a motorway service area. All proposals for future motorway service areas will be assessed against the General Principles Planning Policy which deals with issues including the nature and scale of development and siting, design and external experience. Given existing provision at Dungannon, Coalisland and planning permission at Ballygawley and Castledawson it is difficult to see how this policy would result in the large scale development which MAG have raised concerns about.

The Planning Department notes the suggested policy wording regarding the recreation of interconnected networks. The Council have included the need to improve connectivity between and within settlements and their rural hinterland as a plan objective. It is our aim to do this through accommodating investment in transportation to improve travel times, alleviate congestions and improve safety.

Policy TRAN 3: Access on to protected routes states that development of regional significance would be an exception which would allow for a new access on to protected routes. A strategic Park and Ride Scheme is considered as development of regional importance.

We believe that the suggested removal of protected routes policy would result in poorer connectivity between towns as a result of slower traffic speeds and compromise road safety standards. It is our view that the preferred option for access onto protected routes is most appropriate for efficient movements in the interest of safety and the economy.

Recommendation

- **Continue with 12 mile threshold as there is no evidence to suggest change**
- **Continue to allow the general principles planning policy to deal with scale, siting, design and external appearance of Motorway Service Areas.**
- **The wording of Policy Tran 3 should remain allowing for development of regional significance to be an exception for allowing a new access onto a protected route.**
- **Protected Routes Policy should remain within settlements limits to ensure road safety.**

Implementation of Recommendation(s)

All recommendations have been implemented in the draft Plan Strategy. Policy TRAN 3 (POP) is now TRAN 4 in the draft Strategy due to the addition of new policy TRAN 1 to deal with new road / road improvement schemes. The 12 mile threshold and exceptions for regionally significant development are included in TRAN 4 whilst the design of motorway service stations is dealt with in GP1.

Sustainability Appraisal/Strategic Environmental Assessment

Consultation Body Response

The Department of Agriculture, Environment and Rural Affairs Northern Ireland (DAERA) NIEA, Natural Environment Division.

Under their 'general comments' section NIEA acknowledged that the Interim Report had covered all the relevant environmental topics and generally included sufficient detail on the current state of the environment and strategic nature of the plan to allow an assessment to be carried out. It was also pointed out that the matrix table clearly laid out the thought process behind the scoring, although in a few cases it was felt that mitigation measures offered for the preferred option were lacking.

On a general note the unwieldy nature of the Interim Report and the lack of clear cross referencing with the POP was cited as an issue. They point out that cross referencing to the specific plan topic would be extremely helpful to the assessor.

Focusing on the assessment of alternatives within the SA/SEA Interim Report NIEA made the following comments:

NIEA disagree with the Compatibility Matrix scoring for the Assessment of Housing – Strategic Approach. Mid Ulster Council had scored option 1 – Fair Share of housing allocation, as a Minor Negative and option 2 – Urban Focus, 60% to the hubs, as a Major Negative. NIEA has made the case that the opposite is perhaps a better reflection in that option 1 is likely to have a more negative impact on air quality than option 2 given that more cars would be accessing the work place by driving from the countryside and therefore more pollutants are emitted on the journey to the hub and within the hub, as additional traffic is being brought in from the countryside. Conversely option 2 could actually improve air quality as the concentration of 60% of people living in the hub, where jobs and industry are concentrated, would have more opportunities to walk or cycle the shorter distances to work. NIEA go on to criticise the assessment for not considering any mitigation measures for the preferred option 1 despite having more negative impacts than options 2 or 3.

NIEA point out that whilst the Interim Report admits that additional housing over the plan period will result in increased water consumption and will also put additional strain on the existing Waste Water Treatment Works, this has only been identified as a Minor negative Effect. NIEA is of the view that this should be upgraded to a Major Negative given the increased sewer loadings and the negative impact this will have on SA/SEA Objective 9 'To Improve Water Quality; conserve water resources and provide for sustainable sources of water supply'. NIEA make the point that the same issue would apply to the potential increase in

land zoned for economic development and also for the proposed Environmental Protection Options within the POP.

NIEA advise that the assessment of the Housing Growth Options has considered that the lands north-west of Cookstown drain into Ballinderry River SAC. NIEA has clarified that this is factually incorrect but rather drain into the Ballinderry River downstream of the SAC. and as such needs to be reassessed.

With regards the Economic Development options (Strategic Approach) NIEA are of the view that the Preferred Option i.e. providing an equal share of economic land for the 3 main towns can be mitigated through use of Sustainable Urban Drainage systems (SUDS) and their careful location to avoid adverse effects on landscape, cultural and natural heritage.

NIEA make the case that Transportation and Connectivity Option 2 'To focus on roads and private transport' and Option 3 'To focus on roads and more sustainable modes of transport' should be reviewed in the light of the intention in the Plan to opt for less than 60% housing in 'hubs'. In particular, consideration should be given to changing scorings related to air quality (objective 10) and climate change (objective 14) from a 'minor negative' to a 'major negative'.

With regards the Council's preferred approach to Tourism i.e. utilising Tourism Opportunity Zones and Tourism Conservation Zones, NIEA has queried the SA/SEA claim that this policy will have a neutral effect on water quality. They make the case that water quality will of course be dependent upon the ability of any development to connect to sufficient waste water treatment works. They also point out that the SA/SEA should identify potential mitigation measures in the body of the text.

In considering Mid Ulster's preferred option for a more flexible approach to Housing in the Countryside, NIEA highlight that strong and clear mitigation policies are required to demonstrate how objectives, such as the protection of biodiversity, landscape and water quality, have been fully considered. Similarly, NIEA point out that the proposed Dispersed Rural Community policy requires clear mitigation measures.

On the topic of Natural Heritage NIEA, have queried the scoring of the SA/SEA assessment of AoHSV's in relation to their potential impact on a number of objectives, including; to provide people with the opportunity to live in a decent home and Mid Ulster's ability to attract indigenous and inward investment.

NIEA have also queried the rationale behind the assessment of Local Designations, such as Sites of Local Nature Conservation Importance (SLNCI) and Local Landscape Policy Areas (LLPA) and open space designations. In particular they query why the designation of a SLNCI would have a different scoring against economic SA objectives than the designation of an area of open space such as a football field.

NIEA also challenge the SA/SEA scoring in relation to MUDC's Strategic Options for Environmental Protection. They suggest it would be unduly harsh to negatively

score Option 2 'Constraints Approach' 'identifying areas of constraint to protect vulnerable landscapes, against the various economic objectives. As in effect what is being considered is the safeguarding of small areas of semi-natural habitats.

NIEA NED have also highlighted a number of important updates to government targets for Green House Gas targets and plans and programmes that they recommend be included within Appendix 1 'Plans and Programmes' of the SA/SEA Interim Report.

Department for Communities, Historic Environment Division

HED clarified that they have not operated as part of NIEA since April 2015 and from May 2016 HED has operated within the Department for Communities. They have recommended the SA/SEA be updated as they have been referred to as NIEA within the POP and SA/SEA on a number of occasions.

HED reiterated the importance of continual review of the LDP / SA/SEA datasets. HED's response suggested that it would be appropriate for Mid Ulster to review the shipwrecks inventory for the Mid Ulster district.

The response highlights the importance of historic maps in understanding evolution of the historic landscape and the importance of historic routes and boundaries, including townland and parish boundaries as intrinsic parts of this.

Consideration

We note and welcome the comments of NIEA, NED relating to the scope of relevant environmental topics covered by the SA/SEA Interim report and take on board the point made relating to further work required to identify mitigation measures in the next report. Similarly the general comments relating to the unwieldy nature of the Interim Report/POP documents are noted. We will endeavour to make appropriate changes to help simplify the layout and utilise more cross referencing to create a more user friendly document.

In response to the comments made by NIEA, NED in relation to the assessment of the various policy options Mid Ulster would comment as follows:

Assessment of Housing Allocation Options (Strategic Approach) - The RDS sets a regional target of 60% of new housing to be located in appropriate 'brownfield' sites within the urban footprints of settlements greater than 5,000 population. Given the rural nature of the district and the limited amounts of available brownfield land within Cookstown, Magherafelt, Dungannon, Coalisland and Maghera, it is believed that this target is unrealistic. Nonetheless, we accept NED's point that Option 1 'Equitable Split' may be equally detrimental to air quality as Option 2 'Based on RDS 60% Target' given the greater number of longer journeys that it may generate. The matrix scoring will be amended to reflect this.

We consider that no potential significant negative effects were identified under Approach 1 and therefore no mitigation was identified. Paragraph 1.10 of Interim

Report states that *'where the appraisal has identified any likely significant negative effects, information has been provided on the potential measures envisaged to prevent, reduce and as fully as possible, offset them.'* Consideration will be given to the formulation of mitigation measures for all likely negative effects in the Plan Strategy.

We note and agree with NED assessment that additional housing over the plan period would likely have a significant negative impact on water quality (SA Objective 9). The scoring of the matrix will be amended accordingly.

The comments in the Interim Report relating to lands north east of Cookstown draining into the Upper Ballinderry SAC were based on comments originally received from NIEA in August 2016. Clarification to be sought from NIEA on this matter.

The comments of NED relating to the Economic Development Options – Strategic Approach making the case for SUDS to avoid adverse effects on landscape, cultural and natural heritage are noted and will be considered for inclusion within the Plan Strategy.

We note the comments of NED with regards the suggested amended scoring for Transportation and Connectivity options and agree that Air quality and Climate Change objective should be changed from minor negative to significant negative.**

NED's comments in relation to the preferred option for Tourism policies is noted. Although scored neutral, current text states that 'overall effect will depend on type of tourism development, its location and its ability to connect to mains sewerage infrastructure'.

Although mitigation is suggested by way of criterion based policy, the scale and nature of potential impacts are largely uncertain at this stage and will depend on the location, nature and site characteristics of areas developed. The identification of appropriate mitigation and adaptation measures may be required once specific development proposals in particular locations are identified and approved.

We note the comments of NED on the subject of Housing in the Countryside. Further consideration will be given to clear mitigation measures for the preferred option at the next stage. Preferred option 2 in the POP is listed as option 3 in the interim report. A third option 'Return to Planning Strategy for Rural NI' (option 1 in the interim report) was withdrawn from the POP due to being unrealistic, unsustainable and contrary to the RDS and SPPS. This is clearly illustrated in the relevant SEA appraisal and is also referenced in page 40 of the POP.

NED consider that there is a lack of detail in relation to mitigation measures for the designation of new DRCs. Existing mitigation put forward for Preferred Option 2 include use of criterion based policy with emphasis on good siting and design and satisfactory waste disposal arrangements. Further consideration may be given to additional measures such as buffer zones or minimum separation distances from recognised environmental assets and also the use of SUDs.

We note the inaccuracies within the POP and SA/SEA when referring to HED. We will remove all references to NIEA when relating to HED in future texts.

We note the comments HED regarding the SA/SEA baseline data and its need to be comprehensive. We note these concerns and will continue to review and/or update the information contained in the SA/SEA Scoping Report to ensure that it remains relevant and that the SA/SEA objectives for the appraisal are proportionate to the level of detail required for the appraisal of the Plan Strategy.

Recommendation

- **Appropriate changes to the layout and utilise more cross referencing to create a more user friendly Plan Strategy document.**
- **Further work required to identify mitigation measures for all likely negative effects in the Plan Strategy.**
- **Amend scoring of assessment of for Strategic Housing option 1 impact upon air quality to Major Negative given the greater no. of longer journeys.**
- **Amend scoring of assessment of for Strategic Housing option 1 impact upon water quality to Major Negative given the resultant increased sewer loadings.**
- **Assessment of housing growth lands to NW of Cookstown to be amended to reflect that it does not drain into Ballinderry SAC.**
- **Encourage SUDS within the Plan Strategy as a mitigation relating to all forms of development.**
- **Amend all references to NIEA in relation to HED.**
- **Continue the exercise of gathering information for the SA/SEA process, to further augment the evidence base.**

Department for Infrastructure

Stated that the Sustainability Appraisal should inform the choice of preferred options and furthermore Mid Ulster Council should consider how the policy options for the Environment have been considered against other options presented within the growth strategy. It states that Mid Ulster Council needs to be satisfied that the policy options brought forward should be fully assessed against social, economic and environmental considerations and in combination with the other policy proposals (e.g. housing, economy, tourism, transportation and connectivity), to assist in providing a coherent approach to the development of the proposals that will be included in the Local Development Plan.

DfI stressed the importance of ensuring that the Sustainability Appraisal informs the development of policies which in turn will assist Mid Ulster Council in balancing and integrating the variety of complex social, economic and environmental matters that are in the long term public interest. DfI highlight that this is fundamental to the achievement of sustainable development and in demonstrating plan soundness.

DfI suggested that the justification setting out the rationale for selecting one Preferred

Option over another would benefit from commentary of how each Option performed in the SA. By doing so Mid Ulster could better demonstrate vital linkages from the SA process.

The response states that it is not the role of SA to dictate the preferred Option but rather the final decision is a matter for the Council to determine, using the findings of the SA as a guide to decision making. On occasions a balance will have to be struck between competing alternatives and Mid Ulster Council must be able to demonstrate how it arrived at its decision and provide the relevant evidence as required. The response states that the Council should seek to ensure that the SA of policy options should be as logical and objective as possible and that ultimately the assessment can withstand scrutiny.

Historic Monuments Council (comments on Environment)

HMC highlights that for the Councils preferred option of sustainable development to be effective it requires comprehensive baseline data on all aspects of the environment (natural and historic/built) as well as the expertise to accurately assess the impact of proposed development on key assets/areas.

HMC recommend that as an outcome of the SA Mid Ulster Council should clearly detail the approach it will take to integrated management of the environment and mitigation of impacts on it.

Consideration

We note the comments of DfI regarding the importance of the SA/SEA process informing the preferred options for the plan and the need for Mid Ulster to ensure that policy options are considered against social, economic and environmental objectives. Mid Ulster Council's SA/SEA assessment has been carried out in parallel with the local development plan preparation process and alongside the production of the POP. Throughout the SA/SEA process Mid Ulster Council has sought to promote sustainable development through the integration of social, environmental and economic considerations into the POP. In line with the SEA Directive, we have sought to provide for a high level of protection of the environment and to integrate environmental considerations into the preparation of the POP. An integral part of Mid Ulster's SA/SEA process has been to ensure that it justifies the policies and proposals of the POP. Mid Ulster is aware that it is in its interests to ensure that the SA/SEA is robust enough to withstand detailed scrutiny at independent examination stage.

We take on board DfI's comments relating to the explanation of the justification of selecting one as a preferred option over another. Whilst we provided a summary of the assessment of the policy options within the SA/SEA Interim report, it is acknowledged that the inclusion of a commentary of how each option performed would provide greater clarity and better demonstrate the linkages between the SA/SEA and

the Plan Strategy. Such a commentary would assist in demonstrating how we arrived at its decision and provide the relevant evidence required by the Independent Examination.

We note and agree with HMC's comment relating to the requirement for comprehensive baseline data to properly inform preferred options for sustainable development. We will endeavour to continually update and renew relevant baseline data as an integral part of the SA/SEA process and will consult with the natural / built heritage experts within HED and NED to ensure the Council has the most up to date data on all aspects of the environment both built and natural.

We note HMCs concern regarding the need for detail in relation to integrated management of the environment and mitigation of impacts on it. The integration of these two factors are an integral part of the Development Management process.

Recommendation

- **Include a commentary of how each option performed in order to provide greater clarity of the linkages between it and the SA/SEA.**
- **Continue to update baseline data as part of the SA/SEA process and consult with the relevant experts to ensure the Council has the most up to date data.**

Response from the Public

The vast majority of comments relating specifically to the SA/SEA were contained within a relatively small number of representations. In particular there were two representations from the minerals industry that raised the majority of comments relating to the SA/SEA, namely; Quarry Plan Limited representation on behalf 10 no. companies within the minerals industry and Dalradian Gold Limited. The remaining SA/SEA representations were from the Royal Society for the Protection of Birds (RSPB), Northern Ireland Renewables Industry Group (NIRIG), RES Ltd (the world's largest, independent renewable energy company),

A representation submitted by Quarry Plan on behalf of 10 no. minerals industry companies, considered that the baseline data does not accurately reflect the scale or potential benefit the minerals industry has on the local community. Furthermore the baseline data utilised in the POP and SA/SEA is inaccurate and therefore socio, economic and environmental profile of the district is inaccurate and these inaccuracies lead to an erroneous Scoping Report and assessment of the POP. In addition the fact that the policy approach in the POP for ACMDs and MRPA's are based on inaccurate figures renders the policies flawed.

The Quarry Plan rep states that the Interim Report needs to reconsider the policy approach for ACMDs and MRPA's. The approach used in the POP is based on inaccurate figures. The proposed MRPA's include clay reserves which have no

economic contribution and given that no other MPRA was considered this approach is flawed.

This rep points out that the SA/SEA must assess all reasonable alternatives however we have given no consideration to a 'joint approach' with neighbouring councils. The strategic approach considered basically seeks to restore the status quo and cannot be considered to be 'broad strategic alternatives'.

The Quarry Plan rep challenges in general the lack of qualification of a number of statements. It queries what 'the challenge' is in relation to mineral development. Areas of nature conservation are currently considered as areas of constraint on all development, including minerals. Similarly it contends that some statements lack substance, for example the fact that less special constraints will mean more quarries which will in turn, increase traffic flows. The rep also states that the impacts on amenity are unsubstantiated. There has been no consideration of a buffer zone or a cordon sanitaire for example within the assessments. The Quarry Plan rep disagrees with the SA/SEA statement that more quarrying will likely lead to a loss of flora and fauna, pollution to watercourses and negative impacts on landscapes and cultural assets. It argues that these are already monitored via the EIA process and discharge licenses from NIEA.

This rep challenges the statement 'the council has a lot of areas of high quality landscapes including vulnerable landscapes'. It asks what is meant by 'a lot of areas' and what is meant by 'vulnerable landscapes' and who has identified them? It goes on to state that there is a lack of evidence on consultation with NIEA regarding vulnerable landscapes. This plus the paucity of information on mineral reserves and extant permission seriously undermines the work undertaken to date on the POP.

This rep cautions against dispensing with workable resources and advises that most minerals development utilises topography to avoid prominence. Furthermore it argues that's other types of development are more harmful to vulnerable landscapes than mineral development e.g. single houses, turbines etc.

Commenting on the SA/SEA statement that Mid Ulster possesses 'numerous priority habitats' the rep challenges the lack of detail namely; how many priority habitats? What types and how much of the district? It queries how can these areas be defined without a national vegetation classification? Without this description of habitats it is impossible to determine habitat quality and to reach a view as to what should be protected.

The rep points out potential conflicting statements within the SA/SEA, namely; that mineral development should be encouraged away from remote rural areas in order to minimise traffic flows whilst at the same time contradicting the Councils objective to protect amenity.

The Quarry Plan rep states that without landscape capacity and sensitivity studies along with quantitative and qualitative understanding of supply and demand within the mineral industry, Areas of Constraint on Mineral Development will fall on similar

grounds to those in the draft Magherafelt Area Plan.

Dalradian Gold Limited submitted a rep within which they raised a number of issues relating to the SA/SEA. Foremost of the issues raised was that the SA/SEA was procedurally flawed in that the Scoping report was published alongside the POP, thereby removing the potential for shareholders to comment on and influence the POP. The rep states that this process was contrary to strategic guidance. The Scoping report was only subject to consultation with the consultation bodies prior to publication however this is in conflict with the SA/SEA guidance.

The rep highlights that whilst the availability of gold was referenced in the SA/SEA baseline evidence, the contribution of gold mining was not included within the SA/SEA Scoping Report as something which can have major economic benefits (could potentially equate to 10% of required jobs in MUDC).

Dalradian Gold Ltd disagree with the general assumption of the SA/SEA Scoping Report (paragraph 6.66) that mineral extraction will have negative impacts on the landscape, the location and scale of the development will mean that impacts will vary considerably. The rep goes on to highlight the obvious economic benefits of such development.

The rep also suggests the alteration of one SA objective and the inclusion of an entirely new SA objective. The suggested alteration refers to SA objective no.16 and proposes the following wording; 'to minimise the production of waste and adopt a sustainable approach to the use of non-renewable materials'. Thereby facilitating the sustainable use of resources. The suggested new SA objective reads as follows; 'To utilise the sustainable mineral assets of the district in a sustainable manner'. It is felt that this new rep could address the key sustainability issue of mineral reserves in the district.

The Dalradian Gold Ltd rep disagrees with the findings of the SA/SEA that there will be no positive social impacts from mineral extraction, as mineral extraction will create well paid jobs and associated social benefits, such as greater revenue from taxes. Similarly the rep disagrees that there will be only minor positive impacts for new job creation from the mineral industry.

The rep agree with the SA findings that are major economic benefits associated with the sustainable extraction of minerals and in particular they highlight the economic value of a mineral such as gold. The potential gold available within the Mid Ulster district would have a significant positive economic impact.

The Dalradian Gold Ltd believe that the Interim SA/SEA and its associated evidence base is unsound as it is based upon flawed evidence. The policies contained within the POP will severely restrict extraction of minerals which could bring about major economic and social benefits.

The Royal Society for the Protection of Birds (RSPB), considers that 'managing' sustainable development alone will fall short of the requirement to 'further sustainable development' as set out in the Planning Act (NI) 2011, and the SPPS.

The RSPB rep questions the reasoning behind the suggestion of introducing new strategic land zonings in the Plan Strategy to provide an interim supply whilst the LPP is formulated. The RSPB go on to state that such actions could prejudice the LDP process including the associated HRA and SEAs. It goes on to state that as much development as possible should be delivered through development plans, informed by a robust evidence base. The RSPB supports the need for full and proper scoping at strategic planning SEA, EIA and project levels. SEAs can ensure that an adequate supply of land is provided without exceeding environmental limits and it is believed that a land strategy for Northern Ireland would also assist with this issue.

The Northern Ireland Renewables Industry Group (NIRIG) rep welcomes the reference to the SPPS and that NI has significant renewable energy resources and a vibrant renewable energy industry which is a significant job provider across the region.

Turley Associates Ltd on behalf of a Mid Ulster Property Developer requested that the Council reconsider the retention of undeveloped housing land where no commitment had been demonstrated.

Farran Construction Ltd queried how option 1 takes account of the RDS and indeed the plan's own objective 1, as it inhibits the ability of main towns to grow.

R.E.S. Ltd, 'The worlds largest independent renewable energy company' consider that the lack of evidence regarding the need for new housing and the resultant projected energy supply will have implications for the SEA.

Consideration

We acknowledge the concerns of Quarry Plan relating to the baseline data not accurately reflecting the contribution of the minerals industry leading to an erroneous Scoping Report and assessment of the POP. In an attempt to strengthen the evidence base Mid Ulster has embarked upon a further information gathering process with the Minerals Industry regarding existing and projected supply and demand figures. Quarry Plan highlight that the approach utilised for the designation of ACMDs / MRPA's in the POP is flawed as it is also based upon inaccurate figures. As mentioned above we are attempting to redress this matter through engagement with the minerals industry and central government.

Quarry Plan raise concern that in considering reasonable alternatives Mid Ulster Council has not considered the 'Joint Approach' with adjoining councils. The SPPS requires the council to identify areas which should be protected from minerals development because of their intrinsic landscape. The proposed Areas of Minerals Constraint are an attempt to reflect the Strategic Policy. Notwithstanding this MUDC has instigated the formulation of cross boundary forums to address shared issues, such as Minerals development.

The Quarry Plan representative highlights a number of unqualified statements relating to the minerals industry, such as what is 'the challenge' referred to by the SA/SEA with regards the minerals industry. Similarly the statement that the council has a 'lot of vulnerable landscapes' and that 'extraction can often 'conflict with the need to conflict

has not been substantiated. Mid Ulster Council would acknowledge that further work is required on landscape assessments in association with colleagues in NIEA, including further consideration of the differing development typologies and the potential ability of varying landscapes of the district to accommodate development without causing demonstrable harm. The challenge facing the Mid Ulster Council and its forthcoming plan is how best to strike a sustainable balance between facilitating minerals development whilst at the same time protecting its most sensitive landscapes.

The Quarry Plan rep challenges the SA/SEA assertion that Mid Ulster possesses a number of priority habitats and destruction of these is a legitimate concern. The rep queries how can the extent of these areas and therefore the potential scale of their loss be quantified without a national vegetation classification. We acknowledge the lack of data in this regard and would add that this baseline data may be reviewed with colleagues in NIEA, NED in the future stages of the plan**

The Quarry Plan criticism of Mid Ulster Councils flawed approach to ACMDs and MRPAs policies is noted. These baseline figures held by Mid Ulster will be reviewed in the next stage of the plan process. Indeed we have commenced information gathering process with the Minerals Industry and central government. The criticism of the MPRAs for the clay reserves is noted and whilst it is acknowledged that these reserves make no economic contribution at present, their potential to do so remains.

The rep states that the concerns raised within the SA/SEA in relation to impacts on amenity are unsubstantiated. The rep criticises the SA/SEA for not considering possible mitigation measures for minerals development such as a buffer zone or a cordon sanitaire. We will review baseline data with Environment Health Department with a view to collating incidences of noise/nuisance complaints relating to minerals industry. The SA/SEA should reflect the suggested mitigation measures within the assessment of minerals policies and amend the matrices accordingly.

The Quarry Plan finds the SA/SEA statement that less spatial constraint will mean more quarries, which in turn increase traffic flows. We contends that a criteria based policy approach will assess applications on a case by case basis across a wider geographical area and therefore is more likely to result in greater numbers of minerals development as opposed to an Area of Constraint approach.

The rep argues that more quarrying will not necessarily result in the loss of flora and fauna, pollution to watercourses and negative impact on landscapes. Whilst the EIA process and NIEA licencing could prevent pollution to watercourses and mitigate against some negative impacts on the landscape, the potentially invasive nature of quarrying operations means that it would still likely result in loss of flora and fauna.

The rep contends that the SA/SEA's statement that mineral development should be encouraged away from remote rural areas in order to minimise traffic flows contradicts the POP's stance on protecting amenity. We note this point, although traffic flows are not the only potential issue deriving from mineral development. Minerals development has potential for negative effects on residential amenity particularly in relation to noise, dust, as well as increased traffic from heavy vehicles. Appropriate mitigation measures

however can be effective at minimising these effects.

Turley – Mid Ulster property developer – Phase 2 Housing Land

The Council wish to provide market certainty and protect housing land supply by retaining existing housing zonings where there is a degree of commitment to its delivery demonstrated by permissions and investment by landowners. The Council has undertaken a full survey of the zoned housing lands to test whether the owners are willing to provide their land for future housing development. This evidence is being used to calculate if there is sufficient housing land supply. In order to ensure the adequate provision of land to accommodate the housing need over the plan period it the Council may consider it appropriate to time- limit existing zoned lands.

Turley – Farran Construction – RDS objective

We contends that the preferred equitable split option allows for a balance of growth across the settlement hierarchy including the countryside thereby meeting the objectives of the RDS.

We have calculated the committed units still to be developed and residential zonings in the hubs. These figures show that the hubs have adequate provision by way of unimplemented planning approvals and zonings equating to 54% of the required housing need of 10,950 dwellings over the plan period. Therefore the current situation in Mid Ulster would allow for a majority of housing to be located within the hubs. As such, these existing circumstances would enable the LDP to reach its objective to build the hubs and therefore take account of the objectives of the RDS also.

Recommendation

- **Continue the exercise of gathering information from the minerals industry, to further augment the evidence base.**
- **Ongoing work of the cross boundary forums is an attempt by Mid Ulster Council to address shared issues, such as Minerals development.**
- **Undertake a review the vulnerable landscape methodology which has been used to produce the proposed ACMD designations.**
- **Through consultation with colleagues in NIEA, continue to gather and review baseline data concerning priority habitats within the district.**
- **The SA/SEA for the Plan Strategy to reflect the suggested mitigation measures, within the assessment of minerals policies and amend the matrices accordingly, considered necessary to alleviate negative impacts on amenity.**

Conclusion and Recommendation

As outlined above those representations relating to Plan Strategy matters will be used to inform its' preparation, which is the next stage of the process. Those representations which are essentially about inclusion of sites within settlement limits and other site specific matters, will be held over and considered in the preparation of the Local Policies Plan.

At the point of publication of the Plan Strategy we will place this consultation statement in the near future, on the Council's website and at the Council offices, setting out a summary of those representations that relate to Plan Strategy matters and which will be used to inform its' preparation. The Planning Department have also formulated responses to all the specific comments received from both the consultation bodies and from the public representations (Appendices 5 and 7). These have been held over and will be updated following the discussion of this summary report at the Planning committee meeting on 17th October 2017 and they will then form part of the consultation docmen that will be published with the PS.

The Project Management Team will be given opportunity to comment on emerging policy for inclusion in the Draft Plan Strategy and will be an integral part of testing emerging policy through the Sustainability Appraisal, including Strategic Environmental Assessment and the Equality Impact Assessment process.

A key feature of the LDP system is 'Soundness'. Soundness is the basis on which all Local Development Plans (LDP) will be examined and is a new aspect to the plan making process in Northern Ireland. A test of Plan soundness is whether we have had regard to other relevant plans, policies and strategies relating to any adjoining council's district and also ensuring that our Plan policies and allocations are not in conflict with the Development Plan Documents of neighbouring councils. As a means of demonstrating the soundness of our LDP in relation to neighbouring councils, MUDC set up three forums to discuss cross boundary issues. These forums considered Lough Neagh and Lough Beg, the Sperrin's and Cross Border matters and took place in the MUDC office in April and September 2017. The next round of forums are to take place in November 2017 to continue engagement on such matters. These forums were successful in terms of discussing all relevant cross boundary issues. At this time agreement has not been brokered on all issues that would form part of the Plan Strategy.

Following submission of their consultation body responses to the POP, the Planning Department have met with NIHE, HED, and NED (NIEA) to further discuss their issues raised and will engage again with these consultation bodies once the Plan Strategy has initially been drafted. The Planning Department intend to meet with DfE, relevant energy industries (consultation bodies as per Reg 10 of the LDP Reg's 2015) and Invest NI in the near future to discuss the Plan Strategy.

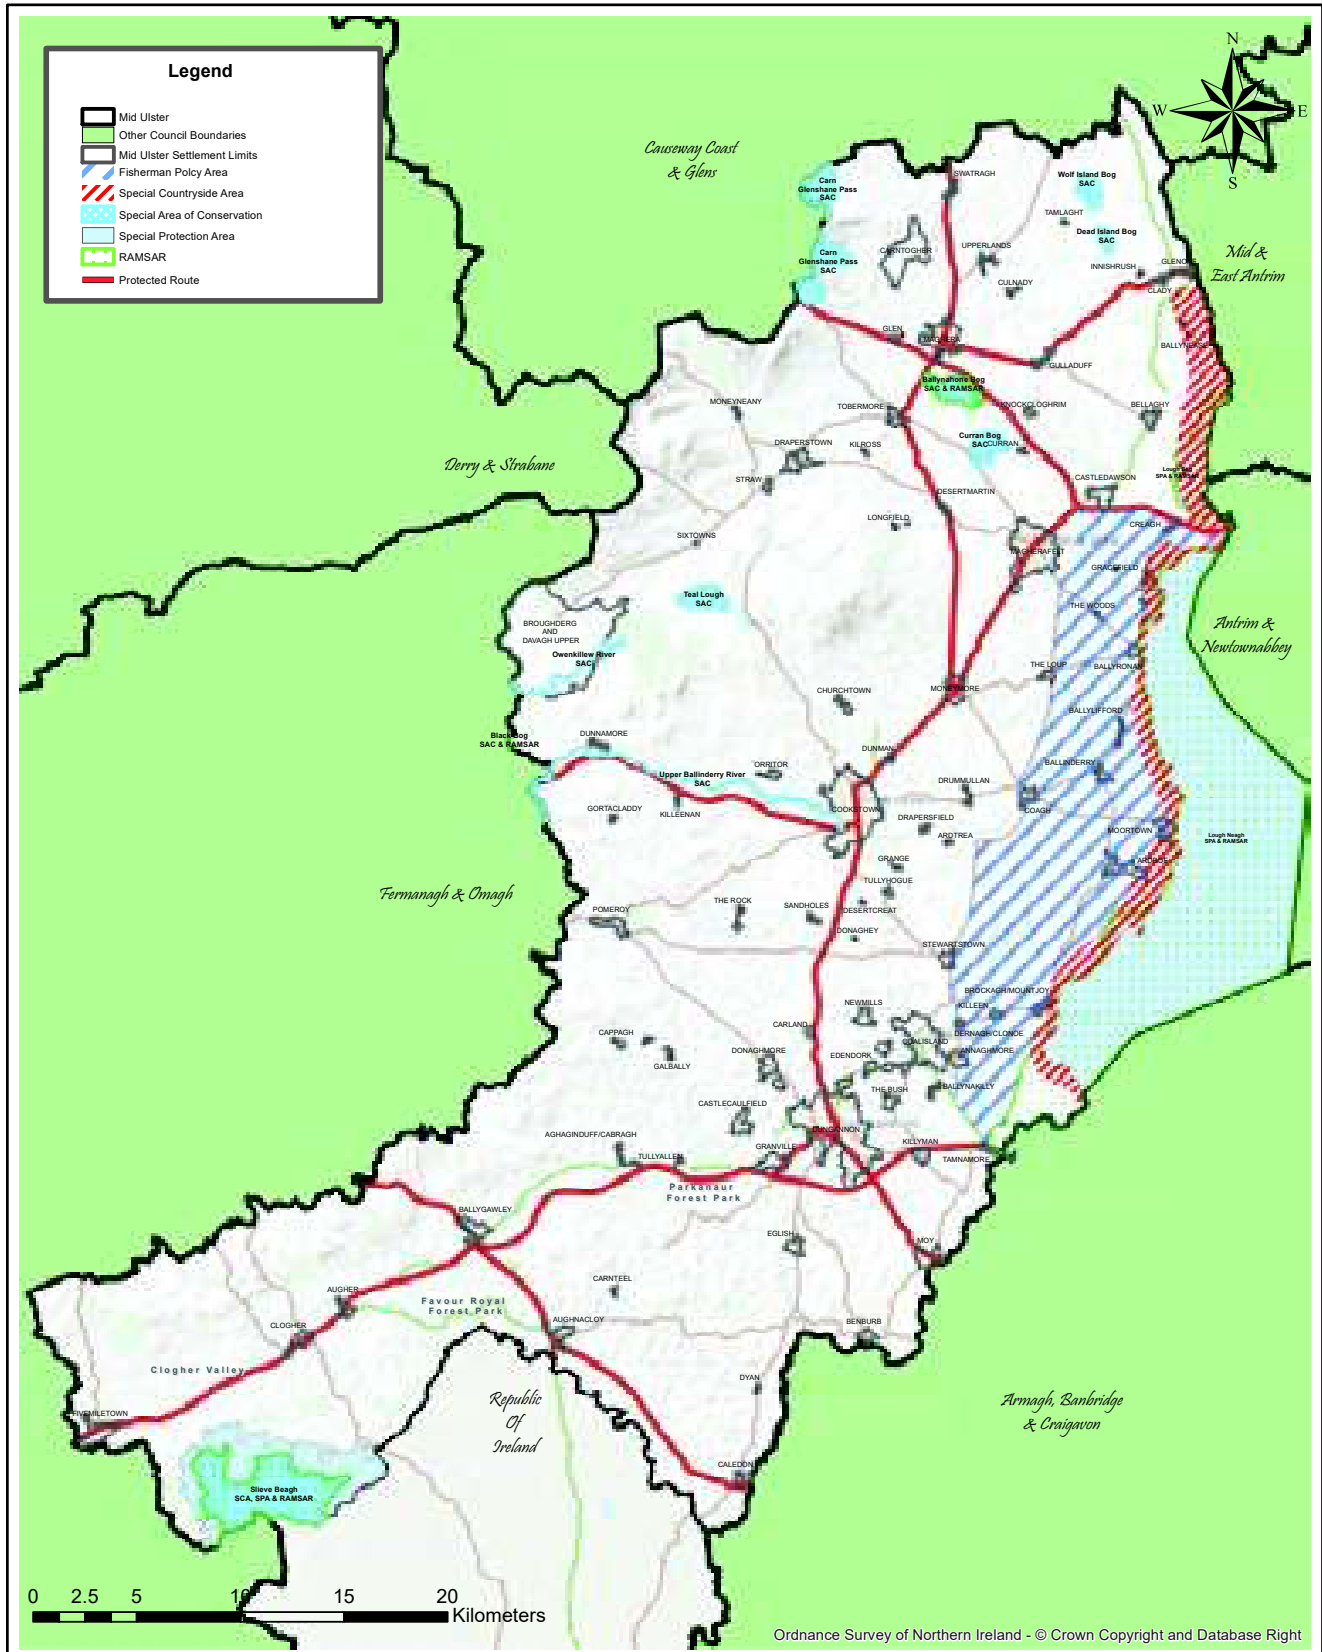

The Planning Department have also met with various groups including the Northern Counties Co-op Enterprises Ltd and EDEN, Edendork Community Group, post publication of the POP to hear their views on what they would like to see happen in their area over the Plan period. A summary of these meetings are contained in Appendix 9.

It should be noted that some of the recommendations within the report are subject to further engagement with the relevant expert consultee prior to publication of the draft Plan Strategy.

Members are requested to note and agree the various recommendations within the separate subjects within the body of this report.

- 8-13. Lists of Heritage Assets which lie inside the candidate ASAI

Preamble

On 25th July 2017 Department consulted its statutory advisory body, the Historic Monuments Council on the identification of further areas of landscape to be included within the Area of Significant Archaeological Interest at Beaghmore. This ASAI was identified following desktop research and field survey carried out by Historic Environment Division.

Department for
Communities
www.communities.gov.uk

Statement of Significance

Beaghmore

An extended area has been identified for inclusion within the Beaghmore Area of Significant Archaeological Interest.

Beaghmore is the most extensive stone circle and alignment complex in Northern Ireland and is managed as a State Care Monument. The definition of the ASAI takes into account the surrounding horizons of the landscape which widely encompass and form the setting for the stone circles and alignments. The interactions of this site with the surrounding historic landscape, including far-ranging views from this site toward surrounding landforms and skylines, are particularly important. This area also provides one of the best dark sky environments in Northern Ireland. Along with Beaghmore the ASAI incorporates a large number of prehistoric Neolithic and Bronze Age monuments and also later heritage assets with both discrete and overlapping settings, and their significance is enhanced by their relationships with each other, with routeways and with the natural environment including its topography, waterways and skylines. The evolution of historic townland and placenames in the district has also variously been influenced by heritage assets, natural landscape characteristics, and sometimes historical associations with places.

The landscape has been shaped by traditional farming activity, but is characterised by open, distant vistas with a distinct absence of modern development.

The landscape of this ASAI is sensitive to change which would adversely affect those distinctive qualities outlined above. The erection of masts, pylons, turbines or other large scale development, including large agricultural sheds, or quarrying and mining activities, within this distinctive landscape would adversely impact the landscape character and the contribution it makes to setting, experience and significance of the stone circles and the other heritage assets within the ASAI

 Proposed ASAI boundary

 Beaghmore Stone Circles and Alignments

1 Aerial view illustrating the layout of the Beaghmore stone circles and alignments

2 The extensive complex once lay beneath blanket bog and it is likely that further remains lie concealed in the landscape.

3 *One of the Beaghmore Stone Alignments*

4 *A key aspect of this site is its interaction with the surrounding landscape and skylines*

5 The site offers far ranging views across the landscape and horizons

6 The landscape has been shaped by traditional farming activity, but is characterised by open distant vistas with a distinct absence of modern development

Creggandevskey Area of Significant Archaeological Interest

CREGGANDEVESKY CANDIDATE AREA OF SIGNIFICANT ARCHAEOLOGICAL INTEREST

Prepared by DfC Historic Environment Division

Heritage Records and Designations Branch

Contents

1. Preamble
2. Statement of Significance
3. Map
- 4-7 Selected imagery
- 8-10 Lists of Heritage Assets which lie inside the candidate ASAI

Preamble

On 25th July 2017 Department consulted its statutory advisory body, the Historic Monuments Council on the identification of the Area of Significant Archaeological Interest at Creggandevsky. This ASAI was identified following desktop research and field survey carried out by Historic Environment Division.

Department for
Communities
www.communities.gov.uk

Statement of Significance

Creggandevesky

An Area of Significant Archaeological interest has been identified, incorporating the wider landscape around Creggandevesky court tomb, which contains a large group of prehistoric sites and monuments with both discrete and overlapping settings. The distinctive rural landscape in which these sites are located is characterised by rugged upland grazing with intermittent improved areas of grassland, blanket bog, occasional water bodies and exposed rock outcrops. The distinctive features of the landscape provide the functional setting for these sites and monuments, and its qualities include the context for these heritage assets and their inter-relationships with each other and with the natural topography and sky lines.

The monuments within the landscape date primarily to the Neolithic and Bronze Age periods. While most obviously of ritual and funerary function, these sites are representative of the wider human occupation of the area in the ancient past. The trapezoidal megalithic tomb at Creggandevesky is a monument in State Care and is one of Northern Ireland's best examples of a court tomb.

To the east and south, the ASAI is defined by the relevant historic roads, townland and parish boundaries that demark the particular local concentration of prehistoric monuments that are located in the vicinity of Creggandevesky. To the west and northwest, the ASAI boundary follows the northern boundary of the Sultin townland. This is to capture the part of the Carrickmore plateau across which views are taken from Creggandevesky towards the unique deglacial landforms of the Murrins. It is of particular note that the historic townland and place names of the area also reflect its distinctive topographical and natural characteristics.

Several wind turbines have been erected within and adjacent to this landscape. The erection of further wind turbines, masts or pylons or large scale development would lead to further cumulative adverse impact on the character of the landscape here, causing deterioration of the integrity of the landscape character and negatively effecting the experience of its prehistoric heritage.

Proposed ASA boundary

● Cregganveesky Court Tomb

Cregganveesky ASA

1 Creggandevsky Court Tomb. One of Northern Ireland's best examples of this type of Neolithic monument

2 The distinctive rural landscape in which these heritage assets are located is characterised by rugged upland grazing with intermittent improved areas of grassland, blanket bog, occasional water bodies and exposed rock outcrops

3 The distinctive features of the landscape provide the functional setting for these sites and monuments, and its qualities include the context for these heritage assets and their inter-relationships with each other and with the natural topography and sky lines

4 Several wind turbines have been erected within and adjacent to this landscape.

5 The erection of further wind turbines, masts or pylons or large scale development would lead to further cumulative adverse impact on the character of the landscape here

Sites and Monuments Records within Creggandevsky ASAI 29th September 2017

Appendix 5
Consultation Response
(Reg 10 summary Tables)

| Statutory Consultee | Summary |
|--|--|
| <p>Armagh, Banbridge & Craigavon (ABC) District Council</p> | <p>Lough Neagh Shores & Blackwater Valley Recognise POP has a number of key planning themes which could potentially impact upon Lough Neagh Shore & Blackwater Valley. Would welcome opportunity to meet & discuss further</p> <p>Natural Heritage Given the POP proposal of a Special countryside Area at the Loughshore, ABC council would welcome further discussion to ensure a consistent approach to protecting sensitive landscapes.</p> <p>Minerals Future discussions are necessary between our Councils to ensure a consistent policy approach.</p> <p>Development in the Countryside More flexible approach to development in the countryside for single dwellings, tourism development and economic development in order to meet the specific needs of Mid Ulster is noted.</p> <p>Settlements Tamnamore village now falls within both MUDC and ABC Council area. Suggests consideration should be given to renaming the two elements, Tamnamore (Co Armagh) & Tamnamore (Co. Tyrone). Reference should be made to the adjoining node of the village in the plan settlement appraisal, the LDP and maps.</p> |

| | |
|--|--|
| <p>Causeway, Coasts & Glens Borough Council</p> | <p>Notes the proposed retail hierarchy, designation of primary retail cores and proposed designation of Rural Industrial Policy Areas and the SCA. Notes the option to adopt no policy in relation to development in proximity to reservoirs until such times as the required information is made available to the public. Acknowledges strategy for the protection of natural heritage.</p> <p>The proposed Mineral Reserve Policy Area, AoC on wind turbines & high structures, Tourism Conservation Zones (particularly within the Sperrins AONB) are of interest as these occur alone our common boundary.</p> <p>Suggestion to prepare a local list of non-designated heritage assets is noted. States that the method regarding the selection criteria for the identification of such assets needs to be clear & based on a robust evidence base.</p> <p>Council are keen to work with MUDC in relation to our common areas of interest as listed above.</p> |
| <p>Derry City and Strabane District Council</p> | <p>The Council notes the proposed vision, plan objectives, spatial framework, housing allocation option and economic land allocation option.</p> <p>The Council notes the preferred options for transport and connectivity and the environment. They note the wording of the General Principles for Sustainable Development Policy.</p> <p>Social policies- Council notes the preferred options for housing, health, education and community use, urban design policy and open space and recreation / leisure policy.</p> <p>Economic policies- Council notes the preferred options for economic development and for agriculture, forestry and rural development.</p> |

| | |
|--|---|
| | <p>Town centres & retailing Council notes the town centre first approach but also highlight that the retail hierarchy places Out-of-town retail Outlet Centres before Edge- of-Centre supermarkets. Suggested policy RE 3 appears to say otherwise.</p> <p>Minerals Council notes suggested minerals policy. Also notes that the contents of maps 2 & 3 which proposed swathes of mid-Ulster as AoCs on Mineral Development, some of which will border our council district. States that future discussion is required between our councils to ensure consistency in policy approach.</p> <p>Tourism Stress that any proposed tourism conservation zone within the shared resource of the Sperrins AONB should be the subject of suitable engagement with this Council.</p> <p>Environmental Policies- Note the preferred option for archaeology & built heritage. Where archaeological sites/ monuments cross, or are in close proximity to our district boundaries then further discussion will be required to ensure the safeguarding of assets through consistent policy approaches. Encourage a collaborative approach where cross –District opportunities are identified such as heritage trails.</p> <p>Natural Heritage Note the preferred option in relation to our shards AONB. Introduction of any AoC on high structures and mineral development will require future discussion to ensure consistency in policy approach.</p> <p>Flood Risk Management Council note decision not to have a policy at this stage in relation to reservoirs due to uncertainty in relation to available data.</p> <p>Waste Management</p> |
|--|---|

| | |
|---|---|
| <p>Mid and East Antrim Borough Council</p> | <p>Preferred option noted.</p> <p>Telecommunications, Overhead Cables & High Structures Thrust of preferred option noted. States need for future discussions between our councils to ensure consistency in policy approach within this shared and designated landscape resource.</p> <p>Renewable Energy The designation of any AoC requires a joined- up cross boundary approach to ensure consistency of the protection afforded.</p> <p>Transportation Thrust of preferred options noted. A collaborative approach would be suggested in terms of areas of common interest, including the A6.</p> <p>SA/ SEA Interim Report Notes content od SA /SEA Interim Report. States repot comprehensively covers consideration of the realistic options for delivering the objectives of the Mid Ulster LDP.</p> <p>States the issues of common interest are focused between the two Council areas which is defined by the Lough Beg and the Lower Bann River corridor. They are summarised as:</p> <p>Protection of lough Beg and the Lower Bann river corridor from inappropriate development, given the environmental and natural heritage importance of this area; The need to recognise the recreational importance of this area and also its tourism potential; The need to have a joined up approach to flood risk management in this area of significant flood risk.</p> <p>A joined up approach on these matters is imperative. Such an approach is not only rational but also mutually beneficial.</p> |
|---|---|

| | |
|---|---|
| <p>Antrim & Newtownabbey Borough Council</p> | <p>Council are particularly interested in any proposed designations that are in close proximity to our shared boundary and any policies / strategies that have potential to influence the shape of future development in the Borough. This includes:</p> <p>The identification of vulnerable landscapes within the Mid Ulster District (including areas along the shores of Lough Neagh and Lough Beg)</p> <p>The proposed designation of a Special Countryside Area (SCA) along the banks of the River Bann and the Shores of Lough Neagh and Lough Beg. A proposed AoC on Mineral Development has also been identified along the loughshore.</p> <p>The transportation and connectivity strategy outlined for Mid Ulster, may have the potential to influence the shape of future development in Antrim & Newtownabbey, particularly the case in areas along key transport corridors.</p> <p>Council welcomes the opportunity to liaise further with the MUDC in order to discuss issues likely to affect our LDPs.</p> |
| <p>Fermanagh & Omagh District Council (FODC)</p> | <p>States that both councils have identified several areas of cross boundary interest in Pre-POP correspondence process.</p> <p>Environment FODC support overall approach to promoting sustainable development including identifying AoC based on vulnerable landscapes such as the Sperrins and the Clogher Valley and other important ridgelines and river valleys.</p> <p>Minerals FODC welcomes the approach to protect more vulnerable landscapes such as the Sperrin AONB from mineral developments whilst at the same time recognising the benefits of the minerals industry to the economy. State that the Mineral Reserve policy Areas would appear to be similar to FODC's Mineral Safeguarding areas which are intended to protect minerals reserves which are valuable to the local economy.</p> |

| | |
|--|---|
| | <p>Tourism Identification of tourism opportunity and conservation zones. Those areas identified within and adjoining the Sperrin AONB & the Clogher Valley are most relevant to FODC and they acknowledge the proposed approach taken to promoting important tourism assets such as these and ensuring tourism development is sensitively located.</p> <p>Archaeology & Built Heritage Notes approach to introduce AoC within ASAs for regional Remains whereby certain types of development may be constrained eg tall/high structures & minerals development. The candidate ASAI at Creggandevsky and the existing Beaghmore ASAI could also potentially extend into the FODC area. FODC will consider these proposals further.</p> <p>Natural Heritage Notes preferred option</p> <p>Telecommunications, Overhead cables & High Structures Notes preferred option and approach to designate AoC in the context of high structures.</p> <p>Renewable Energy Notes the preferred option. FODC notes that a 15m high restriction would apply in locations such as the high Sperrins AONB, the escarpments and prominent ridges overlooking the Clogher Valley and ASAI. Given the shared landscapes, FODC would welcome the opportunity to work with MUDC to ensure consistent policy approach is adopted.</p> |
|--|---|

| Statutory Consultee | Summary |
|---------------------------------|--|
| <p>SSE – Electricity</p> | <p>Focused on the likely impact on the development of onshore wind energy within MUDC. This representation is relevant to both Plan Strategy & Local Policies Plan.</p> <p>SSE operate Slieve Kirk Wind Park (73MW); under construction are Tievenameenta (35MW) & Slieve Divena II (18MW) onshore wind farms; Current application for Doraville wind farm Co. Tyrone; SSE intend to add 201MW of new wind power generation capacity to March 2018.</p> <p>Page 15: POP identifies 17 objectives under 3 themes which SSE broadly support – ‘enhancing the environment’, ‘to reduce contributions & vulnerability to climate change’ & ‘the need to accommodate investment in power’ – deliver via renewable energy schemes.</p> <p>Page 28: SSE suggest Option 1 most appropriate; it is SSE’s opinion that development should be permitted in areas where policy criteria in SPPS & PPS18 is met. SSE does not support Option 3 as this would materially prejudice all development other than residential – to afford greater flexibility to housing development in the countryside would have a detrimental impact on the landscape as do not require Environmental Assessments.</p> <p>Page 58: Paragraphs 6.214 & 6.216 of SPPS and Paragraph 3.101 of RDS recognise renewable energy as economic driver for NI economy, see Appendix 1 i.e. Slieve Kirk Wind Park Co. Derry, the local benefits from onshore wind energy development. Note also Department of Energy & Climate Change Paper – Onshore Wind Direct & Wider Economic Impacts May 2012. MUDC Position Paper 3 recognises the economic opportunities that can arise from on shore wind energy development.</p> <p>Page 76: Tourism SSE supports the adoption of Option 3 but would object to the designation of further Tourism Conservation Zones (TCZ). Page 76 of the POP “Tourism in Mid Ulster is relatively small” therefore the introduction of additional TCZ within Sperrin’s AONB could result in a reduction of any new visitors to the area – SSE opinion that the designation of further TCZs in the absence of a proper evidence base would have a detrimental impact on the economic development of the plan areas as a whole. Position Paper 8 stated no identified pressure or perceived conflict between onshore wind energy development and tourism related land uses or</p> |

| | |
|--|---|
| | <p>interests. E.g. Whitelee's wind farm visitor centre Scotland –eco-attractions; BIGGAR Economic analysed the impact of Scottish windfarms on tourism-related employment in an area, which concluded there was no evidence to suggest windfarms had an adverse effect on tourism in an area. E.g. Galway Wind Park Appendix 2, illustrates tourism & recreation benefits that windfarm development may bring to local area. Note: current Planning Application for Doraville Wind Farm makes provision for the Doraville Area Grant Scheme for delivery of the Sperrin's Outdoor Recreation Action Plan.</p> <p>Note: SSE would strongly resist the designation of any new TCZ's and in their place would request the adoption of a policy based approach that recognises the recreational & tourism benefits that may be derived from wind energy developments.</p> <p>Page 84: Archaeology & Built Heritage SSE disagrees with Option 3 & proposal to identify Beaghmore ASAI as an Area of Constraint for Tall Structures. SPPS, sets out criteria based approach for determining applications on a case by case basis & no overall blanket ban; e.g. PAC 2007/A1313 Mullaghturk and PAC 2014/A0285 Feytown.</p> <p>Page 100: AONB SSE note emerging policy approach against structures over 15m – without regard to the varied characteristics of the plan area or other material planning factors; does not fully regard SPPS policy; PPS18 RE1 only presumes against development where unacceptable impacts on specified resources would occur – this is considered to be an appropriate policy test – every development should be considered on its own merits – paragraph 4.1 PPS18; PPS2 provides a criteria-based policy approach for the assessment of potential development impacts on an AONB. The criteria-based policy NH6 AONBs does not presume against any form of development within AONBs, but rather sets out a number of criteria against which development proposals should be assessed.</p> <p>SSE welcomes adoption of Option 1 which is in line with current Planning Policy i.e. Paragraph 4.5, 4.12 & 4.13 of PPS18.</p> <p>Page 116: Renewable Energy SSE disagrees with Option 2 which proposes the adoption of a highly restrictive approach to development within environmentally sensitive areas and the introduction of Areas of Constraint on wind turbines & high structures; SPPS set out a criteria based approach; PPS18 & PPS2 is bound by the terms of the EC Habitats Directive (and EC Birds Directive & the Ramsar Convention). Position Paper Landscape Character Assessment no</p> |
|--|---|

| | |
|--|---|
| | <p>specific definition of development is provided, the recommendations of the paper refer to all types of development and high structures such as wind turbines & telecommunication masts – there should not be a blanket ban in relation to specific types of development; Section 2 of paper – methodology not adequately described, lacks transparency, not clear or robust and not fit for purpose – wind energy development based on landscape characteristics & the nature of development should be clearly explained – therefore the restriction of high structures & onshore wind energy development within AONBs & other sensitive landscapes is inconsistent with and contrary to RDS. Existing wind farms in NI operational since 2000 are at end of consented lifetime – LDP should embrace advantages of Re-powering renewable energy projects – the circular economy approach – Re-use-Remanufacture-Recycle – protect existing assets for reuse – maintain a low carbon renewable energy generation at existing wind farms – see paragraph 174 at Scottish Planning Policy.</p> <p>Recommendations: There should be no restriction on high structures creating an embargo on onshore wind energy development within the AONB or other landscape designations; The policy framework applicable to onshore wind energy development should continue on a criteria based policy approach that would allow decision makers to continue to weigh the benefits and any adverse effects of development in a proper planning balance and informed by a development specific assessment of effects; Recognition that onshore wind energy development is the most cost effective and deliverable technology to assist in meeting climate change obligations; Recognition that onshore wind energy development can in fact be compatible with and assist in delivering further recreation & tourism opportunities; Recognition that NI has one of the best wind resources in Northern Europe form which a significant socio economic value can be realised; The preferred options have the potential to become significant issues for delivering further onshore wind energy development within the MUDC area; SSE would welcome further consultation and dialogue.</p> |
|--|---|

| Statutory Consultee | Summary |
|---|--|
| <p>Department for Communities: Historic Environment Division (HED)</p> | <p>Concern regarding the articulation of policies to protect the historic environment as drafted in POP; lacking clarity/consistency. States that the phrasing within existing planning policy in the SPPS is critically important.</p> <p>Page 14- HED advise that it would be more appropriate to highlight the number of scheduled & state care monuments as opposed to number of unscheduled monuments.</p> <p>Page 15- Advise that the second objective under Enhancing the environment & improving infrastructure be amended to read “the need to protect the natural, historic & built environment”</p> <p>Page 23- Concern regarding equitable split housing allocation; 40% toward rural housing will potentially have significant impact on rural historic landscape & potentially on historic assets located within it.</p> <p>Page 83- Agriculture, Forestry & Rural Development: Regarding rural development and non-listed vernacular buildings HED would advocate the retention and sympathetic conservation of such assets where this would secure their upkeep & retention.</p> <p><i>Archaeological and Built Heritage (page 85)</i> Refer the Council to HEDs Gazetteer of Nucleated Historic Urban Settlements in relation to potential designation of ATCs & LLPAs. It could be utilised by the Council in assessing potential ATCs and when considered with HEDs existing historic environment records (eg. Listed buildings) could aid in informing new LLPAs. Both ATCs & LLPAs have a key role in the protection & enhancement of historic landscapes.</p> <p><i>Built Heritage Strategy (page 85)</i> Agree with key actions outlined in strategy & would highlight the opportunities to utilize the historic environment to: Promote heritage based tourism; deliver heritage led regeneration opportunities & serve as an educational resource.</p> |

| | |
|--|--|
| | <p>Areas of Significant Archaeological Interest (ASAI's) (page 88) Advise that they are in the process of reviewing the ASAI for Beaghmore. Other areas at Clogher, Cregganvelesky & Tullyhogue are being examined as potential ASAI candidates.</p> <p>Historic Parks, Gardens & Demesnes (page 89) HED agree with adopting the existing policy approach as the preferred approach. Expect that in further drafting of this policy sufficient explanatory text will be included akin to PPS 6 / SPPS.</p> <p>Listed Buildings Policy (page 89-90) HED welcomes Approach 1, however proposed policy BH4 fails to provide adequate protection for any proposed changes to Listed Buildings & their settings. Recommend that the existing policy framework in PPS 6 & the SPPS is adopted.</p> <p>Advertisement on Built Heritage Assets (page 90-91) HED notes proposed Option 2 to amalgamate various existing policies. Advise that the new policy must provide the same level of protection as afforded by Policy BH9. Policy title should be carefully considered as the term 'Built heritage Assets' includes buildings in a Conservation Area / ATC also.</p> <p>Conservation Areas CA (page 91) Concern regarding amalgamation of existing policies as each policy addresses separate considerations. However acknowledge that these policies need to be updates to reflect legislative changes as per the Planning Act (NI) 2011 & strategic policy as per the SPPS.</p> <p>Non-Listed vernacular Buildings & Industrial Heritage (page 92) Recommends that parallel consideration is given to the review of Policy CTY4 in PPS 21 & that it may be appropriate to amalgamate both policies. Policy CTY3 in PPS21 relating to non-listed vernacular dwellings should also form part of the consideration.</p> <p>Areas of Townscape Character ATC's / Village Character (page 93) Welcomes the preferred approach to require all demolition proposals in an ATC to include appropriate arrangements for the redevelopment of the site. Advise that retention of existing policies regarding archaeology & built heritage in PPS 6 & SPPS are important towards the continued recognition of the statutory protection of certain heritage assets, and for maintaining</p> |
|--|--|

| | |
|--|---|
| | <p>compliance with international conventions on the protection of heritage to which the UK is a signatory.</p> <p><i>Enabling Development for the Conservation of Significant Places (page 93)</i> HED welcomes the preferred approach.</p> <p><i>Non-Designated Heritage Assets (NDHAs) (page 94)</i> Welcomes MUDCs consideration of preparing a local list of NDHAs. HED intends to publish guidance document to assist Councils develop bespoke policies. Regarding LLPAs, HED recommend insertion of the ‘vernacular’ buildings.</p> <p><i>Suggested Policy BH1 (page 87)</i> Concern that proposed policy reduces the level of protections afforded to regional & local important archaeological remains & their settings. State that the terms “Regional Importance”, “Regional Significance” & “Local Importance” are fundamental in existing policy. The term Regional as employed in PPS6 & the SPPS identifies monuments which are of the greatest importance within NI as a whole. Concern regarding the exception for an essential public utility- this is not in keeping with PPS 6 where exceptions are only permitted for proposals of overriding importance to the NI context. The drafted policy has potential to conflict with the Historic Monuments & Archaeological Objects (NI) Order 1995 in terms of statutory requirements for Scheduled Monument Consent. Strongly advise that articulation of existing policies is important to ensure sustainable development in relation to the Historic Environment. Suggests there is opportunity to address existing policy gaps in the protection of Industrial Heritage Assets , Defence Heritage & Shipwrecks</p> <p><i>Suggested Policy BH2 (page 88)</i> Concern that amalgamation of policies likely to lead to confusion in the planning process & potentially adverse impact to archaeological remains. Policies in relation to evaluation & mitigation, and achieving by way of planning conditions should be articulated as per the SPPS to meet obligations under the Valetta Convention. Suggest inclusion of additional text that in certain cases facilitation of public visits to view an excavation site could be required.</p> <p><i>Sustainability Appraisal Scoping Report</i> States there are numerous references to NIEA. HED have not operated as part of NIEA since April 2015. HED have operated within Department for Communities from May 2016.</p> |
|--|---|

| | |
|--|---|
| | <p>HED highlight the importance of continual review of their datasets throughout the LDP process (footnotes suggest dataset study dates to July 2014).</p> <p>Suggest it would be appropriate to review the shipwrecks inventory for the District.</p> <p>HED highlight the importance of historic maps in understanding evolution of the historic landscape in the District & the importance of historic routes/boundaries, incl. townland/parish boundaries as intrinsic parts of this.</p> <p>Information on excavations (archaeological remains) which have happened throughout NI are available through visiting The Monuments and Buildings Record at the Klondyke building in Belfast.</p> <p>Plans & Programmes- highlight that the Granada Convention 1985 should be included at an international level. At a NI level the Historic Monuments & Archaeological Objects (NI) Order 1995 should be included. At a local level conservation plans for historic assets should be incl. eg. Conservation Management Plan for Castle Hill, Dungannon (Council commissioned).</p> <p><i>Sustainability Appraisal</i></p> <p>Housing growth / economic growth options into greenfield areas on the outskirts of settlements have potential to impact on previously unrecorded below ground archaeological remains. Rather than a neutral score in regard to impact in areas where no recorded assets are marked, HED advise that a score of uncertain/ potentially negative would be more appropriate.</p> <p>HEDs will assess via a risk based approach what level of site specific analysis & advice can be provided to the Councils on historic environment related matters during the preparation of development plans.</p> |
|--|---|

| Statutory Consultee | Summary |
|---|---|
| <p>Department for Infrastructure</p> | <p>Vision and Plan Objectives</p> <ul style="list-style-type: none"> • Council may wish to give consideration to developing a LDP vision that is locally distinct and that reflects and seeks to make the most of the unique characteristics of MUDC area • There should be a clear logical link between the vision articulated for the district and the plan objectives which should, in turn, support achievement of the vision • The Department supports the inclusion of plan objectives. These should support achievement of the vision; address current key issues identified for the district and be based upon analysis of the plan evidence base • Council is reminded of consistency tests relating to soundness, including that the council has taken account of policy and guidance issued by the Department and that the plan proposals have regard to other relevant plans, policies and strategies relating to the Councils District and/or adjoining district. To ensure soundness plan objectives should be integrated with, and assist in the delivery of, regional policy and guidance as set out within the SPPS and RDS. • In addition to supporting the delivery of regional policy and guidance, plan objectives should be supported by the preferred options set out within the POP. A key test of soundness is that a plan should set out a coherent strategy from which its policies and allocations logically flow. Plan objectives should address the key issues that council has identified for their district and be based upon analysis of the plan evidence base. • Council should give consideration to how the proposed objectives will be delivered, measured and monitored. Clarity is important and reference within objectives such as “variety of locations” may be insufficiently clear. Monitoring of progress toward achieving plan objectives is a key element of the review process vital to measuring the effectiveness of plan provisions. |
| | <p>Spatial Framework, Growth Strategy and Settlement Hierarchy</p> <ul style="list-style-type: none"> • The introduction of SPGs to support the delivery of plan objectives is welcome. All SPGs should reflect the plan vision and objectives and should be realistic. Further consideration should be given to the achievement of measures that are the responsibility of other bodies. • The department welcomes the statement that the Spatial Framework is based upon building the Hubs and Clusters of Hubs. The identification of Cookstown, Dungannon & Magherafelt as the primary growth centres in Mid Ulster District is welcome. |

| | |
|--|--|
| | <ul style="list-style-type: none"> • As presented the SPGs suggest a hierarchy of growth, to focus on hubs first, smaller settlements next then the countryside • The preferred housing allocation should flow logically from the strategic policy articulated by the SPGs. To support the SPGs as written the preferred housing allocation option should articulate the need for growth of the main and local hubs towns. • Consultation and joint working with (six other) neighbouring councils and the Republic of Ireland is vital to developing a coherent response to regional matters and ensuring that plan proposals do not conflict with those of neighbouring councils. The Council should have regard to the relevant plans, policies and strategies of adjoining councils. Where cross boundary issues arise it is important for the Council to satisfy itself that plan proposals do not conflict with those of neighbouring councils. • The Department agrees that small towns, settlements and the Countryside should be supported and the level of provision they provide to their populations and rural hinterlands sustained. Important to recognise that hubs/clusters of hubs are best placed to benefit from/add value to regional economic growth and that the entire district, including rural areas, will benefit from thriving hub towns. • Clarification requested on statement “it is important to reinforce our vibrant rural communities so that they do not begin to decline at the expense of the main urban hubs”. • The Council highlights that “we will also remain a geographically dispersed population with currently a quarter of us living in the man towns, a third living in local towns and 40% of our homes located in the countryside”. The Dept. would suggest that this evidence is not supportive of the regional objectives for housing in settlements contained in the SPPS, consistent with regional guidance in the RDS which are: managing housing growth to achieve sustainable patterns of residential development and supporting urban/rural renaissance. SPPS states ‘it is important to manage housing growth in a sustainable way, placing particular emphasis on the importance of the inter-relationship between the location of local housing, jobs, facilities/ services & infrastructure. It is similarly important to successfully integrate transport and land use generally in order to improve connectivity & promote more sustainable patterns of transport & travel”. |
| | <p>Housing Allocation</p> <ul style="list-style-type: none"> • Although some indications that cognisance has been given to the inter-relationship of housing, economic development & transportation within the growth strategy, there appears to be contradiction between the Council’s preferred housing allocation option, and the SPPS subject |

| | |
|--|--|
| | <p>policies relating to, for example, Housing in Settlements, Development in the Countryside and Transportation which seek to further sustainable development. It is unclear if the housing allocation options have been developed in accordance with the SPSS processes for the allocation of housing land, including the use of the RDS housing evaluation framework.</p> <ul style="list-style-type: none"> • Council is reminded that the RDS objective is to grow the population in the Hubs/Clusters of Hubs (SFG12) in order to support the role of these larger settlements. In the view of the Department this approach to maintaining the existing population distribution fails to support the approach of strengthening Hubs set out in the RDS. It also fails to support the councils own SPG 2 which is to focus growth on the three main hubs & strengthen their roles as residential centres. • Clarification is sought of the terms 'equitable split' & 'fair share' • Whilst the Department acknowledges the need to make appropriate provision for residential development within the countryside it is concerned that the preferred allocation of a maximum of 40% of the HGI to rural areas(outside of settlements) fails to support the RDS aim of supporting strong, sustainable growth for the benefits of all parts of NI. It also fails to support Strategic guidance RG8 of the RDS which seeks to manage housing growth to achieve sustainable patterns of residential development. • Department notes that the maximum 40% of the HGI would permit 4380 rural dwellings over the plan period 2015-2030. The POP states that the recent approval rates (for the period 2012-2014) would, if sustained over the plan period, result in a further 3670 dwellings within Mid- U district. These approval rates suggest that there is potential for further housing growth to be allocated to the main hubs without imposing constraint on recent rates of housing approval in the countryside. • The 3 options for housing allocation all allocate 33% of the HGI to villages/small settlements, and the evidence provided suggest that there is potential for further growth in the majority of these settlements. Has the Council considered an option that these settlements could accommodate rural housing growth without the proposed deviation from regional policy & guidance? • The Department is concerned that there is insufficient evidence provided to support the preferred 'equitable split' option for housing allocation. The ability to demonstrate alignment with regional policy is a key element of the evidence required to demonstrate the consistency test of plan soundness including that the Council has taken account of the RDS. • Coherence & effectiveness of a plan is a key test of soundness. The plan must present a coherent strategy from which its policies and allocations logically flow. The Dept. considers that the preferred option for housing allocation fails to align with/support the Spatial Framework or |
|--|--|

| | |
|--|---|
| | <p>SPGs set out in the POP. The preferred option will encourage a dispersed pattern of development in the countryside which is not a sustainable pattern of development; it is not evident whether this approach can be adequately supported by the required infrastructure and justified by Sustainability Appraisal (SA)</p> <ul style="list-style-type: none"> Ensuring SA informs the development of policies & zoning/allocation of land will assist planning authorities in balancing /integrating the variety of complex social, economic, environmental & other matters that are in the long term public interest & fundamental to achieving sustainable development. Council needs to be satisfied that the policy proposals brought forward are properly assessed against environmental considerations & in combination with the other policy proposals to assist in providing a coherent approach to the development of the proposals that will be included in the LDP. Discussion of how options performed at SA will be useful in providing the rationale/ justification for choice of preferred option. |
| | <p>Housing in the Countryside</p> <ul style="list-style-type: none"> Policy CT1 appears not to reflect the SPPS approach to cluster, consolidate & group new development with existing established buildings There is no provision within the SPPS for designations of DRCs, therefore the Council should be satisfied such designations are based on a robust evidence base & considered in combination with other policy proposals included in the LDP Policy CT4- Dispersed Rural Communities: facilitates single dwellings for those that have a 'strong connection' to the community /make a 'substantial' economic or social contribution to that community. Dept. view that the concept of 'kinship'/ connection with an area or of social/economic contribution is difficult to define. How will the Council determine what constitutes a strong connection/ measure social contribution? Concern that policy approaches based on kinship pose significant problems in relation to interpretation & poses practical problems in relation to implementation, assessment & enforceability. Whilst policy must respond to needs of community, it should also be capable of fair/ consistent application Kinship/ connection, if embedded within policy, has potential to circumvent other policy measures to encourage appropriate rural development. Considers that policy set out in SPPS 'Development in the Countryside' already affords a range of opportunities for residential development to meet the needs of rural dwellers Council should be satisfied that they have fully considered the quantum of development that |

| | |
|--|---|
| | <p>has the potential to come forward under their proposals.</p> <ul style="list-style-type: none"> • Concerned the proposed approach has the potential to give rise to an increase in level of residential development within the countryside & would not be supportive of the SPPS objective to achieve sustainable patterns of development. • Council has not sufficiently articulated the need for further opportunities / proposed deviation from regional policy. Whilst different approaches are not precluded, any departure from SPPS policy must be supported by a robust evidential context; any impacts need to be fully considered in combination with other policies (eg spatial framework/ transportation/ provision of services). Without the evidence base that would be provided through the application of SPPS policy in relation to housing, there is no clear justification for an alternative approach to the strategic planning policy of the SPPS. This is necessary to ensure a coherent approach throughout. |
| | <p>The Economy</p> <ul style="list-style-type: none"> • Concerned that a preferred option has been put forward by the Council without the benefit of results from a feasibility study (survey to establish whether owners of existing zoned lands are willing to provide it for economic development at market value & whether there are any other land owners willing to provide land) • Use of the Employment Land Evaluation Framework set out in table 3.1 of the RDS will provide an objective means of quantifying the demand for, & supply of employment land & how best the requirement can be met by the existing stock of business premises & allocated sites. Such an appraisal framework is important to providing a robust justification of the preferred allocation of employment/economic development land • Council should note the requirement in the SPPS that LDPs should identify previously developed land within settlements for potential economic development use. Council should ensure they have taken account of all factors set out in SPPS such as availability of adequate infrastructure, identification of previously developed land within settlements, specialised needs of specific economic activities, potential environmental impacts & compatibility with nearby uses etc. • Council must take account of SPPS policy regarding economic development in villages/small settlements & the countryside. Whilst different approaches are not precluded, any departure from SPPS policy must be supported by a robust evidential context & any impacts need to be fully considered in combination with other policies such as the spatial framework/housing/transportation & provision of services/ facilities. Without the evidence base |

| | |
|--|---|
| | <p>that would be provided through the application of SPPS policy in relation to economic development, there is no clear justification for an alternative approach to the strategic planning policy of the SPPS.</p> <ul style="list-style-type: none"> • The Dept. welcomes option 1, the preferred option, which proposes to distribute economic development land by providing a minimum of 55-60 ha. in each town. The Dept. welcomes the fact that the approach appears to accord with the RDS by focusing the supply of employment land on larger urban centres, thereby capitalising on the development opportunities, provided by the combination of people, goods & available infrastructure at these locations. • Concern regarding zoning of industrial land within easy access of Ballygawley interchange/ Castledawson Roundabout as these options appear to sit outside Option 1 which relates to the provision of economic development land within Hub towns. Clarity sought on whether these are further possible options and, if so, whether these matters have be subject to SA • Ensuring that the SA informs the development of policies.... |
| | <p>Economic Development</p> <ul style="list-style-type: none"> • In relation to Option 1, considers that the Council's precis of the transitional operational policy in PPS4 to be a misleading simplification. PPS 4 does seek to restrict the level of new building outside settlements but does not forbid such development; it contains policies that permit Major Industrial Development (PED 5) & small Rural Projects (PED 6) in countryside locations subject to sustainability criteria. • Preferred Option for a more flexible approach to existing policy is noted. Council is reminded that in order to be considered realistic Options should be set within the context of regional policy. Where it is proposed to depart from approach set out in SPPS & RDS, Council must provide evidenced justification for doing so. • Requests clarification of the Councils proposals in relation to the provision of workshop developments within the countryside; workshop accommodation in association with a dwelling; proposals for offsite expansion of existing rural enterprises & those for small economic enterprises on edge of settlement locations. States that in interest of rural amenity/ sustainability objectives the level of new building outside settlements should be restricted. Concern approaches may not be consistent with regional policy & more detail required to determine alignment with SPPS. • Lack of clarity regarding reason for designating/identifying Rural Industrial Policy Areas eg. Whether these are to consolidate existing development or whether further opportunities would be provided. Concern such designations may further hamper the uptake of economic development land within hub settlements. Approach appears to conflict with SPG 2in POP |

| | |
|--|--|
| | <p>which seeks to focus growth in 3 main hubs & ‘strengthen their roles as administrative/trade/employment & residential centres.</p> <ul style="list-style-type: none"> Concern regarding use of survey of employment on industrial estates in Omagh/Strabane by Planning Service in 2006 (suggests 50 jobs provided for very 1 ha of industrial land). This baseline date is over 10 years old & does not relate to Mid U area. More recent data may provide greater clarity to current situation regarding employment/economic uses in district |
| | <p>Minerals Development</p> <ul style="list-style-type: none"> Suggests that Council should follow the plan making policy of SPPS to identify areas most suitable for mineral development Council have advised that further research will be carried out before minerals designations are finalised. Dept states that gathering/finalising of evidence should have been completed prior to generation of options for POP States the “application of merits” option is contrary to strategic planning policy and questions whether this can be considered as a reasonable option |
| | <p>Transportation & Connectivity</p> <ul style="list-style-type: none"> Concern that further encouraging a dispersed settlement pattern will make it more difficult to fulfil regional policy objectives (both short/long term) In addition to consulting with Transport NI, states Council should consult with the Department & bodies such as Translink in assessing delivery of options i.e. extension of rail links into district/provision of by-passes around 3 main towns/ improvement of transport corridors such as A29. Option 2 ‘focus on roads & private transport’. Although Council acknowledges that this option is unsustainable approaches that are clearly contrary to strategic objectives of SPPS/RDS (reduce car dependence/ change travel behaviour) are not to be regarding as realistic options The existing dispersed rural nature of district & the Council preferred option for housing allocation which will promote greater potential for dispersal & the need to travel more for goods & services |
| | <p>Environment</p> |

| | |
|--|---|
| | <ul style="list-style-type: none"> • Dept notes that the key environmental measures (POP page 29) reflect the content of the SPPS & the detailed policies address a wider range of environmental issues. However the 3 options presented provide a limited interpretation of the environment & mainly focus on natural heritage aspects. • Encourage Council to ensure all aspects of 'environment' are given adequate consideration within the growth strategy, incl. the preferred option for the pattern of development presented & impacts of climate change such as flood risk & mitigation • SPPS advocates a presumption in favour of sustainable development being inherent in the plan. In this context states that the differentiation between option 2 & 3 is difficult to understand (POP page 28) • The SA should inform the choice of preferred options & the Council should consider how the policy options for the environment have been considered against other options within the growth strategy. • Council needs to be satisfied that the policy options brought forward are fully assessed against social/economic/environmental considerations & in combination with other proposals (eg. Housing, economy, tourism, transport) to assist in providing a coherent approach to the development of proposal that will be incl. in the LDP |
| | <p>Renewable Energy</p> <ul style="list-style-type: none"> • Dept notes the inclusion of the plan objective 'to encourage energy efficiencies & promote use of renewable energy'. Policy options should clearly relate to the proposed objectives & this linkage should be adequately demonstrated in order to show consistency/coherence of approach • Policy RNW1 states 'a separation distance of 10 times rotor diameter to occupied property, with a minimum of not less than 500m will generally apply to any wind turbine exceeding 15m to hub height, unless it can be demonstrated to the satisfaction of Mid U Council that the owners of properties within the stipulated separation distance are supportive of development' Concern that this is a more onerous restriction for smaller turbines compared to larger turbines / windfarms & may be disproportionate • Query whether proposed restriction of 15m in height for turbines within Areas of Constraint of Wind Turbines/High Structures refers to hub height or blade height • Council proposes exceptions where proposal is of regional importance. Query regarding definition of 'regional importance' i.e. is this a turbine producing more than 30 megawatts |

| | |
|--|--|
| | <ul style="list-style-type: none"> • Council should be confident that each criterion in Policy RNW1 can be successfully implemented & defended in the event of an appeal. Particularly regarding criteria wind energy development shall not result in 'unacceptable adverse impacts on the operation of tourism or recreation interest • Council should note the strategic guidance of RDS of a sustainable & secure energy supply, incl. the aim to increase in the contribution that renewable energy can make to the overall energy mix. Also note that the SPPS states a 'cautious approach to renewable energy development proposals will apply within designated landscapes which are of significant value, such as AONBs. |
| | <p>Waste Management</p> <ul style="list-style-type: none"> • Dept acknowledges that a joint Waste management Plan has been prepared by MUDC, Omagh & Fermanagh Council & ABC Borough Council. Dept welcomes setting up of this forum & acknowledges its 7 objectives as set out in POP & reiterates the importance of the NI Waste Management Strategy |
| | <p>Flood Risk</p> <ul style="list-style-type: none"> • Dept welcomes the ongoing engagement between MUDC & Rivers Agency to find a satisfactory planning control for areas where there is a serious flood risk. • Dept notes Councils preferred option in relation to development in proximity to reservoirs- Option 3: Adopt no policy & draws the Councils attention to para 6.127 of SPPS which states that 'LDPs must take account of the potential risks from flooding over plan period & beyond as this is likely to influence decisions on such matters as the zoning of land for development / designation of land for open space. Flood risk may also be a consideration in the definition of settlement limits & in decisions concerning the designation of new settlements'. |
| | <p>General principles for Sustainable Development</p> <ul style="list-style-type: none"> • Encouraging to see that some Core Planning principles of SPPS have clearly been taken into account (good design/place-making) • Anomalies with wording eg. POP states 'where relevant consideration should be given to issues of size, scale etc' and that 'proposals for advertisement will be required to demonstrate that they have <u>no significant impact on amenity or public safety</u>'. Concern that these policy statements do |

| | |
|--|---|
| | <p>not accurately reflect SPPS policy & Council should ensure that the wording aligns with that of SPPS, unless it has provided robust evidence & rationale for an alternative approach locally.</p> <ul style="list-style-type: none"> Detail of this General Planning Policy could be more than that which is necessary at this early stage in the plan process given that the Council is still consulting on its options |
| | <p>Policies for Sustainable Development</p> <p>General comments:</p> <ul style="list-style-type: none"> Part 2 of POP- suggests it may be useful to reinforce the purpose of the POP and the benefits that a fully informed and well structured POP can have on the production of the LDP <p>Reference to SPPS:</p> <ul style="list-style-type: none"> Highlights that the SPPS is not, at times, quoted accurately. Resulting in the intent of the SPPS being misconstrued. Future documents should adequately quote from SPPS to ensure intent is clear. Policies appear to be an interpretation/ amendment to regional policies contained in the SPPS rather than an application of the policies at the local level <p>Generation of options:</p> <ul style="list-style-type: none"> Policy options should clearly relate to the proposed objectives and this linkage should be adequately demonstrated in order to show consistency/ coherence of approach as this is important for demonstration of soundness. States the gathering of evidence and finalising of this evidence should have been completed <u>prior</u> to the generation of options for the POP To demonstrate soundness, plan proposals should represent the most appropriate response in the circumstances, be consistent with regional policy/guidance, and be founded on a robust and credible evidence base. Council should ensure that in all subject policy areas they have the necessary evidence to justify the proposed approach <p>Cross boundary working:</p> <ul style="list-style-type: none"> States importance of cross boundary working and how this is relevant to certain subject policy areas- being able to demonstrate cross boundary working will be important to demonstrating soundness. <p>Sustainability Appraisal (SA):</p> <ul style="list-style-type: none"> Ensuring the SA informs the development of policies will assist the Council in balancing and integrating the variety of complex social, economic & environmental matters that are in the long term public interest- fundamental to achievement of sustainable development/ demonstrating plan soundness |

| | |
|-------------------|--|
| | <ul style="list-style-type: none">• Generally the justification setting out the rationale for selecting one preferred option over another would benefit from commentary of how each option performed in the SA. Dept concerned that the Council has not demonstrated the vital linkages from the SA process. The SA is important in proving evidence that demonstrates how the preferred option has been reached• It is not the role of SA to dictate the preferred option. Final decision on preferred option is a matter for Council to determine, using SA findings as a guide to decision- making. Where a balance needs to be struck between competing alternatives, Council must be able to demonstrate how it arrived at its decision and provide the relevant evidence as required. Additional evidence may include responses from consultation bodies/ findings from public consultation process. Council should seek to ensure that the SA of policy options is as logical and objective as possible and that assessment can withstand scrutiny |
| Additional Issues | |

| Statutory Consultee | Summary |
|---|---|
| Northern Ireland Housing Executive | <p data-bbox="371 640 403 1697">NIHE seek clarification on which takes preference; a draft Plan Strategy or PPS's.</p> <p data-bbox="539 421 603 1697">The POP should, as well as discussing the regional context for each subject, also discuss the local context and use this as a means for bringing through the themes from the Community Plan.</p> <p data-bbox="778 376 906 1697">NIHE do not agree that the allocation of development in the rural areas should be “proportionate to the extent of rural communities.” This tends to repeat historic trends and the plan should instead adopt a place shaping approach and aim to offer vision and strategic direction which can guide future development and allow us to respond to challenges such as climate change and an ageing population.</p> |

| Statutory Consultee | Summary |
|---|--|
| Northern Ireland Housing Executive | <p>NIHE would like to see two new objectives included in the POP, one relating to the reduction of poverty and the other relating to the improvement of health and wellbeing.</p> <p>Where a development is proposed outside the settlement, it should first be demonstrated that development cannot be accommodated within the settlement.</p> <p>The statement in SPG 5 that development in small settlements should be restricted to 6 dwellings is too restrictive and should be removed to allow flexibility to cater for affordable housing need or in situations where development can be accommodated.</p> <p>DRC's are not sustainable, they create isolation, challenge the ability of small settlements and villages to grow and are not provided for by regional policy.</p> |

| Statutory Consultee | Summary |
|---|--|
| Northern Ireland Housing Executive | <p>NIHE supports the preferred strategic environmental option (Option 3) which seeks to designate areas of constraint and allow sustainable development outside these areas. However, they raise queries about how this option aligns with the preferred option for housing allocation.</p> <p>General Principles should include reference to community involvement which is an important aspect of a place making approach.</p> <p>NIHE would like to see the POP reference the supplementary planning guidance contained in Living Places, Building on Tradition and DCAN's.</p> |

| | |
|--|--|
| | <p>NIHE would like all housing developments over 2 units to be accompanied by a D&AS. They agree with point © that all developments over 2-3 stories will need a design and access statement. Part © should also state that developments have regard to approved as well as existing developments.</p> <p>NIHE would like to see the General Principles promote mixed tenure housing and the principles of Lifetime Homes / Lifetime Neighbourhoods.</p> <p>NIHE supports the inclusion of planning gain and developer contribution. The provision of social housing is perhaps something which could be built into this.</p> <p>HOUSING POLICY</p> <p>In relation to housing densities, NIHE would like to see a maximum density of 30 per units with max. densities being set out in Key Site Requirements. Higher densities may be allowed on sites for affordable housing. To restrict densities of affordable housing may make the provision of such housing less economically viable and would place future provision in jeopardy. NIHE also predicts a rise in smaller units for affordable housing which will lead to more demand for higher densities.</p> |
|--|--|

| | |
|--|---|
| | <p>In relation to policies to prevent town cramming, NIHE are of the opinion that some flexibility should be retained in order to allow for circumstances where the 20m habitable window distance is not appropriate or not required. Also, there may be circumstances when houses need to be adapted / extended to suit the needs of elderly of disabled inhabitants and the 20m distance may limit this.</p> <p>Open space provision – NIHE support the preferred option, Option 2</p> <p>In relation to meeting the needs of all, NIHE prefers option 1 and is unsure how option 2 will contribute to meeting the needs of all.</p> <p><u>HOU 1 –</u> NIHE supports the protection of land zoned for housing but also agree that a range of other uses is often desirable such as community uses, education etc.</p> <p>NIHE has serious concerns about proposals that sites of over 50units should provide 25% affordable housing, until the LPP sets KSR's. This is a two tier process and will provide uncertainty is an application is submitted under Plan Strategy and subsequently the LPP is published with different KSR's (for the site in question) regarding affordable housing.</p> |
|--|---|

| | |
|--|--|
| | <p>In relation to the above point, NIHE believe that it is unlikely that there will be many applications for major development coming forward between PS and LPP publications. This lack of major applications could mean that affordable housing will not need to be adequately addressed until LPP stage.</p> <p>THE APPROACH FOR AFFORDABLE HOUSING</p> <p>NIHE believes that there should be a bespoke development management policy for affordable housing in urban and rural area for developments over a certain threshold. This should operate in conjunction with an allocations policy which will set specific allocations of affordable housing as a KSR for certain sites, depending on those sites. This will allow the figure assigned in the development management policy to be tweaked where appropriate. The allocations policy may also see whole sites zoned for affordable housing.</p> <p>LIFETIME HOMES</p> <p>NIHE point out that whilst the POP states (p.10) that the LDP has a role to facilitate housing development to meet the needs of elderly people, there is no mention of a policy to accommodate such.</p> <p>In order for a home to be considered “adequate” it must be accessible. NIHE would therefore encourage council to incorporate a need to meet Lifetime Homes standards and also ensure that a minimum percentage of homes are designed to be wheelchair accessible, given the % of the population classed as wheelchair users in Mid Ulster.</p> |
| | <p>NIHE would like to see Policy HS3 of PPS 12 or the traveller’s policy within the SPPS recreated within the Plan.</p> <p>RURAL HOUSING</p> |

| | |
|--|---|
| | <p>NIHE would like to see additional criteria to avoid build up or cumulative development which can negatively impact upon rural character.</p> <p>NIHE believes the policy for rural housing do not differ significantly from PPS 21.</p> <p>Policy test under dwelling for a carer is unnecessary and could be catered for under personal and domestic circumstances.</p> |
| | <p>NIHE would like the policy on social and affordable housing to state that groups of more than 6 houses can be sought under CT3.</p> <p>NIHE believe that there should be a sequential exceptions policy for locating social and affordable housing in the rural area and that policy should state that such development must be carried out by a registered housing association.</p> |

| | |
|--|--|
| | <p>NIHE does not support DRC's as they contribute to isolation, harm the environment by increasing the use of the public car and impact on people's health and well-being.</p> |
| | <p>NIHE are concerned that the requirement under DRC policy for the applicant to have a strong connection to the area or to make a substantial economic or social contribution will eliminate some section 75 groups from being applicable and could, by association have equality implications for those from minority racial or ethnic backgrounds and this would be contrary to the aims of the Plan (p.15).</p> |
| | <p>NIHE agrees with the proposed wording of CT5 – Temporary Caravans and Mobile Homes.</p> <p>NIHE agrees with the proposals and proposed policy wording of COY 1 – Community Uses.</p> <p>NIHE would like MUDC to consider that “secure by design” principles are incorporated into policy.</p> <p>OPEN SPACE PROVISION</p> <p>In relation to open space provision, NIHE would agree that Option 3 should be adopted.</p> <p>NIHE supports the suggested wording of OS 1 but would welcome the inclusion in policy of the statement that provision of social housing is a “substantial community benefit.” Also agree with OS2, OS3 and OS4.</p> |

| | |
|--|---|
| | <p>ECONOMIC DEVELOPMENT</p> <p>NIHE agree that economic zonings should be kept in the three main hubs and agree with policies ECON 1, 3, and 4. In relation to ECON 2, they would like to see a sequential approach where economic development is only permitted in the countryside in exceptional circumstances. They are supportive of ECON 2 in regard to the provision of workshop development or farm diversification.</p> <p>NIHE would like to see the inclusion in the Plan of the need to impose planning agreements or conditions to require major development to provide specific amounts of employment or training i.e. a “social clause.”</p> |
| | <p>TOWN CENTRES AND RETAILING</p> <p>NIHE agree with the town centre first approach adopted in the POP and also support the wording of the proposed policies. They would also like to see town centre policy encourage more town centre housing / living via promotion of concepts such as LOTS.</p> <p>TOURISM</p> <p>NIHE believes that Mid Ulster’s landscapes including Lough Neagh and the Sperrins are among our most valuable tourism assets. Therefore we need to protect these from development of single houses. Two DRC’s are located in tourism conservation zones.</p> |

| | |
|--|--|
| | |
| | <p>BUILT AND NATURAL HERITAGE</p> <p>NIHE note the contradiction on page 92 where the preferred option text states that proposals “must” involve the redevelopment of a site, whereas the corresponding policy (BH8) states that proposals will “normally” be required to involve the regeneration of a site. NIHE prefers the more strict approach.</p> <p>In relation to proposed policy NH4, NIHE would like to see the policy clarified to show that the “value of the site” relates to natural heritage value of the site and not economic value.</p> <p>RENEWABLE ENERGY</p> <p>NIHE supports the use of renewable energy and supports the preferred option of option 2 which advocates a more sensitive approach. They believe that policy for renewable energy would be better placed in a wider energy strategy or masterplan which would map broad areas where renewable development would be appropriate. Such a strategy would also include options to reduce energy consumption.</p> <p>TRANSPORTATION</p> <p>NIHE would like to see greater emphasis on active travel, sustainable modes of transport including walking and cycling as well as focus on reducing reliance on private car.</p> |

| | |
|--|--|
| | <p>NIHE provide a table showing the 5 year demand for social housing in the settlements across Mid Ulster.</p> <p>NIHE have included in their response, the NIHE Draft Housing Strategy. This document was submitted to the Council at an earlier date and is not a direct response to the POP.</p> <p>The document sets out the NIHE's general principles for all housing development across Northern Ireland as well as their proposed strategic direction for housing in the Mid-Ulster District. The document has not yet received board approval from the NIHE as shown in the covering email to their correspondence. It has been considered by the Council in preparation of the POP.</p> |
|--|--|

| Statutory Consultee | Summary |
|------------------------|--|
| <p>N.I.E.A.</p> | <p>PLAN OBJECTIVES</p> <p>One of the Plan objectives is to accommodate development proportionate to the extent of existing rural communities. They fear that this will result in widespread development which can lead to widespread environmental degradation.</p> <p>SPATIAL FRAMEWORK</p> <p>NIEA welcome the concept of identifying vulnerable landscapes but are unsure of the justification used to define these areas. They recommend that the Council embarks on a process to undertake a detailed local Landscape Character Assessment using recognised methodology; some site work used for current designations dates back to the 1990's.</p> <p>SPG 8 does not mention walking or cycling yet these are specifically referred to in plan objectives.</p> <p>HOUSING ALLOCATION</p> <p>NIEA are concerned with the preferred option for housing allocation. Widespread development in the rural area is not sustainable and would not be in general conformity with the RDS. The preferred option would create negative impacts for biodiversity and water quality and therefore policy safeguards would be needed for these options NIEA would prefer option 2 to be adopted.</p> |

| | |
|--|---|
| | <p>ENVIRONMENT – STRATEGIC</p> <p>NIEA agree with the preferred option, option 3 – presumption in favour of sustainable development.</p> <p>Given the more permissive options for rural development, NIEA would like to see the POP introduce buffer zones around certain environmental features of habitat quality and species conservation merit. This would go some way to mitigate for the more permissive options in the POP (see housing in the countryside comments for more details).</p> <p>GENERAL PLANNING POLICY</p> <p>The policy test of “demonstrable harm” can be difficult to interpret in relation to habitat and species impacts. It can be difficult to predict or prove changes that would result from development and therefore, this policy test may not be able to ensure that there is no loss of biodiversity.</p> <p>In relation to siting, design and external appearance, NIEA suggests that policy includes provision for development including quality landscape design proposals including shrub planting, open space provision, green and blue infrastructure.</p> <p>Re the biodiversity policy test, NIEA are concerned that the wording of this policy is very general in that “biodiversity” has a wide definition which includes species which are not of conservation concern. NIEA however welcome the inclusion of “enhancement” within the policy test.</p> <p>Also, the policy test does not cover earth science features which are not yet designated but which are referred to in the RDS and are considered under NH5 of PPS 2. NIEA suggest renaming this policy test as (g) biodiversity and geodiversity.</p> <p>Also, no mention of active peatland which a requirement in order to comply with climate change commitments and RDS commitments.</p> |
| | <p>HOUSING POLICY</p> <p>NIEA supports the aspects of policy which include separation distance and the incorporation of open space as these will aid biodiversity. They would also like to see the inclusion of a biodiversity checklist in Design and Access Statements.</p> |

| | |
|--|--|
| | <p>HOUSING IN THE COUNTRYSIDE</p> <p>Given NIEA concerns about widespread environmental degradation, they would like to see adequate buffer zones to watercourses, woodlands, wetlands, priority habitats, including the location of septic tanks.</p> <p>Following on from this, NIEA are concerned that the policy relating to integration by using existing vegetation is dangerous in that it could lead to development being located to close to habitats in blocks of woodland as has previously happened.</p> <p>SINGLE DWELLINGS IN THE COUNTRYSIDE</p> <p>NIEA note the lack of a vulnerable landscape approach to single dwellings. This should be considered given the proposed greater flexibility afforded to development consisting of single dwellings.</p> |
| | <p>OPEN SPACE, RECREATION AND LEISURE</p> <p>NIEA welcome the councils preferred option 3. They also welcome the inclusion of the principle of compensation for loss and recommend that the land provided in compensation should be comparable to that which is lost. They also welcome the river corridor policy.</p> <p>They point out that with a more permissive approach to outdoor sports facilities, there is increased potential for conflict between floodlighting and bats which are sensitive to such development. It is also important that the policy highlights what “wildlife” will potentially be sensitive to the proposed development as this is a very general term (OS3).</p> |

| | |
|--|--|
| | <p>ECONOMIC DEVELOPMENT</p> <p>NIEA are concerned with the proposed relaxation of rural economic policy. If this approach is pursued then certain mitigation measures should be implemented; sensitive quality design which takes account of landscape character and biodiversity, size restrictions, limits on growth allowed on a site, control of advertising, landscape proposals to mitigate visual impacts.</p> <p>NIEA welcome the policy proposal of re use of existing buildings in the countryside although they would recommend that protection of species which are currently using the buildings is highlighted in policy.</p> |
| | <p>MINERALS</p> <p>NIEA agree with the preferred option – Option 2.</p> <p>The policy test of “special attention” is not sufficient to ensure a halt to biodiversity loss. Suggested wording is provided in the response.</p> <p>Policy test of “prejudice” would not be sufficient for considering impact on designated sites.”</p> <p>TOURISM</p> <p>NIEA are concerned that the preferred approach in relation to tourism will see development in the most sensitive environmental areas and that the proposed policy would be too lax to ensure appropriate protection;</p> <p>TOU 1 – “WILDLIFE” is too general a term and NIEA prefers “nature conservation interest.”</p> |

| | |
|--|--|
| | <p>TOU 4 – Should include SCA as an area of constraint.</p> <p>TOU 4 – Text at the end requires editing as there is typing error.</p> <p>AGRICULTURAL FORESTRY AND RURAL DEVELOPMENT</p> <p>NIEA is concerned that the more permissive approach to agricultural development will lead to increased ammonia production.</p> |
| | <p>In relation to AFR 1, NIEA concerns over impact this will have on ancient woodland and would like to consider the inclusion in policy, of a provision that such development should not be located on ancient woodland.</p> <p>Policies AFR 2 and AFR 3 should highlight the potential for impact upon species such as roosting birds and bats could be located within old agricultural buildings.</p> <p>HISTORIC BUILT ENVIRONMENT</p> <p>As with AFR 2 AND AFR 3, Listed Building policy (BH 4) should also highlight the potential for impact upon species such as nesting birds (swift) and bats to highlight the issue for case officers.</p> <p>NIEA welcome the review of the LLPAS which will inform the LPP</p> <p>NATURAL HERITAGE</p> <p>NIEA welcome the concept of an SCA to aid with protecting international sites.</p> <p>NIEA are in agreement with the preferred options in the POP which relate to protected species, local and national designations and other habitats, species and features. They also welcome the proposals being considered for AONB's.</p> |

| | |
|--|---|
| | <p>NIEA highlight that the most sensitive features of AONB's and AOHSV's can still be impacted upon by development under 15m in height. There should still be policy for ensuring such development is acceptable.</p> |
| | <p>In relation to designated sites, the policy text should include mitigation measures if a situation were to arise where a proposal could meet the criteria yet still adversely affect a site. Also, the policy test would be better to use the term "special interest of the designation" as opposed to "objectives of the designation."</p> <p>Policy in relation to other species, features and habitats should be refined to highlight those habitats and species which are considered to be of importance.</p> <p>FLOOD RISK MANAGEMENT</p> <p>NIEA promote the use of SuDS and state that there may be certain areas where development would cause damage to water quality and wherein the local species are highly sensitive to such impacts. SuDS would be preferable in these location and would allow development to occur.</p> <p>TELECOMMUNICATIONS, OVERHEAD CABLES AND HIGH STRUCTURES</p> <p>The proposed area of constraint on high structures is not the same as the vulnerable landscapes. Justification is required as to why these areas differ.</p> <p>Policy test for o/h cables is to follow the natural environmental features – could lead to vegetation loss. Would be better if the policy test was to follow topography.</p> |

| | |
|-----------------------|---|
| <p>N.I.E.A</p> | <p>RENEWABLE ENERGY</p> <p>Renewable energy can have negative impacts on the environment. Policy section does not include any unacceptable impacts test, unlike the SPSS and NIEA think this should be included. They also support the inclusion in policy of a test which states that “<i>no development within active peatland unless there are imperative reasons of overriding public interest.</i>”</p> <p>In relation to wind energy development, there are areas of the Sperrin’s where development under 15m would be inappropriate.</p> <p>TRANSPORT</p> <p>NIEA prefer option 2 in relation disused transport networks as this would protect corridors within the countryside. Preferred Option (3) suggests that purpose for protecting these corridors long term is to provide transport, not value for access and recreation.</p> <p>SETTLEMENT MAPS – COOKSTOWN</p> <p>Proposed development within phase 2 will cause issues with drainage into Upper Ballinderry ASSI and SAC. Features in these designations are sensitive to sediment and poor water quality. One mitigation may be SuDS in all development proposals. Should be considered in HRA and SA.</p> <p>Ballysudden ASSI is to the south of economic option 3 and may restrict growth.</p> <p>SETTLEMENT MAPS – DUNGANNON</p> <p>Derraghadoan Pit Earth Science Review 9link provided in response) will impact upon economic option 3.</p> |
| | <p>WATER QUALITY</p> <p>Given the SPSS comments on Water Quality, the POP should contain a designated water quality section which considers the Water Framework Directive and the NI River Basin Management Plans. This would address land zoning, rural development, run off from agricultural development, SuDS etc.</p> |

| Licence Holder | Response Summary |
|--|--|
| NIE | <p>As NIE works across all council areas it believes there should be a common planning policy across NI when it comes to network infrastructure. It feels that different planning requirements in different councils will only add complexities and cost to planning process.</p> <p>They have raised concerns relation to Preferred Option 2 under 'Telecommunications, Overhead Cables and High Structures' and in particular 'Areas of Constraint'. It is considered that this will;</p> <ul style="list-style-type: none"> - Increase cost to customers of developing the electricity network to meet economic growth demands. - Increase cost to individual customers wishing to connect and /or alter existing connection, particularly in Areas of Constraint. - Add time delays associated with reinforcing the network and connecting customers. <p>They considers that the council should adopt current policy (option 1) to ensure consistent approach across districts.</p> |
| SONI (System Operator for Northern Ireland) | <p>SONI considers that the imposition of a blanket 15 metre height restriction on all overhead cables (as proposed), does not consider the safety or site specific requirements associated with overhead transmission lines and if adopted has the potential to restrict SONI's ability to fulfil its statutory licence obligations. 'The purpose of the proposed policy, which appears to be to protect sensitive landscapes, may therefore have unintended consequences on the security of electrical energy supply across the entire region.' SONI believes that the preferred approach conflicts with the SPPS (Para 6.238) and the RDS (section 2.10), as well as Regional Guidance 5 and Strategic Framework Guidance 6.</p> <p>SONI's final routes for a transmission grid infrastructure line carefully considers environmental issues and looks to avoid</p> |

| | |
|-----------------------------|--|
| | <p>sensitive areas such as AONB's, SPA's and SAC's as well as taking on board technical and landowner considerations.</p> <p>As regards policy approach preferred option 2, 'Tailor Current Policy', SONI requests that '...eg. <i>Telecommunications masts and overhead cables</i>' is removed from text and that policy wording is amended to include 'exceptions will include development of such infrastructure by licensed transmission system operator and or where it has been demonstrated that the proposal is of regional importance'.</p> |
| Brookfield Renewable | <p>Brookfield Renewable supports the POP objectives to encourage energy efficiencies and promote use of renewable energy and to take actions to reduce our carbon footprint and facilitate adaptation to climate change</p> <p>It does not support preferred option 2 'A more Sensitive Approach' in relation to the Renewable Energy topic, favouring instead Option 1 'Adopt Existing Policy'. Considers Option 2 to be too restrictive, particularly in the context of SPPS wording (Para 2.221 in particular). Each application should be considered on its own merits without spatial restrictions. Potential adverse impact on economic and social opportunities due to development restrictions on telecommunications and grid infrastructure. Referring to Map on Page 148 of POP, considers the Area of Constraint to go beyond the 'High Sperrins' to include less sensitive areas such as Beltonanean and Ballynagilly, that have been, developed for wind energy.</p> <p>Advises that existing policy PPS 18 already advocates cautious approach and that Option 2 could compromise NI's ability to reach agreed renewable energy targets and would be contrary to SPPS objectives and aims of Para 6.218.</p> <p>As regards the Natural Heritage topic and SCA's in particular, it suggests that a blanket exclusion of all Natura 2000 Areas runs contrary to 'EU guidance on wind energy development in accordance with EU nature legislation' which states that; <i>The Habitats Directive does not, a priori, exclude wind farm developments in or adjacent to Natura 2000 sites. These need to be judged on a case by case basis</i>'. MUDC should take account of this document.</p> <p>As regards the Archaeology and Built Environment topic, it suggests that Option 1 'Adopt Existing Policy Approach' is chosen and not the preferred approach Option 3 'Adopt existing policy with Specific Areas of Constraint'. Option 1 is consistent with SPPS and which ensures projects are assessed on their own merits.</p> |

| | |
|---|--|
| | Generally encourages MUDC to incorporate the broad principles and aims of the SPPS and key NI Executive strategies and policies into the LDP |
| The Renewables Infrastructure Group Limited (TRIG) | <p>TRIUG welcomes MUDC objectives to ‘take actions to reduce our carbon footprint and facilitate adaption to climate change” and to “improve connectivity to enhance the movement of ...energy between places”</p> <p>TRIG welcomes MUDC acknowledgement of the role of renewables in creating jobs and promoting prosperity through the objective ‘encourage energy efficiencies and promote use of renewable energy’ and particularly welcomes the focus on climate change; ‘to reduce contributions and vulnerability to climate change and to reduce flood risk and the adverse consequences of flooding’.</p> <p>It welcomes the Plan Objective to ‘accommodate investment in power, water and sewerage infrastructure, and waste management particularly in the interests of public health’.</p> <p>It is concerned that the correlation between the Districts’ energy needs up to 2030 and energy supply was not properly considered within the policy review papers that informed the POP and therefore could not be considered when devising renewable energy policies. Considers that there are possible implications in terms of SEA as it is unclear if social and economic impact has been taken into account.</p> <p>TRIG is concerned that the preferred policy options for renewable energy development in the POP do not reflect the wider UK policy direction (UK Climate Change Act, UK Carbon Plan, NI Climate Change Act –Dec 2015 update House of Commons Briefing Paper ‘Paris Climate Change conference).</p> <p>TRIG is concerned that the link between tackling climate change through enhanced use of renewables and the intrinsic benefits on natural resources has not been acknowledged through the plan.</p> <p>TRIG would also encourage the Council to consider the wider needs of the community in terms of ensuring a fair access to energy infrastructure. Renewable energy is good for the Northern Ireland consumer as it will reduce the wholesale costs of electricity by £19 million each year between 2013 and 2020 (DETI, 2015).</p> <p>TRIG advises that development of the transmission or distribution networks in Mid Ulster that is required in order to support electricity generation from renewable energy should also be recognised and facilitated through the LDP.</p> |

| | |
|--|--|
| | <p>Considers there to be an absence of spatial direction in respect of addressing climate change and in the provision of renewable energy infrastructure. TRIG is concerned there is a disconnect between the stipulated plan objectives and the spatial framework.</p> <p>Although TRIG strongly welcomes the POP commitment to encourage renewable energy the reference to the SPPS and that the regional planning context, TRIG is concerned about the way in which the POP seeks to frame the promotion of renewable energy development and in particular the rather negative connotations that appear to be applied to wind energy.</p> <p>Feels that the base line reference fails to take account of the UK Climate Change targets for emissions cuts which seeks to achieve a 40% reduction in emissions by 2020, rising to 80% in 2050.</p> <p>TRIG would encourage the Council to look beyond the 2020 PFG 20% target (for all energy to be developed from renewable resources) to develop a robust plan strategy that can sustain the district throughout the plan period. The recent ROI White Paper identifies reductions of 80% to 95% by 2050 and 100% reduction by 2100.</p> <p>TRIG recommends that the MUDC LOP should embrace the advantages of Re-powering renewable energy projects and that the circular Strategy of 'Re-use, Remanufacture-Recycle' should be a fundamental consideration in future planning policy and decisions.</p> <p>TRIG would encourage the Council to consider a positive plan policy that supports the redevelopment and expansion of existing wind farm sites.</p> <p>TRIG is concerned that by imposing the blanket area of constraint on turbines within Mid Ulster will reduce the likelihood of any viable wind farms coming forward, particularly given the closure of NIRO scheme.</p> <p>TRIG would strongly object to the POP Plan Policy Option 2 'A more Sensitive Approach' and considers the introduction of a spatial restrictive policy to be unnecessary. Supports Option 1 'Adopt existing policy' which gives sufficient policy protection ensures. If Option 2 is pursued however it suggests that it includes scope for expansion of</p> |
|--|--|

| | |
|-------------------------|---|
| | existing wind farms within AoC's. TRIG are firmly of the view that the most appropriate mechanism to achieve soundness is for the renewable energy policies to reflect the policies provided within the SPPS. |
| ESB/NIE Networks | <p>Overall, NIE Networks support the preferred options set out in the POP.</p> <p>Advises that liaison with NIE Networks at the early stages of development is critical. Suggests that there is scope to include a statement in Policy RNW1 on timely consultation with NIE Networks in relation to the development of renewable energy projects.</p> <p>NIE Networks highlights a number of significant projects envisaged during the Plan period which will seek to improve the transmission system in and around Mid Ulster including, the proposed North-South Interconnector; Installation of voltage support at Omagh South or Omagh Main, Coolkeeragh or Coleraine and Tamnamore; Turleenan to Tamnamore uprating; and Magherafelt to Coolkeeragh Reinforcement.</p> <p>It advises that the final Plan must ensure that the long-term operational requirements of existing utilities including electricity Transmission & Distribution are protected.</p> <p>NIE Networks considers that the 15m restriction in height should not apply to infrastructure development by a statutory authority in the context that the overarching planning framework provides a robust framework for ensuring that all necessary standards are met and that extensive statutory and non-statutory consultation continues to be an intrinsic part of the planning process for the development of electricity infrastructure.</p> <p>It broadly agrees with the imposition of "<i>Areas of Constraint on Wind Turbines and High Structures</i>" and welcomes that exceptions will be considered where it is demonstrated that the proposal is of regional importance or where a '<i>hot spot</i>' is identified.</p> <p>It suggests that MUDC should strengthen their support for the roll-out of Electrical Vehicle infrastructure and the decarbonisation of transport in the region with the inclusion of promoting policies that will deliver the vision to reduce the use of conventionally fuelled cars and essentially <i>move</i> towards CO₂ free transportation in the longer term. Advises that</p> |

| | |
|----------------------------|--|
| | <p>specific public road space be reserved for car club parking and for the charging of electric vehicles across the towns in Mid Ulster, including residential streets. All new developments should be future proofed in terms provision for electric vehicles.</p> <p>Note – 2nd last page of submission refers to 'paragraph 3.4.3' of the POP???</p> |
| ORA More Energy Ltd | <p>ORA is supportive of Plan objective 'The need to accommodate investment in power, water and sewerage infrastructure, and waste management particularly in the interests of public health'.</p> <p>It considers that the councils preferred approach to the Renewable energy topic conflicts with the Council's objective of promoting renewable energy.</p> <p>Considers that no evidence has been provided to demonstrate that development of wind turbines has had a detrimental impact on the intrinsic value of the AONB. Disagrees with the introduction of an Area of Constraint and considers that proposals for wind energy development should be assessed on the individual merits of the scheme and against social and economic considerations as well as environmental policy considerations.</p> <p>ORA would encourage the council to give more detailed consideration to the extent of Areas of Constraint on High Structures and Areas of Constraint on Mineral Development.</p> |

Appendix 6

Summary of Public Meetings tables

Agents Meeting 11th November 2016 at The Burnavon Cookstown.

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|--|---------------------|---|---|
| Burnavon Cookstown 11 th Nov 2016 | | Chris Boomer Sinead McEvoy Elaine Mullin Colin McKeown | <p>Query regarding housing data from 2013 being used- anything more up-to-date? Sinead stated that the housing monitor up to 2015 has been used. An addendum to the existing housing paper have been done and confirmed that it will be put up online. Explained that the out workings of the preferred housing allocation option have been included in the POP appendix.</p> <p>Query from Turley Associates- Following the end of the public consultation period and once all the representations received have been categorised, can the public view the representations in order to make counter representations? Chris stated that the Planning Dept has the right not to publish certain information (such as the Policy Review stage). Instead we will do a report of all the representations received and provide this to Council members. This report will be published with the draft Plan Strategy and anyone can counter object at that stage (not now). Chris stated that legally we probably will not be able to consider any late representations, but that the council will work in an open and transparent way.</p> <p>Query regarding what size the Plan will be- Chris stated that the Plan will replace a lot of existing PPS's etc. Aim to keep it detailed but succinct.</p> <p>Query whether there was a call for Industrial land in Cookstown- Chris stated that the Dept is happy to consider areas for industrial land in Dungannon, Cookstown and Magherafelt, we have left it open. The call for industrial land is strategic, employment densities tend to be really low in Mid Ulster. We will review housing land at LPP stage.</p> <p>Query regarding Wind turbine applications- is neighbour notification letters the key- Chris stated that the Dept will do the statutory consultation necessary. There are problems with map bases / getting addresses etc.</p> <p>Statement made that the MUDC POP is a progressive paper and does that mean that the Council will be fighting the Department regarding it?- Chris stated that the Plan is evidence based, not</p> |

Appendix ??: Summary of Public Meetings

| | | | |
|--|--|--|---|
| | | | objection based. The Council will reply on its robust baseline evidence to justify any policy amendments. SA/ SEA process running parallel to any Plan work already done. |
|--|--|--|---|

Ardboe Parish Hall - Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|-------------------------------|---------------------|----------------------|--|
| Wed 23 rd Nov | 5 | JP, Colin | <p>Pat McGuckin – Site specific queries about land he owns in Ballinderry. We told him to submit site specific requests to us now but that it might be later in the process when we look at them.</p> <p>Lady from Ardboe Community Association. She commented that a lot of the POP was “common sense” and that she agrees with the approaches in it which attempt to tailor the policies to the local community and the rural area.</p> <p>Mickey John Forbes – site specific queries about some land which he owns and also queries about the CPA on the edge of Ardboe. We told him to submit site specific requests to us now but that it might be later in the process when we look at them. With regard to the CPA we advised him that the CPA was now redundant and was unlikely to be included in the new Plan.</p> <p>Patsy Forbes – site specific queries - We told him to submit site specific requests to us now but that it might be later in the process when we look at them.</p> <p>Other man with the Forbes brothers – he said the council should build more homes for old people.</p> <p>No queries.</p> |
| Thurs 24 th Nov | 0 | Elaine, Karla | |
| Wed 23 rd Nov - | 10 | Chris, Elaine, Colin | One query re difficulty in obtaining dwelling for fishermen although farmers were catered for. Chris said he would happily meet with a delegation of fishermen to discuss the matter further and to hopefully find a solution to the problem. Also a concern raised over rural industry and how it can become a nuisance – query led into discussion re an individual case which Chris addressed privately, not in the public arena. |

Ardboe Parish Hall – Public Meeting 23rd November 2016

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|--------------------------|---------------------|-------------------------|---|
| Wed 23 rd Nov | 10 | Chris, Elaine Collie | <p>Query raised regarding housing policy in countryside to allow for fishermen to get a house, not just limited to farmers.</p> <p>Concern raised about proposed policy for economic development in the countryside. Policy allows for expansion within curtilage, concern raised about businesses expanding bit by bit. Impacts in terms of noise / nuisance etc. as small businesses eventually become large scale.</p> |

Clogher Mart – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|--------------------------|---------------------|---------------|---|
| Mon 21 st Nov | 2 | Elaine, Emma | <p>Councillor Robert Mulligan attended- Raised Issues regarding more car parking needed in village. Indicated that there was additional land beside the existing car park in the centre of the village and queried whether this could be used. Also wanted Recycling centre / facilities on Fintona Road to be retained as there was uncertainty about them remaining. He stated that the 15m height restriction on turbines/ structures in the Area of Constraint on High Structures was too restrictive and would render the turbines as useless (for domestic use only). He thought that a 30m max height would be still visually acceptable (as policy intends for them to be set below the crest of a hill) and would allow them to be more useful. He stated that much of the higher land was not of the best agricultural quality and therefore using the land for turbines would be another income option for such landowners.</p> <p>Site specific query about getting a house in the countryside.</p> |

Cornmill Coalisland – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|-------------------------|----------------------------|----------------------|--|
| Mon 9 th Nov | 1 | Brian, Elaine, Niall | Lack of publicity for the launch of the POP and POP meetings/exhibitions. Protection of Coalisland Canal Historic Waterway and its future use. |
| Tue 8 th Nov | 2 | Elaine, Emma | Site Specific concern raised regarding current planning application for Motor sport facility on Dungannon Road and possible traffic impacts. Site specific query regarding additional industrial land in Dungannon. Fintan McAliskey from Step Ni (fintan@stepni.org) stated that there may be land for sale close by Moy Park at present. |

The Burnavon Cookstown – Public Meeting

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|--------------------------|----------------------------|--------------------------------|---|
| Tues 8 th Nov | 3 | Chris, Sinead, Michael, Elaine | Query regarding settlement limit and no. of housing approvals in The Rock, wanted more land within settlement limit. Urban design issue- Concern raised regarding 'townhouses' being developed in small villages and small settlements. Concern that such townhouses look out of character for area and need to respect the existing development there. Wanted more attention given to the density and character of housing, particularly in smaller villages and small settlements. |

The Burnavon Cookstown – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|--------------------------------|---------------------|------------------|---|
| 8 th Nov | 4 | Colin , JP | <p>Site specific queries about phased housing land to NW of Cookstown, phase 2.</p> <p>Site specific queries about land in the Rock settlement limit. The point was made that land within the settlement limit will never be released and we should investigate the intentions of landowners in order to allow people who want to develop the small settlements to do so.</p> |
| 9 th Nov Daytime | 2 | Brian, Emma | <p>Issued raised about lack of promotion of Moneymore as a local tourist destination within the plan, compared with those areas identified as existing/potential tourism opportunity zones.</p> |
| Evening | 2 | Colin, JP, Karla | <p>Site specific queries regarding land at Castledawson Roundabout</p> |
| 10 th Nov | 4 | Colin, Gillian | <p>Site specific queries about land in Cookstown and Tullyhogue.</p> <p>Points made by one attendee regarding rural housing policy. He said that Planners tended to look on “ribboning” as a bad thing when that was the style of development on many rural areas. He also said that the only thing which should be a “no no” or a “red line” for development on the countryside was inappropriate design.</p> <p>He said that there should be different planning policy for the different parts of the district because the development pressure and various sensitivities of the different parts of the district were very different.</p> |

St Colms Youth Club Draperstown – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|----------------------|---------------------|----------------|--|
| 14 th Nov | 3 | Colin, Brian | Representatives from Workspace. They had specific queries about a site on the edge of the settlement limit in Draperstown, which they would like to have approved or zoned for industry. They were also interested in finding Out more about rural policy for single houses and RIPA's/ economic development in the countryside. They suggested that there was little rural industry in and around Fivemiletown and questioned its inclusion as a proposed RIPA. The definition of the word 'small' was also queried in the context of acceptable economic development on the edge of settlements (policy ECON 2). |
| 15 th Nov | 0 | Colin, Malachy | n/a |

Ranfurley Dungannon – Public Meeting

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|--------------------------|---------------------|--|--|
| Tue 29 th Nov | 4 | Sinead McEvoy Michael McGibbon Brian McGeary | <p>Question asked whether MUDC has been re-zoning land. SME explained all 3 plans are still live however the process of commencing new plan has begun. Explained that MUDC is in the process of contacting owners of zoned sites to gauge their intentions. Potential to re-zone is an option being considered by the Council.</p> <p>Question asked whether such information would be made publically available. SME advised only when the draft plan is published. HGI's dictate the housing need for the district. Council believes in theory that enough land is zoned but are these zonings in the right place?</p> <p>RB asked if MUDC had queried these figures? SME advised that MUDC had provided comment, highlighting our concerns.</p> |

Appendix ??: Summary of Public Meetings

| | | | |
|--|--|--|---|
| | | | <p>It was asked whether Ballygawley would become a town? SME advised that it was mentioned in a Position Paper but following further discussion with Council this position has changed but keen to gauge the public's view.</p> <p>RB observation that the rural allocation of housing appeared generous, queried if this was to be achieved through use of Dispersed Rural Communities? SME – probably not, if we are to operate current policy we would not be beyond the allocated figure over the plan period.</p> <p>Question raised as to what constitutes a 'Contribution to the Community'? SME – examples such as School Teacher, owner of local shop / post office.</p> <p>Question asked relating to full adoption of the new plan. SME advised that current plans would be superseded in Spring 2020. All representations will be broken down into either i) Plan Strategy or ii) Local Policies Plan. New emphasis is on Soundness – testing of the evidence base.</p> |
|--|--|--|---|

Ranfurley Dungannon – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|-----------------------------|---------------------|---------------|---|
| Wed 30 th Nov | 1 | Emma, Colin | <p>One woman in attendance. She asked about the need for housing in Cabragh. We explained that there was need of 15 houses identified for Cabragh.</p> <p>She then asked a site of hers which was on the edge of the settlement but which she would like included. We advised her that site specific queries would not be considered until the LPP stage but that she could still submit them at this stage.</p> <p>She then asked about rural policy and we explained what the POP proposed for the rural area in terms of housing.</p> <p>Winston Duff (former councillor and agent) queried the housing figures for Dungannon. He did not think there was as many units undeveloped as was</p> |
| | 1 | Brian/JP | |

Appendix ??: Summary of Public Meetings

| | | | |
|---|---|-----------------|--|
| Wed 30 th Nov (7-9 PM) | | | indicated in the POP (2766). He also felt there was shortage of industrial land and that Granville was ideally located for expansion, including developing lands on the opposite side of the carriageway. While welcoming a more relaxed rural policy he reckoned there may be problems with 'Carers dwellings' policy in terms of enforceable conditions and mortgage lending. He suggested that the disused train network within the district has been developed on and altered over recent years and that if a new rail link was proposed it should take a new route that links into the old Armagh route. He was the opinion that that there was very little to distinguish the edge of Dungannon and edge of Edendork/Coalisland and suggested it be joined up to form one entity. He also suggested that there was potential for Industrial land to North of Dungannon at the Tyrone Brick location. |
| Tue 29 th Nov | 3 | Elaine, Gillian | <p>Lady from Creagh Concrete querying Areas of Minerals constraint maps and general minerals policies. Stated that they would be submitting a representation. Queried whether the Planning Department would be writing out to the local quarries etc, stated that they would receive a letter within the next few weeks regarding availability of mineral resources.</p> <p>Man from Acheson & Glover querying the above also.</p> <p>Man from Pomeroy discussed wind turbines. Frustrated that even though he gained Planning Approval, he cannot get connected to NIE electric lines. His funding offer, Renewable Obligation Certificate (ROC) is about to run out and he cannot claim it until he has both planning approval and a consent to connect to NIE lines. Stated that it takes too long to get Planning Approval for wind turbines.</p> <p>Francie Molloy MP considered that lands to rear of McCloskey international in Clonoe would be suitable for Industrial Development (currently white land). Highlighted access/deliverability issues with housing zoning CH10 in Coalisland. He advised that there may be an issue with mine shafts on zoning CH09 Land north of Annagher Road in Coalisland.</p> <p>Considered lands beside Pumping Station in Carland to be suitable for development.</p> |
| Thur 1 st Dec | | Brian/Michael | |

| | | | |
|--|--|--|--|
| | | | He suggested that the 'D-MAC' site should be included within the development limits and zoned for industry. He also expressed his support for Area of Constraint of Mineral Development. |
|--|--|--|--|

Galbally Community Centre – Public Meeting

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|----------------------------|----------------------------|------------------------------------|---|
| Mon 5 th Dec | 16 | Elaine Heagney Michael McGibbon | <p>Francie Molloy (FM) – Mechanism for carers is a good idea however more needs to be done to avoid situation where mortgage lenders are reluctant to lend due to health and safety issues created through poorly worded policies.</p> <p>FM – start up facility for new business to utilise existing buildings is a positive feature however caution would have to be exercised to ensure protection of adjoining/nearby residential amenity.</p> <p>Concern raised that the planning policies are too restrictive for dwellings in the countryside. EM highlighted the additional exceptions proposed within the POP.</p> <p>Consensus that the development limits (Galbally) need to be expanded to allow for more housing. Lack of availability for young couples in the area.</p> <p>Need for social housing within the Galbally area. EM advised that should NIHE identify a need then the LDP could designate and accommodate such development.</p> <p>FM Advised that the Interconnector is a major issue for local enterprises such as Dale Farm.</p> <p>FM raised concern that the proposed line of the Dungannon by-pass was shown to the east of the town. Felt that the by-pass could be better accommodated to the west of the town and therefore the Development Plan maps should show both as potential routes of the by-pass. EM advised the LDP Team would take this point under consideration.</p> |

Appendix ??: Summary of Public Meetings

| | | | |
|--|--|--|--|
| | | | <p>FM highlighted the need for additional housing within Carland village in order to sustain the local primary school. Believes there is adequate land and infrastructure adjoining the village to accommodate more housing at this location.</p> <p>FM welcomed the Area of Constraint on wind energy developments.</p> <p>Negative comments in general relating to wind energy – unsightly, inappropriate scale.</p> <p>Query related to the possible relocation of Galbally Primary school and potential implications for the development limits. EM advised that a Pre App was submitted for this site but to date no planning application received.</p> |
|--|--|--|--|

Walshes Hotel Maghera – Public Meeting

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|-----------------------------|---------------------|--|---|
| Wed 16 th Nov | 8 | Sinead, Elaine Sean Diamond Roisin | <ul style="list-style-type: none"> • Areas of Constraint on High Structures- A good idea but too late for it • Concern over lack of social housing in Maghera- last social housing built was ages ago- Sinead stated that NIHE identify need in terms of social housing and it can be included as a Key Site Requirement. • Query regarding what criteria used to designate both small settlements and DRC's. Sinead explained that we did Strategic Settlement Evaluations, used the RDS hierarchy, Population figures etc. • Lady (ex councillor) stated that Maghera was strategically located in terms of good transport links to both Belfast and Derry, therefore there should be good capacity for it to grow in terms of housing and industrial lands. • Existing Park and Ride facility at Maghera is at full capacity. Needs to be enlarged given strategic location and transport links to both cities. • One man stated that balance was important, getting the mix right. Agreed that more houses and businesses were needed but wanted Maghera to retain its character, don't want it to become like Magherafelt. |

| | | | |
|--|--|--|---|
| | | | <ul style="list-style-type: none"> • Another man stated that the proposed equitable split option was correct. He was supportive of housing in the small settlements and countryside in order to sustain rural communities, football teams / rural schools etc. This will help stop young people and young families leaving their rural areas and buying houses in the towns. • Query whether additional DRCs could be put forward, how are they considered and what is the likelihood of them being designated. Sinead explained that we will consider any locations put forward, assessed by the RDS hierarchy, population. Explained that the SPPS does not talk about DRC's but we will rely on our evidence base when putting them forward to Department. • Joe Diamond (Diamond Architecture) - He has had a number of clients coming to him regarding getting land included etc, people are expecting growth and are surprised that very little additional land is needed for housing. Queried housing No's (581 approvals/residual zoning) for Maghera. • Query regarding existing land within the development limit (not zoned) not being used and the use of phase 2 lands- Sinead explained phase 2 is land banked. It would be exceptional that it would be used first. Any single houses that come forward in phase 2 land would be treated under PPS 21. The Plan is reviewed every 5 years and if phase 2 land is there we may use it. We don't plan on expanding zonings but will look at their locations. • Lady queried whether land could be de-zoned- Sinead stated that this is not something that we would rush to do. We will write to land owners to see what their intentions are. • Query regarding imposing a time limit on zoned housing sites- eg if you do not build within 10yrs could it be de-zoned? She stated that its unfair at present as there are other land owners willing to allow housing on their land but they are prevented from doing so because they are not within development limit. Something the Dept may look in to. • Dangers of shared laneways (farm safety slurry pits farmyards) / problems with getting a full mortgage offer discussed. Sinead stated that the housing in the countryside option was more flexible than PPS 21, allowing dwelling just to be visually linked if safety reasons demonstrated. |
|--|--|--|---|

Walshes Hotel Maghera – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|-----------------------------|------------------------|------------------|---|
| Wed 16 th Nov | 5 | Brian, Roisin | <p>Need for additional housing in Glen Small Settlement. Insufficient capacity within Glen to meet housing need over plan period. A letter has been previously submitted to the Council regarding same issue (and acknowledged). Further detailed representation to be submitted including site map outlining lands that may be included.</p> <p>Need for additional housing land in Tobermore Village. Although the POP suggests that there is sufficient land zoned in Tobermore (232 committed units) compared to projected need (71 Based on 'Fair share' option) it is unlikely that much of this will be developed in the near future for a variety of reasons including, land banking and land being used for farming.</p> <p>Site specific issue also raised in relation to a current application for a Community Hall just Tobermore, and the potential effect the new local development plan may have on this proposal. Compliments also received regarding how far-reaching the POP consultation process was, particularly with regards to letters sent to local community groups.</p> <p>Need for additional housing to the south of Maghera as the Town appears to be only expanding northwards with very little development to the south.</p> <p>Site specific query about Maghera Housing Zoning MA05, works carried out by NI water on this portion of land and how this may affect its future development.</p> <p>The suggestion in P.132 of the POP for zoning Maghera High School as Industrial lands was queried. It was suggested that this would be more suitable for Hotel Accommodation given its setting and landscaped surroundings and accessibility. It was highlighted that the open space zoning to the south was prone to flooding.</p> <p>Query about the possible closure of the main Coleraine Road out of Maghera.</p> |

Appendix ??: Summary of Public Meetings

| | | | |
|------------------------------|---|---------------------|--|
| | | | <p>Query regarding Proposed Area of Constraint on High Structures and whether or not this would affect existing wind turbine permissions, or new proposals for solar farms.</p> <p>Query on whether or not there were specific proposals in the POP for car parking area on the Coleraine Road, Opposite Walshes Hotel. Issue previously discussed with Davina McCartney of the Mid Ulster Council Team. Some confusion over future public consultation dates in December regarding the Community Plan and the difference between the Community Plan and the Local Development Plan.</p> <p>Concerns raised regarding rural housing and regarding people having to live in the nearby villages / towns because they cannot get a house beside their home. Effects on local schools / football clubs raised. Proposed housing allocation and proposed policies for housing and economic development in the countryside in POP discussed. Query regarding getting more DRCs in the Magherafelt Rural Area to help regenerate, possibly around Lisnamuck area. Advised to put any such locations for possible DRCs in writing before 27th January.</p> |
| Tues 15 th Nov | 2 | Elaine, Lorraine | |

The Bridewell Magherafelt – Public Meeting

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|------------------------------|---------------------|---------------------------------|---|
| Thur 17 th Nov | 5 | Brian, Michael, Emma, Chris. | <p>Support expressed for phase 2 land in Magherafelt, and the need for flexibility in the plan to accommodate organic growth.</p> <p>The needs of single parent families should be considered and accommodated in the forthcoming plan in terms of housing availability.</p> <p>Support was given to the concept of Dispersed Rural Communities (DRC's) which are 'organic to the area'.</p> <p>Support expressed for suggested rural policy for 'carer' dwellings.</p> <p>Reference made to whether or not there was a need for Mineral Reserve Policy Area in Coalisland/Dungannon areas as there would be very little left of 'claybed deposits' in these areas.</p> |

Appendix ??: Summary of Public Meetings

| | | | |
|--|--|--|---|
| | | | <p>The question was raised about what the plan can do to address the issue of zoned is not developed or deliverable. It was suggested that the plan should build in some flexibility to allow for zoned land not been made available over the plan period.</p> <p>Local concern raised about industrial land been 'landlocked' and therefore not accessible due to different landowners.</p> <p>Need for industry/employment in rural areas where the population is.</p> <p>Not enough done to promote the Lough Neagh as a tourism destination.</p> <p>'Common sense approach is welcomed' –General comment made in relation to whole POP document.</p> <p>Suggestion made that sites/plots within central town locations land should be retained/zoned specifically for residential use for elderly/those with restricted mobility. An example was given of how this worked where an 'old age community, living in rented accommodation within the town looked out for each other'.</p> |
|--|--|--|---|

The Bridewell Magherafelt – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|---------------------------|---------------------|----------------|--|
| Wed 16 th Nov | 1 | Colin, Malachy | William Nesbitt – Does not intend to release land for industry at land identified as an option for industrial growth - Land at Loves Road. I told him to submit representations to us stating that he didn't want to release the land and we would consider this when deciding to zone the land, if necessary. |
| Thur 17 th Nov | 2 | Colin, Emma | Joe Madden - Site specific query regarding a piece of land north of the willows, Coolshiney. He would like it included in the settlement limit. I told him to make representation to this effect and while it probably wouldn't be considered until the LPP stage, we would keep a record of it. |

Appendix ??: Summary of Public Meetings

| | | | |
|-----------------------------|---|-----------|---|
| | | | Query regarding proposals for settlements of Ballymaguigan and Ballyronan. I explained that the POP was mainly about strategic issues but explained the housing need calculations for each settlement. |
| Fri 18 th Nov | 3 | Brian, JP | Site specific query regarding land adjacent to Glen Small settlement and its possible inclusion within the settlement limit. Davy Young - General query regarding what the POP is about and the process for the rest of the Local Development Plan |

The Rowantree Centre Pomeroy – Public Meeting

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|-----------------------------|---------------------|---------------|--|
| Wed 30 th Nov | 5 | Elaine, Emma | <p>Pomeroy Forest- Wanted it to be considered as Potential Tourist Opportunity Site. Playpark has been recently upgraded and they aim to re-use the existing derelict forestry school redevelopment subject to achieving funding)</p> <p>Pomeroy Development Projects Ltd would like the Rowantree Centre to be included within Pomeroy Development limit as it is located immediately adjacent (outside). There is planning conditions on the Centres approval limiting its use as it is located outside the existing dev limit.</p> <p>Re-use of old railway discussed. Ideally people would like the old railway to be reinstated and running again however general consensus / expectations were that this is unlikely to happen.</p> <p>Discussion regarding Pomeroy's strategic location – centre of Ulster (that's why railway ran through it- connections to Derry in North and Donegal / Bundoran to west, highest village in Tyrone).</p> <p>Areas of Constraint on High Structures generally discussed- general consensus was that area should be increase to include Pomeroy area and possibly Mid Ulster District as a whole.</p> <p>Query whether the LDP should include on the maps where Planning Approvals for housing developments are located so people can clearly see them. Housing No's (approvals etc info located in appendix) but people want to clearly see this info on maps in terms of openness / transparency. (as some people didn't believe the housing figures where correct)</p> |

Appendix ??: Summary of Public Meetings

| | | | |
|--|--|--|---|
| | | | <p>Query whether the Plan Strategy would take account of NIHEs recent publication 'Sustainable Rural Communities- Rural Strategy and Action Plan 2016- 2020. Stated that this would be/ is taken account off. Explained inter-departmental consultation on-going with NIHE.</p> <p>Query whether the Planning Department had considered a report completed by Gerry Darby, A Heritage Lottery Fund (HLF) Application Report. Claire Linney should have it as he is a consultant who was paid by the Council to submit a funding application to the HLF. A lot of history / detail about the Mid Ulster Area would be in this report which may be of use to the Planning Dept.</p> |
|--|--|--|---|

The Rowantree Centre Pomeroy – Exhibition

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|----------------|---------------------|---------------|--|
| 1st Dec | 2 | Emma, Colin | <p>One representative from Sinn Fein constituency office in Cookstown. He had queries regarding rural industry and rural housing. We explained the policy proposals for each of these topics. He seemed happy that there appeared to be more flexibility being proposed for the rural area, expressing his view that we are a rural area and should not be treated like less rural areas to the east of the Bann.</p> <p>One representative form a renewable energy firm. We explained the proposals for renewable energy. She didn't say much by way of offering an opinion on the proposals but took the documentation and said they would make a representation</p> |

Joint meetings- Planning Department and Community Plan Team

| VENUE AND DATE | NUMBER OF ATTENDEES | STAFF PRESENT | ISSUES RAISED |
|----------------|---------------------|---------------|---------------|
| | | | |

Appendix ??: Summary of Public Meetings

| | | | |
|--|--|--|---|
| 10/1/2017 Joint meeting with the Disability Forum- Youth Resource Centre, Cookstown | | <p>Sinead Mc Evoy & Elaine Mullin- Planning Dept. MUDC</p> <p>Martina Totten- Community Plan Team MUDC</p> | <p>Raised concern regarding accessibility- want better accessibility for people with mobility difficulties. Stated that play-park facilities within new residential development projects should be designed to ensure they are safe, shared spaces that foster natural surveillance. Queried number of single storey dwellings that will be built in the future- concern that there are not many existing single storey dwellings within Cookstown at present and they are needed for those with mobility issues.</p> |
| 11/1/2017 Joint meeting with the CARERS support group- Junction Building, Beechvalley Dungannon | | <p>Sinead Mc Evoy & Elaine Mullin- Planning Dept. MUDC</p> <p>Martina Totten- Community Plan Team MUDC</p> | <p>Stated that they would like to see a health and well-being centre built in Dungannon. Advocated support for suggested policy- dwelling for a carer or for someone availing of care in the countryside (Policy CT 2- criteria (h)).</p> |

Appendix 7
Representation tables
Strategic & Site Specific

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

Introduction - General Comments

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|-------------|-------------------|--|----------------------|---|-------------|------------|------------|
| MUPOP/11/2 | Letter of Support | Introduction: An Invitation to Participate | GEN: General Comment | Agree with "Key Issues" listed, in particular the "Aim" - to allow towns, villages and smaller settlements and rural communities to maximise their potential. | Strategic | Gulladuff | Carntogher |
| MUPOP/280/3 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | Recommends that a full and detailed audit/condition survey of all historical environmental assets and historic landscape is compiled as part of the evidence base for the LDP. | Strategic | Plan Area | Plan Area |
| MUPOP/306/1 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | Disappointed that 'protection' is not mentioned with regards to the environment in the opening paragraphs of POP. | Strategic | Plan Area | Plan Area |
| MUPOP/306/2 | Opinion to SA/SEA | Introduction: An Invitation to Participate | GEN: General Comment | Considers that 'managing' sustainable development alone will fall short of the requirement to 'further sustainable development' as set out in the Planning Act (NI) 2011, and the (SPPS). | Strategic | Plan Area | Plan Area |
| MUPOP/306/3 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | Supplementary guidance on P.8 does not include guidance on Anaerobic Digestion (Draft), Wind Energy Development in NI landscapes, Parking Standards & Transport Assessment. | Strategic | Plan Area | Plan Area |
| MUPOP/306/4 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | Welcomes commitment to undertake HRA. Seeks clarification on current status and timescales. Considers that now is the time to establish key sensitivities of protected sites and to employ effective avoidance techniques rather than mitigation. | Strategic | Plan Area | Plan Area |
| MUPOP/306/6 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | The POP does not go far enough as required under Part 2 (5) of The Planning Act (NI) 2011 in furthering sustainable development in respect of the Council's LDP making objective. 'Aiding' sustainable development does not go far enough. | Strategic | Plan Area | Plan Area |
| MUPOP/306/8 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | The importance of ecosystem services has not been fully explored. The SPPS recognises that 'the careful management, maintenance and enhancement of ecosystem services are an integral part of sustainable development' (para. 3.14). | Strategic | Plan Area | Plan Area |
| MUPOP/306/9 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | Recommends that the condition of ecosystem services, the provision of services and their relationship to human well-being should be integrated into plan-making and decision-taking processes, as set out in the SPPS (para. 3.16). | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|----------------------|--|-----------|---------------|-----------|
| MUPOP/306/10 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | The LDP objectives must be reassessed to ensure that they relate to its actual function and remit, otherwise the purpose and function of the LDP is compromised and flawed eg. the LDP cannot promote prosperity, create jobs or attract new firms. | Strategic | Plan Area | Plan Area |
| MUPOP/340/12 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | THE PLAN'S MONITORING & 5 YEARLY REVIEW ARE WELCOMED, PARTICULARLY AS THEY WILL ALLOW CHANGES IN PATTERNS & TRENDS TO BE FACTORED IN QUICKLY & EFFECTIVELY. | Strategic | Plan Area | Plan Area |
| MUPOP/340/13 | Opinion to Pop | Introduction: An Invitation to Participate | GEN: General Comment | WELCOMES THE PLAN PROCESS OUTLINED BY COUNCIL AND IS PLEASED TO RESPOND TO POP BUT HAS RESERVATIONS ABOUT DH'S ROLE IN ISSUING A 'BINDING REPORT' ON THE COUNCIL'S FINAL STRATEGY. | Strategic | Plan Area | Plan Area |
| MUPOP/356/1 | Opinion to Pop | Growth Strategy and Spatial Framework | GEN: General Comment | AGREE WITH VISION. Plan Objectives

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|-------------|---|--|---|--|-------------|------------|-----------|
| MUPOP/205/5 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | REP AGREES WITH THE NEED TO PROVIDE 11,00 HOMES TO ACCOMMODATE THE GROWING POPULATION IN MID ULSTER | Strategic | Plan Area | Plan Area |
| MUPOP/246/1 | Opinion to Pop | Introduction: An Invitation to Participate | Plan Obj: Accomodating People and Creating Places | Agrees with principle of objective 1 'To build Cookstown, Dungannon and Magherafelt.' | Strategic | Plan Area | Plan Area |
| MUPOP/205/6 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | REP SUGGESTS THAT THE WORDING OF THE SECOND OBJECTIVE IS ALTERED TO INCLUDE REFERENCE TO SMALL SETTLEMENTS AS WELL AS TOWNS AND VILLAGES IN ORDER TO PROVIDE A FAIRER OBJECTIVE. | Strategic | Plan Area | Plan Area |
| MUPOP/223/4 | General Comment - Requiring No Further Action | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | the rep agrees with th social objectives and point to the economic prosperity which can be achieved via minerals. The rep also points out that all clients have invested heavily in the loal community via training, sponsorship and charitable support. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|-------------|---|---|--|--|----------------|-----------|-----------|
| MUPOP/223/5 | General Comment - Requiring Further Action | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | The rep agrees with the economic objectives of the of the POP. REP points out that regarding the high level of manufacturing in MID ULSTER, a lot of it is linked to the minerals industry which provides raw materials for the industry. | Strategic | Plan Area | Plan Area |
| MUPOP/223/8 | General Comment - Requiring No Further Action | Environmental Policies - Natural Heritage | Plan Obj: Enhancing the Environment and Improving Infrastructure | CLIENTS IN THE REP SUPPORT THE POP'S ENVIRONMENTAL OBJECTIVES. ALL CLIENTS HAVE PROMOTED BIODIVERSITY, CONSIDERED N&B HERITAGE AND DEVELOPED WATER MANAGEMENT PLANS. MINERALS INDUSTRY HAVE V HIGH COMPLIANCE RATES REGARDING WATER DISCHARGE. | Strategic | Plan Area | Plan Area |
| MUPOP/228/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | AMEND OBJECTIVE WORDING TO INCLUDE: BUILD THE PHYSICAL CONTEXT REQUIRED TO SUPPORT VIBRANT, SOCIALLY SUSTAINABLE, CONNECTED LIVEABLE NEIGHBOURHOODS IN THE 3 TOWNS; GENERATE THRIVING ECONOMIC HUBS SERVICED BY FULLY OCCUPIED, WELL USED CENTRAL MIXED USE... | Strategic | Plan Area | Plan Area |
| MUPOP/228/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Enhancing the Environment and Improving Infrastructure | AMEND WORDING TO INCLUDE: NEED TO ACHIEVE GREATER BIODIVERSITY, HIGHER QUALITY ARCHITECTURAL/ URBAN DESIGN; MORE AUTHENTIC ARCHITECTURAL CONSERVATION; SUSTAINABLE WASTE MANAGEMENT; IMPROVE PEDESTRIAN & VEHICULAR CONNECTIVITY; GREATER PROTECTION OF ENV... | Strategic | Plan Area | Plan Area |
| MUPOP/233/1 | Letter of Support | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Agrees with principle of objective 1 'To build cookstown, dungannon & Magherafelt...' | Part-Strategic | Plan Area | Plan Area |
| MUPOP/233/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Queries how this objective could be delivered in view of HGI allocation which 'favours rural area'. | Strategic | Plan Area | Plan Area |
| MUPOP/239/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Agrees with principle of objective 1 'To build Cookstown, Dungannon and Magherafelt.' | Strategic | Plan Area | Plan Area |
| MUPOP/239/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Although supports objective 1, queries how it can be delivered in view of HGI allocation which favours rural areas. | Part-Strategic | Plan Area | Plan Area |
| MUPOP/239/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Although Agrees with principle of wording, requests deletion of latter part of objective 'by accommodating sustainable growth within the countryside proportionate to the extent of existing rural communities'. This is contrary to the aims of the RDS. | Strategic | Plan Area | Plan Area |
| MUPOP/239/4 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Considers that there is insufficient evidence to support inclusion of objective 5. | Strategic | Plan Area | Plan Area |
| MUPOP/241/6 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | REP AGREES WITH FOCUSING GROWTH ON MAIN HUBS BUT ALSO EMPHASISES THE IMPORTANCE OF SUPPORTING GROWTH OF SMALL SETTLEMENTS. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|-------------|----------------|--|---|---|--------------------------|-----------|-----------|
| MUPOP/241/7 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | re the objective of providing for vital and vibrant rural communities. The rep seems to offer support for this principle before going on to state that is at odds with the RDS and not correct the sig. no. of rural houses, which will limit small settlements | Strategic | Plan Area | Plan Area |
| MUPOP/241/8 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | re the objective of recognising the needs of carers, the rep states that additional residential zonings on the periphery of small settlements will address this. | Strategic | Plan Area | Plan Area |
| MUPOP/244/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | REP WELCOMES OBJECTIVES REGARDING SUSTAINABLE GROWTH FOR ALL PARTS OF THE REGION, 8500 JOBS AND ACCOMODATIONS ENTREPRENEURSHIP. THE CONCRETE PRODUCTS INDUSTRY IS IMPORTANT IN FACILITATING ALL OF THESE OBJECTIVES. | Strategic | Plan Area | Plan Area |
| MUPOP/246/1 | Opinion to Pop | Introduction: An Invitation to Participate | Plan Obj: Accomodating People and Creating Places | Agrees with principle of objective 1 'To build Cookstown, Dungannon and Magherafelt.' | Strategic | Plan Area | Plan Area |
| MUPOP/246/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Although supports objective 1 'To build Cookstown, Dungannon and Magherafelt.' queries how it can be delivered in view of HGI allocation which favours rural areas. | Strategic | Plan Area | Plan Area |
| MUPOP/246/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | ALTHOUGH AGREES WITH PRINCIPLE OF WORDING, REQUESTS DELETION OF LATTER PART OF OBJECTIVE 'BY ACCOMMODATING SUSTAINABLE GROWTH WITHIN THE COUNTRYSIDE PROPORTIONATE TO THE EXTENT OF EXISTING RURAL COMMUNITIES'. THIS IS CONTRARY TO THE AIMS OF THE RDS. | Strategic | Plan Area | Plan Area |
| MUPOP/246/4 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | CONSIDERS THAT THERE IS INSUFFICIENT EVIDENCE TO SUPPORT INCLUSION OF OBJECTIVE 5. | Strategic | Plan Area | Plan Area |
| MUPOP/249/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | REP supports the objectives which propose building 11,000 new homes and consolidating the role of towns so they act as local centres . They point out that the site which is the subject of the rep can provide up to 32 houses towards these objectives. | Strategic/ Site Specific | Plan Area | Plan Area |
| MUPOP/262/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Agrees with principle of objective 1 'To build Cookstown, Dungannon and Magherafelt.. | Strategic | Plan Area | Plan Area |
| MUPOP/262/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Supports objective 1, although queries how it can be delivered in view of HGI allocation which favours rural areas. | Strategic | Plan Area | Plan Area |
| MUPOP/262/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | ALTHOUGH AGREES WITH PRINCIPLE OF WORDING, REQUESTS DELETION OF LATTER PART OF OBJECTIVE 'BY ACCOMMODATING SUSTAINABLE GROWTH WITHIN THE COUNTRYSIDE PROPORTIONATE TO THE EXTENT OF EXISTING RURAL COMMUNITIES' as THIS IS CONTRARY TO THE AOMS OF THE RDS | Strategic | Plan Area | Plan Area |

|--------------|----------------|---------------------------------------|--|--|----------------|-----------|-----------|
| MUPOP/262/4 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | CONSIDERS THAT THERE IS INSUFFICIENT EVIDENCE TO SUPPORT INCLUSION OF OBJECTIVE 5. | Part-Strategic | Plan Area | Plan Area |
| MUPOP/264/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | REP AGREES WITH POP OBJECTIVES RELATING TO THE 8,500 NEW JOBS, CREATING DIVERSITY IN JOB PROVISION AND ENCOURAGING ENTREPRENEURSHIP. The rep makes the point later in the document that as owners of MA11, sjg ARE IDEALLY PLACED TO HELP REALISE THESE OBJ'S | Strategic | Plan Area | Plan Area |
| MUPOP/266/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | Supports the plan objective to facilitate the creation of at least 8,500 new jobs by 2030 at a variety of locations. | Strategic | Plan Area | Plan Area |
| MUPOP/266/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Supports plan objective 'To recognise and accommodate entrepreneurship, innovation for large, medium and small firms by attracting new firms and accommodating expanding businesses' | Strategic | Plan Area | Plan Area |
| MUPOP/266/4 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | Consider that plan objectives should focus on the facilitating and supporting growth and development of the industrial sector, particularly in construction and manufacturing. | Strategic | Plan Area | Plan Area |
| MUPOP/273/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | RES WELCOME THE ACKNOWLEDGEMENT OF THE ROLE OF RENEWABLE ENERGY IN THESE OBJECTIVES. | Strategic | Plan Area | Plan Area |
| MUPOP/273/4 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Enhancing the Environment and Improving Infrastructure | RES WELCOMES THE OBJECTIVES OF REDUCING VULNERABILITY TO LCIMATE CHANGE AND FLOOD RISK. THESE OBJECTIVES SHOULD BE REFLECTED IN RENEWABLE POLICY WHICH SHOULD NOT BE OVERTLY RESTRICTIVE. POLICY SHOULD ENDORSE THE POSITIVE ENVIRONMENT EFFECTS OF RENEWABLES | Strategic | Plan Area | Plan Area |
| MUPOP/273/5 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | 11,000 NEW HOMES WILL LEAD TO A SUBSTANTIAL INCREASE IN DEMANDED ENERGY SUPPLY. THE LDP WILL HAVE A ROLE TO PLAY IN FACILITATING THIS ESPECIALLY AS "PRIVATE SECTOR IS PLAYING AN INCREASINGLY IMPORTANT ROLE IN THIS SECTOR. " | Strategic | Plan Area | Plan Area |
| MUPOP/273/12 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | REGARDING THE OBJECTIVE TO CREATE 8500 JOBS, RENEWABLE ENERGY CAN PROVIDE DIRECT EMPLOYMENT. FIGURE QUOTED; IF 75% OF ALL APPROAVSL ARE IMPLEMENTED THEY WOULD CREATE 500 JOBS IN CONSTRUCTION. STRONG RENEWABLE SECTOR CAN ALSO ENCOURAGE FOREIGN INVESTMENT | Strategic | Plan Area | Plan Area |
| MUPOP/273/17 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Enhancing the Environment and Improving Infrastructure | THERE IS A disconnect between the objectives and the SPG's. OBJ'S INCLUDE REFERENCE TO TO VULNERABILITY TO CLIMATE CHANGE, YET NO REFERENCE IS MADE TO THIS VIA A CLEAR SPG. SPGS REFER TO HOUSING GROWTH WITHOUT REFERENCE TO SERVICING THIS GROWTH. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---------------------------------------|--|---|-----------|-------------------|----------------|
| MUPOP/280/15 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Enhancing the Environment and Improving Infrastructure | Recommends the formal addition of the phrase 'historic environment' as follow 'protect and enhance the natural, historic and built environment' | Strategic | Plan Area | Plan Area |
| MUPOP/281/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accommodating People and Creating Places | THE MINERALS INDUSTRY CAN CONTRIBUTE TO THIS OBJECTIVE BY PROVIDING SECURE AND LONG TERM EMPLOYMENT WHICH CAN LEAD TO A REDUCTION IN LEVELS OF DEPRIVATION. MINERALS INDUSTRY CAN ALSO FACILITATE THE GROWTH OF HOUSING AND INFRASTRUCTURE PROJECTS. | Strategic | Plan Area | Plan Area |
| MUPOP/281/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | THE POP ACKNOWLEDGES THE DEPENDENCE ON MINERALS IN THE DISTRICT FOR EMPLOYMENT, COMPARATIVE TO OTHER DISTRICTS AS WELL AS THE RELIANCE OF THE CONSTRUCTION INDUSTRY ON MINERALS. GIVEN THIS, MORE OF AN EMPHASIS SHOULD BE PLACED ON FACILITATING MINERAL DEVT. | Strategic | Plan Area | Plan Area |
| MUPOP/281/4 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Enhancing the Environment and Improving Infrastructure | THE MINERALS INDUSTRY HAS HIGH COMPLIANCE RATES FOR WATER DISCHARGE. THE INDUSTRY IS HIGHLY REGULATED AND ACKNOWLEDGES THAT IT HAS AN IMPORTANT CONSERVATION ROLE TO CARRY OUT WHEN PREPARING FOR EXTRACTION. | Strategic | Plan Area | Plan Area |
| MUPOP/296/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | creation of jobs and wealth should be the top priority of the Plan. There is a much larger amount of zoned land needed in the larger settlements but also, expansion of existing enterprises in the rural area should be facilitated. | Strategic | Plan Area | Plan Area |
| MUPOP/297/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accommodating People and Creating Places | Accommodating People & Creating Places Objectives are welcomed & supported specific to Aghinduff/Cabragh & facilitating additional housing to support & sustain existing local services. | Strategic | Aghinduff/Cabragh | Clogher Valley |
| MUPOP/297/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accommodating People and Creating Places | The objective to accommodate sustainable growth in the countryside is welcomed & supported in the context of facilitating additional housing development of an appropriate scale in Aghinduff/Cabragh. Objective to provide for a range of housing is welcome | Strategic | Aghinduff/Cabragh | Clogher Valley |
| MUPOP/300/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accommodating People and Creating Places | RDS aim is welcomed & supported particularly for Aghnacloy. | Strategic | Aghnacloy | Clogher Valley |
| MUPOP/300/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accommodating People and Creating Places | The objective to protect & consolidate the role of local villages e.g. Aghnacloy is welcomed & supported, facilitating additional housing to support & sustain existing local services. | Strategic | Aghnacloy | Clogher Valley |

|--------------|----------------|---------------------------------------|--|--|-----------|------------|----------------|
| MUPOP/300/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | The objective of sustainable growth in the countryside is welcomed & supported facilitating housing development of an appropriate scale in Aughnacloy. The objective of provide a range of housing is welcomed | Strategic | Aughnacloy | Clogher Valley |
| MUPOP/304/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | It is noted that Plan shares aim of RDS 2035 support towns, villages & rural communities - welcomed & supported particularly for Benburb | Strategic | Benburb | Dungannon |
| MUPOP/304/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | The objective to protect & consolidate role of local villages i.e. Benburb is welcomed & supported, facilitating additional housing to support & sustain existing local services | Strategic | Benburb | Dungannon |
| MUPOP/304/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | The objective to accommodate sustainable growth in the countryside is welcomed & supported in the context of facilitating housing development of appropriate scale i.e. Benburb - provide a range of housing is welcomed | Strategic | Benburb | Dungannon |
| MUPOP/304/5 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | RDS2035 - objective to deliver development in a more sustainable manner - it is assumed that a significant proportion of housing would be allocated to villages e.g. Benburb to maintain & sustain existing level of services within these villages | Strategic | Benburb | Dungannon |
| MUPOP/305/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | RDS2035 aim regarding support towns, villages & rural communities to maximise their potential is welcomed & supported particularly for villages i.e. Benburb | Strategic | Benburb | Dungannon |
| MUPOP/305/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | The objective to protect & consolidate the role of local villages i.e. Benburb is welcomed & supported, facilitating additional housing to support & sustain existing local services. | Strategic | Benburb | Dungannon |
| MUPOP/305/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Objective to accommodate sustainable growth in the countryside is welcomed & supported in context of facilitating housing development of appropriate scale in villages i.e. Benburb - range of housing is welcomed | Strategic | Benburb | Dungannon |
| MUPOP/306/95 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Enhancing the Environment and Improving Infrastructure | Queries wording 'achieve biodiversity'. Amend to reflect WANE Act 2011 'to protect & enhance the natural & built environment to further conservation of biodiversity,achieve quality design, enhanced leisure & econ opportunity & promote health & wellbeing. | Strategic | Plan Area | Plan Area |
| MUPOP/317/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | RDS2035 support our towns, villages and rural communities to maximise their potential aim welcomed & supported particularly Aughnacloy | Strategic | Aughnacloy | Clogher Valley |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---------------------------------------|--|---|-----------|------------|----------------|
| MUPOP/317/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | The objective to protect & consolidate the role of local villages is welcomed & supported, particularly in respect of facilitating additional housing to support & sustain local services i.e. Aughnacloy | Strategic | Aughnacloy | Clogher Valley |
| MUPOP/317/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | The objective to accommodate sustainable growth in the countryside is welcomed & supported in context of facilitating housing development of appropriate scale i.e. Aughnacloy & the range of housing types. | Strategic | Aughnacloy | Clogher Valley |
| MUPOP/319/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | WELCOMES OBJECTIVE RECOGNISING NEEDS OF GROWING FAMILIES & CARERS OF ELDERLY & DISABLED BY ACCOMMODATING DEVELOPMENT WHICH ALLOWS PEOPLE TO REMAIN WITHIN THEIR COMMUNITIES & DOESN'T LEAD TO SIGNIFICANT HARM TO NEIGHBOURS OR THE BUILT & NATURAL ENVIRONMENT | Strategic | Plan Area | Plan Area |
| MUPOP/319/3 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | WELCOMES OBJECTIVE TO PROVIDE 11,000 HOMES BY 2030 BUT SAYS THIS NEEDS TO BE CAREFULLY MONITORED. | Strategic | Plan Area | Plan Area |
| MUPOP/319/6 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | APPROVES OF OBJECTIVE RECOGNISING IMPORTANCE OF SELF-EMPLOYMENT & HOMEWORKING PARTICULARLY IN RURAL LOCATIONS. | Strategic | Plan Area | Plan Area |
| MUPOP/327/15 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | Table 1 in Rep predicts that the true housing need in Mid Ulster is 22000 units for the plan period. What does the 11000 missing households and 26000 people do during the plan period. Leave their home - Remain in district to live in more crowded housing | Strategic | Plan Area | Plan Area |
| MUPOP/327/28 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Accomodating People and Creating Places | I say that the district requires 22000 dwellings to be completed by the end of 2030, if 1000 of these are to be in rural areas, 21000 completed homes are required in settlements. | Strategic | Plan Area | Plan Area |
| MUPOP/355/10 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Creating Jobs and Promoting Prosperity | GENERALLY SUPPORTIVE OF PLAN OBJECTIVES, SPECIFICALLY WELCOMING MUDC'S ACKNOWLEDGEMENT OF RENEWABLES IN CREATING JOBS & PROMOTING PROSPERITY THROUGH THE OBJECTIVE, TO ENCOURAGE ENERGY EFFICIENCIES AND PROMOTE USE OF RENEWABLE ENERGY. | Strategic | Plan Area | Plan Area |
| MUPOP/355/11 | Opinion to Pop | Growth Strategy and Spatial Framework | Plan Obj: Enhancing the Environment and Improving Infrastructure | IN RESPECT OF PLAN OBJECTIVE TO ENHANCE THE ENVIRONMENT & IMPROVE INFRASTRUCTURE WE PARTICULARLY WELCOME FOCUS ON CLIMATE CHANGE; TO REDUCE CONTRIBUTIONS & VULNERABILITY TO CLIMATE CHANGE & TO REDUCE FLOOD RISK AND THE ADVERSE CONSEQUENCES OF FLOODING. | Strategic | Plan Area | Plan Area |

Settlement Hierarchy

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|------------|---|---------------------------------------|---|--|--------------------------|---------------|------------|
| MUPOP/11/1 | Letter of Support | Settlements - Villages | Sett Hierarchy: Proposed Settlement Hierarchy | welcome the Councils proposal to reposition Gulladuff in the Settlement hierarchy from small settlement to village. | Strategic | Gulladuff | Carntogher |
| MUPOP/12/2 | Opinion to Pop | Growth Strategy and Spatial Framework | Sett Hierarchy: Proposed Settlement Hierarchy | the proposed settlement hierarchy should be amended to bring the Creagh up to second tier village status. The POP has identified on P.136 that the Settlement of Creagh has potential for or land for housing and the WWTW has capacity for further development. | Strategic | Creagh | Moyola |
| MUPOP/42/2 | General Comment - Requiring No Further Action | Settlements - Small Settlements | Sett Hierarchy: Proposed Settlement Hierarchy | Does not want a settlement to be zoned. Feel that the this would lead to land being bought up by developers and an increased demand. This will lead to people from outside the area moving in and buying a lot of new housing, meaning locals would lose out | Strategic/ Site Specific | Torrent Rural | Torrent |
| MUPOP/42/3 | General Comment - Requiring No Further Action | Settlements - Small Settlements | Sett Hierarchy: Proposed Settlement Hierarchy | Make the point that the area does not have the physical attributes necessary to enable it to be described as a village. For example, when the proposed village was brought forward in 2010, the only attribute contained within the proposed limits is a school | Strategic/ Site Specific | Torrent Rural | Torrent |
| MUPOP/45/2 | General Comment - Requiring No Further Action | Settlements - Small Settlements | Sett Hierarchy: Proposed Settlement Hierarchy | DOES NOT WANT A SETTLEMENT TO BE ZONED. FEEL THAT THE THIS WOULD LEAD TO LAND BEING BOUGHT UP BY DEVELOPERS AND AN INCREASED DEMAND. THIS WILL LEAD TO PEOPLE FROM OUTSIDE THE AREA MOVING IN AND BUYING A LOT OF NEW HOUSING, MEANING LOCALS WOULD LOSE OUT | Strategic/ Site Specific | Torrent Rural | Torrent |
| MUPOP/45/3 | General Comment - Requiring No Further Action | Settlements - Small Settlements | Sett Hierarchy: Proposed Settlement Hierarchy | MAKE THE POINT THAT THE AREA DOES NOT HAVE THE PHYSICAL ATTRIBUTES NECESSARY TO ENABLE IT TO BE DESCRIBED AS A VILLAGE. | MUPOP/275/1 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | SUPPORTS IN PRINCIPLE MID ULSTER COUNCIL'S PREFERRED OPTION FOR ALLOCATING HOUSING GROWTH - OPTION 1. THIS IS TO EQUALLY SPLIT THE ALLOCATION OF HOUSING THROUGHOUT THE COUNCIL AREA. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|-------------|----------------|--|----------------------------|--|--------------------------|---------------------|----------------|
| MUPOP/275/2 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | DOES NOT SUPPORT NO NEED FOR FURTHER HOUSING ALLOCATION IN BENBURB. THERE ARE LIMITED FEASIBLE LANDS WITHIN THE CURRENT SETTLEMENT LIMIT TO SUSTAIN HOUSING GROWTH OVER THE NEXT PLAN PERIOD. | Strategic/ Site Specific | Benburb | Dungannon |
| MUPOP/280/7 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | whilst it recognises the rationale for this preferred option it should be recognised that this has potential to put pressure on the historic landscape in towns and on the rural historic landscape. | Strategic | Plan Area | Plan Area |
| MUPOP/294/1 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Considers that there's need for Mid Ulster Council to sustain rural communities and that this can only be accomplished by the allocation of appropriate housing land in rural areas. There needs to be a fair and equitable treatment of the rural population. | Strategic | Plan Area | Plan Area |
| MUPOP/296/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | REPUULD SUPPORT OPTION 3. THIS WOULD RESPECT THE LOCAL CONTEXT AND ALSO BE IN LINE WITH REGIONAL POLICY. MAIN TOWNS ARE CENTRES FOR JOBS AND SERVICES AND SO GROWTH SHOULD BE DIRECTED HERE. PPS21 CURRENTLY PROVIDES ADEQUATE PROVISION FOR NEW RURAL HOUSES | Strategic | Plan Area | Plan Area |
| MUPOP/297/6 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | The settlement growth strategy is acknowledged & welcomed. It is noted Option One is preferred for Housing Allocation - suggested allocation for villages should be 40% not 33%, at the expense of rural allocation. | Part-Strategic | Aghaginduff/Cabragh | Clogher Valley |
| MUPOP/298/1 | Opinion to Pop | | HOU Opt 1: Equitable Split | Number of dwellings that can be delivered from existing commitments needs to be re-assessed. Agents analysis of relevant permissions indicates there are a number of external constraints as to why a significant number of the sites will not be developed. | Strategic | Draperstown | Moyola |
| MUPOP/298/2 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | recommended that Council review each of the housing zonings carefully and re-zone new housing zonings where: - There is no reasonable prospect of approved dwellings being developed; and - No commitment / investment has been made to develop the lands. | Strategic | Draperstown | Moyola |
| MUPOP/299/1 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Refutes the housing allocation findings in Appendix 2 of POP. Suggests a more comprehensive assessment of residential zonings in towns and villages to assist in setting housing requirement targets. | Strategic | Plan Area | Plan Area |
| MUPOP/299/2 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | There is a risk that there will not be an adequate provision of housing if current phase 1 lands are retained in the forthcoming LDP, as land may not be deliverable. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|----------------------------|---|----------------|------------|----------------|
| MUPOP/299/3 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Suggests that land zonings should be timebound and and monitored every 5 years to allow upgrading of phase 2 land if phase 1 land is not delivered. | Strategic | Plan Area | Plan Area |
| MUPOP/300/6 | Opinion to Pop | | HOU Opt 1: Equitable Split | It is noted Option one is preferred option - however it is considered that in order to maintain & sustain the existing level of services within villages e.g. Aughnacloy, this allocation should rise to 40% at the expense of rural housing. | Part-Strategic | Aughnacloy | Clogher Valley |
| MUPOP/304/7 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | It is noted that Option One is the preferred option - however, it is considered that in order to maintain & sustain the existing level of services within villages i.e. Benburb 40% allocation should be considered at the expense of rural housing | Strategic | Benburb | Dungannon |
| MUPOP/305/7 | Opinion to Pop | Social Policies - Accommodating Growth and Creating Places | HOU Opt 1: Equitable Split | It is noted that option one is preferred option - however it is considered that in order to maintain & sustain existing level of services within Benburb this allocation should be 40% at the expense of rural housing | Strategic | Benburb | Dungannon |
| MUPOP/306/18 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | LDP should be more ambitious in its approach to accommodating housing growth within the main hubs and on Brownfield land. RDS 60% target should be better reflected in LDP. Urban Capacity Studies are key to informing the Council's position on this issue. | Strategic | Plan Area | Plan Area |
| MUPOP/306/19 | Opinion to Pop | Introduction: An Invitation to Participate | HOU Opt 1: Equitable Split | Justification for future patterns of allocation predicated on historic patterns does not necessary mean that it will further sustainable development. | Strategic | Plan Area | Plan Area |
| MUPOP/306/20 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | The LDP should ensure that new housing development, should not compromise environmental integrity, and be based on a robust evidence base. A sequential approach should be applied and policy should require as much housing as possible on Brownfield land. | Strategic | Plan Area | Plan Area |
| MUPOP/306/21 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Important to recognise Brownfield sites are often a haven for wildlife. Potential for conflict between brownfield development policy and biodiversity policies. Brownfield development policy should exclude minerals workings, landfill or soil dredging. | Strategic | Plan Area | Plan Area |
| MUPOP/306/25 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Recommended that Mid Ulster Council follows the approach to housing zoning and phasing as advocated by the SPPS ie. th eplan, monitor and manage approach to ensure that there is no over zoning or over provision of land. | Strategic | Plan Area | Plan Area |
| MUPOP/308/1 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | Concerns raised regarding the methodology employed to allocate residential development within the plan period. The housing need identified as 44 units may not be representative of actual requirements of Gulladuff. | Strategic | Gulladuff | Carntogher |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|--|----------------------------|--|--------------------------|------------|----------------|
| MUPOP/308/2 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | The figure of 72 residential units from 'committed' sites is misleading as many of these have not been commenced / misleading. Request a that the committed sites are fully reviewed. | Strategic | Gulladuff | Carntogher |
| MUPOP/309/1 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | Concerns raised regarding the methodology employed to allocate residential development within the plan period. The housing need identified as 44 units may not be representative of actual requirements of Gulladuff. | Strategic | Gulladuff | Carntogher |
| MUPOP/309/2 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | THE FIGURE OF 72 RESIDENTIAL UNITS FROM 'COMMITTED' SITES IS MISLEADING AS MANY OF THESE HAVE NOT BEEN COMMENCED / MISLEADING. REQUEST A THAT THE COMMITTED SITES ARE FULLY REVIEWED. | Strategic | Gulladuff | Carntogher |
| MUPOP/312/1 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | Concerns regarding the methodology employed to allocate provision of residential development. Concern in particular to the suggestion that Gulladuff will require only 44 units in the period up to 2030. | Strategic | Gulladuff | Carntogher |
| MUPOP/312/2 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | Current housing stock cannot meet demand. It is suggested that the Housing Growth Indicators do not take into account the local demand for housing. Therefore the identified need (of 42 units) may not be representative of actual requirements of Gulladuff. | Strategic | Gulladuff | Carntogher |
| MUPOP/312/3 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | The figure of 72 committed units for Gulladuff does not take into account the length of time they have remained uncommenced/undeveloped. Request that a review of committed sites is carried out to give an accurate assessment of development potential. | Strategic | Gulladuff | Carntogher |
| MUPOP/317/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | It is noted Option one is the preferred option - however, it is considered that in order to maintain and sustain the existing level of services within Aughnacloy, this allocation should rise to 40% at the expense of rural housing. | Strategic/ Site Specific | Aughnacloy | Clogher Valley |
| MUPOP/327/19 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | this option is inappropriate, option 2 is more appropriate. Inappropriate to extrapolate the 2 year record of rural approvals used in POP over the 15 year plan period. Record of approvals do not tell us how many were replacements between 2012 & 2014 (cont) | Strategic | Plan Area | Plan Area |
| MUPOP/327/20 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | only finite number of replacement, re-use, infill and farm dwellings opportunity sites. The early rush in 2010 may well have exhausted a large number of dev opportunities. See table 23 in councils housing paper, illustrating decreasing number of approvals | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|--|----------------------------|---|----------------|-------------|-------------|
| MUPOP/327/21 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | More realistic estimate of additional homes in the countryside over plan period is 1000. That adds a further 2700 units to be redistributed amongst the settlements. | Strategic | Plan Area | Plan Area |
| MUPOP/330/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | AGREES WITH PREFERRED OPTION FOR HOUSING ALLOCATIONS, IT SHOULD BE EQUITABLY SPLIT BASED ON 2011 CENSUS & NISRA HOUSEHOLD PROJECTION FIGS, WITH REMAINDER ALLOCATED TO C'TRYSIDE. RELEVANT&SPECIFIC CONSIDERING RURAL HINTERLAND & COMMUNITIES PREVALENT IN MU. | Strategic | Plan Area | Plan Area |
| MUPOP/333/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | Access to housing is an ongoing issue in the village and wider area. This is not a reflection of housing demand. Any change to village status will limit further opportunities to address housing shortfall. | Strategic | Cappagh | Torrent |
| MUPOP/333/3 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | Over 70% of MUDC population is based in rural areas. Do not agree that the POP housing allocation options accurately reflect the population split and anticipate that future housing needs of rural population will not be met. | Strategic | Plan Area | Plan Area |
| MUPOP/334/1 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | WHILST THE POP PROMOTES THE EQUITABLE SPLIT, THE COUNCIL MUST ENSURE THAT THERE IS A GENEROUS SUPPLY OF HOUSING LAND IN THE MAIN SETTLEMENTS TO PROMOTE AS MUCH HOUSING AS POSSIBLE IN THESE AREAS. | Strategic | Plan Area | Plan Area |
| MUPOP/334/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | SMALL SETTLEMENTS LIKE CREAGH, ACKINDUFF, BALLYNAKILLY, CLADY, BROCKAGH ARE IDENTIFIED AS HAVING HOUSING NEED WHILST THERE IS NO NEED FOR HOUSING IN THE MAIN TOWNS. THIS IS CONTRARY TO THE RDS. | Strategic | Plan Area | Plan Area |
| MUPOP/334/3 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | EQUITABLE SPLIT WILL LEAD TO SMALL PARCELS OF DEVELOPMENT IN SMALL SETTLEMENTS. THIS SHOULD NOT BE CARRIED OUT BEFORE AN ASSESSMENT OF CAPACITY IN THESE AREAS - INFRASTRUCTURE, EMPLOYMENT ETC. | Strategic | Plan Area | Plan Area |
| MUPOP/334/4 | Opinion to Pop | Settlements - Towns | HOU Opt 1: Equitable Split | THE POP PAINTS A PICTURE OF MAGHERAFELT HAVING VASTLY ADEQUATE HOUSING TO MEET THE DEMAND IN MAGHERAFELT (APPENDIX 2). HOWEVER, THIS DOES NOT TAKE ACCOUNT OF LOWER BUILD RATES, DIFFICULTIES IN RELEASING LAND ETC. | Part-Strategic | Magherafelt | Magherafelt |
| MUPOP/338/4 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | POP prefers an 'equitable split' approach - consideration should be given to ensuring choice & supply of housing land in the main settlements & larger villages. | Strategic | Bellaghy | Moyola |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|----------------------------|---|--------------------------|-------------|-----------|
| MUPOP/338/5 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Potential housing growth based on 'fair share' - although this may be a statistical 'fair share' allocations in accordance with Appendix 2 would result in a disproportionate allocation to smaller settlements. | Strategic | Bellaghy | Moyola |
| MUPOP/338/6 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | A planned approach which would be based upon settlement analysis including development potential, available infrastructure, physical constraints etc. would better ensure that the more sustainable settlements such as Bellaghy could be allocated appropriate | Strategic | Bellaghy | Moyola |
| MUPOP/338/9 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | HGI refers to housing which must be delivered & occupied by 2030 - the plan must therefore zone sufficient lands to ensure choice & continuity of supply, especially in sustainable locations...; The plan should also ensure that at the end of the plan period a 5 year supply of housing land remains, in order to ensure a planned transition to the successor plan - reference to approach in Antrim & Newtonabbey POP. | Strategic/ Site Specific | Bellaghy | Moyola |
| MUPOP/338/10 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | | Strategic/ Site Specific | Bellaghy | Moyola |
| MUPOP/338/11 | Opinion to Pop | Settlements - Villages | HOU Opt 1: Equitable Split | history has demonstrated that generous zonings in towns such as Bellaghy has not resulted in over supply of housing, nor undue housing sprawl - providing reasonable choice of location can help ensure that house prices remain competitive & affordable. | Strategic/ Site Specific | Bellaghy | Moyola |
| MUPOP/340/22 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | WELCOMES POP THINKING RE RURAL PARTS OF DISTRICT & AGREES WITH PREFERRED OPTION FOR HOUSING, EQUITABLE SPLIT OF PROJECTED NEW HOMES SUBJECT TO A: THE HOUSING NEEDS BEING REGULARLY REVIEWED & B: DRAPERSTOWN'S REDESIGNATION AS A TOWN RATHER THAN VILLAGE. | Strategic/ Site Specific | Draperstown | Moyola |
| MUPOP/347/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | Want to talk about zoning pattern and how effective a plans and b plans work and where the most appropriate zoning areas can be in the future. | Strategic | Plan Area | Plan Area |
| MUPOP/347/7 | Opinion to Pop | | HOU Opt 1: Equitable Split | | Strategic | 0 | |
| MUPOP/347/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | Would like to see the council take a liberal view of new homes required rather than the conservative figure currently proposed. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|-------------|----------------|--|----------------------------|---|-----------|-----------|-----------|
| MUPOP/349/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | The proposed options for housing allocation do not reflect the existing population split. The POP needs to take more account of the restrictive drural housing policy and allow for more housing for farmers and rural dwellers. | Strategic | Plan Area | Plan Area |
| MUPOP/350/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | Access to housing is an ongoing issue in village & wider community area - significant housing shortage in village - not a reflection of housing demand but of downturn & reluctance to develop & invest limit future opportunities to address housing shortfall | Strategic | Cappagh | Torrent |
| MUPOP/350/5 | Opinion to Pop | Social Policies - Accommodating Growth and Creating Places | HOU Opt 1: Equitable Split | We do not agree that housing allocation options put forward in the POP accurately reflect this population split & anticipate that housing needs of the existing & future rural population will not be met. | Strategic | Cappagh | Torrent |
| MUPOP/352/1 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | Phasing of land within Cookstown is too prescriptive. Phasing of zoned land in Cookstown must be reconsidered to identify where areas need developed. Some sites are land locked or have access issues e.g Loy St, and also access to Moneymore Road site. | Strategic | Cookstown | Cookstown |
| MUPOP/352/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | Housing waiting lists and housing stress is an issue for the area. There is a need to require developers and housing associations to provide housing. NIHE are building a minimum in the cookstown district. | Strategic | Plan Area | Plan Area |
| MUPOP/352/3 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 1: Equitable Split | How do we ensure infrastructure to accommodate 40% of housing going into the countryside? Currently there are no footpaths, streetlighting. Also road gritting could eventually be required for additional roads based on numbers of occupants. | Strategic | Plan Area | Plan Area |
| MUPOP/354/3 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | AGREE IN PRINCIPLE WITH COUNCIL'S PREFERRED OPTION (OPTION 1) TO EQUALLY SPLIT ALLOCATION OF HOUSING THROUGHOUT THE AREA. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|-------------|----------------|---------------------------------------|----------------------------|--|-----------|--|--|
| MUPOP/249/7 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | The rep does not agree that zonings should be time bound but should instead be monitored every 5 years. If permission has been sought on a site then it should be de zoned. | Strategic | | |
| MUPOP/265/7 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Supports that existing zoned housing land be time limited allowing for de-zoning if not acted on and replaced by alternative land for housing. | Strategic | | |
| MUPOP/265/8 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Lack of commitment to develop undeveloped phase 1 land clearly puts potential developers of phase 2 land at a distinct disadvantage especially those with small holdings that would not prejudice any comprehensive development objectives. | Strategic | | |
| MUPOP/296/5 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Housing land should not be zoned in Phase 1 & 2. This approach has led to uncertainty which has depressed the housing market. A plentiful supply of land should be allocated so as to allow land to be delivered on a phased basis governed by demand. | Strategic | | |

Housing Allocation (Option 2)

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|-------------------|--|------------------------------------|---|-------------|------------|-----------|
| MUPOP/12/1 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 2: Based on RDS 60% Target | should be larger housing allocation for smaller settlements to help maintain & invigorate rural communities, Rural housing should be focused on settlements rather than dotted round countryside. Support option 2 set out on P23. | Strategic | Creagh | Moyola |
| MUPOP/228/15 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | ADVOCATE HOUSING ALLOCATION OPTION 2 IN INTERESTS OF ENVIRONMENTAL & SOCIAL SUSTAINABILITY. ALLOCATION OF RURAL HOUSING IN OPTIONS 1 & 3 ARE UNSUSTAINABLE ENVIRONMENTALLY. MORE PEOPLE LIVING IN TOWNS MEAN THEY ARE LIKELY TO BE VIBRANT & COMPETITIVE. | Strategic | Plan Area | Plan Area |
| MUPOP/228/29 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 2: Based on RDS 60% Target | RECOMMEND GREATEST PRIORITY GIVEN TO LOCATING NEW HOUSING IN 3 MAIN TOWNS, SECONDARY PRIORITY TO 2 SMALLER TOWNS & VILLAGES & LOWEST PRIORITY TO NEW RURAL HOUSING. | Strategic | Plan Area | Plan Area |
| MUPOP/233/4 | Letter of Support | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | Option 2 'Based on RDS 60 % target' is a more sustainable approach, notwithstanding implied references that housing cannot be delivered above the HGI threshold of 10'950. | Strategic | Plan Area | Plan Area |
| MUPOP/236/1 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | INDICATED A PREFERENCE FOR OPTION 2 - HOUSING ALLOCATION BASED ON RDS TARGET OF 60% HOUSING GROWTH TO BE WITHIN MAIN TOWNS | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|------------------------------------|---|-----------|-----------|-----------|
| MUPOP/239/6 | Opinion to Pop | General Principles for Sustainable Development | HOU Opt 2: Based on RDS 60% Target | Supports Option 2 approach to housing allocation which can facilitate growth of towns and settlements. Disagrees however with implied reference that housing could not be delivered above the HGI indicative threshold. | Strategic | Plan Area | Plan Area |
| MUPOP/246/6 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | SUPPORTS OPTION 2 APPROACH TO HOUSING ALLOCATION WHICH CAN FACILITATE GROWTH OF TOWNS AND SETTLEMENTS. DISAGREES HOWEVER, WITH IMPLIED REFERENCE THAT HOUSING CANNOT BE DELIVERED ABOVE THE HGI INDICATIVE THRESHOLD. | Strategic | Plan Area | Plan Area |
| MUPOP/248/2 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | STATES SUSTAINING RURAL COMMUNITIES MUST BE KEY TO PS & LPP. AS SUCH OUTLINES WHY OPTION 2 OR 3 WOULD BE DETRIMENTAL TO RURAL FAMILIES PARTICULARLY FARMING FAMILIES AND HOW THEY COULD IMPACT ON THE VIABILITY OF LOCAL RURAL COMMUNITIES. | Strategic | Plan Area | Plan Area |
| MUPOP/262/6 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | SUPPORTS OPTION 2 APPROACH TO HOUSING ALLOCATION WHICH CAN FACILITATE GROWTH OF TOWNS AND SETTLEMENTS. DISAGREES HOWEVER WITH IMPLIED REFERENCE THAT HOUSING COULD NOT BE DELIVERED ABOVE THE HGI INDICATIVE THRESHOLD | Strategic | Plan Area | Plan Area |
| MUPOP/265/3 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 2: Based on RDS 60% Target | Option 2 or 3 would be more consistent with the POPs wider objectives and would allow more housing to be allocated especially to a fast growing town such as Dungannon | Strategic | Plan Area | Plan Area |
| MUPOP/265/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 2: Based on RDS 60% Target | the housing allocation to Dungannon town should properly reflect its level of recent growth rather than being based on its share of existing households | Strategic | Dungannon | Dungannon |
| MUPOP/306/22 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | Disagrees with Equitable split Option 1 preferred approach. Recommends that Option 2 Based on RDS 60 % target approach is followed. | Strategic | Plan Area | Plan Area |
| MUPOP/306/23 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 2: Based on RDS 60% Target | Approach to zoning should be evidence led and include; reasons for zoning, timescales, and prospect of delivery within LDP timeframe. Opportunity to revisit and monitor historic land use zonings. | Strategic | Plan Area | Plan Area |
| MUPOP/306/17 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 1: Equitable Split | Caution should be exercised by Mid Ulster Council in its approach to housing allocation within the settlement hierarchy given the wording of RDS SFG 12. Notably, the RDS recognises Cookstown, Dungannon and Magherafelt as a potential cluster. | Strategic | Plan Area | Plan Area |

Housing Allocation (Option 3)

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|-------------|-------------------|--|--------------------------------------|---|-------------|------------|-----------|
| MUPOP/231/3 | Letter of Support | Growth Strategy and Spatial Framework | HOU Opt 3: Urban Drive to main towns | Supports Housing Allocation Option 3 'Urban drive to the main towns' | Strategic | Plan Area | Plan Area |
| MUPOP/248/3 | Opinion to Pop | Growth Strategy and Spatial Framework | HOU Opt 3: Urban Drive to main towns | STATES SUSTAINING RURAL COMMUNITIES MUST BE KEY TO PS & LPP. AS SUCH OUTLINES WHY OPTION 2 OR 3 WOULD BE DETRIMENTAL TO RURAL FAMILIES PARTICULARLY FARMING FAMILIES AND HOW THEY COULD IMPACT ON THE VIABILITY OF LOCAL RURAL COMMUNITIES. | Strategic | Plan Area | Plan Area |
| MUPOP/265/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU Opt 3: Urban Drive to main towns | Option 2 or 3 would be more consistent with the POPs wider objectives and would allow more housing to be allocated especially to a fast growing town such as Dungannon | Strategic | Plan Area | Plan Area |

The Economy - Economic Land Allocation and Zoning

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|-------------------|--|-------------------------------|--|-------------|------------|-----------|
| MUPOP/146/7 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Representation welcomes the approach of allocating equal amount of industrial land across the 3 main settlements and makes the point that while MFELT has less people, it has better links to main transport networks and ports. | Strategic | Plan Area | Plan Area |
| MUPOP/202/2 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | WOULD LIKE GREATER FLEXIBILITIES IN POLICY TO FACILITATE GREATER NO. OF BUSINESSES TO BE BUILT IN DISTRICT. ISN'T CONVINCED THE EXTENT OF PROPOSALS IN POP ALLOW ENOUGH FLEXIBILITY TO MEET THE NEEDS OF THE DISTRICT & REALISE ITS SOCIAL & ECONOMIC POTENTIAL. | Strategic | Plan Area | Plan Area |
| MUPOP/227/1 | Letter of Support | Economic Policies - Economic Development | ECN Opt 1: Equal Share | Supports the Councils preferred option to provide an equal share of economic development land across each of the towns. | Strategic | Plan Area | Plan Area |
| MUPOP/227/2 | Letter of Support | Economic Policies - Economic Development | ECN Opt 1: Equal Share | Supports the economic growth options as per pages 124-132 of the plan. | Strategic | Plan Area | Plan Area |
| MUPOP/228/18 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 3: Population of Town | STATES THAT IS IS LOGICAL THAT THE ECONOMIC DEVELOPMENT LAND AREA BE APPORTIONED PRO-RATA RELATIVE TO THE POPULATION OF EACH OF THE THREE TOWNS. | Strategic | Plan Area | Plan Area |
| MUPOP/233/7 | Letter of Support | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Agrees with Option 1 Equal share approach for Economic land allocations. | Strategic | Plan Area | Plan Area |
| MUPOP/239/9 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Agrees with option 1 Equal share approach | Strategic | Plan Area | Plan Area |
| MUPOP/239/10 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Supports the idea of identifying Ballygawley interchange and Castledawson roundabout as potential growth hubs, | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---------------------------------------|-------------------------------|--|----------------|------------|-----------|
| MUPOP/246/9 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | AGREES WITH OPTION 1. EQUAL SHARE APPROACH. | Strategic | Plan Area | Plan Area |
| MUPOP/246/10 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | SUPPORTS THE IDEA OF IDENTIFYING BALLYGAWLEY INTERCHANGE AND CASTLEDAWSON ROUNDOABOUT AS POTENTIAL GROWTH HUBS. | Strategic | Plan Area | Plan Area |
| MUPOP/247/1 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | SUBMISSION WAS PREPARED IN RESPONSE TO THE COUNCIL'S STRATEGY ON ECONOMY AND SPECIFICALLY THE QUESTION "IF THERE HAS BEEN NO PROGRESS IN IMPLEMENTING ZONED INDUSTRIAL LAND SHOULD IT BE DE-ZONED IN FAVOUR OF ANOTHER SITE?" | Strategic | Plan Area | Plan Area |
| MUPOP/251/1 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | SUBMISSION WAS PREPARED IN RESPONSE TO THE COUNCIL'S STRATEGY ON ECONOMY AND SPECIFICALLY THE QUESTION "IF THERE HAS BEEN NO PROGRESS IN IMPLEMENTING ZONED INDUSTRIAL LAND SHOULD IT BE DE-ZONED IN FAVOUR OF ANOTHER SITE?" | Strategic | Plan Area | Plan Area |
| MUPOP/252/2 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | STATES THAT THE COUNCIL NEEDS TO WORK WITH TRANSPORT NI SO GOOD ACCESS LINKS TO ECONOMIC DEVELOPMENT LAND CAN BE ACHIEVED. THIS IS SPECIFICALLY IN REFERENCE TO LAND ALONG THE A6 DUAL CARRIAGEWAY. | Part-Strategic | Plan Area | Plan Area |
| MUPOP/252/3 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | SUPPORTS THE PROPOSAL THAT LOCATIONS CLOSE TO INTERCHANGES ON KEY TRANSPORT CORRIDORS SHOULD BE EXPLOITED FOR ECONOMIC DEVELOPMENT I.E. BALLYGAWLEY AND CASTLEDAWSON ROUNDOABOUT. ALSO THAT THIS INVOLVES CLOSE LINKS WITH TRANSPORT NI. | Part-Strategic | Plan Area | Plan Area |
| MUPOP/264/6 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | SIG AGREE WITH THE APPROACH OF ALLOCATION ECONOMIC LAND EQUALLY, ALTHOUGH THERE IS NO MENTION OF MAGHERA BEING CATERED FOR WHICH IS AT ODDS WITH SPG3. | Strategic | Plan Area | Plan Area |
| MUPOP/277/3 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | DOES NOT AGREE WITH THE PREFERRED OPTION 1 WHICH IS TO ALLOCATE AN EQUAL SHARE OF ECONOMIC DEVELOPMENT LAND AIMING TO PROVIDE 55-60HA MINIMUM IN EACH TOWN. | Strategic | Plan Area | Plan Area |
| MUPOP/277/4 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 3: Population of Town | SUPPORTS OPTION 3 AS A MORE APPROPRIATE OPTION FOR ALLOCATING ECONOMIC LAND IN MID ULSTER BASED ON THE POPULATION OF A TOWN AND THE PEOPLE PER HECTARE. WILL BE USING ESTABLISHED INFRASTRUCTURE WITHOUT THE NEED FOR NEW INVESTMENT. | Strategic | Plan Area | Plan Area |
| MUPOP/277/5 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 3: Population of Town | OPTION 3 CALCUALTIONS CAN BE USED TO DETERMINE THAT COALISLAND CURRENTLY HAS ONLY 13HA OF ZONED ECONOMIC LAND. HOWEVER BASED ON THESE CALCULATIONS THERE IS AN ADDITIONAL NEED FOR AT LEAST ANOTHER 14HA OF LAND. | Part-Strategic | Coalisland | Torrent |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---------------------------------------|--------------------------------------|--|----------------|---------------------|----------------|
| MUPOP/288/1 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | The overall space zoned for industrial use in the Council area should be higher than 170ha. It should be in excess of 200 Ha. (allow for land owner/topography/access issues). | Strategic | Plan Area | Plan Area |
| MUPOP/288/2 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | if there is a limit of 170ha of industrial space allocated from now to 2030, then the Soth Tyrone area should receive 100 hectares to enable them to meet the future demand.(See rep for amplification) | Strategic | Plan Area | Plan Area |
| MUPOP/288/3 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 2: Hinterlands and Catchment | the council should adopt option 2 within their POP with regards to zoning industrial land for the period of the plan. (See rep for amplification) | Strategic | Plan Area | Plan Area |
| MUPOP/291/3 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | DRP endorses the views of Dungannon Enterprise Centre on the caveat that any additional land zoned fo industry is regulated to ensure uses are non-retail | Strategic | Plan Area | Plan Area |
| MUPOP/296/6 | Opinion to Pop | Settlements - Towns | ECN Opt 1: Equal Share | POP HAS IGNORED THE POTENTIAL OF MAGHERA AS A DESTINATION FOR EMPLOYMENT LAND. POSITION AT JUNCTION OF A6 AND A29 MAKES IT A STRATEGIC LOCATION. | Strategic | Maghera | Carntogher |
| MUPOP/296/9 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | REP agrees with the equal share option but suggests that instead of 170 hectares, there should be 340 hectares zoned to meet latent demand and provide choice. | Strategic | Plan Area | Plan Area |
| MUPOP/297/7 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Disagree with preferred option. Consideration should be given to zoning an appropriate amount of land within villages i.e. SPG4 particularly Aghaginduff/Cabragh | Part-Strategic | Aghaginduff/Cabragh | Clogher Valley |
| MUPOP/299/7 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Considers there may be justifiable grounds to dezone undeveloped industrial lands in favour of other sites and landowners who commit to delivering industrial development. | Strategic | Plan Area | Plan Area |
| MUPOP/300/7 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | The preferred option is noted, however to fulfil SPG4 consideration should be given to zoning an appropriate amount of land in Aughnacloy for economic development. | Part-Strategic | Aughnacloy | Clogher Valley |
| MUPOP/301/4 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Highlights the importance of providing a choice and a variety of sites across the plan area to respond to the changing nature of business and industry. | Strategic | Plan Area | Plan Area |
| MUPOP/301/8 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | If land is dezoned in favour of another site for financial reasons it may not be of any benefit as it may be reflective of wider prevailing economic conditions. | Strategic | Plan Area | Plan Area |
| MUPOP/301/13 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Where the owner and purchaser can't agree on a value, it may not be prudent for the site to be de-zoned as it could have a negative impact on industrial land values. This may deter landowners to release/develop land due to reduced economic viability. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|------------------------|--|-----------|-----------|-----------|
| MUPOP/301/14 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Unimplemented zoned land be reflective of site specific characteristics. In these circumstances they may be merit in zoning additional land, although the need to concurrently dezone land is debatable as it may have economic value for other projects. | Strategic | Plan Area | Plan Area |
| MUPOP/301/15 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | It would be useful to outline the mechanism through which the exercise of rezoning would take place. Could this result in a non-industrial zoning being changed to industrial or would it focus primarily on land zoning. | Strategic | Plan Area | Plan Area |
| MUPOP/301/16 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Supportive of provision of a variety and choice of sites. It would be helpful to detail evidence in support of any proposal to provide an interim supply of industrial land. Given the LDP process is underway, a parallel zoning process may be nugatory. | Strategic | Plan Area | Plan Area |
| MUPOP/304/8 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | The preferred option is noted - however in order to fulfil SPG4 to maintain & consolidate the role of villages as local service centres - consideration should be given to zoning an appropriate amount of land within villages such as Benburb | Strategic | Benburb | Dungannon |
| MUPOP/305/8 | Opinion to Pop | Economic Policies - Economic Development | ECN Opt 1: Equal Share | Preferred option is noted - however to fulfil SPG4 consideration should be given to zoning an appropriate amount of land within these villages i.e. Benburb | Strategic | Benburb | Dungannon |
| MUPOP/306/24 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Merits of querying existing landowners' intentions is questioned given potential changes in landownership and positions of landowners. Recommends rather than urban capacity studies are undertaken to ascertain brownfield availability within urban footprint. | Strategic | Plan Area | Plan Area |
| MUPOP/306/26 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Approach to economic land needs to be evidence led, and include identification of the originally intended reasons for their zoning, timescales, and prospect of delivery within the new LDP timeframe. | Strategic | Plan Area | Plan Area |
| MUPOP/306/27 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | The LDP should steer economic development away from sensitive areas. There is need for a robust policy which protects not only designated sites but priority habitats and species, as identified in the NI Biodiversity Strategy. | Strategic | Plan Area | Plan Area |
| MUPOP/306/28 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Preferred option does not meet requirements of, or is compatible with, RG1 of the RDS. Paragraphs 6.92 and 6.93 should be referred to in SPPS. Accommodating economic zonings within settlements will depend on position within settlement hierarchy and local conditions. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|-------------------|--|--------------------------------------|--|--------------------------|-------------|----------------|
| MUPOP/306/29 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 2: Hinterlands and Catchment | Options 2 and 3 effectively produce very similar outcomes, they are not considered to be sufficiently different to constitute to genuinely different options for consideration. | Strategic | Plan Area | Plan Area |
| MUPOP/306/30 | Opinion to SA/SEA | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | Questions the reasoning behind the suggestion of introducing new strategic land zonings in the Plan Strategy to provide an interim supply whilst the LPP is formulated, such actions could prejudice the LDP process including associated HRA or SEAs. | Strategic | Plan Area | Plan Area |
| MUPOP/306/31 | Opinion to SA/SEA | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | As much development as possible should be delivered through development plans, informed by a robust evidence base. SEA's can ensure that an adequate amount of land is provided without exceeding environmental limits. A land strategy for NI would also assist | Strategic | Plan Area | Plan Area |
| MUPOP/317/6 | Opinion to Pop | Economic Policies - Economic Development | ECN Opt 1: Equal Share | The preferred option is noted - however in order to fulfil SPG4 to maintain and consolidate the role of the villages as local service centres, consideration should be given to zoning an appropriate amount of land within Aughnacloy. | Strategic/ Site Specific | Aughnacloy | Clogher Valley |
| MUPOP/327/37 | Opinion to Pop | | ECN Opt 1: Equal Share | with population to grow by 28000, why is the council content with an ambition to create 8500 new jobs. Option 1 is my preferred option, however the quantum of land required is massively understated. | Strategic | Plan Area | Plan Area |
| MUPOP/330/3 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | THE PREFERRED ECONOMIC ALLOCATION OPTION (EQUAL SHARE) ENCOURAGES THOSE WITH ECONOMIC LAND TO BRING IT FORWARD INTO ACTIVE USE. THIS WOULD BE SUSTAINABLE & ACCORD WITH THE HOUSING ALLOCATION SPLIT WHICH WOULD MINIMISE TRAVEL TIMES & JOURNEYS. | Strategic | Plan Area | Plan Area |
| MUPOP/340/24 | Opinion to Pop | Growth Strategy and Spatial Framework | ECN Opt 1: Equal Share | ALLOCATION OF ECONOMIC DEVELOPMENT LAND SHOULD BE RE-APPRAISED FACTORING IN DRAPERSTOWNS ROLE AS A SIGNIFICANT ECONOMIC HUB WITHIN MID ULSTER. EXAMINATION OF THE ACTUAL AVAILABILITY FOR DEVELOPMENT OF NORMALLY ZONED INDUSTRIAL LAND IS WELCOMED. | Strategic/ Site Specific | Draperstown | Moyola |

Transport and Connectivity

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|---|---|--|--------------------------|------------|-----------|
| MUPOP/228/19 | Opinion to Pop | Growth Strategy and Spatial Framework | TRA Opt 3: Focus on roads and more sustainable modes of transport | DISAGREE WITH OPTION 3 HOWEVER ADVOCATE A STREETS BASED APPROACH (CHARACTER OF TRADITIONAL STREET ALBEIT WITH 21ST CENTURY CONTEMPORARY BUILDINGS) AS AN INTEGRATED APPROACH TO SUSTAINABLE MODES OF TRANSPORT. | Strategic | Plan Area | Plan Area |
| MUPOP/306/32 | Opinion to Pop | Growth Strategy and Spatial Framework | TRA Opt 3: Focus on roads and more sustainable modes of transport | The main thrust here must be to support measures to improve transport sustainability to reduce carbon and other greenhouse gas emissions. | Strategic | Plan Area | Plan Area |
| MUPOP/306/135 | Opinion to Pop | Environmental Policies - Transportation | TRA Opt 3: Focus on roads and more sustainable modes of transport | Walking and cycling should be promoted, while targeting new walking and cycling routes for eg a river walk on the west bank of the Lower Bann River from Newferry to Portglenone, creating a sustainable place for visitor strolough beg and Heaneys Homeground | Strategic | Plan Area | Plan Area |
| MUPOP/306/136 | Opinion to Pop | Environmental Policies - Transportation | TRA Opt 3: Focus on roads and more sustainable modes of transport | Consideration should be given to the afteruse plans for the Newferry Peat Extraction site at Lower Bann River, where wetlands can be created and a network of paths developed to fulfil this need and could complement Heaney's homeground. | Strategic | Plan Area | Plan Area |
| MUPOP/306/137 | Opinion to Pop | Environmental Policies - Transportation | TRA Opt 3: Focus on roads and more sustainable modes of transport | Any development that is likely to generate 'significant movement' and that cannot be served adequately by public transport provision should be refused. Local development cannot be allowed where it compromises the objective of minimising carbon emissions. | Strategic | Plan Area | Plan Area |
| MUPOP/333/4 | Opinion to Pop | Environmental Policies - Transportation | TRA Opt 2: Focus on Roads and private transport | LDP can improve transportation, connectivity within MUDC. Scope to liaise with adjoining councils to review transportation / connectivity between neighbouring areas. Access to local services could be guaranteed by retaining villages such as Cappagh. | Strategic | Cappagh | Torrent |
| MUPOP/340/23 | Opinion to Pop | Growth Strategy and Spatial Framework | TRA Opt 3: Focus on roads and more sustainable modes of transport | WELCOMES POP THINKING RE RURAL PARTS OF DISTRICT & AGREES WITH TRANSPORTATION & CONNECTIVITY OPTION 3 ESPECIALLY IMPROVING CAR/PUBLIC TRANSPORT INTEGRATION THROUGH PARK & RIDE SCHEMES. | Strategic/ Site Specific | Plan Area | Plan Area |
| MUPOP/350/6 | Opinion to Pop | Growth Strategy and Spatial Framework | TRA Opt 3: Focus on roads and more sustainable modes of transport | The LDP should extend the scope of facilitating improved transportation in partnership with other councils to review transportation & connectivity with Omagh Town - travel time to critical services a major issue - A&E - focus on infrastructure & connectivity | Strategic | Cappagh | Torrent |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|-------------|----------------|---|---|---|-----------|-----------|-----------|
| MUPOP/350/7 | Opinion to Pop | Growth Strategy and Spatial Framework | TRA Opt 3: Focus on roads and more sustainable modes of transport | Access to local services & facilities also vital existing local services within Cappagh should be protected & access improved - focus on alternative affordable sustainable modes of transport - needs of rural pop without access to private car | Strategic | Cappagh | Torrent |
| MUPOP/350/8 | Opinion to Pop | Environmental Policies - Transportation | TRA Opt 3: Focus on roads and more sustainable modes of transport | Welcome review of rail links into the District - reuse of former routes would greatly improve connectivity & choice of transport | Strategic | Cappagh | Torrent |
| MUPOP/352/4 | Opinion to Pop | Environmental Policies - Transportation | TRA Opt 2: Focus on Roads and private transport | As the new LDP will replace existing plans it is essential that the new LDP will provide protection to proposed road schemes. | Strategic | Plan Area | Plan Area |

Environment

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|---|--|---|-------------|------------|-----------|
| MUPOP/205/14 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | REP IS SUPPORTIVE OF THIS OPTION AS THE PREFERRED OPTION. IT IS IMPORTANT THAT MUDC IDENTIFY VULNERABLE AREAS AT STRATEGIC LEVEL. | Strategic | Plan Area | Plan Area |
| MUPOP/249/9 | Opinion to Pop | Environmental Policies - Protecting Heritage and Providing Infrastructure | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | REP IS SUPPORTIVE OF THIS APPROACH. | Strategic | Plan Area | Plan Area |
| MUPOP/280/8 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | For this approach to be effective it requires comprehensive baseline data on all aspects of the environment (natural and historic/built) as well as the expertise to accurately assess the impact of proposed developments on key assets/areas. | Strategic | Plan Area | Plan Area |
| MUPOP/306/33 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | Weclomes SCA, but recognition must be given to biodiversity outwith designated sites. Small portion of our biodiversity is protected in designated sites eg. lowland grassland important for waders, & blanket bog important for ecosystem services & GHG targets | Strategic | Plan Area | Plan Area |
| MUPOP/306/34 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | LDP must; spell out the precise extent of SCA's, what SCA's mean & how they will be managed. Recommends SCA extends beyond the ASSI/SPA and includes Ramsar areas & the 'S.Heaney landscape' at Lough Neagh & Lough Beg. to help buffer protected areas. | Strategic | Plan Area | Plan Area |
| MUPOP/306/35 | Opinion to Pop | | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | SCA might also include Annaghroe/Annacraup and Blackwater Wetlands, and Slieve Beagh given its importance to birds of prey such as merlin, peregrine and falcon. | Strategic | Plan Area | Plan Area |

| MUPOP/264/8 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | REP AGREES WITH THE PRINCIPLE OF HAVING A GENERAL PLANNING POLICY WITHIN THE LDP | Strategic | Plan Area | Plan Area |
| MUPOP/264/9 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | WITH REFERENCE TO THE GP1 COMMENT ON CAR PARKING, THE REP WELCOMES THE USE OF "SHOULD" RATHER THAN "SHALL " THE REP ALSO COMMENTS THAT DOE PARKING STANDARDS NEED UPDATED. | Strategic | Plan Area | Plan Area |
| MUPOP/264/10 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | THE REQUIREMENT FOR DEVELOPMENT TO HAVE ACCESS TO SEWERAGE INFRASTRUCTURE MUST BE INTERPRETED TO ALLOW DEVELOPERS TO BRING FORWARD THEIR OWN INFRASTRUCTURE AND WHERE NECESSARY, ON A TEMPORARY BASIS. | Strategic | Plan Area | Plan Area |
| MUPOP/264/11 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | IN TEST OF "ENHANCE" FOR BIODIVERSITY AND LANDSCAPE CHARACTER ARE TOO ONEROUS. | Strategic | Plan Area | Plan Area |
| MUPOP/280/10 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Recommends that GP1 should be consistent with the intent and wording of the Regional Development Strategy (RDS 2035) – RG11. | Strategic | Plan Area | Plan Area |
| MUPOP/280/11 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Recommends addition of another clause to GP1 to follow or precede (i)Development proposals should respect, protect and/or enhance the district's rich and diverse archaeological and built heritage. | Strategic | Plan Area | Plan Area |
| MUPOP/296/11 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | A POLICY FOR RURAL ADVERTISEMENTS SHOULD SEEK TO STRICTLY LIMIT THE OPPORTUNITY FOR ADVERTISEMENTS IN THE COUNTRYSIDE. | Strategic | Plan Area | Plan Area |
| MUPOP/301/1 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Some of the text for policy GP 1 (j) Planning Gain and Developer Contribution appears to be missing. | Strategic | Plan Area | Plan Area |
| MUPOP/301/2 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Although the inclusion of policy GP (j) is appreciated in respect of private sector developments it would caution against same for public sector works where wider societal benefits are driving force rather than profit, potentially affecting deliverability | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|---|--|-----------|-----------|-----------|
| MUPOP/306/38 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Plan making should seek to integrate sustainable development objectives rather than balance them as this could result in environmental trade-offs. A holistic approach to the management of nature's landscapes for people and for nature will be necessary. | Strategic | Plan Area | Plan Area |
| MUPOP/306/39 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Questions the need for GP Policy in the format it is presented, as it could present unnecessary opportunities for 'wriggle room' in the assessment of applications, as it omits certain important elements of policy which are contained within amplification. | Strategic | Plan Area | Plan Area |
| MUPOP/306/40 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Recommends the following wording for GP1 Planning permission will be granted for sustainable development where the proposal accords with the Plan unless material considerations indicate otherwise.' | Strategic | Plan Area | Plan Area |
| MUPOP/306/41 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Capturing all material considerations in onesizefitsall can lead to omissions eg on flooding issues -that it does not contribute to or exacerbate risk of flooding elsewhere. More robust to keep GP policy general and leave parameters to individual policy. | Strategic | Plan Area | Plan Area |
| MUPOP/306/42 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Caution should be exercised regarding Planning Gain and Developer contribution to avoid interpretation that permission can be bought or sold. (see case law R Wright V Dean District Council, & Bradford council V Secretary of State) | Strategic | Plan Area | Plan Area |
| MUPOP/318/3 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | Policy wording reads well but the GAA believes that voluntary/community groups should not be liable for 'developer led contributions' to roads giving access to facilities which GAA provides for the public good at zero/minimal cost to the public purse | Strategic | Plan Area | Plan Area |
| MUPOP/330/4 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | IS CONTENT THE WORDING OF GENERAL POLICY (GP1) WILL FACILITATE BALANCED DECISION MAKING FOR ALL DEVELOPMENTS & STILL HAVE SUFFICIENT FLEXIBILITY FOR CONSIDERATION OF SITE SPECIFIC MATERIAL CONSIDERATIONS. | Strategic | Plan Area | Plan Area |
| MUPOP/340/25 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | SUGGESTS ADDITION TO POLICY WORDING OF GP1: DEVELOPMENT SHOULD BE COMPATIBLE WITH SURROUNDING LANDUSES, THE AMENITIES OF NEARBY RESIDENTS & HAVE REGARD TO THE SOCIAL, ECONOMIC & ENVIRONMENTAL CHARACTER OF THE AREA IN WHICH IT IS LOCATED. | Strategic | Plan Area | Plan Area |
| MUPOP/340/26 | Opinion to Pop | General Principles for Sustainable Development | GP1: General Principles Planning Policy | REFERRING TO GENERAL PRINCIPLES PLANNING POLICY IT SHOULD BE MADE CLEAR THAT 'BIODIVERSITY' INCLUDES THE HUMAN SPECIES. | Strategic | Plan Area | Plan Area |

|--------------|----------------|--|--|---|-----------|---------------------|----------------|
| MUPOP/297/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU DEN Opt 2: Set densities in Policy | In respect of housing densities, the preferred option is welcomed | Strategic | Aghaginduff/Cabragh | Clogher Valley |
| MUPOP/300/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU DEN Opt 2: Set densities in Policy | In respect to housing densities, the preferred option that encourages proposals for housing to respond to the local context is welcomed | Strategic | Aughnacloy | Clogher Valley |
| MUPOP/304/9 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU DEN Opt 2: Set densities in Policy | In respect of housing densities the preferred option that encourages proposals for housing to respond to local context is welcomed | Strategic | Benburb | Dungannon |
| MUPOP/305/9 | Opinion to Pop | Social Policies - Accommodating Growth and Creating Places | HOU DEN Opt 2: Set densities in Policy | The preferred option for housing to respond to the local context is welcomed | Strategic | Benburb | Dungannon |
| MUPOP/306/43 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU DEN Opt 2: Set densities in Policy | Policy lacks flexibility. KSR's are more sustainable and specific to local circumstances. Suggests alternative option; continue current policy that discourages over intensification, respects their context, and apply appropriate density KSR's. | Strategic | Plan Area | Plan Area |
| MUPOP/317/7 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU DEN Opt 2: Set densities in Policy | The preferred option that encourages proposals for housing to respond to the local context is welcomed. | Strategic | Aughnacloy | Clogher Valley |
| MUPOP/330/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU DEN Opt 2: Set densities in Policy | DISAGREE WITH OPTION 2 FOR HOUSING DENSITY; OVERLY SPECIFIC HENCE LACKS FLEXIBILITY TO RESPOND TO HOUSING NEEDS. OPTION 1&2 ARE TO PREVENT SITE INTENSIFICATION HOWEVER OPTION 2 WILL BE OVERLY PRESCRIPTIVE (TYPE& TENURE) IF NO.OF UNITS PER HECTARE ARE SET. | Strategic | Plan Area | Plan Area |

Town Cramming

| Reference | Nature of Reqs | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|---|---|-------------|------------|-----------|
| MUPOP/205/20 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | TWN CRAM opt 2: Subordinate and Ancillary | THE REP AGREES WITH THE APPROACH THAT EXTENSIONS AND ALTERATIONS ARE SUBORDINATE TO THE MAIN BUILDING. | Strategic | Plan Area | Plan Area |
| MUPOP/228/27 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | TWN CRAM opt 2: Subordinate and Ancillary | POP STATES HIGH RISE RESIDENTIAL BUILDINGS ARE INAPPROPRIATE- WANTS HIGH RISE DEFINED e.g. 4/5 STOREY. STATES THERE ARE DIFFERENCES IN HISTORIC/MODERN STOREY HEIGHTS (NO FIGURES PROVIDED) & THAT HISTORIC HEIGHTS SHOULD BE PERMITTED IN MID U. | Strategic | Plan Area | Plan Area |
| MUPOP/249/13 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | TWN CRAM opt 2: Subordinate and Ancillary | REP WELCOMES THE PROPOSAL TO ENSURE THAT EXTENSIONS AND ALTERATIONS ARE SUBORDINATE. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|---|--|-----------|-----------|-------------|
| MUPOP/330/6 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | TWN Cram opt 2: Subordinate and Ancillary | TOWN CRAMMING OPTION 2 DOESN'T JUSTIFY WHY CHANGE IN POLICY IS REQUIRED, ESPECIALLY WHEN OPTION 1 ACCEPTS THAT MOST OF THE EXISTING CRITERIA IS INCLUDED IN THE GENERAL POLICIES SECTION. | Strategic | Plan Area | Plan Area |
| MUPOP/330/7 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | TWN Cram opt 2: Subordinate and Ancillary | TOWN CRAMMING OPTION 2 IS VERY SPECIFIC AS BACKLAND DEVELOPMENT CAN OCCUR ON LARGE URBAN SITES WITHOUT NEGATIVE IMPACT. WHILST PLANNING JUDGEMENT CAN BE APPLIED IN EACH CASE IT MAKES IT DIFFICULT TO ADAPT TO SPECIFIC PHYSICAL OR PERSONAL CIRCUMSTANCES. | Strategic | Plan Area | Plan Area |
| MUPOP/194/2 | Opinion to Pop | Social Policies - Urban Design | UD3 | WOULD LIKE POLICY ON URBAN DESIGN TO BE MORE FLEXIBLE SO AS TO BE LESS PRESCRIPTIVE FOR SITES SUCH AS BACKLAND SITES WHERE THE VANTAGE POINTS ARE LESS CRITICAL. SUGGEST INCLUSION OF "WHERE APPROPRIATE" IN POLICY WORDING OF ud3 TO ACHIEVE THIS | Strategic | Moneymore | Magherafelt |
| MUPOP/338/15 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | TWN Cram opt 2: Subordinate and Ancillary | The suggestion that separation distances between dwellings might be more prescriptively applied could prevent efficient use of housing land, prevent innovative design-led schemes & reduce range & choice of house types. | Strategic | Bellaghy | Moyola |
| MUPOP/338/14 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | TWN Cram opt 2: Subordinate and Ancillary | It is considered that the POP does not adequately justify its reasons for suggesting changes to well established Regional Policy & Guidance e.g. PPS7 and Creating Places. | Strategic | Bellaghy | Moyola |

Neighbouring Amenity

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|--|---|-------------|------------|-----------|
| MUPOP/205/21 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | THE REP AGREES WITH THE PREFERRED OPTION OF INTRODUCING A MINIMUM SEPARATION DISTANCE OF 20M. | Strategic | Plan Area | Plan Area |
| MUPOP/228/28 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN Opt 1: Adopt Current Policy and Guidance | PREFER OPTION 1.WANTS 20M MIN. SEP'N DISTANCE DELETED-TOO RIGID.SUGGESTS ALTERNATIVE WORDING:'ENSURE NEIGHBOUR'S AMENITY IS ADEQUATELY PROTECTED' & THAT AMENITY/STOREY HEIGHT & SLOPE SITE ILLUSTRATION BEST PLACED IN SEPARATE DESIGN GUIDANCE, NOT IN LDP. | Strategic | 0 | |
| MUPOP/233/12 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | Considers this policy to be unnecessary as neighbourin gamenity issues can be addressed under General Principles Planning Policy GP 1. | Strategic | Plan Area | Plan Area |
| MUPOP/239/15 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | Considers this policy to be unnecessary as issue of residential amenity can be addressed under policy GP 1 and supplementary guidance Creating Places. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|--|---|---|-----------|-----------|-----------|
| MUPOP/241/11 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | NEIGHBOURING AMENITY CAN BE ADDRESSED VIA GENERAL PRINCIPLES AND GUIDANCE SUCH AS THAT INCLUDED IN CREATING PLACES. SEPARATION DISTANCES ARE THEREFORE NOT NECESSARY | Strategic | Plan Area | Plan Area |
| MUPOP/246/15 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | CONSIDERS THIS POLICY TO BE UNNECESSARY AS ISSUE OF RESIDENTIAL AMENITY CAN BE ADDRESSED UNDER POLICY GP 1 AND SUPPLEMENTARY GUIDANCE CREATING PLACES | Strategic | Plan Area | Plan Area |
| MUPOP/262/15 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | CONSIDERS THIS POLICY TO BE UNNECESSARY AS ISSUE OF RESIDENTIAL AMENITY CAN BE ADDRESSED UNDER POLICY GP 1 AND SUPPLEMENTARY GUIDANCE CREATING PLACES. | Strategic | Plan Area | Plan Area |
| MUPOP/330/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | AGREE WITH NEIGHBOURING AMENITY PREFERRED OPTION 2 AS IT ENCOURAGES GREATER CONSIDERATION OF SEPARATION DISTANCES & PROVIDES SPECIFIC GUIDANCE & DISTANCES FOR DEALING WITH THE MORE CONTENTIOUS SLOPING SITES, WHERE OVERLOOKING IS MORE LIKELY TO OCCUR. | Strategic | Plan Area | Plan Area |
| MUPOP/334/6 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | THIS PRESCRIPTIVE APPROACH WILL RESTRICT INNOVATIVE DESIGN AND REDUCE THE RANGE AND CHOICE OF HOUSE TYPES AND DESIGN. WHILE IT IS IMPORTANT TO PROTECT NEIGHBOURING AMENITY, SUCH A PRESCRIPTIVE POLICY WILL ONLY SERVE TO FORCE DEVELOPERS AWAY FROM MUDC. | Strategic | Plan Area | Plan Area |
| MUPOP/338/16 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | Whilst amenity of existing residents should be protected from new developments there must be flexibility for developers to design new development which will be economically viable & attractive. | Strategic | Bellaghy | Moyola |
| MUPOP/338/17 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | NB AMEN OPT 2: Minimum dimensions in Policy | It is unclear what is intended in the proposal to avoid tandem development on backland sites - clearly housing need can be sustainably met by more efficient use of urban sites in appropriate circumstances. | Strategic | Bellaghy | Moyola |

|--------------|----------------|--|---|---|-----------|----------|--------|
| MUPOP/338/23 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | MTG NEEDS Opt 2: Tailor Policy for Mid Ulster | If 25% provision is introduced for social housing in the absence of Regional Policy it could have a negative effect on the delivery of affordable family housing in the area. | Strategic | Bellaghy | Moyola |
|--------------|----------------|--|---|---|-----------|----------|--------|

Design & Access Statements

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|---------------------------------------|--|-------------|------------|-----------|
| MUPOP/306/47 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | D&A ST OPT 1: Adopt Current Policy | Appears to be no policy re; Design Concept Statements, Concept Master Plans & Comprehensive Planning. D&AS section is unclear as it interchanges between D&AS and Design Concept Statements Option 1 should be pursued to ensure no weakening of policy. | Strategic | Plan Area | Plan Area |
| MUPOP/330/11 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | D&A ST OPT 2: Policy of Encouragement | BEST PRACTICE GUIDANCE FOR PRODUCING DESIGN & ACCESS STATEMENTS WOULD BE USEFUL & IT SHOULD ACCORD WITH DESIGN MANAGEMENT PRACTICE NOTE 12 PRODUCED BY DEPARTMENT OF INFRASTRUCTURE. | Strategic | Plan Area | Plan Area |
| MUPOP/330/12 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | D&A ST OPT 2: Policy of Encouragement | AN OUTLINE APPLICATIONS JUDGEMENT SHOULD BE USED AS TO WHETHER DESIGN & ACCESS STATEMENTS NEED TO BE APPLIED, CONSIDERING SUCH MATTERS OF DESIGN & ACCESS ARE RESERVED. | Strategic | Plan Area | Plan Area |

HOU 1

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|--|---|-------------|------------|-----------|
| MUPOP/233/14 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU 1 : Quality Residential Development in Urban Areas | Disagrees with stipulation of 25% social housing provision in developments of 50 units or more. Suggests that this should be discussed with housing authority and if not forthcoming by developer, a developer contribution should be sought in lieu. | Strategic | Plan Area | Plan Area |
| MUPOP/228/46 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU 1 : Quality Residential Development in Urban Areas | KEY TO SUCCESSFUL PLACE-MAKING SHOULD ALSO INCLUDE: DEPENDENT ON DENSITY, HEIGHT, SCALE, MATERIALS, DESIGN, QUALITY & USES GOING ON WITHIN THE BUILDINGS AND INTERCONNECTIVITY (LANDSCAPE DESIGN, STREET FURNITURE, PLANTING) | Strategic | Plan Area | Plan Area |
| MUPOP/205/22 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | WHILE THE LAST ELEMENT AGREES WITH THE MINIMUM SEPARATION DISTANCE OPTION, THE REP ALSO URGES THE NEED FOR FLEXIBILITY TOWARDS SEPARATION DISTANCE BECAUSE DISTANCES UNDER 20M CAN OFTEN BE ACCEPTABLE. THEREFORE, THEY SUPPORT THE WORD "NORMALLY" IN POLICY | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|--|--|-----------|-----------|-----------|
| MUPOP/205/24 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | IN ANSWER TO BOTH QUESTIONS AND IN COMMENT ON THE PROPOSED POLICY WORDING, THE REP AGREES WITH THE REQUIREMENT TO HAVE 10% OF THE SITE AREA AS OPEN SPACE. ALSO AGREE THAT THIS CAN BE REDUCED IN A TOWN CENTRE. | Strategic | Plan Area | Plan Area |
| MUPOP/205/25 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | SUGGEST USING THE TERM "AROUND" 10M INSTEAD OF "NOT LESS THAN" 10M IN RELATION MIN. GARDEN SIZE. THIS WILL ALLOW SMALLER GARDENS WHERE THIS IS SUITABLE IN SOME EXAMPLES, SUCH AS SOCIAL HOUSING FOR EXAMPLE. | Strategic | Plan Area | Plan Area |
| MUPOP/205/26 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | IN RELATION TO POLICY REQUIRING A MIX OF HOUSE TYPES TO CATER FOR NEEDS OF ALL, THE REP SUGGESTS THAT THE WORDS, "CATER FOR THE NEEDS OF FAMILIES AND SMALL HOUSEHOLDS" COULD BE REMOVED WITHOUT WEAKENING THE POLICY. | Strategic | Plan Area | Plan Area |
| MUPOP/205/28 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | REP AGREES WITH THE POLICY PROVISION WHICH LIMITS THE DEVELOPMENT OF ZONED HOUSING LAND FOR NON HOUSING USES UNLESS EXCEPTIONALLY IT IS FOR A USE ANCILLARY TO HOUSING DEVELOPMENT | Strategic | Plan Area | Plan Area |
| MUPOP/228/32 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | DISAGREE THAT DEVELOPMENT OF NON-RESIDENTIAL USES ON LAND ZONED FOR HOUSING CONFLICTS WITH PLAN. STATES THAT GREATER MIXED USE DEVELOPMENT WILL ACHIEVE SAFER & SOCIALLY / ECONOMICALLY SUSTAINABLE NEIGHBOURHOOD. OTHER USES eg OFFICES COMPATIBLE WITH HOUSING | Strategic | Plan Area | Plan Area |
| MUPOP/228/33 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | DELETE 1-30 UNITS PER HA IN POLICY. SUGGESTS 'INCREASE TOWN CENTRE DENSITIES TO THE LEVEL OF 2/3 STOREY TERRACED STREETS. QUERY WHAT TANDEM DEVELOPMENT MEANS? SUGGESTS THAT HOUSING WITH MIN. SEPARATION DISTANCES SHOULD BE BEST ARRANGED AS TERRACING. | Strategic | Plan Area | Plan Area |
| MUPOP/228/34 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | AMEND WORDING TO 'PROVIDING WELL LAID OUT TRADITIONAL STREET NETWORKS THROUGH PEDESTRIAN & VEHICULAR CONNECTIONS ROUTES TO OTHER RESIDENTIAL NEIGHBOURHOODS (LAST BULLET POINT ON PAGE 37 OF POP). | Strategic | Plan Area | Plan Area |
| MUPOP/239/19 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | Opposes requirement for 25% social housing in schemes of 50 units or more. Belives this issue should be dealt with by strategic housing authority. Suggests a developer contribution could be enough in lieu of not providing social housing. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|--|---|-----------|-----------|-----------|
| MUPOP/246/18 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | OPPOSES REQUIREMENT FOR 25% SOCIAL HOUSING IN SCHEMES OF 50 UNITS OR MORE. BELIEVES THIS ISSUE SHOULD BE DEALT WITH BY STRATEGIC HOUSING AUTHORITY. SUGGESTS A DEVELOPER CONTRIBUTION COULD BE SOUGHT IN LIEU OF NOT PROVIDING SOCIAL HOUSING. | Strategic | Plan Area | Plan Area |
| MUPOP/249/14 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | Policy must be flexible to allow the separating distances to be a starting point. Quality Residential Environments are still possible where separation distances of under 20m are used. "normally" should be retained and clarity sought on "habitable room." | Strategic | Plan Area | Plan Area |
| MUPOP/249/16 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | 10% OF OPEN SPACE IS ADEQUATE (BUT COULD BE REDUCED IN TOWN CENTRES). The rep is also supportive of the inclusion of landscape strategy in D&AS. | Strategic | Plan Area | Plan Area |
| MUPOP/249/17 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | REGARDING GARDEN SIZES, THE REP PROPOSES THE INTRODUCTION OF THE WORD "AROUND" SO THAT GARDEN SIZES SHOULD BE AROUND 10M. This would ensure gardens of this approximate size but would also allow a degree of flexibility. | Strategic | Plan Area | Plan Area |
| MUPOP/249/18 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | regarding meeting the needs of all - the rep argues for the removal of the reference to "families and small households". The rep states that these terms are superfluous could be removed without weakening policy. | Strategic | Plan Area | Plan Area |
| MUPOP/249/19 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | the rep is supportive of th idea that non residential uses on housing land will conflict with the plan. | Strategic | Plan Area | Plan Area |
| MUPOP/262/20 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | .OPPOSES REQUIREMENT FOR 25% SOCIAL HOUSING IN SCHEMES OF 50 UNITS OR MORE. BELIEVES THIS ISSUE SHOULD BE DEALT WITH BY STRATEGIC HOUSING AUTHORITY. SUGGESTS A DEVELOPER CONTRIBUTION COULD BE SOUGHT IN LIEU OF NOT PROVIDING SOCIAL HOUSING. | Strategic | Plan Area | Plan Area |
| MUPOP/265/6 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | The proposed review of all uncommitted Phase 1 land is urgently required as part of the preparation of the Local Policies Plan. | Strategic | Plan Area | Plan Area |
| MUPOP/306/44 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | Notes there is no reference to multi-functional green space or to the quality (design) of spaces. Recommends that submission of Landscape Strategy should be a requirement rather than 'encouraged' & should also demonstrate support of wildlife. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|--|--|--|-----------|-----------|-----------|
| MUPOP/306/45 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | Policy wording is confusing and unclear. Recommends that the suggested policy as a minimum replicates the wording of the SPPS and PPS7, Policy QD 1 and set out all the criteria which all proposals for residential development will be expected to confirm. | Strategic | Plan Area | Plan Area |
| MUPOP/306/46 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | No recognition that good design can promote biodiversity and encourage wildlife (PPS 7, para 4.3), this is a step backwards in policy formulation for sustainable development and biodiversity. Also applies to open space provision (PPS 7 Para 4.3). | Strategic | Plan Area | Plan Area |
| MUPOP/306/48 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | Policy HOU1 is not sufficiently robust or clear to ensure the creation of quality residential developments which further sustainable development. Also, there appears to be no options or suggested policy for addressing regeneration in urban areas. | Strategic | Plan Area | Plan Area |
| MUPOP/306/49 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | Design and layout of new residential developments should aim to protect & enhance biodiversity & enhance connections between ecological features. Recommends Exeter Residential Design Code & Wildlife Trusts good practice for infrastructure & biodiversity. | Strategic | Plan Area | Plan Area |
| MUPOP/306/50 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | Recommends consideration of nesting & roosting bricks, SUDs, green living roofs, wildlife friendly trees, shrubs and flower rich meadows, maximising of green linkages, wildlife friendly lighting. | Strategic | Plan Area | Plan Area |
| MUPOP/334/7 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | THE RESTRICTION OF DEVELOPMENT ON BACKLAND SITES IS UNCLEAR. WHAT IS MEANT BY THIS? ALSO, THE EFFICIENT USE OF URBAN SITES IS A SUSTAINABLE WAY OF MEETING HOUSING NEED. | Strategic | Plan Area | Plan Area |
| MUPOP/334/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | THERE IS NO EVIDENCE TO SUPPORT THE INCLUSION OF 25% SOCIAL HOUSING ON LARGE SITES. SINCE PPS 22 WAS WITHDRAWN THERE IS NO REGIONAL POLICY ON THIS MATTER. THIS PROPOSAL IS NOT EVIDENCE BASED AND NEED WILL VARY BETWEEN SETTLEMENTS. | Strategic | Plan Area | Plan Area |
| MUPOP/334/9 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | HOU1: Quality Residential Development in Urban Areas | THE PROPOSAL TO REQUIRE 25% SOCIAL HOUSING ON LARGE SITES WILL IMPACT UPON LARGER SETTLEMENTS MORE AS THIS IS WHERE THERE ARE MORE LARGE SITES. THIS WILL IMPACT THE SMALLER SETTLEMENTS WHERE A SOCIAL NEED MAY BE APPARENT. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

CT 1

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|----------------------------------|---|-------------|------------|-----------|
| MUPOP/306/53 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT1: All Residential Development | Policy gives no recognition to the environmental value of countryside. The environment should be explicitly recognised as should avoidance of sensitive areas. Policy appears to finish mid sentence & RSPB reserves right to make further comment. | Strategic | Plan Area | Plan Area |
| MUPOP/306/54 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT1: All Residential Development | Sustainable approach to dealing with waste water should be a priority requirement – for example linking dwellings into specially constructed wetlands for such purposes. | Strategic | Plan Area | Plan Area |
| MUPOP/318/4 | Opinion to Pop | Social Policies - Accommodating Growth and Creating Places | CT1: All Residential Development | Mid Ulsters housing needs should be regularly reviewed so that housing market/demand changes can be accommodated. | Strategic | Plan Area | Plan Area |

Single Dwelling Policy Approach

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|---|---|-------------|------------|-----------|
| MUPOP/146/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | SNG DWL OPT 2: More flexible approach | The policy for rural housing, while more flexible does not differ significantly from PPS 21, which offers strict controls on rural housing. Implication that policy wont be capable of producing the number of rural houses required in the preferred option? | Strategic | Plan Area | Plan Area |
| MUPOP/228/38 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | SNG DWL OPT 1: Adopt existing Policy Approach | 'PPS 21 ADAPTS A POLICY APPROACH THAT IS MUCH STRICTER THAN WE REQUIRE IN MID-U'-QUERIES THE VALIDITY OF THIS STATEMENT. 'PPS21 DOES NOT RECOGNISE THE PATRICULAR NEEDS OF OUR RURAL AREA'- REQUESTS THAT THIS STATEMENT BE OMITTED. | Strategic | Plan Area | Plan Area |
| MUPOP/306/55 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | SNG DWL OPT 2: More flexible approach | Does not agree with this preferred option . Supports option 1 (Existing Policy) in the interests of sustainable development. Option 1 already provided flexibility under special and domestic circumstances. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|---------------------------------------|---|-----------|-----------|-----------|
| MUPOP/319/21 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | SNG DWL OPT 2: More flexible approach | ENCOURAGES ADOPTING OPTION 2 A MORE FLEXIBLE APPROACH; SIMILAR TO PPS21 BUT LITTLE MORE FLEXIBLE; SHAPED & DESIGNED TO MEET MID ULSTER'S SPECIFIC NEEDS & RURAL POPULATION; RECOGNISING AGING POPULATION & CARERS ROLE IN SUPPORTING A VIBRANT RURAL COMMUNITY. | Strategic | Plan Area | Plan Area |
| MUPOP/330/13 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | SNG DWL OPT 2: More flexible approach | AGREE WITH PREFERRED OPTION FOR SINGLE WELLINGS IN THE COUNTRYSIDE (OPTION 2) WHICH INTRODUCES A POLICY THAT IS SIMILAR IN SPIRIT TO THE OUTGOING PPS21 BUT IS TAILORED TO REFLECT THE PARTICULAR NEEDS OF MID ULSTER. | Strategic | Plan Area | Plan Area |
| MUPOP/340/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | SNG DWL OPT 2: More flexible approach | THE PROPOSED RURAL POLICY IS LARGELY WELCOMED. | Strategic | Plan Area | Plan Area |

CT2

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|------------|----------------|--|-----------------------------------|--|-------------|------------|-----------|
| MUPOP/25/1 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | Existing polict CTY10 should be revised so that well defined, integrated sites with own independent access could be approved without being visually linked or sited to a cluster with established group of buildings owned on the farm. | Strategic | Plan Area | Plan Area |
| MUPOP/25/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | CTY 10 is generally geared towards an immediate family member of the farm business due to its current restrictions, and another person cannot apply on same farm within 10 years, if this was lifted other family members could apply. | Strategic | Plan Area | Plan Area |
| MUPOP/25/3 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | people with well matured portions of land ad their property without DARD ID's. character of properties are distinguished from other rural house types. A site could be granted if land has well matured site boundaries and not detract from privacy of adj lan | Strategic | Plan Area | Plan Area |
| MUPOP/25/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | using existing access causing concern in todays climate with Mortgage Lenders. Lenders are now refusing applications where 3rd parties are associated with existing access. This is another reason not having to visually link/cluster or use existing accesses. | Strategic | Plan Area | Plan Area |
| MUPOP/41/1 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | DESPITE LAND AVAILABILITY CURRENT PLANNING RESTRICTIONS IN COUNTRYSIDE ARE FORCING YOUNGER GENERATIONS OUT OF AREA. AUGHAMULLAN, DERRYLOUGHAN & DERRYTRESK WITHIN WIDER WASHINGBAY WARD REQUIRE SINGLE & GROUPS / CLUSTERS OF LOW DENSITY HOUSING. | Strategic | Plan Area | Plan Area |

| | | | | | | | |
|--------------|----------------|--|-----------------------------------|---|----------------|-----------|-----------|
| MUPOP/228/42 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | DWELLING TO MEET PERSONAL/DOMESTIC CIRCUMSTANCES- THIS CLAUSE OPEN TO ABUSE. IT OPENS DOORS TO PERSONS WITH NO CONNECTION TO LAND/CARING WORK COMMITMENTS IN RURAL CONTEXT. OVERTIME RESULTING IN LOW DENSITY, CAR DEPENDANT RURAL SUBURBAN LIVING. | Strategic | Plan Area | Plan Area |
| MUPOP/228/43 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | AGREE POLICY FOR DWELLING FOR A CARER SATISFACTORILY CATERERS FOR CARE-GIVERS/SOMEONE AVAILING OF CARE- AMEND WORDING TO INCLUDE 'A SEPARATE 'BUT' ATTACHED RESIDENTIAL UNIT 'AGREE WITH DWELLING IN FARM CLUSTER ALREADY PROVIDED FOR IN 'BUILDING IN TRADITION' | Strategic | Plan Area | Plan Area |
| MUPOP/239/20 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | Policy CT2 (h) should be removed given the high level of population (11%) that provide care within the district and that policy (g) provided for dwellings to meet personal and domestic circumstances. Queries how this development would be conditioned. | Strategic | Plan Area | Plan Area |
| MUPOP/242/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | IN SUPPORT OF THE PROPOSAL TO OPTION 2 - A MORE FLEXIBLE APPROACH TO SINGLE DWELLINGS IN THE COUNTRYSIDE. THIS WILL ENABLE MORE PEOPLE TO LIVE IN A RURAL SETTING AND ANOTHER REASON WHY THERE IS NOT THE NEED FOR ADDITIONAL HOUSING IN KILLEEN. | Part-Strategic | Killeen | Torment |
| MUPOP/246/19 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | POLICY CT2 (H) SHOULD BE REMOVED GIVEN THE HIGH LEVEL OF POPULATION (11%) THAT PROVIDE CARE WITHIN THE DISTRICT AND THAT POLICY (G) PROVIDES FOR DWELLINGS TO MEET PERSONAL AND DOMESTIC CIRCUMSTANCES. QUERIES HOW THIS DEVELOPMENT WOULD BE CONDITIONED. | Strategic | Plan Area | Plan Area |
| MUPOP/252/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | FEELS THAT A DWELLING IN THE COUNTRYSIDE SHOULD BE FAVOURABLY CONSIDERED WHEN A FAMILY OR INDIVIDUAL HAS LIVED WITHIN THAT LOCALITY FOR A NUMBER OF YEARS FOR EXAMPLE IN EXCESS OF 10.THIS SHOULD BE INCLUDED IN CT2. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|-------------|----------------|--|-----------------------------------|---|--------------------------|---------------|-----------|
| MUPOP/252/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | MAIN REASONS FOR SUPPORTING CHANGE TO CT2 ARE TO ALLOW THOSE NOT FROM A FARMING BACKGROUND TO LIVE IN THE COUNTRYSIDE. THIS WILL SUPPORT THOSE WHO HAVE LIVED IN RURAL AREAS ALL THEIR LIFE I.E. YOUNG PEOPLE TO CONTINUE TO STAY IN THESE AREAS. | Strategic | Plan Area | Plan Area |
| MUPOP/263/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | REGARDS CLUSTERING SUGGESTS ASSESSING NON FARMING DWELLERS APPLICATIONS BENEFITTING FROM A COUPLE OF BUILDINGS ONLY & WHERE SITE INTEGRATES CAUSING NO DEMONSTRABLE HARM TO LANDSCAPE OR VISUAL AMENITY. GIVES EXAMPLES OF PROPERTIES & SITES THIS COULD INCLUDE. | Strategic | Plan Area | Plan Area |
| MUPOP/263/3 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | MORE FLEXIBLY COULD BE EXERCISED WHERE NON FARMING RESIDENTS HAVE A SUFFICIENTLY INTEGRATED SITE BUT MAY NOT ALWAYS SATISFY ALL THE CRITERIA ATTACHED TO CLUSTERING. AT PRESENT LITTLE SCOPE FOR NON FARMING DEVELOPMENT IN THE COUNTRYSIDE. | Strategic | Plan Area | Plan Area |
| MUPOP/263/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | WANTS CONSIDERATION GIVEN TO A SECOND HOUSE ON A FARM WITHIN 10 YEARS (NO LESS THAN FIVE YEARS AFTER THE GRANTING OF PERMISSION) AS AN EXCEPTIONAL CASE WHERE THE SITE IS SUFFICIENTLY INTEGRATED & AN EXISTING ACCESS & SERVICES CAN BE USED. | Strategic | Plan Area | Plan Area |
| MUPOP/282/1 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | EXPRESSED A DESIRE FOR MORE HOUSING TO BE ALLOWED IN DERRY'GHAN, DERRY'TSK AND AUGHAMULLAN SO PEOPLE CAN LIVE CLOSE TO FAMILIES WHO HAVE STRONG TIES TO AREA. WOULD URGE PLANNERS TO BRING FORWARD A TOWNLAND POLICY SO PEOPLE CAN LIVE IN THEIR OWN TOWNLANDS | Strategic | Torrent Rural | Torrent |
| MUPOP/282/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | They argue that creating a settlement, would mean that those immediately outside the limits would be unable to secure housing unless they were employed in agriculture or owned a business and would have to "clear off and live somewhere else." | Strategic | Torrent Rural | Torrent |
| MUPOP/282/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | THEY DESCRIBE THE AREA WHICH SHOULD BE SUBJECT TO THE "TOWNLAND POLICY." IT SHOULD BE "FROM WASHINGTON, THEN ALONG REENADERRY ROAD FROM FALLS CORNER TO SLIGHTLY BEYOND DERRYVARN ROAD." | Strategic/ Site Specific | Torrent Rural | Torrent |

|--------------|----------------|--|-----------------------------------|--|--------------------------|-----------|-----------|
| MUPOP/293/7 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | PREVIOUS REPLACEMENT POLICIES (CTY2) GIVE RISE TO UNWARRANTED DESTRUCTION OF VERNACULAR BUILDINGS. EXAMPLE GIVE (H/2008/049/F) WHERE VERNACULAR BUILDING IMPORTANT TO AREAS HERITAGE WAS REFUSED FOR FARM STORAGE LEAVING OWNER NO CHOICE BUT TO DEMOLISH. | Strategic/ Site Specific | Plan Area | Plan Area |
| MUPOP/293/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | ASKS LDP TO ENCOURAGE THE RETENTION OF DWELLINGS OF VERNACULAR MERIT AND THEIR ADJACENT OR OFF SITE REPLACEMENT WHILST ALLOWING THEIR RETENTION FOR NON DOMESTIC USE TO PRESERVE THEM AS IMPORTANT RECORD OF AREA'S BUILT HERITAGE. Current planning policies are not flexible enough and must be tailored to the individual needs of dwellers; for example, a substantial number of rural dwellers are also carers and rural dwellers may depend on family owned land for 'affordable housing. | Strategic | Plan Area | Plan Area |
| MUPOP/294/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | Current planning policies are not flexible enough and must be tailored to the individual needs of dwellers; for example, a substantial number of rural dwellers are also carers and rural dwellers may depend on family owned land for 'affordable housing. | Strategic | Plan Area | Plan Area |
| MUPOP/296/13 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | EXISTING POLICY IN PPS 21 PROVIDES A SUSTAINABLE BASIS FOR FUTURE DEVELOPMENT. RELAXATION OF RURLA POLICY WILL LEAD TO MUCH GREATER THAN EXPECTED NO. OF NEW DWELLINGS. CT2 PROVIDES TOO MUCH SCOPE FOR NEW HOUSING. | Strategic | Plan Area | Plan Area |
| MUPOP/306/56 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | Wording not as robust as that contained in Para 6.73 of SPSPs & should be revisited introduces unnecessary flexibility, eg. removal of replacement dwelling siting requirement. See also CT1 Comments in respect of ecosystem services, sensitive sites, SUDs. | Strategic | Plan Area | Plan Area |
| MUPOP/318/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | Tyrone GAA is very supportive of proposed greater flexibility re Housing in the Countryside, the acceptance of the central role played by carers in rural communities and the retention/development of the dispersed rural communities concept. | Strategic | Plan Area | Plan Area |
| MUPOP/318/6 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | More thought needs to be given to the appropriateness of obliging new dwellings to be built as part of farm clusters and to building in attachment to place/community and kinship links as planning considerations. | Strategic | Plan Area | Plan Area |
| MUPOP/319/22 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | SUGGESTS SIZE OF GAP SITE BE INCREASED TO NOT MORE THAN 90-100M FOR 2 DWELLINGS & 45-50M FOR SINGLE DWELLINGS, TO ALLOW APPLICANT TO DESIGN & BUILD REASONABLY STANDARD SIZED DWELING WITH AMPLE SPACE FOR PRIVATE AMENITY & ENJOYMENT OF THE PROPERTY. | Strategic | Plan Area | Plan Area |

|--------------|----------------|--|-----------------------------------|--|-----------|-----------|-----------|
| MUPOP/319/23 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | REQUESTS MORE CLARIFICATION ON WHAT CONSTITUTES A ROAD FRONTAGE BUILDING AND WHETHER OR NOT THE GAP SITE IS MEASURED FROM BUILDING TO BUILDING OR PLOT TO PLOT. | Strategic | Plan Area | Plan Area |
| MUPOP/319/24 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | IN RELATION TO REPLACEMENT DWELLINGS STATES TERM 'SUBSTANTIALLY INTACT' NEEDS CLARIFICATION. SUGGESTS CHARACTERISTICS OF A DWELLING SHOULD BE LISTED & CLARIFICATION GIVEN AS TO HOW MANY CHARACTERISTICS MUST STILL EXIST WITHIN THE DWELLING TO BE REPLACED. | Strategic | Plan Area | Plan Area |
| MUPOP/319/25 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | APPLAUDS DWELLING IN A FARM CLUSTER POLICY. HOWEVER REQUESTS CLARIFICATION ON MINIMUM SIZE A FARM SHED WILL NEED TO BE TO QUALIFY AS A SUBSTANTIAL FARM BUILDING. | Strategic | Plan Area | Plan Area |
| MUPOP/319/26 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | WELCOMES DWELLING FOR CARER OR SOMEONE AVAILING OF CARE POLICY. HOWEVER REQUESTS MUDC CONSIDER ALLOWING A SEPARATE DETACHED RESIDENTIAL UNIT FOR A CARER WITHIN THE CURTILAGE OF A RESIDENTIAL UNIT PROVIDED ALL SERVICES & AMENITIES ARE SHARED. | Strategic | Plan Area | Plan Area |
| MUPOP/319/27 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | APPROVE OF POLICY FOR DWGS FOR A BUSINESS ENTERPRISE. THIS WILL ALLOW FOR OWNERS AND MANAGERS OF RURAL BUSINESS TO LIVE ON SITE FOR SECURITY REASONS AND ENCOURAGE HOMEWORKING. THIS WILL ALSO REDUCE THE DEPENDENCY ON THE CAR AND TRAVEL TO WORK ELSEWHERE. | Strategic | Plan Area | Plan Area |
| MUPOP/319/28 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | AGREES IT'S IMPORTANT THE IMPACT OF A NEW DWELLING ON THE RURAL LANDSCAPE & CHARACTER MUST REMAIN STEADFAST IN CONSIDERATION OF ALL APPLICATIONS IN COUNTRYSIDE. | Strategic | Plan Area | Plan Area |
| MUPOP/323/1 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | REMOVE WORD "SUBSTANTIAL" FROM PART (A) OF THE POLICY - DWELLING ON A NON FARM CLUSTER. THE INCLUSION OF THE TERM "SUBSTANTIAL" MAKES THE POLICY TOO ONEROUS. ALSO REMOVE REFERENCE TO "SUBSTANTIAL" FROM REPLACEMENT POLICY AS WELL AS IT IS V RESTRICTIVE. | Strategic | Plan Area | Plan Area |
| MUPOP/323/2 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | REMOVE THE PRESCRIPTIVE SITE DIMENSIONS OF 35M & 70M. THESE ARE TOO SMALL AND DO NOT TAKE INTO ACCOUNT TOPOGRAPHY OR OTHER SITE SPECIFIC CIRCUMSTANCES. ALSO, CLARITY IS SOUGHT ON WHETHER THE DIMENSIONS ARE MEASURED GABLE TO GABLE OR ARE BASED ON SITE WIDTH | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030

| | | | | | | | |
|--------------|----------------|--|-----------------------------------|---|-----------|-----------|-----------|
| MUPOP/323/3 | Opinion to Pop | | CT2: Dwellings in the Countryside | AGAIN, IN RELATION TO THE POLICY WHICH IS PROPOSED FOR INFILL SITES, THE WORDING SHOULD BE CHANGED TO PERMIT A DWELLING ON A SMALLER INFILL SITE BETWEEN TWO "BUILDINGS" AS OPPOSED TO TWO "DWELLINGS." THE INCLUSION OF THE WORD "DWELLINGS" IS TOO ONEROUS. | Strategic | Plan Area | Plan Area |
| MUPOP/323/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | THERE APPEARS TO BE A CONTRADICTION IN TERMS IN REGARD TO CT 2 - PART E. POLICY SAYS "CONSIDERATION WILL BE GIVEN TO A SITE WHICH IS VISUALLY LINKED TO A FARM." SHOULD THIS NOT SAY CONSIDERATION WILL BE GIVEN TO A SITE WHICH IS NOT VISUALLY LINKED? | Strategic | Plan Area | Plan Area |
| MUPOP/323/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | SUGGESTED ALTERNATIVE WORDING TO POLICY ON DWELLINGS ON A FARM CLUSTER (SEE REP FOR EXACT PROPOSALS). EXISTING POLICY IN CTY10 AND SPPS IS SUFFICIENTLY RESTRICTIVE IN THIS REGARD AND THE PROPOSED POLICY ON ADDS MORE RESTRICTIONS. | Strategic | Plan Area | Plan Area |
| MUPOP/323/6 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | NOTWITHSTANDING THE SUGGESTED CHANGES TO POLICY, THE REP IS SUPPORTIVE OF THE POPS SUGGESTION TO OFFER A "LITTLE MORE FLEXIBILITY BY ADDING ADDITIONAL CIRCUMSTANCES IN WHICH A SINGLE DWELLING MAY BE ACCOMMODATED." | Strategic | Plan Area | Plan Area |
| MUPOP/330/14 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | IN REFERENCE TO POLICY CT2 DWELLING IN AN EXISTING CLUSTER, AN ELEMENT OF FLEXIBILITY SHOULD BE APPLIED IN RELATION TO A FOCAL POINT AS THE USE OF CROSSROADS OR A COMMUNITY BUILDING IS VERY RESTRICTIVE. | Strategic | Plan Area | Plan Area |
| MUPOP/330/15 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | POLICY CT2 DWG INFILLING A SMALL GAP SITE IS VERY RESTRICTIVE AS IT IMPOSES A SPECIFIC LENGTH & DOES NOT TAKE ACCOUNT OF THE SPECIFIC SITE CONTEXT. ORIGINAL WORDING IN PPS21 CTY8 WHICH REFERS TO THE "EXISTING DEVELOPMENT PATTERN" SHOULD BE RETAINED. | Strategic | Plan Area | Plan Area |

CT4

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|-------------|----------------|--|----------------------------------|--|-------------|------------|-----------|
| MUPOP/293/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT4: Dispersed Rural Communities | AGREES WITH THE APPROACH TO CLUSTER DEVELOPMENT WITHIN DRC'S AND THAT DESIGN AND ENVIRONMENTAL SUSTAINABILITY OF THE CONSTRUCTION SHOULD BE IMPORTANT. | Strategic | Plan Area | Plan Area |

General Comments Housing - Rural and Urban

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|----------------------|--|-------------|------------|-----------|
| MUPOP/205/23 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | IN RESPONSE TO THE QUESTION THE POP WOULD WELCOME THE NEED FOR ILLUSTRATIONS ON SLOPING SITES ALTHOUGH THEY SHOULD BE USED AS A STARTING POINT FOR ASSESSING APPLICATIONS WHILE ALSO CONSIDERING PLANTING, DESIGN, LAYOUT ETC. | Strategic | Plan Area | Plan Area |
| MUPOP/205/27 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | THE REP WOULD WELCOME THE INTROCUCTION OF LDP GUIDANCE ON SUBMITTING D&AS, AS LONG AS THE GUIDANCE IS IN KEEPING WITH ANY LEGISLATIVE REQUIREMENTS AND DMPN's. | Strategic | Plan Area | Plan Area |
| MUPOP/228/36 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | 'A MOVE AWAY FROM A ONE-SIZE FITS ALL RURAL PLANNING POLICY & MOST RURAL PEOPLE ARE NOT FARMERS- PLANNING NEEDS TO BE MORE RESPONSIVE TO LOCAL NEEDS' DISAGREES WITH THESE STATEMENTS (FROM COMMUNITY PLAN) AND ASK THAT THEY BE DELETED. | Strategic | Plan Area | Plan Area |
| MUPOP/228/37 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | 'BUILDING ON TRADITION'- IS AN EFFECTIVE DESIGN DOCUMENT ENCOURAGING MORE SUSTAINABLE BUILDING DESIGNS IN COUNTRYSIDE. RURAL CHARACTER OF MID-U NOT DRAMTICALLY DIFFERENT FROM OTHER RURAL AREAS TO WARRANT ITS OWN BESPOKE RURAL DESIGN GUIDANCE. | Strategic | Plan Area | Plan Area |
| MUPOP/249/7 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | in response to the question, should housing land be time bound? The rep does not agree that zonings should be time bound but should instead be monitored every 5 years. If permission has been sought on a site then it should not be de-zoned. | Strategic | Plan Area | Plan Area |
| MUPOP/249/15 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | THE INCLUSION IN THE PLAN STRATEGY OF ILLUSTRATIONS RE SLOPING SITES IS WELCOME BUT PRINCIPLES OF FLEXIBLE DECISION MAKING WOULD NEED TO BE APPLIED AS WELL. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|-------------------|--|----------------------|--|-----------|-----------|-----------|
| MUPOP/265/7 | Letter of Support | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | the proposal on page 24 that 'existing zoned housing land be time limited allowing for de-zoning if not acted on and replaced by alternative land for housing' is supported. | Strategic | Plan Area | Plan Area |
| MUPOP/265/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | lack of commitment to develop undeveloped phase 1 land clearly puts potential developers of phase 2 land at a distinct disadvantage especially those with small holdings that would not prejudice any comprehensive development objectives. | Strategic | Plan Area | Plan Area |
| MUPOP/265/10 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | irrespective of quantity & Location of proposed housing land throughout towns and villages, the council will have no direct influence through planning process in their delivery. | Strategic | Plan Area | Plan Area |
| MUPOP/265/11 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | delivery of rural single houses is outside direct control of council irrespective of which rural policy is in due course adopted. There is no direct link between the policy adopted and the quantity of rural dwellings built in due course. | Strategic | Plan Area | Plan Area |
| MUPOP/284/8 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | Recommends that rural development should concentrate around existing buildings and that 'Building on Tradition' is given particular attention. | Strategic | Plan Area | Plan Area |
| MUPOP/284/9 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | The repair of traditional buildings with sensitive methods has the potential to contribute positively to the wider economic tourist value of the area. | Strategic | Plan Area | Plan Area |
| MUPOP/284/11 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | There are opportunities to repair reuse and extend existing traditional rural properties, currently under threat, which if sensitively repaired would contribute to the wider heritage asset. | Strategic | Plan Area | Plan Area |
| MUPOP/296/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | HOUSING LAND SHOULD NOT BE ZONED IN PH 1&2. THIS APPROACH HAS LED TO UNCERTAINTY WHICH HAS DEPRESSED THE HOUSING MARKET. A PLENTIFUL SUPPLY OF LAND SHOULD BE ALLOCATED SO AS TO ALLOW LAND TO BE DELIVERED ON A PHASED BASIS, GOVERNED BY DEMAND. | Strategic | Plan Area | Plan Area |
| MUPOP/306/51 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | Recommends that the 'Housing in Countryside' subject is returned to the 'Development in Countryside' subject as this is more logical and reflects the approach in Regional Objectives and Policy. | Strategic | Plan Area | Plan Area |
| MUPOP/306/52 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | GEN: General Comment | Welcomes recognition of environmental considerations in the location, siting and design in the countryside but should be included within overarching development in the countryside (refers to paragraph 6.65 of SPPS). | Strategic | Plan Area | Plan Area |

| MUPOP/220/5 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Generally supportive of Policy ECON 2 Economic Development in the Countryside to ensure a more flexible and responsive approach to proposals for expansion and development of existing employment uses. | Strategic | Maghera | Carntogher |
| MUPOP/223/37 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Mineral development projects should be explicitly mentioned as candidate sites under policy ECON 2 - Economic Development in the Countryside. This is because they make a significant contribution to the economy and need a rural location. | Strategic | Plan Area | Plan Area |
| MUPOP/223/38 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Existing mineral sites are industrial sites and should be explicitly mentioned under policy ECON 3 Protection of zoned land and existing economic development sites as a candidate for protection. | Strategic | Plan Area | Plan Area |
| MUPOP/225/1 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | KDM hire request that KDM hire premises in Cookstown is designated as a Rural Industrial Policy Area. This is in recognition of the potential for future expansion, significance of the existing business and to create new employment opportunities. | Strategic/ Site Specific | Cookstown Rural | Cookstown |
| MUPOP/225/2 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Land owned by KDM premises should be designated as a Rural Industrial Policy Area. | Strategic/ Site Specific | Cookstown Rural | Cookstown |
| MUPOP/225/3 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Land south of and adjacent to existing KDM Hire identified as being suitable and available for future expansion of KDM Hire. | Strategic/ Site Specific | Cookstown Rural | Cookstown |
| MUPOP/227/1 | Letter of Support | Economic Policies - Economic Development | ECN Opt 1: Equal Share | Supports the Councils preferred option to provide an equal share of economic development land across each of the towns. | Strategic | Plan Area | Plan Area |
| MUPOP/227/2 | Letter of Support | Economic Policies - Economic Development | ECN Opt 1: Equal Share | Supports the economic growth options as per pages 124-132 of the plan. | Strategic | Plan Area | Plan Area |
| MUPOP/228/61 | Opinion to Pop | Economic Policies - Economic Development | ECON1: Economic Development in Settlements | Agrees with the removal of floor space restrictions within reason suggesting the following policy rewording: 'Within towns, proposals for economic development on land zoned for such purposes will conform with the plan, as will proposals within the existing urban development where the size, scale, form and massing can be integrated into the existing context without being detrimental to town character'. | Strategic | Plan Area | Plan Area |
| MUPOP/228/62 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Suggests following policy rewording of Policy ECON 2 (Bullet point 6) 'can be accommodated in the countryside without harming its setting & biodiversity quality'. | Strategic | Plan Area | Plan Area |
| MUPOP/228/63 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Suggests policy rewording for policy ECON 2 (Bullet point 7) : 'Where practicable centre of settlement, or failing that edge of settlement location will be favoured' | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|---|---|---------------|-----------|-----------|
| MUPOP/228/64 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Suggests an amended policy wording to ECON 3 Protection of Zoned land and Existing Economic Development Sites to include 'place-making & social cohesion an community/employment benefits' Also suggests including at end of policy '(environmental) and/or agricultural cultivation (benefits)'. Request for lands adjacent and south west of COU 8(Industrial Zoning at Creagh) to be zoned for industry. | Strategic | Plan Area | Plan Area |
| MUPOP/237/3 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Request for lands adjacent and south west of COU 8(Industrial Zoning at Creagh) to be zoned for industry. | Site Specific | Creagh | Moyola |
| MUPOP/239/26 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Supportive of Option 2 | Strategic | Plan Area | Plan Area |
| MUPOP/244/2 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Welcomes the flexibility contained within suggested policy Econ 2. They are supportive of the provision for expansion within the curtilage as well as major industry where there is a significant economic benefit to the regional economy. | Strategic | Plan Area | Plan Area |
| MUPOP/244/3 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | Welcomes the support shown for Mid Ulster's strong construction and manufacturing base. Creagh concrete is an example of such a native industry and therefore, they request that both sites are afforded a protective land use zoning to allow growth. | Strategic | Plan Area | Plan Area |
| MUPOP/244/4 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Request for lands at Creagh Road to be zoned and protected for industry / employment use. Current location outside any such zoning is compromising the businesses ability to expand. | Site Specific | Creagh | Moyola |
| MUPOP/244/5 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Site specific reasons for zoning land at Creagh- good transport links, brownfield site with long running history of development. Development here would ease pressure on greenfield sites within rest of district. | Site Specific | Creagh | Moyola |
| MUPOP/244/6 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Planning history shows a firm intent on behalf of Creagh to develop the site for industry. They also illustrate their intentions to access the site from Creagh Industrial Park. | Site Specific | Creagh | Moyola |
| MUPOP/244/7 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | There are a range of surrounding land uses such as anaerobic digester, manufacturing, recycling etc. and expansion of Creagh would be compatible with all of these. | Site Specific | Plan Area | Plan Area |
| MUPOP/244/8 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | The same rationale for zoning industrial land at this location in the current plan (Magherafelt 2015) applies today. | Site Specific | Plan Area | Plan Area |
| MUPOP/244/10 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Request to include Creagh concrete lands at Ardboe aerodrome within the industrial zoning to help protect this long established local business. | Site Specific | Plan Area | Plan Area |
| MUPOP/246/26 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Supportive of Option 2- Flexible and tailored approach to economic development in mid ulster | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|--|---|---|--------------------------|----------------------|----------------|
| MUPOP/248/5 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Believes rural communities should not be disadvantaged by having to move to different locations to set up businesses and the opportunity to facilitate economic growth in rural areas should be promoted. | Strategic/ Site Specific | Plan Area | Plan Area |
| MUPOP/252/6 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Supports the proposal that policy should allow for small enterprises on edge of settlement locations. | Strategic | Plan Area | Plan Area |
| MUPOP/263/6 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Wants consideration given to the promotion of economic growth & security of zoned land COU 10 at Creagh. | Strategic/ Site Specific | Creagh | Moyola |
| MUPOP/263/7 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Welcomes more flexibility for rural businesses many of which have been established in the countryside for decades. | Strategic | Plan Area | Plan Area |
| MUPOP/263/8 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Applications to expand rural enterprises should be based on merit and need of business and not restricted in terms of existing scale. Each case should be weighed accordingly. This must also be assessed against environmental criteria. | Strategic | Plan Area | Plan Area |
| MUPOP/264/18 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Welcomes the more flexible approach to economic development as laid out in suggested policy ECON 1. | Strategic | Plan Area | Plan Area |
| MUPOP/264/19 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | Flexible approach should be borne out in approach to KSR on economic sites. Use class B1(a) for example is currently restricted to town centre. More flexibility needed on this as suggested in policy review paper and SPPS. | Strategic | Plan Area | Plan Area |
| MUPOP/264/21 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Welcomes the simplified policy approach to ECON 3. | Strategic | Plan Area | Plan Area |
| MUPOP/264/23 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Exception to policy should read as important community 'and/or' employment benefits. | Strategic | Plan Area | Plan Area |
| MUPOP/266/6 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | Request for lands at Ardboe Aerodrome to be included as a strategic economic development/employment area. | Strategic/ Site Specific | Clogher Valley Rural | Clogher Valley |
| MUPOP/272/7 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Welcomes the general thrust of economic policies however the requirement to 'conform' to the plan may dissuade investment. Should be re-worded to 'general' conformity. | Strategic | Plan Area | Plan Area |
| MUPOP/278/5 | Opinion to Pop | Economic Policies - Economic Development | Cookstown Settlement | Existing Key Site Requirement of Cookstown Area Plan, industrial Zoning I6, refers to an Eastern Distributor Road. This is considered out of date as it would prejudice implementation of the new proposed by-pass. | Site Specific | Cookstown | Cookstown |
| MUPOP/279/2 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Supports Creagh remaining a candidate for a Rural Industrial Policy Area with the retention of zoning COU 10 to be included within this allocation. | Part-Strategic | Creagh | Moyola |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|-------------------|--|---|--|----------------|-------------------|----------------|
| MUPOP/279/3 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Reasons for including COU 10 within a Rural Industrial policy Area ; 1.This area is readily recognised as a location for industrial and business development. 2. It will deliver economic growth and provide employment opportunities. | Part-Strategic | Creagh | Moyola |
| MUPOP/279/4 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Supports policy ECON 3 and asserts that it is linked to zoning COU 10.The importance of protecting zoned land should be upheld in the interest of prosperity, Job creation and economic growth. | Part-Strategic | Creagh | Moyola |
| MUPOP/281/7 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Dalradian welcomes a more flexible rural policy in regards to economic development. However, they would argue that because employment uses are still constrained in the countryside, there should be a specific policy for promoting new minerals development. | Strategic | Plan Area | Plan Area |
| MUPOP/281/8 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | In relation to workshops (key question 1) there should be no restriction on size, where it can be demonstrated that development can still take place appropriate to the scale and nature of the use provided. | Strategic | Plan Area | Plan Area |
| MUPOP/281/9 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | Dalradian supports all the approaches alluded to in second Key Question on P. 61 of the POP but would also re iterate that policy should facilitate new mineral exploitation | Strategic | Plan Area | Plan Area |
| MUPOP/281/10 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | Dalradian supports the introduction of RIPA's's but reiterates the view that because mineral development invariably takes place in the rural area, specific zoned economic development areas in the countryside, cannot be limited to RIPA's. | Strategic | Plan Area | Plan Area |
| MUPOP/296/14 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Option 2 is the best approach for Mid Ulster. Policy should include comment on the need to create significant landscape buffers at the edge of commercial / industrial sites. | Strategic | Plan Area | Plan Area |
| MUPOP/297/9 | Letter of Support | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | The preferred option which would permit small economic enterprises on edge of settlement limits such as Aghinduff/Cabragh is welcomed. However, this policy should apply to villages as well as the candidate areas for rural industrial policy areas. | Strategic | Aghinduff/Cabragh | Clogher Valley |
| MUPOP/299/6 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Supports the Councils preferred option to Economic development in Mid Ulster. | Strategic | Plan Area | Plan Area |
| MUPOP/299/10 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Welcomes the principle of Rural Industrial Policy Areas as it will ensure control of where it can be located and will help accommodate entrepreneurship and economic development in rural areas. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|-------------------|---|---|---|--------------------------|------------|----------------|
| MUPOP/300/9 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | The preferred option would permit small economic enterprise on edge of settlement locations e.g. Aughnacloy is welcomed. However this policy should specifically apply to villages as well as the candidate areas for Rural Industrial Policy Areas. | Strategic | Aughnacloy | Clogher Valley |
| MUPOP/301/9 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | It is not clear how the Council proposes to test proposals under this policy where it states that proposals will need to be 'firm and not speculative'. | Strategic | Plan Area | Plan Area |
| MUPOP/301/10 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Welcomes policy Econ 3 regarding 'community and employment benefits' which accords with the SPPS. Change of use within 'settlements' appears however to be a relaxation of PPS/SPPS and suggests that the test for determining need should be suitably robust | Strategic | Plan Area | Plan Area |
| MUPOP/301/11 | Opinion to Pop | Economic Policies - Economic Development | ECON4: Development Incompatible with Economic Development Uses | Welcomes policy ECON 4. We would suggest that for purposes of clarity that the phrasing of the proposed policy includes this 'new or expanded' uses wording as per the SPPS. | Strategic | Plan Area | Plan Area |
| MUPOP/304/10 | Letter of Support | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | The preferred option 'more flexible approach tailored to MU' would permit small economic enterprise on edge of settlement locations i.e. Benburb is welcomed - however this policy should specifically apply to villages as well as Rural Industrial Policy Areas | Strategic | Benburb | Dungannon |
| MUPOP/305/8 | Opinion to Pop | Economic Policies - Economic Development | ECN Opt 1: Equal Share | Preferred option is noted - however to fulfil SPG4, consideration should be given to zoning an appropriate amount of land within these villages i.e. Benburb | Strategic | Benburb | Dungannon |
| MUPOP/305/10 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | The preferred option would permit small economic enterprise on edge of settlement locations such as Benburb is welcomed - However this policy should specifically apply to villages as well as Rural Industrial Policy Areas. | Strategic | Benburb | Dungannon |
| MUPOP/306/65 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Policy contains no requirement to demonstrate no detrimental impact on biodiversity or sensitive areas and features. | Strategic | Plan Area | Plan Area |
| MUPOP/313/10 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Welcomes proposed designation of Tamnamore as a Rural industrial policy Area as it reflects the imperative of protecting & growing rural industry. | Strategic | Tamnamore | Dungannon |
| MUPOP/313/11 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Requests that land identified on map at Tamnamore is included as a Rural Industrial Policy Area. | Site Specific | Tamnamore | Dungannon |
| MUPOP/317/6 | Opinion to Pop | Economic Policies - Economic Development | ECN Opt 1: Equal Share | The preferred option is noted - however in order to fulfil SPG4 to maintain and consolidate the role of the villages as local service centres, consideration should be given to zoning an appropriate amount of land within Aughnacloy. | Strategic/ Site Specific | Aughnacloy | Clogher Valley |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|---|---|---|-----------|------------|----------------|
| MUPOP/317/8 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | The preferred option is welcomed - however, this policy should specifically apply to villages as well as the candidate areas for Rural Industrial Policy Areas. | Strategic | Aughnacloy | Clogher Valley |
| MUPOP/318/8 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Tyrone GAA is very supportive of planning policies which sustain and develop business and jobs in Tyrone and particularly those in successful, established, indigenous sectors such as manufacturing, agri-food and construction. | Strategic | Plan Area | Plan Area |
| MUPOP/320/2 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | Local convenience shopping supports local suppliers, contributes to service provision, establishes sustainable travel patterns, strengthens local communities, brings life to streets, regenerate neighbourhoods provides employment, increased business rates. | Strategic | Plan Area | Plan Area |
| MUPOP/330/28 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Agree with Mid Ulster's preferred option for economic development (option 2) allowing flexibility in decision making. | Strategic | Plan Area | Plan Area |
| MUPOP/330/29 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Agrees that a size restriction should be placed on small workshop in the countryside. | Strategic | Plan Area | Plan Area |
| MUPOP/330/30 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Agrees policy should accommodate workshop style development in rural area. | Strategic | Plan Area | Plan Area |
| MUPOP/330/31 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Agrees policy should allow site expansion in rural areas. | Strategic | Plan Area | Plan Area |
| MUPOP/330/32 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Doesn't agree that policy should remove floorspace restriction in settlements. Each case needs to be considered on its own merits and space restrictions applied to ensure that multiple units are not amalgamated to produce larger units | Strategic | Plan Area | Plan Area |
| MUPOP/330/33 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Agrees that policy should allow for small enterprises on edge of settlement locations. | Strategic | Plan Area | Plan Area |
| MUPOP/330/34 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Agrees with the principle that the plan should contain rural industrial policy areas. | Strategic | Plan Area | Plan Area |
| MUPOP/330/35 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Agrees the existing policy approach provides suitable protection from incompatible land uses to existing industrial sites and therefore supports proposed policy ECON 4 Development incompatible with economic development uses. | Strategic | Plan Area | Plan Area |
| MUPOP/334/11 | Opinion to Pop | Economic Policies - Economic Development | ECON3: Protection of Zoned Land and Existing Economic Development Sites | Proposals for other employment uses on zoned economic land shouldn't be limited to use 'Class B Industrial and storage uses' but for other employment generating uses such as call centre (B1) care homes (where appropriate), showrooms and hotels, call centres, mixed use with element of housing might also be appropriate. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|---|---|---|--------------------------|-------------|-------------|
| MUPOP/334/12 | Opinion to Pop | Economic Policies - Economic Development | ECON1: Economic Development in Settlements | Policy should refer to 'employment' zonings rather than economic or industrial zonings. | Strategic | Plan Area | Plan Area |
| MUPOP/336/4 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | There should be sufficient land zoned for conflicting employment uses and land should also be zoned for non invest NI clients. Offices, food processing should be separate from dirtier industries. | Strategic | Plan Area | Plan Area |
| MUPOP/340/4 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | Since the MUDEC Economy is dominated and driven by small, indigenous business (92% of VAT registered businesses employ 9 people or less). Mid Ulster is also home to more businesses than any other Council area bar Belfast). The LDP must reflect this reality and be supportive of small business creation, survival and growth. | Strategic | Plan Area | Plan Area |
| MUPOP/340/40 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | In general terms welcome the LDP's recognition of the structure of mid ulster's economy and importance of manufacturing, agri-food & construction. It is considered however that the sophisticated knowledge/technical base of these industries continues to be under-played or ignored. | Strategic | Plan Area | Plan Area |
| MUPOP/340/41 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | In general terms believes importance of public sector jobs should be highlighted and their decentralisation encouraged or facilitated. Many Mid Ulster people travel daily to jobs particularly jobs in Belfast, which could just as easily be located locally. | Strategic | Plan Area | Plan Area |
| MUPOP/340/42 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | In general terms welcomes the LDP's economic development objectives as set out on page 58 of preferred options paper. | Strategic | Plan Area | Plan Area |
| MUPOP/340/43 | Opinion to Pop | Economic Policies - Economic Development | GEN: General Comment | In general terms feel strongly Draperstown's role as a local economic power-house should be reflected in and supported by the plan. | Strategic/ Site Specific | Draperstown | Moyola |
| MUPOP/340/44 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Wary of imposing a '100 sqm limit' on small workshops and seemingly restricting the business use to self-employment as set out in policy Econ 2 'Economic development in the countryside'. | Strategic | Plan Area | Plan Area |
| MUPOP/343/4 | Opinion to Pop | Economic Policies - Economic Development | Plan Obj: Creating Jobs and Promoting Prosperity | The opening of Magherafelt Bypass has provided opportunities for further lands to be zoned for industry . Magherafelt town centre forum would support zoning new lands for industry in the area and utilising opportunities provided by the Bypass. | Strategic | Magherafelt | Magherafelt |
| MUPOP/347/6 | Opinion to Pop | Economic Policies - Economic Development | ECON2: Economic Development in the Countryside | Consideration should be given to expanding rural industrial zones to support existing jobs and businesses. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

Proposed Retail Strategy

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|--|---|-------------|------------|-----------|
| MUPOP/291/5 | Opinion to Pop | Economic Policies - Town Centres and Retailing | Retail Strategy: Proposed Retail Strategy for Mid Ulster | DRP agrees with "town centre first" strategy to protect future viability & vitality of Dun Twn Centre. It reflects aims & obj of SPPS, & DRP supports need to undertake regular town centre retail asses & Health Checks. Such strategy needs robust policies | Strategic | Plan Area | Plan Area |
| MUPOP/291/6 | Opinion to Pop | Economic Policies - Town Centres and Retailing | Retail Strategy: Proposed Retail Strategy for Mid Ulster | DRP disagrees with the status of the Oaks Centre as a District Centre providing for the daily shopping needs of residents with that quadrant of the town. | Strategic | Dungannon | Dungannon |
| MUPOP/349/4 | Opinion to Pop | Economic Policies - Town Centres and Retailing | Retail Strategy: Proposed Retail Strategy for Mid Ulster | RETAIL HIERARCHY NEEDS TO BE MORE FLEXIBLE IN ORDER TO ALLOW MORE SERVICES TO THE RURAL AREA. DOWNGRADING CAPPAGH FROM A VILLAGE TO A SMALL SETTLEMENT WILL REDUCE THE ABILITY OF THE SETTLEMENT TO MEET DAY TO DAY NEEDS. | Strategic | Plan Area | Plan Area |
| MUPOP/330/43 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | AGREES WITH THE EXTENT OF THE PRIMARY RETAIL CORES. | Strategic | Plan Area | Plan Area |
| MUPOP/352/7 | Opinion to Pop | Economic Policies - Economic Development | Key Q: Key Question | Suggested that primary retail core could be extended to Argos, Station Square, Molesworth Street, Orritor Street, Coagh Street and potentially Union Street. Also scope to extend further along Burn Road. | Strategic | Cookstown | Cookstown |

RE 1

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|--------------------------------------|---|-------------|-------------|-------------|
| MUPOP/228/65 | Opinion to Pop | Economic Policies - Economic Development | RE1: Development within Town Centres | REQUEST POLICY AMENDED: TO ALLOW FOR RESIDENTIAL USES IN BOTH PRIMARY RETAIL CORE & TOWN CENTRE. ALLOW FOR CONVERSION OF FORMER VACANT & DISUSED RETAIL PREMISES INCL. LIVING OVER THE SHOP. STRENGTHEN THE PRESUMPTION AGAINST OUT/EDGE OF TOWN LARGE RETAIL | Strategic | Plan Area | Plan Area |
| MUPOP/291/7 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE1: Development within Town Centres | DRP agree with policy in principle, but to avoid stifling dev we would suggest that the wording in the final sentence be amended to state "new development within town centres should be mindful of any conservation interests and unique character of town. | Strategic | Plan Area | Plan Area |
| MUPOP/343/1 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE1: Development within Town Centres | Town Centre Core: - Support the 'town centre first' principal; support a review of the current town centre boundary and wish to be involved in this process; Primary Retail Core should be identified & protected; welcome opportunity to be involved with LDP. | Strategic | Magherafelt | Magherafelt |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|-------------|----------------|--|--------------------------------------|--|-----------|-------------|-------------|
| MUPOP/343/2 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE1: Development within Town Centres | The opening of Magherafelt Bypass has had a significant impact on Magherafelt Town Centre - request study to determine if protected route status still required through town centre. | Strategic | Magherafelt | Magherafelt |
| MUPOP/350/9 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE1: Development within Town Centres | Lack of retail & related uses it is critical that daily needs of residents are met - retention of Cappagh village status retail hierarchy should be more flexible to ensure convenient, daily access to goods & services for rural population. | Strategic | Cappagh | Torrent |
| MUPOP/352/6 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE1: Development within Town Centres | Questioned whether possible to identify more than town centre to ensure that businesses do not miss out on funding opportunities based on town centre boundary. | Strategic | Cookstown | Cookstown |
| MUPOP/352/9 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE1: Development within Town Centres | Point made that a number of the six opportunity sites mentioned within the POP have now been developed. | Strategic | Cookstown | Cookstown |

RE 2

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|---|---|--------------------------|------------|-----------|
| MUPOP/13/1 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE2: Retention of Shop Units in Primary Retail Core | Retail development should be focused on primary retail core and not out of town sites. The proposed primary retail core in Dungannon should be expanded to include other opportunity sites within Dungannon town centre. | Strategic | Dungannon | Dungannon |
| MUPOP/13/2 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE2: Retention of Shop Units in Primary Retail Core | refer to Key Q at P.66 would suggest the site delineated red on attached map to the rear of 18-20 Scotch Street as an opportunity site that would be suitable for expansion of the primary retail core. | Strategic | Dungannon | Dungannon |
| MUPOP/228/66 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE2: Retention of Shop Units in Primary Retail Core | AMEND POLICY WORDING ALLOWING FOR CHANGE OF USE FROM SHOPS TO 'RESIDENTIAL AND' OTHER USES. INCLUDE WORD 'ACTIVE' IN CRITERIA: THERE WOULD BE A SIGNIFICANT LOSS OF 'ACTIVE' RETAIL FLOORS/SPACE AT GROUND LEVEL. | Strategic | Plan Area | Plan Area |
| MUPOP/228/68 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE2: Retention of Shop Units in Primary Retail Core | THE LOSS OF GROUND FLOOR UNITS WITHIN THE PRC TO NON-RETAIL/NON-RETAIL RELATED USES WILL CONFLICT WITH PLAN 'UNLESS THERE IS A CHRONIC ISSUE OF RETAIL VACANCY & CREEPING DERELICTION' REQUESTS THAT THIS WORDING IS ADDED TO END OF PROPOSED POLICY. | Strategic | Plan Area | Plan Area |
| MUPOP/291/8 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE2: Retention of Shop Units in Primary Retail Core | DRP agree with policy in principle but would remove the following 2 points 1, it would result in the creation of a cluster of more than 3 non-retail uses at floor level. 2, The area overall is tending to be dominated by non-retail uses. | Strategic | Plan Area | Plan Area |
| MUPOP/352/8 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE2: Retention of Shop Units in Primary Retail Core | Retail at Sweep Road and Tesco's site should remain as is, with no defined boundary/district centre designated. | Strategic/ Site Specific | Cookstown | Cookstown |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

RE 3

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|---|---|-------------|------------|-----------|
| MUPOP/168/11 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | AGREES THAT THERE ARE ADEQUATE CONSTRAINTS ON RETAIL DEVELOPMENT OUTSIDE OF TOWN CENTRES. HOWEVER THAT DISTRICT CENTRES ARE SPECIAL CASES, FORMING PART OF RETAIL HIERARCHY, SO THEY ARE WARRANTED BOTH PROTECTION & PROMOTION FOR FUTURE RETAIL DEVELOPMENT. | Strategic | Plan Area | Plan Area |
| MUPOP/168/12 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | THRESHOLD FIGURE OF 1000SQM FOR SUBMISSION OF A RETAIL IMPACT ASSESSMENT IS AN ARBITRARY FIGURE NO LONGER BASED ON ANY EVIDENCE. SUGGESTS COUNCIL UNDERTAKE RESEARCH TO UNDERSTAND PURPOSE FOR SETTING A THRESHOLD & WHETHER 1000SQM OR HIGHER MAY BE BETTER | Strategic | Plan Area | Plan Area |
| MUPOP/264/25 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | RE3 SHOULD BE ALTERED TO CLARIFY THAT PERTOL FILLING STATIONS ARE NOT A TOWN CENTRE USE OR A RETAIL USE. POLICY SHOULD INCLUDE THE CAVEAT "EXCLUDING PETROL FILLING STATIONS WITH ANCILLIARY RETAIL FLOORSPACE" | Strategic | Plan Area | Plan Area |
| MUPOP/291/9 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | DRP agrees with the aim of the policy, however, the definition needs to be tightened and the test made more stringent and vigorous to avoid impact on town centres. | Strategic | Plan Area | Plan Area |
| MUPOP/291/10 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | In the final sentence of the policy, DRP believes the figure should be amended from 1000sq.m to 150sq.m Moreover, a retail impact Study should consider the issue of displacement/net jobs created as a result of the proposed retail development. | Strategic | Plan Area | Plan Area |
| MUPOP/320/6 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | Policy wording should be amended to facilitate locally accessible, convenience shopping proposals of an appropriate scale. References to 100 sq.m. in Policy RE3 is inappropriate. Inconceivable that such a modern convenience shop would be developed. | Strategic | Plan Area | Plan Area |
| MUPOP/320/9 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | Policy RE3 should relate to major convenience retail proposals and comparison shopping. SPPS, RE4, 5 and 6 all make it clear that there will be local convenience shopping outside of town centres. RE3 should not therefore contradict this - amend wording. | Strategic | Plan Area | Plan Area |
| MUPOP/320/10 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | The threshold of 100 sq.m. above which an assessment of alternative sites is required is meaningless as it is practically inconceivable that a new shop of less than 100 sq.m. would ever be proposed. | Strategic | Plan Area | . |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|---|--|-----------|-----------|-----------|
| MUPOP/320/15 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE3: Retail Development Outside of Town Centres | Q.9 The threshold for the submission of a retail impact assessment should be set at 1,000sq.m. gross external area. | Strategic | Plan Area | Plan Area |
| MUPOP/330/46 | Opinion to Pop | Economic Policies - Town Centres and Retailing | Key Q: Key Question | STATES THE THRESHOLD FOR THE SUBMISSION OF A RETAIL IMPACT ASSESSMENT SHOULD BE SET AT 1000SQM. TO INCLUDE AS ASSESSMENT OF RETAIL NEED AND CAPACITY THAT SHOULD BE DEFINED SO THERE IS NO CONFUSION OR AMBIGUITY OVER THE REQUIREMENTS. | Strategic | Plan Area | Plan Area |

RE 4

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|--------------------------|---|-------------|------------|-----------|
| MUPOP/228/69 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE4: Neighbourhood Shops | AMEND POLICY WORDING TO READ: 'N' HOOD SHOPS SHOULD BE LOCATED WITHIN MIXED-USE AREAS 'BUT COULD' ALSO BE 'LOCATED ADJACENT TO, OR WITHIN (AS OPPOSED TO) A RESIDENTIAL AREA ESPECIALLY IF THIS PROMOTED STREET VIBRANCY, WALKABILITY & REDUCED NO. OF CAR TRIPS. | Strategic | Plan Area | Plan Area |
| MUPOP/264/26 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE4: Neighbourhood Shops | 100 SQ.M THRESHOLD IS TOO LOW IN RELATION TO RETAIL ANCILLARY TO PETROL FILLING STATIONS. RE 4 SHOULD MAKE IT CLEAR THAT THIS POLICY EXCLUDES SUCH DEVELOPMENT AND SET A SEPARATE THRESHOLD F 250 SQ.M FOR SUCH DEVELOPMENT. | Strategic | Plan Area | Plan Area |
| MUPOP/320/7 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE4: Neighbourhood Shops | Policy wording should be amended to facilitate locally accessible, convenience shopping proposals of an appropriate scale. References to 100 sq.m. in Policy RE4 is inappropriate. Inconceivable that such a modern convenience shop would be developed. | Strategic | Plan Area | Plan Area |
| MUPOP/320/11 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE4: Neighbourhood Shops | Principle of RE4 is welcomed however the 100 sq.m. cap, without any justification or analysis of floor areas across the sector, is wholly inappropriate. RE4 as drafted would preclude development of modern shopping in Mid Ulster | Strategic | Plan Area | Plan Area |
| MUPOP/340/46 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE4: Neighbourhood Shops | REGARDING TOWN CENTRES & RETAILING, ARE WARY OF IMPOSING A '100 SQM LIMIT' ON NEW LOCAL SHOPS (POLICIES RE4, RE5 & RE6). | Strategic | Plan Area | Plan Area |

RE 5

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|------------|-------------------|--|-------------------------------------|---|-------------|------------|------------|
| MUPOP/11/7 | Letter of Support | Economic Policies - Town Centres and Retailing | RE5: Villages and Small Settlements | fully support a more flexible approach to accommodating economic development in towns, and villages that meet the daily needs of those within the settlement and surrounding catchment. | | Gulladuff | Carntogher |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|-------------------------------------|---|-----------|-----------|-----------|
| MUPOP/320/12 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE5: Villages and Small Settlements | Wording of Policy RE5 discourages investment in new convenience retailing facilities in villages and small settlements. It protects existing retailing to the detriment of competition. The proposed cap of 100 sq.m. is again, wholly inappropriate. | Strategic | Plan Area | Plan Area |
| MUPOP/320/13 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE5: Villages and Small Settlements | Q.2 It is considered that village centres should not be designated. The village or small settlement itself constitutes the centre within the wider rural area. | Strategic | Plan Area | Plan Area |
| MUPOP/320/14 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE5: Villages and Small Settlements | Q.8 It is considered that the constraints on locally accessible, convenience retailing outside of town centres are wholly inappropriate. | Strategic | Plan Area | Plan Area |
| MUPOP/333/6 | Opinion to Pop | Settlements - Small Settlements | RE5: Villages and Small Settlements | It is critical that the day to day needs of residents in the village and surrounding hinterland are met. This again supports retention of Cappagh as a village. A more flexible retail hierarchy needed to ensure convenient access to services. | Strategic | Cappagh | Torrent |
| MUPOP/340/47 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE5: Villages and Small Settlements | REGARDING TOWN CENTRES & RETAILING, ARE WARY OF IMPOSING A '100 SQM LIMIT' ON NEW LOCAL SHOPS (POLICIES RE4, RE5 & RE6). | Strategic | Plan Area | Plan Area |

RE 6

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|-------------|----------------|--|------------------|--|-------------|------------|-----------|
| MUPOP/320/8 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE6: Countryside | Policy wording should be amended to facilitate locally accessible, convenience shopping proposals of an appropriate scale. References to 100 sq.m. in Policy RE6 is inappropriate. Inconceivable that such a modern convenience shop would be developed. | Strategic | Plan Area | Plan Area |
| MUPOP340/48 | Opinion to Pop | Economic Policies - Town Centres and Retailing | RE6: Countryside | REGARDING TOWN CENTRES & RETAILING, ARE WARY OF IMPOSING A '100 SQM LIMIT' ON NEW LOCAL SHOPS (POLICIES RE4, RE5 & RE6). | Strategic | Plan Area | Plan Area |

Proposed Retail Hierarchy

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|------------|----------------|--|---|---|-------------|------------|-----------|
| MUPOP/93/1 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | DOESN'T AGREE WITH SWEEP RD BEING A DISTRICT CENTRE. MAIN TOWN ARTERY NEEDS SUPPORT & DESIGNATION WOULD UNDERMINE CHAPEL & CHURCH ST REGENERATION. T.C COUNTER HUB WILL SQUEEZE INVESTMENT&BUSINESS BETWEEN 2 LOCATIONS. A BARRIER TO INVESTMENT ALONG MAIN ST. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|---|--|--------------------------|-----------|-----------|
| MUPOP/233/21 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | Disagrees with retail hierarchy in that out of town locations should not be pitched above edge of centre sites. This is contrary to the SPPS approach. Proposed Hierarchy is also at odds with Policy RE 3 Retail development outside of town centres. | Strategic | Plan Area | Plan Area |
| MUPOP/239/27 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | Disagrees with retail hierarchy. Edge of centres should be above out of centre locations as per SPPS. | Strategic | Plan Area | Plan Area |
| MUPOP/239/28 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | Hierarchy is at odds with policy RE3 which suggests that SPPS approach should be followed. | Strategic | Plan Area | Plan Area |
| MUPOP/246/27 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | DISAGREES WITH RETAIL HIERARCHY. EDGE OF CENTRES SHOULD BE ABOVE OUT OF CENTRE LOCATIONS AS PER SPPS. | Strategic | Plan Area | Plan Area |
| MUPOP/246/28 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | HIERARCHY IS AT ODDS WITH POLICY RE3 WHICH SUGGESTS THAT SPPS APPROACH SHOULD BE FOLLOWED. | Strategic | Plan Area | Plan Area |
| MUPOP/255/2 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | MOYGASHEL IS REQUESTED TO BE DESIGNATED AS A LOCAL CENTRE IN RESPECT OF THE PROPOSED RETAIL HIERARCHY IN THE POP. | Strategic/ Site Specific | Dungannon | Dungannon |
| MUPOP/255/3 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | THE POPULATION OF MOYGASHEL HAS INCREASED BY 14.5% FROM 2005-2015 COMPARED TO NI OF 7.2%. THERE IS ALSO THE POTENTIAL FOR C.178 ADDITIONAL DWELLINGS IN MOYGASHEL. THUS DEMAND FOR LOCAL RETAIL SERVICES WILL GROW DUE TO INCREASING POPULATION. | Strategic/ Site Specific | Dungannon | Dungannon |
| MUPOP/296/15 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | THERE IS NO NEED FOR THE PROPOSED DISTRICT CENTRE TO BE ZONED AT SWEEP ROAD COOKSTOWN BECAUSE OF THE NEED TO PROTECT THE TOWN CENTRE. THERE IS ALSO AN UNDEVELOPED BUT EXTANT RETAIL PAR NEAR THIS LOCATION. | Strategic | Plan Area | Plan Area |
| MUPOP/330/36 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | AGREE WITH MID ULSTERS TOWN CENTRE FIRST APPROACH FOR RETAILING AND MAIN TOWN CENTRE USES IN LINE WITH THE SPPS WHILST ALLOWING FLEXIBILITY FOR RURAL RETAIL OPPORTUNITIES. | Strategic | Plan Area | Plan Area |
| MUPOP/330/37 | Opinion to Pop | Economic Policies - Town Centres and Retailing | PRH: Proposed Retail Hierarchy for Mid Ulster | RETAIL HIERARCHY GIVES OUT OF TOWN RETAIL OUTLET CTR PRIORITY OVER EDGE OF CTR SUPERMARKETS/STORES, A CHANGE TO RETAIL APPROACH WHERE OPPOSITE HAS BEEN CASE&AT ODDS WITH POLICY RE3-EDGE OF CTR SUPERMARKETS/STORES PRIORITY OVER OUT OF TOWN RETAIL OUTLET CTR | Strategic | Plan Area | Plan Area |

General Comments - Town Centre Retailing

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|----------------------|--|----------------|------------|-----------|
| MUPOP/168/1 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | STATES THAT RETAIL HIERARCHY, TOWN CENTRE BOUNDARIES, RETAIL CAPACITY & THRESHOLDS FOR UNDERTAKING RETAIL IMPACT ASSESSMENTS ARE STRATEGIC MATTERS & SHOULD BE CONSIDERED AT THIS POINT IN THE PROCESS | Strategic | Plan Area | Plan Area |
| MUPOP/168/2 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | STATES THAT A MODIFIED SEQUENTIAL TEST SHOULD BE APPLIED FOR DUNGANNON GIVEN STEP TOPOGRAPHY CONSTRAINTS WHICH MAY MAKE EDGE OF CENTRE SITES UNDEVELOPABLE. | Strategic | Plan Area | Plan Area |
| MUPOP/168/3 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | REQUEST SPECIAL CONSIDERATION BE GIVEN TO OAKS DISTRICT CENTRE IN THE FORMATION OF SEQUENTIAL APPROACH- IDENTIFY IT AS A LOCATION FOR ADDITIONAL RETAIL DEVELOPMENT & HAVE PERMISSIVE POLICY FOR A MIX OF RETAIL & OFFICE/ECONOMIC USE. | Strategic | Plan Area | Plan Area |
| MUPOP/168/4 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | SUPPORTS THAT THE DISTRICT CENTRE BOUNDARY AT OAKS CENTRE WILL BE REVIEWED IN LPP. STATES THAT THERE MAY BE SCOPE TO ENLARGE IT TO ACCOMMODATE FUTURE RETAIL & ECONOMIC DEVELOPMENT NEED. | Strategic | Plan Area | Plan Area |
| MUPOP/168/5 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | WELCOMES THAT THE OAKS CENTRE IS IDENTIFIED AS A DISTRICT CENTRE IN PROPOSED RETAIL HIERARCHY | Part-Strategic | Plan Area | Plan Area |
| MUPOP/168/6 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | IT'S NECESSARY THAT MUDC APPOINTS EXPERTS IN THE FIELD OF RETAIL CAPACITY ASSESSMENTS & PREPARE UP-TO-DATE & ROBUST EVIDENCE ON THE RETAIL ENVIRONMENTAL AND FUTURE NEEDS OF THE AREA. WOULD LIKE TO RESERVE THE RIGHT TO COMMENT ON THAT STUDY. | Strategic | Plan Area | Plan Area |
| MUPOP/168/9 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | DUNGANNON NEEDS TO HAVE AMBITION TO DELIVER NEW RETAIL FLOORSPACE CONSISTENT WITH ITS STATUS AS THE LARGEST TOWN IN THE COUNCIL AREA WITHIN A TIME SPECIFIC PERIOD TO ENSURE CUSTOMERS BENEFIT FROM A QUALITATIVE RETAIL EXPERIENCE. | Strategic | Plan Area | Plan Area |
| MUPOP/168/10 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | THE OAKS CENTRE IS A KEY SHOPPING LOCATION THAT SHOULD BE SUPPORTED AND ENHANCED IN THE POLICIES BEING CONSIDERED IN THE NEW LDP | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|----------------------|--|-----------|-----------|-----------|
| MUPOP/168/13 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | No comment- Entered in error | Strategic | Plan Area | Plan Area |
| MUPOP/228/70 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | AGREE WITH SEQUENTIAL TEST APPROACH BEING ADOPTED (i.e PRIMARY RETAIL CORE-TOWN CENTRE - TOWN CENTRE- EDGE-OF CENTRE). | Strategic | Plan Area | Plan Area |
| MUPOP/284/12 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | The centre of towns and villages would benefit from the regeneration of the traditional and historic properties which make up the retail core. In particular this would relate to the reuse of vacant upper floor space for residential and commercial uses. | Strategic | Plan Area | Plan Area |
| MUPOP/320/1 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | Modern locally accessible convenience shopping should be encouraged in the LDP. Such shops have a critically important place and role in community life across rural, village, neighbourhood and town locations. | Strategic | Plan Area | Plan Area |
| MUPOP/320/3 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | People expect longer opening hours, a fuller grocery and a variety of complementary services. These factors have implications for floor space. A modern Spar/Vivo would be 3000-4500 sq. ft and Eurospar 5,500-6500sq. Ft | Strategic | Plan Area | Plan Area |
| MUPOP/320/4 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | Convenience shopping should be encouraged in the LDP generally through positive policies for local shops of a scale appropriate to the sector and if appropriate, local centres. This would be consistent with strategic guidance,i.e. RDS, SPDS | Strategic | Plan Area | Plan Area |
| MUPOP/320/5 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | Northern Ireland Rural Development Programme 2014-2020 also encourages investments in villages to meet local needs and those of visitors, develop vibrant communities and improve quality of life and access to services. | Strategic | Plan Area | Plan Area |
| MUPOP/320/16 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | The Henderson Group requests that the LDP provides a planning framework which is supportive of locally accessible, convenience shopping. This would secure a wide range of social, physical and economic benefits. | Strategic | Plan Area | Plan Area |
| MUPOP/336/6 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | MUDC should support independent retailers and sustain the current retail offering. | Strategic | Plan Area | Plan Area |
| MUPOP/340/49 | Opinion to Pop | Economic Policies - Town Centres and Retailing | GEN: General Comment | THE PLAN SHOULD ACCOMMODATE THE CURRENT POPULAR & EVIDENTLY VERY SUCCESSFUL RETAIL MODEL OF FILLING STATION/SMALL SUPERMARKET/ BAKERY/COFFEE DOCK/HOT FOOD COUNTER/OFF-LICENCE/CONVENIENCE GOODS WHICH IS TO BE FOUND ACROSS MID ULSTER DISTRICT. | Strategic | Plan Area | Plan Area |

Minerals - Policy Approach - Areas of Constraint or not

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|-------------------|------------------------------|---|--|-------------|-----------------|-----------|
| MUPOP/98/4 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | He supports the need to control extraction but asks council to consider the importance of Mid Ulster in being the main supplier of sand and gravel in NI | Strategic | Cookstown Rural | Cookstown |
| MUPOP/138/1 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | With reference to the imposition of ACMD's the representation argues that there is not a sufficient evidence base (available reserves, demand etc.) for imposing these designations and this is contrary to the PAC report into the draft Magherafelt Area Plan. | Strategic | Plan Area | Plan Area |
| MUPOP/138/2 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | Areas of scientific interest, nature reserves etc already benefit from protection under other designations. ACMD's should be a strategic regional tool to protect important sites Mournes, high sperrins and Antrim Glens. | Strategic | Plan Area | Plan Area |
| MUPOP/146/9 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | PAC REPORT ON DRAFT MAP STATES THAT ACMD'S ARE POTENTIALLY FLAWED. THIS SITUATION HASN'T CHANGED AND THEREFORE MUDC APPROACH OF ADOPTING ACMD'S IS ILLOGICAL | Strategic | Plan Area | Plan Area |
| MUPOP/146/10 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | The size of existing resources of S&G mentioned in the POP are not quantified, nor is it documented whether or not they have the benefit of PP. This should be clear before the decision is taken to designate ACMD's or not. | Strategic | Plan Area | Plan Area |
| MUPOP/222/2 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | Objects to proposed area of constraint Map 3. Potential restriction in terms of Sperrins AONB where reserves exist. This proposal would prejudice extant and potential sites from peat extraction. | Strategic | Plan Area | Plan Area |
| MUPOP/222/3 | Letter of Support | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | Supports principle of Mineral Reserve Policy Areas. | Strategic | Plan Area | Plan Area |
| MUPOP/223/6 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | The REP agrees broadly with the idea of having ACMD's and MRPAs but would have concerns with the POP approach to each, as outlined later in the rep | Strategic | Plan Area | Plan Area |
| MUPOP/223/9 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | THE REP DOESN'T SUPPORT THE PREFERRED OPTION OF ADOPTING MINERALS CONTRAINT AREAS. THE REASON FOR THIS IS THAT THERE ARE NO QUANTITATIVE OR QUALITATIVE EVIDENCE REGARDING PERMITTED RESERVES WITHIN MID ULSTER | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|---|------------------------------|---|--|-----------|-----------|-----------|
| MUPOP/223/17 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | vulnerable landscapes which inform the ACMD's are based on guidance for wind energy and not minerals guidance. No sensitivity studies of the landscapes in question with specific reference to impacts of minerals have been carried out. ACMDs unreliable | Strategic | Plan Area | Plan Area |
| MUPOP/223/18 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | Some non mineral development within ACMD's may impact upon landscape character as well but will not be constrained like minerals will be. The pop does not specify which aspect of mineral development the landscapes in question are vulnerable to. | Strategic | Plan Area | Plan Area |
| MUPOP/223/19 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | The approach of the POP to ACMD's is similar to draft MAP which imposed ACMD's without proper consideration of economic need. This fails to properly balance the environmental and economic considerations. | Strategic | Plan Area | Plan Area |
| MUPOP/223/20 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | there is ambiguity in the maps which are showing areas of mineral constraint, specifically maps 2&3 - see page 24-25 of REP for detail | Strategic | Plan Area | Plan Area |
| MUPOP/223/22 | General Comment - Requiring No Further Action | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | THE POP IS "ENORMOUSLY INSULAR." GIVEN THE LOCATION OF MINERAL DEPOSITS ACROSS COUNCIL BOUNDARIES, CONSIDERATION HAS NOT BEEN GIVEN TO THE NEEDS OF OTHER COUNCILS MINERAL REQUIREMENTS AND VICE VERSA, MID ULSTERS NEEDS OF MINERALS MORE PREVALENT ELSEWHERE | Strategic | Plan Area | Plan Area |
| MUPOP/281/11 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | DALRADIAN AGREE THAT THESE SHOULD BE IN THE PLAN BECAUSE SPPS SAYS SO. HOWEVER, SPPS ALSO SAYS THAT NOT ALL OF ENV DESIGNATIONS SHOULD BE DESIGNATED AS ACMD AND THAT SOME DEVELOPMENTS WITHIN THESE. REP ARGUES THATR MUDC SHOULD ASSESS THE AONB WITH THIS IN MIND | Strategic | Plan Area | Plan Area |
| MUPOP/327/39 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | there is no need to define ACMD. Policy objective is to balance need for the minerals against desire to protect environment. Legislation and policy at regional level require applications to satisfy stringent env protection criteria. | Strategic | Plan Area | Plan Area |
| MUPOP/327/40 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | The necessity for & policy basis for identification of ACMD was debated during the Examination in Public for the most recent plans. It was concluded that defining such areas in the plans was inappropriate. SPPS does not require council to ID ACMD. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | | |
|--------------|----------------|------------------------------|---|---|--|-----------|-----------|-----------|
| MUPOP/327/41 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | MIN POL APR OPT 2: Adopt Areas of Constraint and Mineral Reserve Policy Areas Alongside Tailored Policy | Massive increase in extent of ACMD likely to bring end to the opportunity for extraction of resources on new sites. That response to environmental protection is not appropriate. | Strategic | Plan Area | Plan Area |
| MUPOP/223/10 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 1: Applications on Merits | MIN POL APR OPT 1: Applications on Merits | NEITHER DOES THE REP SUPPORT THIS OPTION. THIS OPTION WOULD LEAD TO A CONSULTEE LED APPROACH WHERE THERE IS A BIAS TOWARDS THE INTERESTS OF THE AREA OF CONCERN WHICH IS OF IMPORTANCE TO CONSULTEE. | Strategic | Plan Area | Plan Area |
| MUPOP/223/43 | Opinion to Pop | Economic Policies - Minerals | MIN POL APR OPT 1: APPLICATIONS ON MERITS | MIN POL APR OPT 1: APPLICATIONS ON MERITS | WITH REFERENCE TO OPTION ONE, IT WOULD LEAD TO CONSULTEE LED APPROACH. CONSIDERATION OF PLANNING APPLICATIONS FOR MINERAL DEVT ON THEIR MERITS CURRENTLY TAKES THE FORM OF A CONSULTEE LED APPROACH WHERE POLICY IS INTERPRETED BASED ON THE LEVEL OF IMPACT ON THE AREA OF CONCERN WHICH IS RELEVANT TO THAT CONSULTEE. | Strategic | Plan Area | Plan Area |

Areas of Constraint Map 3

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|-------------|---|------------------------------|---|---|--------------------------|-----------------|-----------|
| MUPOP/98/2 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | Site has been heavily invested in with a view to long term operation and diversification, which is dependent on a reliable source of raw materials. Therefore, he suggests that this site and the general crancussy/loughdoo area not included as ACMD. | Strategic/ Site Specific | Cookstown Rural | Cookstown |
| MUPOP/98/3 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | Operators whose supply of raw materials are exhausted or are soon to be exhausted, but who have invested in their site should be considered because they may need to extract raw materials from new sites in the locality and shouldn't be prohibited from this | Strategic/ Site Specific | Cookstown Rural | Cookstown |
| MUPOP/138/3 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | Whilst MUDC undoubtedly has areas of scenic value, there is no evidence that these areas are under pressure from proposed or existing mineral workings and therefore to impose new ACMD's is incorrect. Other env designations should be adequate (e.g. AONB) | Strategic | Plan Area | Plan Area |
| MUPOP/138/4 | General Comment - Requiring No Further Action | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | The extraction which is taking place on site is low level and doesn't have a widespread impact. Therefore it is difficult to understand why it has been included in ACMD designation. There is no evidence that previous lack of ACMD has been detrimental here | Site Specific | Cookstown Rural | Cookstown |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|------------------------------|---|--|-----------|-----------|-----------|
| MUPOP/138/5 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | Exclusion of the areas around Lough Fea and the inclusion of areas further west cannot be based on robust assessment of mineral resources, landscape characteristics or a pressure analysis. Therefore, there can be no reason for option 3 to be preferred. | Strategic | Plan Area | Plan Area |
| MUPOP/281/12 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | MUDC NEED TO ASSESS THE AREAS OF VALUE WITHIN THE DISTRICT AND INSTEAD OF SIMPLY IMPOSING BLANKET DESIGNATIONS, NEED TO CONSIDER WHICH PARTS OF THE AREAS SHOULD BE CONSTRAINED AND WHICH (IF ANY) ARE SUITABLE FOR DEVELOPMENT | Strategic | Plan Area | Plan Area |
| MUPOP/281/13 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | MUDC NEED TO CONSIDER THAT WHILE ACMD'S MAY CONSTRAIN MINERAL DEVT, OTHER TYPES OF DEVT WHICH ALSO HAS A SIGNIFICANT CUMULATIVE IMPACT WILL NOT BE CONSTRAINED AS READILY. INDEED, NO EVIDENCE IS PROVIDED AS TO HOW MINERAL DEVT IS HAVING A NEGATIVE IMPACT. | Strategic | Plan Area | Plan Area |
| MUPOP/281/14 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | AREAS WHICH HAVE BEEN REMOVED FROM ACMD'S ARE BASED ON ECONOMIC CONTRIBUTION AND NOT THE INTRINSIC VALUE OF THE LANDSCAPE. | Strategic | Plan Area | Plan Area |
| MUPOP/281/16 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | THE COUNCIL HAS NOT HEEDED THE ADVICE OF THE PAC (DRAFT MAP) - THERE HAS BEEN NO ASSESSMENT OF KEY SITES, WITHIN THE ACMD, WHERE DEVELOPMENT MIGHT BE ACCEPTABLE. NOR HAS THERE BEEN CONSIDERATION OF THE ECONOMICS AND HOW THIS BALANCES AGAINST PROTECTION | Strategic | Plan Area | Plan Area |
| MUPOP/340/51 | Opinion to Pop | Economic Policies - Minerals | Area of Constraint on Mineral Development Map 3 | BELIEVE PROPOSED AREAS OF CONSTRAINT ON MINERAL DEVELOPMENT SHOULD BE RE-DESIGNATED AS AREAS OF MANAGED MINERAL DEVELOPMENT WHERE THE FOCUS IS ON EXPLOITING THESE VALUABLE LOCAL ASSETS IN SYMPATHETIC, MANAGED & SUSTAINABLE WAYS | Strategic | Plan Area | Plan Area |

Mineral Reserve Policy Area's

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|------------------------------|---|---|-------------|------------|-----------|
| MUPOP/146/11 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | The proposed MRPAs were designated over a decade ago and have been reduced in the POP. Seems to imply that logic would suggest this wont provide enough reserves for the plan period. | Strategic | Plan Area | Plan Area |
| MUPOP/146/12 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | In relation to MRPA's, no protective designations have been assigned in relation to sand and gravel, which the POP points out is of great importance to the District. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|-------------------|------------------------------|---|--|--------------------------|------------|-----------|
| MUPOP/146/13 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | 2 of the 3 proposed MRPA's are owned by the same operator and this creates an unfair market advantage. | Strategic/ Site Specific | Plan Area | Plan Area |
| MUPOP/146/14 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | The rate of working at the MRPA designation at Derraghadoan suggests that this site will not be WORKED DURING THE PLANNING PERIOD. Also, part of it lies within Dungannon GC. Therefore, inclusion of this designation is illogical | Strategic/ Site Specific | Plan Area | Plan Area |
| MUPOP/146/15 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | The MRPA at Coalisland is based on illogical rationale because the factory which it was designed to serve has ceased operating and therefore and intentions have been made public to develop the site as a business park | Strategic/ Site Specific | Coalisland | Torrent |
| MUPOP/146/16 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | As opposed to modifying existing MRPA's, MUDC should work with the local industry to establish what the specific needs are and should designate MRPA's to identify and protect those needs | Strategic | Plan Area | Plan Area |
| MUPOP/146/17 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | When deciding on the location of MRPA's, areas of protection should also be designated around the boundaries of existing major workings to facilitate expansion or extension as required. | Strategic | Plan Area | Plan Area |
| MUPOP/223/15 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | PLANNING AUTHORITY SHOULD ADOPT A SYSTEMATIC APPROACH TO DESIGNATING MRPA's. The planning authority should also plan for steady supply of minerals by designating specific site, preferred areas and search areas. (p18-19 of rep) | Strategic | Plan Area | Plan Area |
| MUPOP/223/21 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | Current operational sites are more valuable to the MU economy than the proposed MRPA's and therefore other sites may be worthy of protection. The rep does not wish to remove protection from the proposed sites but would put forward this point. | Strategic | Plan Area | Plan Area |
| MUPOP/223/30 | Opinion to SA/SEA | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | INTERIM REPORT - PLAN NEEDS TO HAVE APPROP. POLICY APPROACH FOR ACMDS AND MRPAS. APPROACH IN POP IS BASED ON INACCURATE FIGURES. PROPOSED MRPAS INCLUDE CLAY RESERVES WHICH HAVE NO ECONOMIC CONTRIBUTION. NO ALTERNATIVE MRPA CONSIDERED. APPROACH IS FLAWED. | Strategic | Plan Area | Plan Area |
| MUPOP/281/15 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | THE COUNCIL ACKNOWLEDGES THE PRESENCE OF VALUABLE GOLD IN THE POSITION PAPER BUT DOES NOT MENTION OR PROVIDE ANY EVIDENCE ON THE NEED TO PROTECT SUCH RESOURCES IN THE FUTURE. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|------------------------------|---|--|-----------|-----------|-----------|
| MUPOP/281/17 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | THE VUL. L'SCAPES are simply based on nilca and not on best practice. More detailed assessment of the vul.l'scapes is needed in order for MUDC to say with confidence that certain areas are more vulnerable to mineral devt as opposed to other types of devt | Strategic | Plan Area | Plan Area |
| MUPOP/281/18 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | DALRADIAN STRONGLY DISAGREES WITH THE EXTENT OF THE PROPOSED ACMD BECAUSE THEY ARE NOT BASED ON ENVIRONMENTAL OR ECONOMIC EVIDENCE. CONSULTATION SHOULD TAKE PLACE WITH DFI AND GSNI. | Strategic | Plan Area | Plan Area |
| MUPOP/281/19 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | IN TERMS OF EVIDENCE FOR LANDSCAPES WHICH FEED INTO THE ACMD'S, THIS NEEDS REVISITED. MUDC SHOULD ONLY DESIGNATE AREAS WHERE THERE IS A CLEAR AND DEFENSIBLE VIEW AS TO THE OPPORTUNITY WHICH EXISTS AND THE AREA WHERE CONSTRAINTS ARE LEGITIMATELY REQUIRED. | Strategic | Plan Area | Plan Area |
| MUPOP/281/20 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | REP AGREES WITH PRINCIPLE OF MRPAS. HOWEVER, POP MAKES NO REFERENCE AT LOCAL LEVEL TO VALUABLE MINERALS AND THEIR PROTECTION. CONSULTATION SHOULDVE BEEN CARRIED OUT WITH GSNI IN THIS REGARD. LACK OF CONSULTATION / UNDERSTANDING MEANS OPTIONS ARE FLAWED. | Strategic | Plan Area | Plan Area |
| MUPOP/281/21 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | CONSULTATION HAS NOT BEEN CARRIED OUT (RE MRPAS) WITH THE OPERATORS AND BODIES SUCH AS QPANI. AGAIN, SUCH LACK OF CONSULTATION / UNDERSTANDING MEANS THAT THE OPTIONS IN THE POP ARE FLAWED. FAILURE TO IDENTIFY NEEDS OF OPERATORS IS A "FUNDAMENTAL FLAW." | Strategic | Plan Area | Plan Area |
| MUPOP/281/23 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | THE FOLLOWING STEPS MUST BE CARRIED OUT URGENTLY; 1) APPROPRIATE INFORMATION OBTAINED FROM GSNI AND OTHER STAKEHOLDERS. 2) PROPER CONSIDERATION OF OPTIONS SHOULD THEN BE CARRIED OUT. 3) PREFERRED OPTION IDENTIFIED. 4) FURTHER CONSULTATION EXERCISE. | Strategic | Plan Area | Plan Area |
| MUPOP/306/71 | Opinion to Pop | Economic Policies - Minerals | MIN RPA OPT 2: Modify the Existing MRPA's | Caution should be exercised with regards to releasing MRPA's where reserves have been exhausted, in terms of sustainability of future development. Clarification is sought as to whether MRPA includes peatlands SW of Lough Neagh currently worked for peat. | Strategic | Plan Area | Plan Area |

Minerals - MIN 1

| Reference | Nature of Reqs | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|------------------------------|----------------------------|--|-------------|------------|-----------|
| MUPOP/222/4 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Supports Min 1 Policy generally. | Strategic | Plan Area | Plan Area |
| MUPOP/222/5 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Seeks amendment to Min 1 policy to accommodate peat extraction with emphasis on restoration and compensation. Policy focuses on quarrying operations only. | Strategic | Plan Area | Plan Area |
| MUPOP/222/8 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Recommends Council to seek comment from all stakeholders, including peat extractors, to inform POP mineral extraction policies. | Strategic | Plan Area | Plan Area |
| MUPOP/223/41 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | "SPECIAL ATTENTION SHOULD BE PAID TO ACCOMODATING BIODIVERSITY." WHAT DOES THIS MEAN? IS RELOCATION OR REMOVAL (WITH COMPENSATION) ADEQUATE? OUTSIDE ACMD'S THERE SHOULD BE A PRESUMPTION IN FAVOUR OF MINERAL DEVT WITH ADEQUATE MITIGATION / COMPENSATION. | Strategic | Plan Area | Plan Area |
| MUPOP/223/42 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | "NO SIGNIFICANT RISK TO PUBLIC SAFETY FROM DUST BLASTING ETC...." POLICY HAS BEEN REPEATED FROM SPPS AND THIS IS NOT NEEDED IN LDP. PLANNING POLICY SHOULD INTRODUCE DESIGN REQUIREMENTS AND PROVIDE GEOTECHNICAL ADVICE AND RESTORATION ADVICE. | Strategic | Plan Area | Plan Area |
| MUPOP/306/67 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Reference should be made to RSPB's publication Habitat Creation for the Mineral Industry re: Restoration, Phasing, Management, Natural Regeneration, Soil nutrients, Topography, Bare earth, Woodland, Hedgrows, Improving habitat, Water bodies. | Strategic | Plan Area | Plan Area |
| MUPOP/306/68 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Policy wording Min 1 should be strengthened RE: peat extraction to read 'planning permission will not be granted for peat extraction from new or extended sites, or renew extant permissions'. This is in line with the English NPPE. | Strategic | Plan Area | Plan Area |
| MUPOP/306/69 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | The RSPB would expect all countries to follow Defra's lead of phasing out peat, by 2020 for consumer gardening and by 2030 for commercial horticulture. These targets are stated in the government's Natural Choice report, 2011. | Strategic | Plan Area | Plan Area |
| MUPOP/306/70 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Consideration should be given to the United Nations Environment Programme (UNEP) Global Peatlands Initiative. The Scottish Natural Heritage (SNH) Peatland plan provides a good template for NI. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|------------------------------|----------------------------|--|-----------|-----------|-----------|
| MUPOP/306/72 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Criterion (a) - wording is vague and open to interpretation. The wording 'prejudicing the essential characterises of a site' does not accord with tests for potential impact on such sites, including those set in European directives. | Strategic | Plan Area | Plan Area |
| MUPOP/306/73 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Criterion (b) current wording does not provide sufficient protection to the natural environment as required by RDS and SPPs. Wording 'special attention' in relation to protected species and protecting biodiversity is vague and open to interpretation. | Strategic | Plan Area | Plan Area |
| MUPOP/306/74 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Recommends Criterion (g) is amended to include wording 'sustainable restoration proposals' and 'the enhancement of biodiversity wherever possible'. Restoration policy should facilitate regular inspection to ensure plans are followed through. | Strategic | Plan Area | Plan Area |
| MUPOP/306/75 | Opinion to Pop | Economic Policies - Minerals | MIN 1: Mineral Development | Welcomes that MUDC will determine applications for unconventional hydrocarbon extraction in line with the strategic policy as contained within this SPPS – the policy should however be stated in full so as to provide clarity. | Strategic | Plan Area | Plan Area |

Minerals - MIN 2

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|------------------------------|---|--|-------------|------------|-----------|
| MUPOP/138/6 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | Request that reference to "short term extraction" is removed. Each proposal must be assessed on its own merits with development being acceptable where restoration is possible. Shouldn't be a presumption against extensions so as to protect existing reserves | Strategic | Plan Area | Plan Area |
| MUPOP/222/6 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | Objects to policy wording on basis that it limits, inter alia the size scale and time period relating to the expansion of existing workings. This should be driven by site specifics. | Strategic | Plan Area | Plan Area |
| MUPOP/222/7 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | Policy Min 2 should facilitate on site processing of materials where it is temporary and it can be restored without environmental harm. Peat extraction regularly involves on site processing. | Strategic | Plan Area | Plan Area |
| MUPOP/223/44 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | amplification required - what is meant by "short term?" and what is meant by "limited?" | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|------------------------------|---|--|-----------|-----------|-----------|
| MUPOP/223/45 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | the requirement for there to be no on site processing of material is prejudicial to existint gsites where material is already processed on site. Perhaps should say....There shall be no processing of material within extension area or planning application area? | Strategic | Plan Area | Plan Area |
| MUPOP/281/24 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | TIME FRAMES ON EXTRACTION WILL MAKE IT HARD TO ATTRACT INVESTMENT TO FUND EXTRACTION PROCESS. NO EVIDENCE TO JUSTIFY SHORT TERM EXTRACTION REQUIREMENT. DEV.MAN. PROCESS / CONDITIONS / MONITORING CAN ENSURE ENV. CONSIDERATIONS. EG. N.Y.M CASE IN ENGLAND. | Strategic | Plan Area | Plan Area |
| MUPOP/281/25 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | "LIMITED ENVIRONMENTAL EFFECTS." THIS TERM IS UNDERSCRIPTIVE. ENV. MITIGATION CAN BE ACHIEVED VIA CONDITIONS AND SUBMISSION OF ENV. INFORMATION. SUGGESTED WORDING - "IT CAN BE DEMONSTRATED THAT THERE WILL BE NO UNREASONABLE ENV. IMPACTS." | Strategic | Plan Area | Plan Area |
| MUPOP/281/26 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | "NO ON SITE PROCESSING." DALRADIAN DISAGREE. ON SITE PROCESSING CAN LIMIT AIR IMPACTS VIA TRAFFIC MOVEMENT. PROPOSALS FOR ON SITE EXCAVATION SHOULD BE APPROVED WHERE IT IS PROVED THAT THERE WILL BE NO UNREASONABLE ADVERSE ENV. IMPACTS. | Strategic | Plan Area | Plan Area |
| MUPOP/281/27 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | "ADEQUATE RESTORATION PROPOSALS" - DALRADIAN WOULD WELCOME THIS INCLUSION IN POLICY. | Strategic | Plan Area | Plan Area |
| MUPOP/306/76 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | Rewording needed to provide clarity on the limited environmental impact test in order for it to be robust and not subject to interpretation. | Strategic | Plan Area | Plan Area |
| MUPOP/306/77 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | Criterion (d) should be amended 'to include wording 'sustainable restoration proposals' and 'the enhancement of biodiversity wherever possible'. | Strategic | Plan Area | Plan Area |
| MUPOP/306/78 | Opinion to Pop | Economic Policies - Minerals | MIN 2: Areas of Constraint on Mineral Development | Policy needs to articulate that an exception will not be applied to for unconventional hydrocarbon extraction until there is sufficient and robust evidence on all environmental impacts, consistent with Regional Strategic Policy. | Strategic | Plan Area | Plan Area |

|--------------|----------------|------------------------------|-------------------------------------|--|-------------|------------|-----------|
| MUPOP/281/28 | Opinion to Pop | Economic Policies - Minerals | MIN 3: Mineral Reserve Policy Areas | DALRADIAN WELCOME THE INCLUSION OF THE PROVISIONS OF PROPOSED POLICY MIN 3. HOWEVER, THEY WOULD ADVOCATE THE PROTECTION ALSO BEING EXTENDED TO AREAS WHERE THERE ARE IDENTIFIED RESOURCES. | Strategic | Plan Area | Plan Area |

Minerals General Comments

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|---|------------------------------|----------------------|---|---------------|-----------------|-----------|
| MUPOP/98/1 | Opinion to Pop | Economic Policies - Minerals | GEN: General Comment | Lays out the extent of the operation at Crancussy Rd. Shows maps outlining Phases 1 & 2 of approval. Also includes details of infrastructure which are in place to allow processing to take place on site which shows level of investment which has taken place | Site Specific | Cookstown Rural | Cookstown |
| MUPOP/98/5 | General Comment - Requiring No Further Action | Economic Policies - Minerals | GEN: General Comment | Table containing the information requested by MUDC in relation to extraction rates, remaining reserves etc. | Site Specific | Cookstown Rural | Cookstown |
| MUPOP/146/18 | General Comment - Requiring No Further Action | Economic Policies - Minerals | GEN: General Comment | There is a need for a Regional Mineral Strategy to cover the whole of Northern Ireland | Strategic | Plan Area | Plan Area |
| MUPOP/146/19 | General Comment - Requiring No Further Action | Economic Policies - Minerals | GEN: General Comment | Projections for future demand are not certain and can vary depending on the implementation of various projects, particularly infrastructure projects. Therefore, a "buffer" should be added to projected demand to allow for these occurrences. | Strategic | Plan Area | Plan Area |
| MUPOP/146/20 | Opinion to Pop | Economic Policies - Minerals | GEN: General Comment | Minerals are not just an important resource for Mid Ulster, as stated in the POP, but are a vital component of the local construction industry and by association, the local economy. | Strategic | Plan Area | Plan Area |
| MUPOP/146/21 | Opinion to Pop | Economic Policies - Minerals | GEN: General Comment | Mineral employment figures of 1250 may not be accurate as this is viewed from QPANI and does not include non QPANI members. Also query if it includes indirect employment and not just quarrying activity. | Strategic | Plan Area | Plan Area |
| MUPOP/146/22 | Opinion to Pop | Economic Policies - Minerals | GEN: General Comment | Significant concern regarding the value of mineral production in MU which would suggest a selling price of £3.13 per tonne which is not accurate. | Strategic | Plan Area | Plan Area |
| MUPOP/146/23 | Opinion to Pop | Economic Policies - Minerals | GEN: General Comment | As per the previous two elements, the figures for employment and production are flawed and these are the basis for the mineral strategy. Flaws also exist in the approach whereby, figures on production/demand where sought after the POP and not before. | Strategic | Plan Area | Plan Area |

| | | | | | | | |
|--------------|----------------|-----------------------------|----------------------|---|-----------|-----------|-----------|
| MUPOP/228/76 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | EXTEND OBJECTIVE TO INCLUDE: 'VALUE & TARGET FOR SUPPORT, PROTECTION & ENHANCEMENT OF THIS COUNCILS BUILT & NATURAL HERITAGE ASSETS INCL. COLLECTIVE HISTORIC URBAN SETTLEMENTS DATING FROM ULSTER PLANTATION. NEW DEVELOPMENT TO PROTECT/RESPECT EXISTING HERITAGE | Strategic | Plan Area | Plan Area |
| MUPOP/228/77 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | MID ULSTER HAS SETTLEMENTS WITH ULSTER PLANTATION ORIGINS INCL DUNGANNON, MAGHERAFELT, DRAPERSTOWN MONEYMORE, THE MOY. STRONG CONCENTRATION OF COLLECTIVE HISTORIC URBAN SETTLEMENTS - RICH CULTURAL ASSET/RESOURCE ON WHICH TO BUILD A STRONG TOURIST PRODUCT. | Strategic | Plan Area | Plan Area |
| MUPOP/228/78 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | STATES TOURISM IRELAND RESEARCH BUILT/NATURAL HERITAGE ARE TWO PRIMARY ELEMENTS THAT MAKE A PLACE DISTINCTIVE & THAT IT IS SAID VISITORS TO HERITAGE STAY TWICE AS LONG AS OTHER VISITORS & SPEND TWICE AS MUCH. | Strategic | Plan Area | Plan Area |
| MUPOP/228/79 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | STATES THAT AN OVERARCHING LDP OBJECTIVE IS TO PROMOTE JOBS IN THE DISTRICT & PROMOTION OF JOBS IN THE TOURISM SECTOR IS AN IMPORTANT WAY OF ENSURING THERE IS A DIVERSE RANGE OF JOBS ACROSS ALL SECTORS. | Strategic | Plan Area | Plan Area |
| MUPOP/228/81 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | REFERS TO A 'STUDY OF THE ECONOMIC VALUE OF NI'S HISTORIC ENVIRONMENT' WHICH HIGHLIGHTS THE HISTORIC ENVIRONMENT IN NI PRODUCES A LOWER LEVEL OF OUTPUT THAN NEIGHBOURING JURISDICTIONS, THEREBY SIGNIFICANT POTENTIAL TO DEVELOP THE HISTORIC ENVIRONMENT SECTOR IN NI | Strategic | Plan Area | Plan Area |
| MUPOP/228/82 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | STATES THAT THE REGIONS BUILT & NATURAL HERITAGE IS AN OPPORTUNITY TO DEVELOP SUSTAINABLE WORK FOR PEOPLE BUT THAT SKILLS DEVELOPMENT IS REQUIRED TO DEVELOP A WORKFORCE EQUIPPED TO DELIVER THIS. | Strategic | Plan Area | Plan Area |
| MUPOP/228/83 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | RE-WORD OBJECTIVE TO INCLUDE: SUPPORT 'TOURISM DEVELOPMENT' IN RURAL AREAS WHICH IS OF APPROPRIATE SCALE/NATURE/LOCATION AND ADD 'CONTRIBUTE TO THE REGIONAL ECONOMY THROUGH A GROWTH IN TOURISM'. | Strategic | Plan Area | Plan Area |
| MUPOP/228/85 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | STATES TOURISM IN SETTLEMENTS SHOULD BE FACILITATED BY VALUING & PRIORITISING FOR SUPPORT/ PROTECTION/ ENHANCEMENT OF BUILT/NATURAL HERITAGE ASSETS. NEW DEVELOPMENT WITHIN HISTORIC SETTLEMENTS SHOULD STRENGTHEN THE TOURIST OFFER & BE APPROPRIATE SCALED. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|-----------------------------|----------------------|--|--------------------------|------------------|------------|
| MUPOP/228/98 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | ANSWER TO SHOULD THERE BE NO LIMITATION TO SELF-CATERING ACCOMMODATION QUESTION: RECOMMEND THAT THERE NEEDS TO BE CONTROL OF ALL DEVELOPMENT THAT CATERERS FOR TOURIST ECONOMY PARTICULARLY WHEN THIS IS LOCATED IN/ADJACENT TO THE TOURIST PRODUCT. | Strategic | Plan Area | Plan Area |
| MUPOP/228/99 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | PLANNING POLICY SHOULD ENCOURAGE HOTEL/GUESTHOUSE/HOSTEL DEVELOPMENT WITHIN SETTLEMENTS AS A PRIORITY AS OPPOSED TO EDGE OF SETTLEMENT LOCATIONS. POLICY MAY BE LESS PRESCRIPTIVE ABOUT DESIGN APPROACHES ALTHOUGH PROPOSALS WHOULD INTEGRATE WITH CONTEXT. | Strategic | Plan Area | Plan Area |
| MUPOP/273/14 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | TURBINES CAN ACT AS A TOURIST ATTRACTION AND PROMOTE TOURISM. FOR EXAMPLE THE WIND TURBINE AT ALTAHULLION IS LISTED AS A TOURIST ATTRACTION. | Strategic | Plan Area | Plan Area |
| MUPOP/283/3 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | APPROPRIATE DEVELOPMENT CAN HELP TO PROMOTE LOUGH NEAGH AS A TOURIST DESTINATION AND HELP FUND THE CONSERVATION OF VALUED LANDSCAPES. | Strategic | Plan Area | Plan Area |
| MUPOP/293/14 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | STATES CARNTOGHER HOLDS MAJOR POTENTIAL TO DEVELOP CULTURAL, ENVIRONMENTAL, ARCHAEOLOGICAL & OUTDOOR ACTIVITY TOURISM OFFER. LISTS ITS ASSETS, TRADITIONS & HOW IT IS INTERNATIONALLY RECOGNISED AS LEADING WAY FOR IRISH LANGUAGE REINSTATEMENT IN IRELAND. | Strategic/ Site Specific | Carntogher Rural | Carntogher |
| MUPOP/293/16 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | TOURISM DEVELOPMENT IN CARNTOGHER & POTENTIAL IT HOLDS OFFERS A SIGNIFICANT OPPORTUNITY THAT COULD HAVE MAJOR SYNERGY WITH AN EMERGING GAELTACHT DESIGNATION (SUGGESTED) HELPING CREATE A TOURISM HOTSPOT THAT COULD GENERATE SIGNIFICANT TOURISM IN MUDC. | Strategic/ Site Specific | Carntogher Rural | Carntogher |
| MUPOP/306/81 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | The LDP should ensure that tourism proposals do not have an adverse impact on biodiversity. It is imperative that the Mid Ulster LDP provides strong policy protection for those areas of natural and semi-natural habitat which lack formal designation. | Strategic | Plan Area | Plan Area |
| MUPOP/306/82 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | POP does not refer to sustainable tourism, as set out in the SPPS (6.254). The objective as contained within the SPPS is to 'facilitate sustainable tourism in an environmentally friendly sensitive manner | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|-----------------------------|----------------------|--|-----------|-----------|-----------|
| MUPOP/306/83 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | Potential disturbance to key birds from recreational tourism should be considered. Particularly areas of important habitat for breeding waders, Eurasian Curlew Northern Lapwing & Common Snipe e.g. along shores of Lough Beg and Lough Neagh (SEE maps). | Strategic | Plan Area | Plan Area |
| MUPOP/306/84 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | Lough Beg is not shown on the Tourism Map-this is a critical omission and should be remedied both in terms of its consideration within the LDP and future mapping. LDP should steer tourism related development away from sensitive areas e.g. Lough Neagh /beg. | Strategic | Plan Area | Plan Area |
| MUPOP/306/88 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | Tourism assets must include landscapes like Lough Beg, (based on legacy of Seamus Heaney) and other 'honey pot sites' if created around Lough Neagh where wetlands are close to main transport routes linking Titanic Belfast with Fermanagh Lakes. | Strategic | Plan Area | Plan Area |
| MUPOP/306/89 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | Additional sites within the tourism map should include the destinations being developed by Mid Ulster Council as part of the Seamus Heaney HomePlace Long Point, Lough Beg, and Toner's Bog. In addition to Washing Bay/Derryloughan at Lough Neagh. | Strategic | Plan Area | Plan Area |
| MUPOP/306/90 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | The south-west corner of Lough Neagh should be considered as a Proposed Tourism Conservation Zone, as should the area at Lough Beg. | Strategic | Plan Area | Plan Area |
| MUPOP/318/10 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | Wary of the potential contribution that can be made locally by tourism and believes therefore that this unproven potential should not be allowed to restrict/prevent other developments. | Strategic | Plan Area | Plan Area |
| MUPOP/336/5 | Opinion to Pop | Economic Policies - Tourism | GEN: General Comment | Important tourism assets in Mid Ulster are Lough Neagh, The Sperrin's and "Heaney Country". | Strategic | Plan Area | Plan Area |

AFR PA OPT 1- Adopt existing Policy Approach

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|---|--|--|-------------|------------|-----------|
| MUPOP/306/91 | Opinion to Pop | Economic Policies - Agriculture, Forestry and Rural Development | AFR PA OPT 1: Adopt Existing Policy Approach | Supports this approach, in that existing buildings should be utilised in the first instance, unless there are exceptional circumstances. In line with strategic policy, these reasons should be clearly articulated. | Strategic | Plan Area | Plan Area |

AFR1 - Agriculture and forestry development

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|---|--|---|-------------|-----------------|-----------|
| MUPOP/102/3 | Opinion to Pop | Economic Policies - Agriculture, Forestry and Rural Development | AFR1: Agriculture and Forestry Development | The group are supportive of the removal of the requirement to demonstrate need when applying to build a new agricultural shed; as long as the development is subject to other planning considerations | Strategic | Cookstown Rural | Cookstown |
| MUPOP/296/17 | Opinion to Pop | Economic Policies - Agriculture, Forestry and Rural Development | AFR1: Agriculture and Forestry Development | AGREE THAT A MORE FLEXIBLE APPROACH IS NEEDED. HOWEVER, IN GENERAL, POLICY SHOULD FOCUS NEW BUILDING AT THE SITE OF EXISTING CLUSTERS OF BUILDINGS. | Strategic | Plan Area | Plan Area |

AFR2: Farm Diversification

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|---|----------------------------|--|-------------|-----------------|-----------|
| MUPOP/102/4 | Opinion to Pop | Economic Policies - Agriculture, Forestry and Rural Development | AFR2: Farm Diversification | The group welcome the commitment to continue to facilitate farm diversification schemes. | Strategic | Cookstown Rural | Cookstown |
| MUPOP/228/102 | Opinion to Pop | Economic Policies - Agriculture, Forestry and Rural Development | AFR2: Farm Diversification | AGREE WITH POLICY APPROACH THAT EXISTING BUILDINGS SHOULD BE UTILISED IN FIRST INSTANCE TO FACILITATE FARM DIVERSIFICATION. STATES THAT DIVERSIFICATION PROPOSALS INVOLVING NEW BUILDINGS SHOULD BE LIMITED IN SIZE. | Strategic | Plan Area | Plan Area |
| MUPOP/340/53 | Opinion to Pop | Economic Policies - Agriculture, Forestry and Rural Development | AFR2: Farm Diversification | FACILITATION OF FARM DIVERSIFICATION IS WELCOMED BUT REQUIREMENT FOR THE NEW ACTIVITY TO RUN IN CONJUNCTION WITH THE FARM IS TOO RESTRICTIVE & MAY BE COUNTER PRODUCTIVE REGARDING FARM DIVERSIFICATION. | Strategic | Plan Area | Plan Area |

AFR 3: Conversion and Re-use of existing buildings fr Non-Residential Use

Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|----------------|---|--|--|-----------|-----------|-----------|
| MUPOP/228/136 | Opinion to Pop | Environmental Policies - Natural Heritage | NH6: Areas of Outstanding Natural Beauty | STATES THEY CONSIDER THERE IS A NEED FOR ADDITIONAL CONTROLS FOR MINERAL EXTRACTION AND HIGH STRUCTURES, INCLUDING WIND TURBINES, TELECOMMUNICATIONS AND OVERHEAD CABLES, WITHIN THE AONB. | Strategic | Plan Area | Plan Area |
| MUPOP/228/137 | Opinion to Pop | Environmental Policies - Natural Heritage | NH6: Areas of Outstanding Natural Beauty | STATES IN ABSENCE OF NATIONAL PARKS OUR AONB ARE OUR FINEST NATURAL ASSETS-NEED MAXIMUM PROTECTION. WANT POLICIES STRENGTHENED TO INCL. PROTECTION OF AONB IMMEDIATE & WIDER SETTINGS; SHORT/ LONG DISTANCE VIEWS TO/FROM AONB TO DEV. WITHIN/BEYOND.. | Strategic | Plan Area | Plan Area |
| MUPOP/249/9 | Opinion to Pop | Environmental Policies - Protecting Heritage and Providing Infrastructure | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | REP IS SUPPORTIVE OF THIS APPROACH. | Strategic | Plan Area | Plan Area |
| MUPOP/280/8 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | For this approach to be effective it requires comprehensive baseline data on all aspects of the environment (natural and historic/built) as well as the expertise to accurately assess the impact of proposed developments on key assets/areas. | Strategic | Plan Area | Plan Area |
| MUPOP/283/2 | Opinion to Pop | Environmental Policies - Natural Heritage | NH1: International Designation | THERE IS A RISK THAT A PLANNING POLICY IN THE PROPOSED SCA WILL BE OVERLY RESTRICTIVE AND WILL NOT RECOGNISE THE ABILITY FOR SYMPATHETIC DEVELOPMENT TO BE ACCOMMODATED AND ASSESSED ON ITS MERIT ON A SITE BY SITE BASIS. | Strategic | Plan Area | Plan Area |
| MUPOP/306/33 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | Welcomes SCA, but recognition must be given to biodiversity outwith designated sites. Small portion of our biodiversity is protected in designated sites eg. lowland grassland important for waders, & blanket bog import for ecosystem services & GHG targets | Strategic | Plan Area | Plan Area |
| MUPOP/306/34 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | LDP must; spell out the precise extent of SCA's, what SCA's mean & how they will be managed. Recommends SCA extends beyond the ASSI/SPA and includes Ramsar areas & the 'S.Heaney landscape' at Lough Neagh & Lough Beg, to help buffer protected areas. | Strategic | Plan Area | Plan Area |
| MUPOP/306/35 | Opinion to Pop | | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | SCA might also include Annaghroe/Annacraup and Blackwater Wetlands, and Slieve Beagh given its importance to birds of prey such as merlin, peregrine and falcon. | Strategic | Plan Area | Plan Area |
| MUPOP/306/36 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | Areas outside of any area of constraint zoning must not become the 'sink holes' for development, the potential environmental impacts of any development or constraint zoning must be thoroughly assessed in the decision making process. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|----------------|---|--|---|-----------|-----------|-----------|
| MUPOP/306/37 | Opinion to Pop | Growth Strategy and Spatial Framework | ENV Opt 3: Presumption in favour of sustainable development - Plan led in Partnership with scope for developer led schemes | To halt the loss of our habitats & species, MUDC will need to 'work(ing) towards the restoration of & halting the loss of biodiversity' (para 3.33 of the SPPS). Refers to Defra survey and how planning system is important tool for biodiversity enhancement. | Strategic | Plan Area | Plan Area |
| MUPOP/306/101 | Opinion to Pop | Environmental Policies - Natural Heritage | NH2: Protected Species | No objection to this policy approach, provided there is no weakening of existing policy approach. Recommends link included to state where terms priority habitats and priority species is found, as per SPPS. | Strategic | Plan Area | Plan Area |
| MUPOP/306/102 | Opinion to Pop | Environmental Policies - Natural Heritage | NH3: National Designations | Questions the merit of removing reference to the AONB designation. Recommends word 'would' is replaced with 'could'. 'would' does not incorporate precautionary principle. Should include wording on value of habitat network & sites of special interest. | Strategic | Plan Area | Plan Area |
| MUPOP/306/103 | Opinion to Pop | Environmental Policies - Natural Heritage | NH4: Local Designations | Suggests policy wording is strengthened to ensure that adequate mitigation is provided and appropriate conditions are applied in the event of an approval. Circumstances that outweigh the values of such a site, should also be clarified within the policy. | Strategic | Plan Area | Plan Area |
| MUPOP/306/104 | Opinion to Pop | Environmental Policies - Natural Heritage | NH5: Other Habitats, Species or Features of Natural Importance | Supports this policy although suggests that it should provide a list of habitats, species or features as contained within the SPPS (6.192) and an indication of where these can be found. Notes that no reference is made to values of ecosystem services. | Strategic | Plan Area | Plan Area |
| MUPOP/306/105 | Opinion to Pop | Environmental Policies - Natural Heritage | NH6: Areas of Outstanding Natural Beauty | Wording doesn't have regard to heritage & wildlife & should read 'Development will be required to be sensitive to the distinctive special character & the quality of their landscape, heritage & wildlife of Sperrins Area AONB in order to conform with LDP'. | Strategic | Plan Area | Plan Area |
| MUPOP/306/106 | Opinion to Pop | Environmental Policies - Natural Heritage | NH6: Areas of Outstanding Natural Beauty | Policy needs to include wording on cumulative impacts in such areas, and reference to the Landscape Character Assessments and any other relevant guidance including AONB Management Plans and local design guides in the assessment of development proposals. | Strategic | Plan Area | Plan Area |

FLD 1: Fluvial Flood Plains

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|---------------------------|--|-------------|------------|-----------|
| MUPOP/249/23 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD1: Fluvial Floodplains | THE REP IS SUPPORTIVE OF THE PROPOSED FLOODING POLICY WHICH MIRRORS EXISTING PROVISIONS OF PPS 15. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|----------------|--|---------------------------|---|-----------|-----------|-----------|
| MUPOP/306/115 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD1: Fluvial Floodplains | Suggests a presumption against the development of previously developed land within settlement limits, even if the appropriate 'current' minimum standard of flood defence has been met. | Strategic | Plan Area | Plan Area |
| MUPOP/306/116 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD1: Fluvial Floodplains | Should be reworded; Where flood Protection and/ or management measures are 'identified in a Flood Risk Assessment' in order to facilitate 'valid exception' development within flood plains, the following will not be acceptable... | Strategic | Plan Area | Plan Area |
| MUPOP/306/117 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD1: Fluvial Floodplains | Should include requirement for FRA within this policy, including a requirement that when a site is close to the margins of the flood plain as depicted on Strategic flood Map a more accurate definition of the extent of potential flooding is required. | Strategic | Plan Area | Plan Area |

PFD&DI OPT 1 - ADOPT EXISTING POLICY APPROACH

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--|--|--|-------------|------------|-----------|
| MUPOP/296/19 | Opinion to Pop | Environmental Policies - Flood Risk Management | PFD&DI OPT 1: Adopt Existing Policy Approach | GENERALLY, FLOODPLAIN POLICY AS EXISTING IS REASONABLE ALTHOUGH THERE IS A NEED TO ALLOW COUNCIL TO BE PRAGMATIC AND TO ALLOW PROPOSALS WHICH WILL HAVE NEGLIGIBLE IMPACTS OR IS THE IMPACTS CAN BE MITIGATED AGAINST. | Strategic | Plan Area | Plan Area |

FLD: Flood Defence and Drainage Infrastructure

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|--|---|--|-------------|------------|-----------|
| MUPOP/306/118 | Opinion to Pop | Environmental Policies - Natural Heritage | FLD2: Flood Defence and Drainage Infrastructure | Supports policy provided permission can still be granted for redevelopmentT that replaces hard with soft flood defence mechanisms e.g. in certain cases to breach flood defences to allow flooding of low-lying land for managed retreat purposes. | Strategic | Plan Area | Plan Area |
| MUPOP/306/119 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD2: Flood Defence and Drainage Infrastructure | Wording should include 'The council will not permit development that would impede the operational effectiveness of flood defence and drainage infrastructure or hinder access for maintenance purposes'. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|---------------|-------------------|--|---|--|-----------|-----------|-----------|
| MUPOP/306/120 | Opinion to SA/SEA | Environmental Policies - Flood Risk Management | FLD2: Flood Defence and Drainage Infrastructure | The dimensions of the Rivers Agency working strip should be contained within the policy; 'The working strip should have minimum width of 5 metres, and up to 10 metres where considered necessary, and be provided with clear access and egress at all times'. | Strategic | Plan Area | Plan Area |
|---------------|-------------------|--|---|--|-----------|-----------|-----------|

FLD 3: Development and Surface Water(Pluvial) Flood Risk Outside Flood Plains

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|--|--|---|-------------|------------|-----------|
| MUPOP/306/121 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD 3: Development and Surface Water (Pluvial) Flood Risk Outside Flood Plains | Queries how scenarios in last paragraph of FLD 3 will be effectively regulated and monitored to ensure compliance so as to avoid pluvial flood risk. | Strategic | Plan Area | Plan Area |
| MUPOP/306/122 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD 3: Development and Surface Water (Pluvial) Flood Risk Outside Flood Plains | Hopes that FLD 3 is reflected in the assessment of plans to extract peat from lowland and raised bogs in NI, and that the precautionary approach will be adopted, given they are internationally recognised as important for water storage. | Strategic | Plan Area | Plan Area |
| MUPOP/306/123 | Opinion to Pop | | FLD 3: Development and Surface Water (Pluvial) Flood Risk Outside Flood Plains | Where planning permission is granted subject to the undertaking of mitigation measures, a planning agreement to facilitate their long-term management may be required. | Strategic | Plan Area | Plan Area |

FLD 4: Artificial Modification of Watercourses

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|--|--|--|-------------|------------|-----------|
| MUPOP/306/124 | Opinion to Pop | Environmental Policies - Flood Risk Management | FLD 4: Artificial Modification of Watercourses | Supports policy approach although concern remain regarding canalisation of any form can disrupt the connectivity and interaction between wetlands, riparian zones and rivers. The RSPB also recommends leaving Policy FLD2 and FLD 4 as separate policies. | Strategic | Plan Area | Plan Area |

DEV TO RES OPT 3: Adopt no Policy in Proximity to Reservoirs

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|--|--|---|-------------|------------|-----------|
| MUPOP/249/25 | Opinion to Pop | Environmental Policies - Flood Risk Management | DEV TO RES OPT 3: Adopt no Policy in Proximity to Reservoirs | THE REP AGREES WITH THIS APPROACH | Strategic | Plan Area | Plan Area |
| MUPOP/306/125 | Opinion to Pop | Environmental Policies - Flood Risk Management | DEV TO RES OPT 3: Adopt no Policy in Proximity to Reservoirs | Concerns with this approach. Given the no. of Reservoirs in MU (15) Rivers Agency should provide the Reservoir Development Management Maps as a matter of urgency Until such times, the Regional Strategic Policy contained within the SPPS should apply. | Strategic | Plan Area | Plan Area |

General Comments: Flood Risk

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|--|----------------------|--|-------------|------------|-----------|
| MUPOP/306/107 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | The RSPB has long-advocated an integrated approach to river and coastal management which steps away from defence and drainage and instead looks to contribute to the wider social, economic and environmental objectives set by Government. | Strategic | Plan Area | Plan Area |
| MUPOP/306/109 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | Where floodplains are prevented from functioning, due to artificial flood banks, consideration should be given to the removal of strategically targeted floodbanks, to allow the floodplain to function properly, and manage the risk posed downstream. | Strategic | Plan Area | Plan Area |
| MUPOP/306/111 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | Landowners should receive ecosystem service payments, made through a joined up approach between, for eg, water companies; tourism providers; flood risk managers & environmental farming schemes | Strategic | Plan Area | Plan Area |
| MUPOP/306/112 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | Strategy should ensure that a strongly worded policy is adopted which clearly and robustly prevents new development in areas known to be at risk of flooding, or that may increase the risk of flooding elsewhere. | Strategic | Plan Area | Plan Area |
| MUPOP/306/114 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | Advocates sustainable approach to management of development & flood risk which will protect natural floodplains and allow them to be used for flood alleviation as well as contributing to safety and well-being, prudent and efficient use of economic resources, conservation & enhancement of biodiversity, conservation of archaeology & built heritage. | Strategic | Plan Area | Plan Area |
| MUPOP/306/126 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | The RSPB welcomes Mid Ulster's commitment to maintain the SPPS Regional Strategic Policy for Flood Risk. SuDs should be promoted within new developments, along with retrofits to existing developments when assessments prove the need. | Strategic | Plan Area | Plan Area |
| MUPOP/318/13 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | Tyrone GAA supports the Council's thinking here. | Strategic | Plan Area | Plan Area |
| MUPOP/340/56 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | REGARDING FLOODRISK COUNCIL THINKING IS TIMELY & APPROPRIATE. LDP SHOULD SIMULTANEOUSLY RECOGNISE CLIMATE CHANGE FACTORS WHICH INCREASE FLOOD RISK ALSO HAVE SIGNIFICANT DETRIMENTAL ECONOMIC IMPACTS ON CORE LOCAL BUSINESS ACTIVITIES EG FARMING & MINERALS. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|----------------|--|----------------------|---|-----------|-----------|-----------|
| MUPOP/306/114 | Opinion to Pop | Environmental Policies - Flood Risk Management | GEN: General Comment | key actions of the Food Risk Strategy should include a policy to promote sustainable development through the retention and restoration of natural flood plains and natural watercourses as a form of flood alleviation and an important environmental and social resource | Strategic | Plan Area | Plan Area |
|---------------|----------------|--|----------------------|---|-----------|-----------|-----------|

WM SPA OPT 1: Adopt Existing Policy Approach

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|---|--|--|-------------|------------|-----------|
| MUPOP/306/127 | Opinion to Pop | Environmental Policies - Waste Management | WM SPA OPT 1: Adopt Existing Policy Approach | There is no reason why the suggested policy approach cannot accommodate the policy provisions of PPS11 as amended by the SPPs. This could provide all the various tests relating to flooding, built and natural heritage, roads matters etc. | Strategic | Plan Area | Plan Area |

Telecommunications

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|--|--|---|-------------|-----------------|-----------|
| MUPOP/102/9 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | TOHS 1: Outside of "Areas of Constraint on Wind Turbines and High Structure" | The group would agree with Option 2 being preferred as it introduces tighter controls on high structures. | Strategic | Cookstown Rural | Cookstown |
| MUPOP/146/26 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | TOHS 1: Outside of "Areas of Constraint on Wind Turbines and High Structure" | Clarity is needed within policy to ensure that the Areas of Constraint on high structures will not apply to plant machinery used for on site processing of minerals. These pieces of plant, by allowing on site processing, support sustainable transport patterns. | Strategic | Plan Area | Plan Area |
| MUPOP/259/1 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | TOHS 1: Outside of "Areas of Constraint on Wind Turbines and High Structure" | The policy should also include guidelines regarding the councils approach to undeveloped extant permissions for single rural dwellings that are or will be directly affected by the route of such overhead cables. | Strategic | Plan Area | Plan Area |
| MUPOP/306/128 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | TOHS PA OPT 2: Tailor Current Policy | RSPB welcomes coordinated approach to addressing strategic infrastructure. Opportunities should be explored to work with the utility regulator & others to bury lines where feasible. Early dialogue with TNi is encouraged to align powerlines with new roads. | Strategic | Plan Area | Plan Area |
| MUPOP/306/129 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | RE PA OPT 2: A More Sensitive Approach | The spatial approach to wind turbines in particular within this policy option should ideally be undertaken at a Northern Ireland level, and have regard to a more comprehensive list of criteria beyond landscape and visual impact. | Strategic | Plan Area | Plan Area |
| MUPOP/318/15 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | GEN: General Comment | Too many communities within Tyrone still experience unacceptable gaps in broadband and mobile phone coverage. The plan needs to support ways of filling those gaps. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|--|---|-----------|---------------|-----------|
| MUPOP/340/11 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | TOHS 1: Outside of "Areas of Constraint on Wind Turbines and High Structure" | MUDC suffers from broadband and mobile phone coverage deficits which impact on local life. LDP should be flexible and facilitate innovative responses to deficits. In the same way policy TOHS 1 shouldn't exclude applications from 'service recipients' who may wish to address deficits. | Strategic | Plan Area | Plan Area |
| MUPOP/356/8 | Opinion to Pop | Environmental Policies - Telecommunications, Overhead Cables and High Structures | TOHS 1: Outside of "Areas of Constraint on Wind Turbines and High Structure" | As the population in Aughamullan, Killeen, Derryloughan and Derrytresk grow the LDP should ensure adequate infrastructure is in place and, where necessary, accommodate future investment in services such as power, telecoms, water & sewage infrastructure. | Strategic | Torrent Rural | Torrent |

| MUPOP/34/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Welcome and Fully Support Option 2 to offer more weight to views of neighbours by requiring Wind Turbines to be located 500m from occupied dwellings unless there's agreement from those residents falling within the 500m. | Strategic | Plan Area | Plan Area |
| MUPOP/35/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Welcome and Fully Support Option 2 to offer more weight to views of neighbours by requiring Wind Turbines to be located 500m from occupied dwellings unless there's agreement from those residents falling within the 500m. | Strategic | Plan Area | Plan Area |
| MUPOP/36/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Welcome and Fully Support Option 2 to offer more weight to views of neighbours by requiring Wind Turbines to be located 500m from occupied dwellings unless there's agreement from those residents falling within the 500m. | Strategic | Plan Area | Plan Area |
| MUPOP/37/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Welcome and Fully Support Option 2 to offer more weight to views of neighbours by requiring Wind Turbines to be located 500m from occupied dwellings unless there's agreement from those residents falling within the 500m. | Strategic | Plan Area | Plan Area |
| MUPOP/38/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Welcome and Fully Support Option 2 to offer more weight to views of neighbours by requiring Wind Turbines to be located 500m from occupied dwellings unless there's agreement from those residents falling within the 500m. | Strategic | Plan Area | Plan Area |
| MUPOP/39/1 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 4: Strategic Planning Guideline | Trust that MUDC accepts that wind turbines close to homes will devalue property due to noise, visual amenity etc., and that a number of residents forced to live close to structures left with no option but to seek compensation, following recent Hight Court Judgement. | Strategic | Plan Area | Plan Area |
| MUPOP/39/2 | General Comment - Requiring No Further Action | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Research indicates the use of outdated planning guidelines, inadequate noise assessment methods etc. may now come back to haunt wind turbine industry, planning departments, land owners and other relevant organisations. | Strategic | Plan Area | Plan Area |
| MUPOP/39/3 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | It has to be accepted that wind turbines make so much noise that people living near cannot sleep, the exposure to noise causes insomnia, headaches and general inability to function normally. It would now seem the High Court agrees with my opinion. | Strategic | Plan Area | Plan Area |
| MUPOP/39/4 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | The high court ruling along with other disclosures prove families, are being forced to move/sell their homes because once a wind turbine is built near a home there is a significant decrease in value. Families being evicted by inadequate planning guidelines. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|--|--|-----------|-----------------|-----------|
| MUPOP/39/5 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Is it fair that any family that has invested hundreds of thousands of pounds in homes that they have lived in for many years are forced to move or endure a lifetime of misery, due to a turbine being built so close to their property. | Strategic | Plan Area | Plan Area |
| MUPOP/39/6 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | I trust that the process the council planning department have undertaken will result in a comprehensive overhaul of all aspects of wind turbine planning regs to include an extensive overhaul of ETSU-97 so that all types of noise can be addressed. | Strategic | Plan Area | Plan Area |
| MUPOP/39/7 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | I would hope that these issues will be discussed with the Public Health Agency as part of the consultation process currently being carried out by the Mid-Ulster Council Planning Department. | Strategic | Plan Area | Plan Area |
| MUPOP/102/10 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Supports the minimum 500m separation distance, with a view to possibly extending the 500m distance....given that some turbines can be in excess of 160m high. | Strategic | Cookstown Rural | Cookstown |
| MUPOP/238/1 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Supports the submission made by Northern Ireland Renewables Industry group (NIRIG) to the preferred options paper. | Strategic | Plan Area | Plan Area |
| MUPOP/238/2 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Objects to Renewable Energy Policy Option 2 'A more Sensitive approach'. Feels that there is no need for stricter policy as existing regime endorsed through SPPS is sufficient. Encourages MUDC to reflect on the criteria based approach to renewable energy generation contained within the SPPS. | Strategic | Plan Area | Plan Area |
| MUPOP/238/3 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 1: Adopt Existing Policy | Encourages MUDC to produce a LDP in conformity with RDS & SPPS. Recommends the existing policy framework (PPS's) is suitable and fit for purpose in assessing onshore wind energy development & that renewable energy policy Option 1 'Adopt Existing Policy' should be taken forward. | Strategic | Plan Area | Plan Area |
| MUPOP/238/5 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Outlines a number of renewable policies (promoting renewable energy) which should be reflected in the policy review papers & outcome of the LDP. In particular encourages the MUDC LDP to build on & reflect success of NI Strategic Energy Framework (SEF) 2010. | Strategic | Plan Area | Plan Area |
| MUPOP/238/6 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | As LDP intends to provide planning policy guidance to at least 2030 it's insufficient to develop policies based on 2020 targets. Need a strategy that sustains & leads district proactively tackling climate change through renewable energy development to 2030. | Strategic | Plan Area | Plan Area |
| MUPOP/264/27 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | No objections to this policy. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|---|---|--|---|-----------|-----------|-----------|
| MUPOP/264/29 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Separation distance should be confined to wind farm as opposed to "any wind turbine" in line with the provisions of the SPPs. | Strategic | Plan Area | Plan Area |
| MUPOP/264/30 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | The principle of neighbourhood agreement should be removed as it will lead to residents holding wind energy to ransom. Amenity issues can be satisfactorily addressed under proposed policies RNW1 'All Renewable Energy Development' and GP1 'General Principles'. | Strategic | Plan Area | Plan Area |
| MUPOP/264/31 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Passive solar design should be encouraged but not as a requirement. To make it a requirement might deter development. | Strategic | Plan Area | Plan Area |
| MUPOP/264/32 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Agree with the proposal to be flexible on re use and repair of existing renewable structures. | Strategic | Plan Area | Plan Area |
| MUPOP/273/2 | General Comment - Requiring No Further Action | Environmental Policies - Renewable Energy | GEN: General Comment | RES endorses the tests and criteria as set out in PPS 18 & SPPs which successfully balance the needs of the economy and environmental protection. | Strategic | Plan Area | Plan Area |
| MUPOP/273/6 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | RES is concerned that correlation between energy supply and new homes has not been considered and this will impact upon renewable energy policy. | Strategic | Plan Area | Plan Area |
| MUPOP/273/7 | Opinion to SA/SEA | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | The lack of baseline evidence regarding the need for new housing and the resultant projected energy supply will have implications for the S.E.A. | Strategic | Plan Area | Plan Area |
| MUPOP/273/8 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Regarding the encouragement within the POP on the use of gas; RES would encourage MUDC to be more progressive and encourage the use of renewables over the use of fossil fuels. | Strategic | Plan Area | Plan Area |
| MUPOP/273/9 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The POP does not mention the Paris Agreement, the UK Climate Change Act or the Carbon Plan, all of which endorse the use of renewables. Concerns expressed that the POP is not reflective of UK policy. | Strategic | Plan Area | Plan Area |
| MUPOP/273/10 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | RES has concerns that the POP places greater emphasis on the protection of visual and physical resources than the economic and environmental benefits of renewable energy. | Strategic | Plan Area | Plan Area |
| MUPOP/273/11 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | RES would encourage council to look at policy for supply and distribution network infrastructure in accordance with EirGrids Grid Development Strategy 25. | Strategic | Plan Area | Plan Area |
| MUPOP/273/13 | General Comment - Requiring No Further Action | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Renewable development can lead to direct investment into the local economy by the developer. Examples provided of Altaveedan wind farm in Antrim and & Barr Cregg windfarm in Derry. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|---|--|---|---|-----------|-----------|-----------|
| MUPOP/273/16 | General Comment - Requiring No Further Action | Environmental Policies - Renewable Energy | GEN: General Comment | RES also draws attention to other government legislation / policy which promotes renewables. | Strategic | Plan Area | Plan Area |
| MUPOP/273/18 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Welcomes acknowledgement within POP that renewable energy should be encouraged and can be a significant provider of jobs across the region. However, has concerns about the negative connotations "that appear to be applied to wind energy." | Strategic | Plan Area | Plan Area |
| MUPOP/273/19 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | The POP asserts that wind energy has a negative impact upon on built/natural heritage and landscapes. However there is no comparative analysis of impact of other forms of energy nor of the resultant displacement of mining and movement of fossil fuels | Strategic | Plan Area | Plan Area |
| MUPOP/273/20 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | MUDC seem to promote the use of gas. Unclear if this involves gas pipelines or fracking. There is no assessment of potential negative impacts of these. | Strategic | Plan Area | Plan Area |
| MUPOP/273/21 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Puts forward the opinion that existing policy under PPS18 and SPPS offers a sufficient balance and provides adequate protection for sites and habitats of recognised importance. | Strategic | Plan Area | Plan Area |
| MUPOP/273/22 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | RES is concerned that the POP focuses only on the negatives of wind energy development and ignores the unique potential of the west of NI for wind energy, one of the best places in Europe for such development. | Strategic | Plan Area | Plan Area |
| MUPOP/273/23 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | RES claims that the target figures in the POP are not reflective of all government targets and are out of date. Figures are also being used to suggest targets are ceilings which are close to being reached. Advises that targets should not be capped when achieved, siting dismissed PAC case 2007/A1313 for a wind farm at Mullaghturk. | Strategic | Plan Area | Plan Area |
| MUPOP/273/24 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Concerned that the use of targets which are now outdated will lead to under planning for the renewable needs of the future. Council should move away from outdated figures and look beyond 2020 to develop a more sustainable policy approach as per ROI. | Strategic | Plan Area | Plan Area |
| MUPOP/273/25 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | RES make the point that not all projects will be implemented and that those which are implemented will be nearing the end of their conditioned lifespan. This should be factored into MUDC thinking for any future plan policy. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|---|--|--|-----------|-----------|-----------|
| MUPOP/273/26 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Policy should embrace the circular economy approach; reusing, remanufacturing and recycling should be a major consideration in future policy, referring to Scottish Planning Policy -SPP -para.174. The impacts of this will be less than "virgin sites" or one off turbines. | Strategic | Plan Area | Plan Area |
| MUPOP/273/28 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | RES has concerns that there is an inference that wind farm development will not be facilitated. As recognised by PPS 18, wind energy development needs to be located where the wind source is and a proposal to zone these areas as areas of constraint will be contrary to this. | Strategic | Plan Area | Plan Area |
| MUPOP/273/29 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 1: Adopt Existing Policy | RES supports the existing criteria based approach in the SPPS which along with EIA and associated mitigation, achieves the right balance between facilitating development and protecting the environment. This would allow appropriate development to meet NI energy targets. | | Plan Area | Plan Area |
| MUPOP/273/30 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | RES strongly objects to option 2 'A more sensitive approach'. Considers this to be an overly restrictive and exhaustive approach which is not required given the existing protection afforded under existing policy. Protection is evident in the refusals as shown in recent PAC decisions. | Strategic | Plan Area | Plan Area |
| MUPOP/273/31 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Without prejudice, if option 2 is pursued, then RES would encourage the allowance of expansion and redevelopment of existing windfarms which already lie within the designations. | Strategic | Plan Area | Plan Area |
| MUPOP/273/32 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | A proliferation of small wind turbines would have a worse cumulative impact than a well sited and designed wind turbine. This is a realistic scenario /outcome under this policy approach. | Strategic | Plan Area | Plan Area |
| MUPOP/273/33 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | RES reminds MUDC of requirement to be in "general conformity" with RDS and SPPS. The best option for achieving soundness is to reflect the policies of the SPPS in the POP. | Strategic | Plan Area | Plan Area |
| MUPOP/284/14 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Supports, in general terms policies to encourage renewable energy. Impacts on designated assets, such as listed buildings, conservation areas, areas of townscape character should also be considered. | Strategic | Plan Area | Plan Area |
| MUPOP/284/15 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | The POP does not cover the potential for integrated Renewable Energy and Passive Solar Design, which needs detailed consideration for historic buildings. The concept of integrating measures to enhance the energy performance of buildings is supported. | Strategic | Plan Area | Plan Area |
| MUPOP/284/16 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Potential visual issues in introducing renewable energy technology into traditional buildings. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|---|--|--|-----------|-----------|-----------|
| MUPOP/303/1 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Does not agree with option 2 'a more sensitive approach' as the preferred option for renewable energy. States this option is much more restrictive outlining that it suggests introducing proposed areas of constraint on wind turbines & high structures | Strategic | Plan Area | Plan Area |
| MUPOP/303/2 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 1: Adopt Existing Policy | Favours option 1 (Adopt Existing Policy) as the preferred option for renewable energy. | Strategic | Plan Area | Plan Area |
| MUPOP/303/3 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Opposes area of constraint at High Sperrins AONB. Feels that the boundary identified incorrectly encompasses a larger area including not just more sensitive but also less sensitive parts (such as Beltonanean & Ballynagilly) which it shouldn't. | Strategic | Plan Area | Plan Area |
| MUPOP/303/4 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Opposes Option 2 and the introduction of areas of constraint; stating applications should be assessed on own merits rather than imposing a complete restriction of a certain type of development in certain sensitive areas. | Strategic | Plan Area | Plan Area |
| MUPOP/303/5 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | LDP should focus on appropriate siting and design of development in sensitive/designated landscapes rather than prohibition (turbines over 15 m's within areas of constraint). Assessing on merit ensures landscape protection & renewable energy development to meet & sustain society's needs. | Strategic | Plan Area | Plan Area |
| MUPOP/303/6 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | Option 2 is too restrictive given SPPS is overall supportive of renewable energy proposals & requires councils set out policies & proposals in LDP's supporting a diverse range of renewable energy development (Para.6.221). | Strategic | Plan Area | Plan Area |
| MUPOP/303/7 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | States Option 2 would not only severely restrict wind energy development but also the development of telecommunications, grid infrastructure, biomass, power storage, as well as existing facilities (quarries etc). | Strategic | Plan Area | Plan Area |
| MUPOP/303/8 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | Existing planning policy (PPS18 & SPPS) advocates a cautious approach to the siting of wind energy proposals within AONB and this should be adopted by MUDC as suggested in option 1. | Strategic | Plan Area | Plan Area |
| MUPOP/303/9 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | Option 2 could impact on NI's ability to meet renewable energy targets and would be contrary to the SPPS's overall objective for the planning system to further sustainable development. Sites aim of SPPS, Paragraph 6.218. | Strategic | Plan Area | Plan Area |
| MUPOP/303/10 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | Renewable Energy Option 2 wouldn't fully support RDS strategic objectives. The POP doesn't reflect the important role it has played, particularly wind, in reducing carbon emissions to tackle climate change. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|----------------|---|--|--|-----------|-----------|-----------|
| MUPOP/303/11 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | Encourages MUDC to recognise that a green economy involves balancing the strategic objectives of promoting climate change and economic opportunities, jobs and investment. | Strategic | Plan Area | Plan Area |
| MUPOP/303/12 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | It is unlikely that boundaries & edges of proposed areas of constraint present a sharp border of landscape quality or character as is often the case with AONB boundaries. Imposing defined areas may therefore be inaccurate and an inefficient tool in managing wind energy development. | Strategic | Plan Area | Plan Area |
| MUPOP/303/13 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | Referencing the economic development section in the POP it states wind energy development brings various economic benefits to the region and these benefits could be lost with the introduction of an option as strict as option 2. | Strategic | Plan Area | Plan Area |
| MUPOP/303/14 | Opinion to Pop | Environmental Policies - Renewable Energy | SPG 1: Strategic Planning Guideline | Both the SPSS & PPS18 recognise economic benefits of wind energy development and this isn't reflected in the preferred option for renewable energy which could compromise the economic development policy set out in the POP. | Strategic | Plan Area | Plan Area |
| MUPOP/306/130 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Recommends wording of Para 6.224 of SPSS (& PPS 18) is used. The suggested 2nd paragraph of POP re "wider environmental, economic and social benefits.." is supplementary to para 6.224 criteria and is not an adequate substitute to prevent adverse impact. | Strategic | Plan Area | Plan Area |
| MUPOP/306/131 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | There needs to be an explicit expression within Policy RNW 1 that any development on active peatland will not be permitted unless there are imperative reasons of overriding public interest. | Strategic | Plan Area | Plan Area |
| MUPOP/306/132 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Supports an suggests an NI wide approach to Areas of Constraint on wind turbines, where scope is extended to include sensitive nature features & includes habitats and species. Areas of constraint should also have their nature designations listed. | Strategic | Plan Area | Plan Area |
| MUPOP/306/133 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | It is the presence of wind turbines per se as opposed to turbines in excess of 15m height which causes issues of disturbance to particular bird species. The height of turbines is also relevant with regards to the potential for collision risk. | Strategic | Plan Area | Plan Area |
| MUPOP/306/134 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | Consideration should be given to bio-energy, in instances where management of the natural landscape could contribute to fuelling this energy. For eg. Research has shown that the energy content of wetland rushes (mown) can be entered into bioenergy market. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|---------------|-------------------|---|----------------------|--|-----------|-----------|-----------|
| MUPOP/306/143 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommends a more structured, strategic and spatially explicit approach should be taken to the planning and deployment of renewable energy proposals avoiding our most important areas for wildlife(Natura 2000 sites, ASSI's etc.) | Strategic | Plan Area | Plan Area |
| MUPOP/306/144 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommends that spatial planning for renewables is included at the finer scale in local development plans. | Strategic | Plan Area | Plan Area |
| MUPOP/306/145 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommends continuance of the precautionary approach used by regulators in decision-making when there is significant uncertainty as to the impacts of a wind energy proposal on sensitive bird populations. | Strategic | Plan Area | Plan Area |
| MUPOP/306/146 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Considers there to be continued need for investment into the environmental impacts of renewable technologies, and Governmental role in ensuring delivery of post construction monitoring and critical research. | Strategic | Plan Area | Plan Area |
| MUPOP/306/147 | Opinion to SA/SEA | Environmental Policies - Renewable Energy | GEN: General Comment | Reinforces the need for full and proper scoping at strategic planning SEA, EIA and project levels. | Strategic | Plan Area | Plan Area |
| MUPOP/306/148 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | There is a need for consideration of cumulative effects on birds and other wildlife. | Strategic | Plan Area | Plan Area |
| MUPOP/306/149 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | There is a need for regional and sub-regional strategic capacity assessments. | Strategic | Plan Area | Plan Area |
| MUPOP/306/150 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | There is a need for sensitivity mapping to indicate where our most sensitive habitats and species are located. | Strategic | Plan Area | Plan Area |
| MUPOP/306/151 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | There is a need for local councils to work collaboratively and use up to date evidence to gather evidence on a sub-regional basis. | Strategic | Plan Area | Plan Area |
| MUPOP/306/152 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | All developers should ensure early and proactive engagement with stakeholders. | Strategic | Plan Area | Plan Area |
| MUPOP/306/153 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The determining authority should ensure developers set aside sufficient financial requirements to support decommission activities, this needs to be strengthened through a bond or similar. | Strategic | Plan Area | Plan Area |
| MUPOP/306/154 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommends that a transparent and nationally-agreed protocol should be developed that sets out how and when discussions about community benefit should take place. 'Strategic consideration of community benefits required'. | Strategic | Plan Area | Plan Area |
| MUPOP/306/155 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommends, that community benefits should encompass biodiversity benefits – e.g. through habitat restoration or enhancement. | Strategic | Plan Area | Plan Area |
| MUPOP/306/156 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommends (in the context of previous element raised MUPOP/306/155) development of a formula of £/MW/year specifically for biodiversity-related community benefit for on-shore wind. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|-------------------|---|---|--|-----------|-----------|-----------|
| MUPOP/306/157 | Opinion to Pop | Environmental Policies - Renewable Energy | GP1: General Principles Planning Policy | Recommends consideration of following publications; 2013 Birdlife International Report 'Wind Farms and Birds', Birdlife Europe (2011) Meeting Europe's Renewable Energy Targets in Harmony with Nature & current RSPB project on renewable energy and wildlife and habitats. | Strategic | Plan Area | Plan Area |
| MUPOP/314/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Fully supports policy option 2, in particular the proposal to offer more weight to the views of neighbours by requiring wind turbines to be located 500m from occupied property. Would welcome an even greater separation distance. | Strategic | Plan Area | Plan Area |
| MUPOP/314/2 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Council should consider adoption of an application form specifically designed for wind turbines. P1 application form does not allow for relevant issues to be addressed or the appropriate information to be submitted. | Strategic | Plan Area | Plan Area |
| MUPOP/315/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Fully supports policy option 2, in particular the proposal to offer more weight to the views of neighbours by requiring wind turbines to be located 500m from occupied property. Would welcome an even greater separation distance. | Strategic | Plan Area | Plan Area |
| MUPOP/315/2 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | MUDC should consider adoption of an application form specifically designed for wind turbines. The P1 application form does not allow for relevant issues to be addressed or the appropriate information to be submitted. | Strategic | Plan Area | Plan Area |
| MUPOP/316/1 | Letter of Support | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Fully supports policy Option 2, in particular the proposal to offer more weight to the views of neighbours by requiring wind turbines to be located 500m from occupied property. Would welcome an even greater separation distance. | Strategic | Plan Area | Plan Area |
| MUPOP/316/2 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | MUDC should consider adoption of an application form specifically designed for wind turbines. P1 application form does not allow for relevant issues to be addressed or the appropriate information to be submitted. | Strategic | Plan Area | Plan Area |
| MUPOP/340/58 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Regarding renewable energy, supports the broad thrust of council thinking but have reservations about local development/infrastructure 'being stymied in favour of what is locally minimalist tourism'. | Strategic | Plan Area | Plan Area |
| MUPOP/355/1 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | NIRIG (Irish Wind Energy Association & renewables UK) provide knowledge exchange, policy development & consensus on best practice in NI's renewables industry. Its members have developed the majority of NI's wind resources— large & small scale wind, offshore & marine technologies. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|--|--|-----------|-----------|-----------|
| MUPOP/355/2 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | NIRIG welcomes opportunity to respond to POP as part of preparation for LDP as its emerging policy will have a huge impact on the further deployment of renewable electricity within Mid Ulster. | Strategic | Plan Area | Plan Area |
| MUPOP/355/3 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Renewable energy preferred option 2 to adopt a highly restrictive approach to development by introducing Areas of Constraint doesn't have regard to varied characteristics of plan area, other material considerations or policy imperative to encourage renewable energy development. | Strategic | Plan Area | Plan Area |
| MUPOP/355/4 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | MUDC should reflect criteria based approach to renewable energy generation contained in SPPS in new LDP as it provides robust assessment but also flexibility for planning balance of each application to be assessed individually, taking account of cumulative impacts | Strategic | Plan Area | Plan Area |
| MUPOP/355/18 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Climate change is one of greatest challenges facing our planet & every effort should be taken to actively tackle it. UK government & the NI executive intend to transition to a low carbon economy through growth of renewable energy technology installations. The LDP should reflect this. | Strategic | Plan Area | Plan Area |
| MUPOP/355/19 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The UK has agreed steps to implement its target to reduce emissions by at least 40% by 2030. This is particularly relevant to MUDC plan preparation & ought to be reflected in the policy review papers & outworking of the LDP. | Strategic | Plan Area | Plan Area |
| MUPOP/355/20 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | NIRIG outlines the benefits of the NI Executive's Strategic Energy Framework (SEF) & encourages MUDC to build on its success & reflect this in the LDP moving forward | Strategic | Plan Area | Plan Area |
| MUPOP/355/21 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | NIRIG strongly welcomes MUDC commitment to reflect the strategic objectives of the RDS and highlighting the need to tackle climate change as one of its key objectives. Concerns remain that the preferred policy option for renewable energy development doesn't support this | Strategic | Plan Area | Plan Area |
| MUPOP/355/22 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | References to promoting renewable energy in the POP are framed in a very limiting way and doesn't reflect the important role it has played, particularly wind energy in assisting with reducing carbon emissions in the fight to tackle climate change. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|----------------------|---|-----------|-----------|-----------|
| MUPOP/355/23 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Encourages MUDC to recognise a 'green' economy is complementary to the strategic objectives of both reducing climate change & promoting economic opportunities & jobs through new investment. | Strategic | Plan Area | Plan Area |
| MUPOP/355/24 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | A secure low carbon electricity system in NI at lowest cost to consumer and bill payer can only be achieved by retaining onshore wind in the mix for the future. Renewable energy sourced electricity will reduce electricity wholesale cost by £19m a year between 2013-2020 | Strategic | Plan Area | Plan Area |
| MUPOP/355/25 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Decarbonising electricity sector is cheapest way of decarbonising energy system; heat, agriculture & transport decarbonising expensive particularly in a rural/agricultural economy like NI. Expect more electrification of these sectors requiring more, not less, renewable electric development. | Strategic | Plan Area | Plan Area |
| MUPOP/355/26 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Onshore wind is the cheapest option for any new electricity generation. The industry has successfully innovated to the point where the support scheme for renewable electricity (NIRO) is now ending. | Strategic | Plan Area | Plan Area |
| MUPOP/355/27 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Connection to the electricity grid is a vital part of renewable energy development hence development of the transmission/distribution networks in Mid Ulster is required to support electricity generation from renewable energy. This should be recognised & facilitated through the LDP. | Strategic | Plan Area | Plan Area |
| MUPOP/355/28 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Innovations (e.g. energy storage) will play key role in increasing the electricity system stability, helping it be more economically & securely managed. Encourage MUDC to support and actively promote suitable infrastructure proposals coming forward in this arena. | Strategic | Plan Area | Plan Area |
| MUPOP/355/29 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Encourage MUDC to recognise key role renewable industry can play in meeting strategic objectives of facilitating the creation of 8500 new jobs by 2030 & promoting diversity in district's job range - give examples of job creation generally and specific to Mid Ulster. | Strategic | Plan Area | Plan Area |
| MUPOP/355/30 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | A green economy plays significant role in meeting plans objectives to rebalance economy. The report 'Onshore Wind in NI: Economic Impacts' confirms its contribution. Last year in NI 165mw of onshore wind was commissioned with value of £56m locally. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|-------------------|---|----------------------|---|-----------|-----------|-----------|
| MUPOP/355/31 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | <p>NI Developers outstrip GB counterparts ensuring windfarms have as 'much local content as possible' 49% during the construction phase (or £340,000/mw) and 67% (or £800,000/mw over project life) at operations/maintenance. At an average size of 2.8MW per turbine, the benefits to the local economy are clear. The economic contribution is particularly relevant in context of the SPPS & NI's PFG focus on developing the NI economy.</p> | Strategic | Plan Area | Plan Area |
| MUPOP/355/32 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | <p>NI executive set an important target (SEF 2010) to generate 40% of all electricity consumed from renewable energy sources by 2020. We therefore support MUDC including policies derived from SPPS & PPS18 in LDP to guide and encourage renewable energy development through and beyond the LDP period.</p> | Strategic | Plan Area | Plan Area |
| MUPOP/355/34 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | <p>Welcomes the fact that renewable energy recognised as main issue within the POP and agree that this sector should be recognised through LDP policies promoting renewable energy proposals. Strongly welcomes commitment to encourage renewable energy.</p> | Strategic | Plan Area | Plan Area |
| MUPOP/355/35 | Opinion to SA/SEA | Environmental Policies - Renewable Energy | GEN: General Comment | <p>Welcomes reference to SPPS & the regional planning context acknowledgement that 'Northern Ireland has significant renewable energy resources and a vibrant renewable energy industry that makes an important contribution towards achieving sustainable development, and is a significant provider of jobs and investment across the region.'</p> | Strategic | Plan Area | Plan Area |
| MUPOP/355/36 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | <p>Have significant concerns about the way the POP seeks to frame the promotion of renewable energy development and in particular the negative connotations that appear to be applied to wind energy.</p> | Strategic | Plan Area | Plan Area |
| MUPOP/355/37 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | <p>The POP states that the main source of renewable energy is wind but states that it 'has the greatest potential for creating adverse impact on built, natural and landscape features'. Concerned by this regressive statement and lack of comparative view of exploitation movement and burning of fossil fuels in terms of direct emissions and their associated public health, environmental, landscape and negative climate change impacts..</p> | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|----------------------|--|-----------|-----------|-----------|
| MUPOP/355/38 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The POP makes a sweeping statement wind energy has greatest potential for damage yet there's a lack of evidential comparison with other forms of energy supply that would have to be promoted in the absence of wind energy to meet renewable energy targets. | Strategic | Plan Area | Plan Area |
| MUPOP/355/39 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | NIRIG supports existing policy context (SPPS & PPS18) which limit windfarm development to only suitable sites where the impact is not adverse. The dismissal of wind energy fails to recognise NI has one of the greatest wind energy resources in Europe. | Strategic | Plan Area | Plan Area |
| MUPOP/355/40 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | POP refers to Renewable Energy targets including SEF 40% of electricity consumption from renewables by 2020 & highlights December 2015 electricity usage as 38.2%. Concerned by way this message is framed as annual figure is 25%. Work still needs done to reach the 40% target. | Strategic | Plan Area | Plan Area |
| MUPOP/355/41 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Work still needs to be done to reach our (SEF) 40% target of electricity consumption from renewables by 2020 we will need to develop further renewables to decarbonise our electricity, transport & heat. | Strategic | Plan Area | Plan Area |
| MUPOP/355/42 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | POP refers to PFG 2011-2015 targets. Concerned that MUDC is under-planning for energy consumption throughout the plan period by relying upon a target 2 years out of date & superseded by other government policies & agreements | Strategic | Plan Area | Plan Area |
| MUPOP/355/43 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | LDP is intended to provide overarching planning policy guidance to at least 2030 hence insufficient to develop policies based on 2020 targets. MUDC must look beyond 2020 targets & approach a plan strategy that can sustain district throughout plan period. | Strategic | Plan Area | Plan Area |
| MUPOP/355/44 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | MUDC have an opportunity to lead the district to proactively tackling climate change. We would encourage MUDC to adopt a more sustainable policy approach. | Strategic | Plan Area | Plan Area |
| MUPOP/355/45 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Points out that the Investment Strategy NI 2011-2021 highlights the importance of renewable sources in electricity generation and NI's need to become less reliant on fossil fuels. | Strategic | Plan Area | Plan Area |
| MUPOP/355/46 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Draws MUDC's attention to the onshore renewable energy action plan 2013-2020. It recognises the significance onshore wind has in contributing to NI renewable energy resources. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|----------------------|--|-----------|-----------|-----------|
| MUPOP/355/47 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The LDP is an opportunity to guide sustainable development throughout & beyond plan period; urge MUDC to reflect its strategic objectives by promoting a proactive approach to tackling climate change through encouraging renewable energy development. | Strategic | Plan Area | Plan Area |
| MUPOP/355/48 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | It is likely that not all consented renewable energy projects will be delivered. Therefore the plan has a duty to provide flexibility to ensure on-going supply of renewable energy. | Strategic | Plan Area | Plan Area |
| MUPOP/355/49 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | There is a number of NI windfarms that have been operational since approximately 2008 that are coming to end of their lifetime. Generally conditioned for 25yrs then to be decommissioned. IF decommissioning isn't factored into plan policies & planned for this could result in a substantial supply deficit. | Strategic | Plan Area | Plan Area |
| MUPOP/355/50 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommend LDP should embrace advantages of repowering renewable energy projects. Maintaining low carbon renewable energy generation at existing windfarm locations is clearly highly desirable. Refers to Scottish Planning Policy on existing wind farm sites. | Strategic | Plan Area | Plan Area |
| MUPOP/355/51 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Allow amendment to windfarm layouts that support co-location of other low carbon generation/technologies that may increase existing renewable technologies efficiency and build into policy and guidance to enable efficient lower cost stable future energy generation. | Strategic | Plan Area | Plan Area |
| MUPOP/355/52 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Encourage MUDC to consider a positive plan policy that supports the redevelopment & expansion of existing wind farm sites. | Strategic | Plan Area | Plan Area |
| MUPOP/355/53 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Concerned by inference that the plan doesn't need to provide for new windfarm development proposals. | Strategic | Plan Area | Plan Area |
| MUPOP/355/54 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Onshore wind is cheapest new electricity generation option and industry has innovated to point were the support scheme (NIRO) is now closing. We will continue to deliver lowest- cost electricity to consumers: any plan to restrict cheapest energy generation will have long term impacts on consumer cost. | Strategic | Plan Area | Plan Area |
| MUPOP/355/55 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Supports planning policy regime particularly balance struck in SPPS between need to protect & conserve our most precious landscapes and to proactively tackle climate change through enhanced proportion of renewable energy sources | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|--|---|-----------|-----------|-----------|
| MUPOP/355/56 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The overarching direction of the SPPS is that local councils should set policies & proposals in their ILDP's that support a diverse range of renewable energy development. | Strategic | Plan Area | Plan Area |
| MUPOP/355/57 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The SPPS stipulates LDPs must take account of its aim and regional strategic objectives for renewable energy, local circumstances & the wider environmental, social and economic benefits of renewable energy development which should be given appropriate material weight in planning policies. | Strategic | Plan Area | Plan Area |
| MUPOP/355/58 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Encourages MUDC to reflect the aspirations of the SPPS in the plan policies quoting the aim of the SPPS in relation to renewable energy (Para 6.218 of SPPS). | Strategic | Plan Area | Plan Area |
| MUPOP/355/59 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Outlining the SPPS's criteria based approach to assessing renewable energy applications, strongly encourages MUDC to reflect the criteria based approach to renewable energy generation contained within the SPPS in the new LDP.. | Strategic | Plan Area | Plan Area |
| MUPOP/355/60 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 2: A More Sensitive Approach | Objects to Option 2. Introducing a restrictive spatial policy is unnecessary as existing regime endorsed by SPPS is sufficiently protective. Elsewhere MUDC express preference for existing policies as no evidence they aren't working and this should also apply here. | Strategic | Plan Area | Plan Area |
| MUPOP/355/61 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The SPPS only permits development of wind farm sites in sensitive areas where the need outweigh the environmental impacts. The precautionary principle is fully endorsed by NIRIG. | Strategic | Plan Area | Plan Area |
| MUPOP/355/62 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Strongly encourage MUDC to produce a plan that is in conformity to RDS & SPPS | Strategic | Plan Area | Plan Area |
| MUPOP/355/63 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | The introduction of Areas of constraint in sensitive landscapes is inconsistent and contrary to national planning policy. It is also significantly inconsistent with decision making for onshore wind energy development within AONB's (see schemes like Brockaghboy, Crockandun & Dunbeg) | Strategic | Plan Area | Plan Area |
| MUPOP/355/64 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | Recommends that the existing policy framework (PPS's) is suitable & fit for purpose for assessment of onshore wind energy development accordingly the option that should be taken forward in the LDP is to maintain the existing policy position. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|---|------------------------------------|--|-----------|-----------|-----------|
| MUPOP/355/65 | Opinion to Pop | Environmental Policies - Renewable Energy | RE PA OPT 1: Adopt Existing Policy | The Renewable Energy option which the LDP should take forward is to maintain existing policy position that states there's no substitute for assessing development on its individual merits and criteria based policies that allow balance between benefits and adverse effects of development. | Strategic | Plan Area | Plan Area |
| MUPOP/355/66 | Opinion to Pop | Environmental Policies - Renewable Energy | GEN: General Comment | NI has an abundant, diverse & indigenous renewable energy resource which presents great environmental, social & economic opportunities for MUDC area. NIRIG encourages MUDC to embrace these opportunities in the formulation of the LDP. | Strategic | Plan Area | Plan Area |

TRAN 1: Dis-used Transport Routes

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|---|-----------------------------------|--|-------------|------------|-----------|
| MUPOP/228/21 | Opinion to Pop | Environmental Policies - Transportation | TRAN 1: Dis-used Transport Routes | ADVOCATE FOR THE DESIGNATION OF LANDS FOR FUTURE RAIL INFRASTRUCTURE AND RE-OPENING FORMER RAIL LINES. | Strategic | Plan Area | Plan Area |
| MUPOP/257/1 | Opinion to Pop | Environmental Policies - Transportation | TRAN 1: Dis-used Transport Routes | SUPPORTS OPTION 3 - BLANKET BAN WITH EXCEPTIONS ADOPTED. | Strategic | Plan Area | Plan Area |
| MUPOP/333/5 | Opinion to Pop | Environmental Policies - Transportation | TRAN 1: Dis-used Transport Routes | CVRG welcomes the possibility of the LDP reviewing rail links into the district. Reuse of former routes would greatly improve connectivity and offer a different choice of public transport. | Strategic | Plan Area | Plan Area |

TRAN 2: Car Parking

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|---------------|----------------|---|---------------------|---|-------------|------------|-----------|
| MUPOP/228/144 | Opinion to Pop | Environmental Policies - Transportation | TRAN 2: Car Parking | DISAGREE WITH PROTECTING EXISTING CAR PARKS. STATES POLICY SHOULD BE RE-WORDED TO ENCOURAGE DEVELOPMENT OF MULT-STORY CAR PARK & REDEVELOPMENT OF SURFACE CAR PARKS WHERE PROPOSALS WILL CREATE A MIXED USE DEVELOPMENTS INCL. MIXED TENURE RESIDENTIAL USES. | Strategic | Plan Area | Plan Area |
| MUPOP/228/145 | Opinion to Pop | Environmental Policies - Transportation | TRAN 2: Car Parking | PROTECTION OF EXISTING CAR PARKS RUNS COUNTER TO ANY POLICIES THAT SEEK TO REDUCE CAR USAGE. RECOGNISE NEED TO ACCOMMODATE CARS IN TOWNS HOWEVER PROTECTION OF SUCH IS ALSO UNSUSTAINABLE SOCIALLY, ENVIRONMENTALLY & ECONOMICALLY. | Strategic | Plan Area | Plan Area |
| MUPOP/257/2 | Opinion to Pop | Environmental Policies - Transportation | TRAN 2: Car Parking | SUPPORTS OPTION 2 - PROTECTION OF EXISTING CAR PARKS WITH THE FOLLOWING CAVEAT MID ULSTER DISTRICT COUNCIL SHOULD UNDERTAKE AN AUDIT OF CAR PARKS IN COOKSTOWN, MAGHERAFELT AND DUNGANNON TO DETERMINE DAY USAGE AND DEVELOP APPROPRIATE STRATEGIES. | Strategic | Plan Area | Plan Area |

General Comments: Urban Design, Archaeology and Built Heritage and Natural Heritage

| Reference | Nature of Reps | Section | Issue Raised | Synopsis | Designation | Settlement | District |
|--------------|----------------|--------------------------------|----------------------|---|-------------|------------|-----------|
| MUPOP/228/47 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | PLAN OBJECTIVES WORDING SHOULD INCLUDE: PROTECT THE ROLE OF LOCAL TOWNS/VILLAGES SO THAT THEY ACT AS LOCAL CENTRES FOR 'RESIDENTIAL, ECONOMIC', SHOPS AND COMMUNITY SERVICES. | Strategic | Plan Area | Plan Area |
| MUPOP/228/54 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | AGREE THAT A D&AS SHOULD BE REQUESTED FOR ANY APPLICATION NOT JUST RESIDENTIAL- IF A DESIGN TEAM HAS A WELL-FOUNDED CONCEPT THEY WILL HAVE NO DIFFICULTY PREPARING AN ADEQUATE D&AS STATEMENT. | Strategic | Plan Area | Plan Area |
| MUPOP/228/55 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | AGREE THAT A LANDSCAED ENTRANCE TO SETTLEMENTS DOES MATTER THOUGH THEY DO NOT HAVE TO BE COMPLICATED OR VISUALLY FUSSY. THE OPPOSITE IS PREFERABLE- LESS IS MORE. | Strategic | Plan Area | Plan Area |
| MUPOP/228/56 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | TO REDUCE OVERALL IMPACTS OF CAR- PARKING NEED TO REDUCE EXTENT OF CAR PARKING, PROVIDE HIGH QUALITY DESIGN OF ITS LAYOUT INCL. HARD/SOFT LANDSCAPING. DON'T ADD LANDSCAPING ON TO SCREEN SOMETHING THAT LOOKS POOR. | Strategic | Plan Area | Plan Area |
| MUPOP/228/57 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | AGREE THAT DESIGN GUIDES SHOULD BE PREPARED FOR PARTICULAR SETTLEMENTS AFTER THE PLAN IS COMPLETE AS THE ONLY ONES THAT EXISTS IS THE MAGHERAFELT TOWN CENTRE DESIGN GUIDE- HOWEVER THEY SHOULD NOT BE OVERLY PRESCRIPTIVE. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|----------------|--|----------------------|--|-----------|-----------|-----------|
| MUPOP/228/104 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | EXTEND WORDING OF BUILT HERITAGE STRATEGY TO INCLUDE: PROTECT LISTED BUILDINGS & THEIR SETTINGS; 'COLLECTIVE BUILT HERITAGE OF SIGNIFICANCE (LISTED & UNLISTED) INCLUDING HISTORIC TOWNS AND VILLAGES AND THEIR SETTINGS'. | Strategic | Plan Area | Plan Area |
| MUPOP/228/105 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | RE-WORD STRATEGY TO INCLUDE: 'IDENTIFY & AUDIT HERITAGE DERELICTION/VACANCY & EMERGENCY WORKS IN CONSERVATION AREAS, ATCS, HISTORIC PARKS / GARDENS/DEMESNES, LISTED BUILDINGS & INDUSTRIAL HERITAGE WITHIN STEELEMINTS & LOCAL LANDSCAPE POLICY AREAS. | Strategic | Plan Area | Plan Area |
| MUPOP/228/106 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | INCLUDE WORDS IN STRATEGY: 'AUDIT THE COUNCIL REGION, PARTICULARLY ALL HISTORIC SETTLEMENTS TO IDENTIFY POTENTIAL FOR ADDITIONAL DESIGNATION OF CONSERVATION AREAS, ATCS, HISTORIC PARKS/GARDENS, LISTED BUILDINGS & INDUSTRIAL HERITAGE WITHIN SETTLEMENT LIMITS | Strategic | Plan Area | Plan Area |
| MUPOP/228/107 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | INCLUDE WORDING: PROTECT BUILT / ARCHAEOLOGICAL HERITAGE THROUGH 'APPLYING A PHILOSOPHY OF CONSERVATIVE REPAIR ALSO ALLOWING ESSENTIAL CHANGES TO BE MADE IN A MANNER THAT IS SENSITIVE & SYMPATHETIC TO THE HISTORIC BUILDING & ALSO ARCHITECTURAL IDIOM OF TODAY | Strategic | Plan Area | Plan Area |
| MUPOP/228/116 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | AGREE THAT THE COUNCIL SHOULD PREPARE A LOCAL LIST OF NON- DESIGNATED HERITAGE ASSETS. SHOULD INCL: COLLECTIVE HISTORIC URBAN SETTLEMENTS- DUNGANNON, M'FELT, M'MORE, D'TOWN, MOY & ALSO COOKSTOWN (ORIGINATE FROM 1609 REGIONAL PLAN FOR ULTER) | Strategic | Plan Area | Plan Area |
| MUPOP/228/117 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | AGREE POLICY SHOULD ALLOW FOR ALTERATION/EXTENSION OF NN-LISTED VERNACULAR/INDUSTRIAL BUILDINGS TO ADDRESS NEEDS OF MODERN LIVING PROVIDED THIS IS EXECUTED SENSITIVELY AND SYMPATHETICALLY (CAN INCL. USE OF CONTEMPORARY ARCHITECTURAL EXPRESSION). | Strategic | Plan Area | Plan Area |
| MUPOP/228/120 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | REWORD REGIONAL STRATEGIC OBJECTIVES TO INCL: CONTRIBUTE TO RURAL/URBAN REGENERATION BY ENSURING THE 'DESIGN' OF DEVELOPMENTS DEMONSTRATES VALUE & RESPECT FOR THEIR IMMEDIATE & WIDER SURROUNDING NATURAL HERITAGE CONTEXT & SETTING'. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|---------------|----------------|--|----------------------|--|-----------|-----------|-----------|
| MUPOP/228/121 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | RE-WORD STRATEGIC OBJECTIVES: PROTECT/ ENHANCE NATURAL & BUILT ENVIRONMENT TO ACHIEVE & 'MAXIMISE SUSTAINABLE' BIODIVERSITY. | Strategic | Plan Area | Plan Area |
| MUPOP/228/122 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | REWORD STRATEGY:'IDENTIFY' & DESIGNATE THE 'MOST SIGNIFICANT LANDSCAPE' SITES (AS OPPOSED TO THE BEST LANDSCAPE SITES) AND DELETE GIVING THE ATTAINMENT OF THEIR PROTECTION EQUAL STATUS WITH ECONOMIC / SOCIAL PRIORITIES. | Strategic | Plan Area | Plan Area |
| MUPOP/228/123 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | RE-WORD STRATEGY: 'MAP, IDENTIFY & AUDIT THE QUALITY & SIGNIFICANCE' OF NATURAL HERITAGE FEATURES & 'LANDSCAPES'. DEVELOP A HIERARCHY OF SIGNIFICANCE & DESIGNATE SITES ON THE BASIS OF THIS. | Strategic | Plan Area | Plan Area |
| MUPOP/228/124 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | AMEND STRATEGY WORDING: TAKE ACCOUNT OF THE IMPLICATIONS OF PROPOSED LAND USE ZONINGS ON NATURAL FEATURES WITHIN PLAN AREA & 'ITS WIDER SETTING & AMEND WHERE NECESSARY TO PROTECT SIGNIFICANT NATURAL HERITAGE. | Strategic | Plan Area | Plan Area |
| MUPOP/228/125 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | RE-WORD STRATEGY:PROTECT AND INTEGRATE 'IDENTIFIED NATURAL HERITAGE FEATURES & LANDSCAPES OF SIGNIFICANCE' WHEN ZONING SITES FOR DEVELOPMENT THROUGH KEY SITE REQUIREMENTS. | Strategic | Plan Area | Plan Area |
| MUPOP/228/126 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | REWORD STRATEGY: CONSIDER NATURAL / CULTURAL COMPONENTS OF THE LANDSCAPE & PROMOTE OPPORTUNITIES FOR THE ENHANCEMENT & 'CONSERVATION' OF DEGRADED LANDSCAPES, PARTICULARLY THOSE 'IMPACTING ON COMMUNITIES'. | Strategic | Plan Area | Plan Area |
| MUPOP/228/127 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | RE-WORD STRATEGY:ENSURE POTENTIAL 'NEGATIVE' EFFECTS ON LANDSCAPE & NATURAL HERITAGE, INCL. THE CUMULATIVE EFFECTS OF DEVELOPMENT ARE 'ELIMATED' WHEN PREPARING LPD'S & POLICIES. | Strategic | Plan Area | Plan Area |
| MUPOP/228/139 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | PROPOSED USE OF SCA, AREAS OF CONSTRAINT ON MINERALS/HIGH STRUCTURES ARE INADEQUATE. MORE ROUNDED POLICY NEEDED FOR PROTECTION AGAINST eg SCHOOLS /OUTDOOR PERSUIT CENTRES IN VULNERABLE LANDSCAPES- THESE SHOULD BE LOCTAED WITHIN / EXTENSION TO SETTLEMENTS | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|-------------------|--|----------------------|---|-----------|-----------|-----------|
| MUPOP/228/140 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | SUGGESTS COUNCIL CREATE A 'LOCAL LIST' OF HERITAGE ASSETS-AN ESSENTIAL BASELINE AUDIT COLLATING WHAT EXISTS; ITS SIGNIFICANCE LOCALLY/ REGIONALLY /NATIONALLY & PUT THIS OUT TO PUBLIC CONSULTATION TO ENSURE LOCAL COMMUNITIES PROMOTE HERITAGE IN THEIR AREAS | Strategic | Plan Area | Plan Area |
| MUPOP/228/141 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | SUGGESTS CATEGORIES FOR A LOCAL HERITAGE ASSET LIST INCL: RESIDENTIAL/COMMERCIAL/ INDUSTRIAL BUILDINGS FROM 1800, ECCLESIASTICAL SITES, SITES RELATING TO NORMANS/ NORMAN EARLDOM, FEATURES OF SIGNIFICANCE, SITES RELATING TO UNOFFICIAL PLANTATION OF ULSTER... | Strategic | Plan Area | Plan Area |
| MUPOP/249/20 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | ON THE QUESTION RE FENESTRATION AND DESIGN, THE REP STATES THAT IF THE QUESTION IS POSED IN RELATION TO RESIDENTIAL BUILDINGS THEN IT WOULD NOT BE SUPPORTIVE OF THIS BEING INCLUDED IN THE PLAN | Strategic | Plan Area | Plan Area |
| MUPOP/249/21 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | IN ANSWER TO THE QUESTION RE THE NEED FOR DESIGN GUIDES FOR PARTICULAR SETTLEMENTS, THE REP WOULD BE SUPPORTIVE OF THIS AS LONG AS IT REMAINS ONLY AS GUIDANCE. | Strategic | Plan Area | Plan Area |
| MUPOP/264/17 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | GENERAL COMMENT STRONGLY DISAGREES THAT MANUFACTURING WILL NOT GROW IN THE COMING YEARS. | Strategic | Plan Area | Plan Area |
| MUPOP/273/34 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | REGARDING NATURAL HERITAGE, RES WOULD SUPPORT MORE WINDFARM DEVELOPMENT IN ORDER TO FACILITATE TRANSITIONING TO LOW CARBON ECONOMY AND HELPING PROTECT OUR NATURAL ENVIRONMENT | Strategic | Plan Area | Plan Area |
| MUPOP/280/1 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Recommends that importance of Heritage of Mid Ulster; natural, historic and built should be acknowledged more fully across the POP. The term 'historic environment' should be recognised and used given its recognition at govt level. | Strategic | Plan Area | Plan Area |
| MUPOP/280/2 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Recommends that an integrated approach to heritage assets is taken, seeing natural and cultural heritage as intertwined aspects of the landscape and the result of the interaction between people and place over the millennia. | Strategic | Plan Area | Plan Area |
| MUPOP/280/5 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | The link between sustainable tourism and protecting and enhancing the environment should be stronger. | Strategic | Plan Area | Plan Area |
| MUPOP/280/9 | Opinion to SA/SEA | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Recommends that Mid Ulster Council should clearly detail its approach to the integrated management of the environment and the mitigation of impacts on it. | Strategic | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations

| | | | | | | | |
|--------------|----------------|--|----------------------|---|----------------|-----------|-----------|
| MUPOP/280/13 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | agrees with the content of the introduction stressing the importance of Archaeology and Built Heritage and the consistency in the approach of the POP with the SPPS (6.1-6.4). | Strategic | Plan Area | Plan Area |
| MUPOP/280/14 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | The recognition of previously unknown archaeological sites in the context of the mitigation of development and the concept of Areas of Archaeological Potential is another 'key issue to consider' | Strategic | Plan Area | Plan Area |
| MUPOP/280/17 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Strongly supports the consideration of the Tullaghogue, Clogher Hillfort and Creggandevsky (partially within Mid Ulster) Candidate ASAls for designation. | Strategic | Plan Area | Plan Area |
| MUPOP/280/19 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Supports the view of HED in that existing policies in PPS 6 and the SPPS should be retained to ensure statutory protection of certain heritage assets and maintaining compliance with international conventions on protection of heritage. | Strategic | Plan Area | Plan Area |
| MUPOP/283/8 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | RESTRICTIVE PLANNING POLICES WHICH PREVENT NEW DEVELOPMENT WILL LEAD TO FURTHER DECLINE OF THE BUILT ASSETS WE SHOULD BE SEEKING TO CONSERVE. | Strategic | Plan Area | Plan Area |
| MUPOP/283/9 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | RESTRICTIVE PLANNING POLICES WHICH PREVENT NEW DEVELOPMENT WILL LEAD TO FURTHER DECLINE OF THE NATURAL HERITAGE ASSETS WE SHOULD BE SEEKING TO CONSERVE. | Strategic | Plan Area | Plan Area |
| MUPOP/284/1 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Advises council to undertake audit of heritage assets, including archaeology and scheduled monuments, rural, urban, vernacular and polite architecture, LBS, CAS, ATC's, AVC's, buildings at risk and site of cultural biodiversity and landscape interests. | Strategic | Plan Area | Plan Area |
| MUPOP/284/2 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | The POP should list; Buildings at risk from the BHARNI register, Ca's, ATC's, AVC's Buildings forming a local list of heritage interest, rural vernacular buildings. | Part-Strategic | Plan Area | Plan Area |
| MUPOP/284/3 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Recommends that design guidance is updated for existing CA's, ATC's and AVC's. | Strategic | Plan Area | Plan Area |
| MUPOP/284/4 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Considers that following a similar approach as set out in current planning policy is not sufficient to protect historic built environment as additional legislation and guidance applies for other forms of heritage protection inc. BHARNI, CA, ATCs, AVC's. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|--------------|----------------|--|----------------------|---|-----------|-----------|-----------|
| MUPOP/285/4 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | IN RELATION TO HPGD, THE REMAINS OF THE ITALIANATE GARDEN AT DRUMCAIRNE FOREST AND THE WALLED GARDEN AND GROUNDS AT STUART HALL, BOTH IN THE PARISH OF BALLYCLOG, STEWARTSTOWN, DESERVE CONTINUED ATTENTION. | Strategic | Plan Area | Plan Area |
| MUPOP/285/9 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | SUPPORTS THE PROPOSAL THAT MID ULSTER COUNCIL SHOULD PREPARE A LOCAL LIST OF NON-DESIGNATED HERITAGE ASSETS. | Strategic | Plan Area | Plan Area |
| MUPOP/293/12 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | POP CONCENTRATES ON IDENTIFYING & DESIGNATING SITES. NATURAL HERITAGE EXISTS IN DESIGNATED SITES & THROUGHOUT LANDSCAPE & IT IS IMPORTANT THAT PRIORITY HABITATS & SPECIES ARE PROTECTED WHEREVER THEY ARE. IMPORTANT THIS IS RECOGNISED IN POLICY APPROACH. | Strategic | Plan Area | Plan Area |
| MUPOP/293/13 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | MUDC SHOULD CONTINUE DESIGNATING HIERARCHY OF SITES INCLUDING SLNCI & BUILD ECOLOGICAL DATABASE OF IMPORTANT HABITATS THAT NEED PROTECTED. RECOMMENDS DEVELOPING REGISTER / GIS DATABASE OF ECOLOGICALLY SIGNIFICANT SITES & BROADER PRIORITY HABITAT AREAS. | Strategic | Plan Area | Plan Area |
| MUPOP/306/57 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | Fails to comprehensively address wider built environment including urban regeneration. Policy should advocate good design. Place making should include area around scheme.Guiding principle should be to avoid development that impacts on natural ecosystems | Strategic | Plan Area | Plan Area |
| MUPOP/306/60 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | Policies UD 1, 2 and 3 should be amended to take account of 'Kingsbrook' example - including 50 % wildlife-friendly greenspace, wildlife corridors, SUDS, planting for wildlife and wildlife homes eg. birdboxes built into walls and places. | Strategic | Plan Area | Plan Area |
| MUPOP/306/96 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | Peatlands of the lower Bann Valley should be included when acknowledgement is given to the areas rich natural heritage. | Strategic | Plan Area | Plan Area |
| MUPOP/306/97 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | Natural Heritage Strategy does not carry through elements within Regional Strategic Objectives & repalces 'and' scenarios with 'and/or'. Furthering sustainable development is not obvious within the LDP and should be further enhanced. | Strategic | Plan Area | Plan Area |
| MUPOP/306/98 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | It recommended that the precautionary principle should be carried though in to the LDP Natural Heritage Strategy – the RSPB welcomes this in the Strategic Policy Approach.. | Strategic | Plan Area | Plan Area |

**Mid Ulster Local Development Plan 2030
Preferred Options Paper - Strategic Representations**

| | | | | | | | |
|---------------|----------------|---|----------------------|---|-----------|-----------|-----------|
| MUPOP/306/99 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | There is no cognisance of the need to promote ecological networks throughout the plan area to help reduce the fragmentation and isolation of natural habitats through a strategic approach. Recommends referring to 'The Making Space for Nature' report. | Strategic | Plan Area | Plan Area |
| MUPOP/306/108 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | The potential for new flood plains to be created up stream should be examined to (i) allow water in, (ii) to be held, and (iii) then to be released when the river can once again cope with the flow. | Strategic | Plan Area | Plan Area |
| MUPOP/306/110 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | Land that is then transferred into periodical wetlands due to our climate should be treated as an asset, both for the landscape it creates, the additionality it brings and the natural filtrationby allowing water to settle out on these floodplains. | Strategic | Plan Area | Plan Area |
| MUPOP/306/113 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | Strategy should ensure that a policy is adopted that aims to promote sustainable development though the retention & restoration of natural flood plains & natural watercourses as a form of flood alleviation & an important environmental and social resource. | Strategic | Plan Area | Plan Area |
| MUPOP/318/12 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | Tyrone's heritage is a central interest of Tyrone GAA. Planning should reflect its importance but should also facilitate its interpretation and celebration whilst minimising any negative or restrictive consequences for local communities. | Strategic | Plan Area | Plan Area |
| MUPOP/340/7 | Opinion to Pop | Environmental Policies - Archaeology and Built Environment | GEN: General Comment | BELIEVE NO. OF ARCHEOLOGY & BUILT HERITAGE DESIGNATIONS IS TOO COMPLEX & CONFUSING & SHOULD BE SIMPLIFIED, PARTICULARLY TO CREATE BETTER LOCAL UNDERSTANDING & OWNERSHIP OF IMPORTANT ISSUE. | Strategic | Plan Area | Plan Area |
| MUPOP/340/8 | Opinion to Pop | Environmental Policies - Natural Heritage | GEN: General Comment | BELIEVE NO. OF NATURAL HERITAGE RELATED DESIGNATIONS IS TOO COMPLEX & CONFUSING & SHOULD BE SIMPLIFIED, PARTICULARLY TO CREATE BETTER LOCAL UNDERSTANDING & OWNERSHIP OF IMPORTANT ISSUE. | Strategic | Plan Area | Plan Area |
| MUPOP/340/37 | Opinion to Pop | Social Policies - Urban Design | GEN: General Comment | WELCOMES COUNCILS THINKING & SUGGESTIONS REGARDING URBAN DESIGN & SUPPORTS THE USE OF PLANNING TO CONTINUE TO IMPROVE & DEVELOP OUR LOCAL PUBLIC REALM. | Strategic | Plan Area | Plan Area |

| MUPOP/144/1 | Opinion to Pop | Settlements - Villages | Granville Settlement | include land identified on attached map as a rounding off opportunity for industry as a 4th Option for Granville | Site Specific | Granville | Clogher Valley |
| MUPOP/144/2 | Opinion to Pop | Settlements - Villages | Granville Settlement | scope to reduce SLNCI without compromising the lake and its natural ecology in line with extent of rounding off on the attached map. | Site Specific | Granville | Clogher Valley |
| MUPOP/144/3 | Opinion to Pop | Settlements - Villages | Granville Settlement | this rounding off 4th option is preferable to options 1 & 2 identified as set out at page 127 of the POP which would unnaturally expand the physical limits of industrial land into the open countryside. | Site Specific | Granville | Clogher Valley |
| MUPOP/145/1 | Opinion to Pop | Settlements - Villages | Ballylifford Settlement | LAND IDENTIFIED ON ATTACHED MAP TO BE RETAINED WITHIN THE BALLYLIFFORD SETTLEMENT LIMIT. THE LANDOWNER STATES HIS INTENTION IS TO USE THE LAND FOR HOUSING DEVELOPMENT. | Site Specific | Ballylifford | Magherafelt |
| MUPOP/145/2 | Opinion to Pop | Settlements - Villages | Ballylifford Settlement | LAND IDENTIFIED ON THE ATTACHED MAP TO BE INCLUDED FOR POTENTIAL DEVELOPMENT | Site Specific | Ballylifford | Magherafelt |
| MUPOP/146/8 | Opinion to Pop | Settlements - Towns | Magherafelt Settlement | Industrial site at station road should be extended northwards resulting in a small loss of land at LLPA (MT34) which could be sustained without loss to the character of the area. | Site Specific | Magherafelt | Magherafelt |
| MUPOP/146/24 | Opinion to Pop | Environmental Policies - Protecting Heritage and Providing Infrastructure | BH10: Local Landscape Policy Areas | LLPA's are excessive particularly to the N and E of M'felt. LLPA in M'felt is disproportionate to the size of the settlement, when compared with Cookstown and Magherafelt. Land to N&W of station rd is not worthy of LLPA and could be developed for housing. | Site Specific | Magherafelt | Magherafelt |
| MUPOP/146/28 | Opinion to Pop | Settlements - Towns | Dungannon Settlement | SITE TO BE CONSIDERED FOR HOUSING | Site Specific | Dungannon | Dungannon |
| MUPOP/146/29 | Opinion to Pop | Settlements - Towns | Cookstown Settlement | SITE TO BE CONSIDERED FOR HOUSING (ALREADY ZONED AS h18) | Site Specific | Cookstown | Cookstown |
| MUPOP/146/30 | Opinion to Pop | Settlements - Towns | Cookstown Settlement | SITE TO BE CONSIDERED FOR HOUSING (ALREADY ZONED AS H18) | Site Specific | Cookstown | Cookstown |

IT IS ASSOCIATED WITH THE BUILT FABRIC OF COOKSTOWN AND IS LOCATED WITHIN WALKING DISTANCE TO JOBS, AIDED BY A FOOTPATH WHICH BOUNDS THE SITE. RETAIN THE SITE IN QUESTION WITHIN THE SETTLEMENT LIMIT. THERE ARE NO CONSTRAINTS ON THIS SITE AND GIVEN ITS HISTORIC INCLUSION AND BUILT FOOTPRINT, IT SHOULD BE RETAINED WITHIN THE LIMIT. | Site Specific | Cookstown | Cookstown |
| MUPOP/331/1 | Opinion to Pop | Settlements - Towns | Cookstown Settlement | REP WANTS THE SITE INCLUDED FOR POSSIBLE NEW GAELSCOIL WHICH IS GROWING FAST AND WILL NEED TO EXPAND. HOUSE COULD ALSO BE CONSIDERED FOR HOUSING. THERE IS A NEED FOR MORE HOUSING AND THE TWO USES ARE COMPATIBLE. | Site Specific | Cookstown | Cookstown |
| MUPOP/332/2 | Opinion to Pop | Settlements - Villages | Draperstown Settlement | THE REP WANTS THE WHITE LAND BETWEEN THE ZONING MT05 AND THE EMPLOYMENT ZONING TO BE INCLUDED FOR HOUSING. NO MAP HAS BEEN INCLUDED SO IT IS UNCLEAR AS TO WHAT EXACT LAND IS BEING REFERRED. (CANNOT PLOT). | Site Specific | Draperstown | Moyola |
| MUPOP/334/5 | Opinion to Pop | Settlements - Towns | Magherafelt Settlement | THE REP SUPPORTS THE POPS OPTION OF EXPANDING ECONOMIC ZONING SOUTHWARDS FROM ECONOMIC LANDS ALONG BALLYRONAN ROAD. THIS WILL MAKE USE OF NEW BY PASS. LAND IN QUESTION IS ZONED FOR HOUSING BUT HAS NEVER BEEN THE SUBJECT OF A PLANNING APPLICATION. | Site Specific | Magherafelt | Magherafelt |
| MUPOP/336/2 | Opinion to Pop | Settlements - Towns | Cookstown Settlement | Lands at Ballynease Road were previously within development limits under MAP1976-1996 - planning application H/2003/1374/O - dismissed at appeal. | Site Specific | Cookstown | Cookstown |
| MUPOP/338/2 | Opinion to Pop | Settlements - Villages | Bellaghy Settlement | lands to west of BY03/2 at Mullaghboy Road well placed to facilitate development - not extend development further along Mullaghboy Road, will consolidate urbanform & make use of infrastructure which will be put in place when BY03/2 is developed. | Site Specific | Bellaghy | Moyola |
| MUPOP/338/12 | Opinion to Pop | Settlements - Villages | Bellaghy Settlement | Request that clients lands are considered for rezoning as housing development lands - given significant housing needs which exist at present in Dungannon Area important that enough land to cater for any proposed expansion over next 13 years - see map | Site Specific | Bellaghy | Moyola |
| MUPOP/345/1 | Opinion to Pop | Growth Strategy and Spatial Framework | Sett Hierarchy: Proposed Settlement Hierarchy | Agree growth of housing lands in Magherafelt should be phased - draw attention to lands to the north of Ballyheifer Road - see attached map include lands as an option for future expansion of housing lands - edge of current development limit. | Site Specific | Dungannon | Dungannon |
| MUPOP/348/1 | Opinion to Pop | Settlements - Towns | Magherafelt Settlement | We would recommend that the suggested LLPA does not include these lands as there is nothing that they add to the remainder of the LLPA. | Site Specific | Magherafelt | Magherafelt |
| MUPOP/348/2 | Opinion to Pop | Settlements - Towns | BH10: Local Landscape Policy Areas | Request for lands to be included within the settlement limit of Cabragh. | Site Specific | Magherafelt | Magherafelt |
| MUPOP/351/1 | Opinion to Pop | Settlements - Villages | Aghaduff/Cabragh Settlement | | Site Specific | Plan Area | Plan Area |

Mid Ulster Local Development Plan 2030
Preferred Options Paper - Site Specific (LPP) Representations

| | | | | | | | |
|-------------|----------------|--|-----------------------------------|--|---------------|---------------|---------|
| MUPOP/353/2 | Opinion to Pop | Settlements - Small Settlements | Edendork Settlement | SPG5 & DSTAP Edendork is a village - site is located in rural area but adjoins settlement limit along northern boundary - POP | Site Specific | Edendork | Torrent |
| MUPOP/353/5 | Opinion to Pop | Settlements - Small Settlements | Edendork Settlement | Include land for the following reasons: No constraints to extending to the settlement limit in a southern direction to take in the subject site; planning history LA09/2025/1204/F, M/2013/0554/F & 131 Killymeal Road natural extension - compact urban form. | Site Specific | Edendork | Torrent |
| MUPOP/353/6 | Opinion to Pop | Settlements - Small Settlements | Edendork Settlement | Inclusion of site would not result in urban sprawl but would be physically contained by a minor road along south of site, strong hedgerow to east & Killymeal Road to west; site does not undermine visual break between two nodes; one dwelling only. | Site Specific | Edendork | Torrent |
| MUPOP/431/4 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | SPECIAL CIRCUMSTANCES: SITE SPECIFIC TOPOGRAPHY CONSTRAINTS (BOGLAND). THEREFORE LDP NEEDS TO ESTABLISH TAILORED POLICY SOLUTION FOR THIS PARTICULAR AREA SENSITIVE TO SIZE, CHARACTER OF AREA IN TERMS OF SCALE, FORM, DESIGN. | Site Specific | Torrent Rural | Torrent |
| MUPOP/635/5 | Opinion to Pop | Social Policies - Housing Policy - Housing in Settlements and Housing in the Countryside | CT2: Dwellings in the Countryside | LOW DENSITY CLACHAN STYLE DEVELOPMENT HISTORIC TO THE LOCALITY (DUE TO TOPOGRAHY) IS APPROPRIATE & WOULD RESPOND TO HOUSING NEED BY PROVIDING LOCALS NOT IN A POSITION TO DEVELOP A SINGLE DWELLING TO CONTINUE TO LIVE IN WASHINGBAY AREA. | Site Specific | Torrent Rural | Torrent |

Appendix 8
Housing Monitor Figure Updates
Housing and Industry Figures

Appendix ????

Housing Monitor figures- updated April 2017.

In relation to the 60% figure for the main towns (including Coalisland which has a population of over 5000) then the breakdown is as follows:

| Settlement | Original Figure (potential units) | Changes to original figure | New figure (potential units) |
|--------------------|--------------------------------------|-------------------------------|---------------------------------|
| COOKSTOWN | 1445 | -35 | 1410 |
| DUNGANNON | 2766 | -76 | 2690 |
| COALISLAND | 1227 | -26 | 1201 |
| MAGHERAFELT | 1859 | -51 | 1808 |
| | | | |
| TOTAL | 7,297 | -188 | 7,109 |

$$(7,109 / 10,950) \times 100 = 64.9$$

Therefore, at present in settlements of over 5,000 population, we have adequate housing provision by way of unimplemented approvals and zonings, to accommodate **65%** of the required housing need of 10,950.

By focussing solely on the hubs and not counting Coalisland.....

$$7,109 - 1,201 = 5,908$$

$$(5,908 / 10,950) \times 100 = 53.9$$

So, in the 3 main hubs of Magherafelt, Cookstown and Dungannon, we have adequate housing provision by way of unimplemented approvals and zonings, to accommodate **54%** of the required housing need of 10,950.

Appendix ??? Industry Figures

| SETTLEMENT | NO OF LETTERS ISSUED | RESPONSES RECIEVED | POSITIVE RESPONSES | NEGATIVE RESPONSES | NON COMMITAL |

- 34% of letters issued were replied to; 21% were replied to with a positive intention to develop.
- 62% of all replies were positive

Appendix 9

Late Representation Summary.

Appendix ???????

LATE REPRESENTATIONS - RECEIVED AFTER 27TH JANUARY (DATE OF CONSULTATION END)

To date 29 late representations have been received. The issues raised in these representations are summarised below:

- 9 of these representations were received from the Aughamullan, Derrytresk, Derrylaughan residents. Like the representations from this community which were received during the consultation period, the main focus of these responses is the provision of single houses and groups of housing so that the young people in the area, will not be forced to move away from the area. There is also a belief expressed that the drawing of settlement limits, and the creation of new small settlements is not the preferred way of achieving this. Rather, a specific “townland policy” could be drafted for the area to allow local people to live in their own areas, without the need to move to a town and to build their own homes without being subject to market forces which are evident within settlement limits, driving house prices up to unattainable levels for local people.
- There were 12 representations which were of a site specific nature. That is to say that they were focused on making a case for one piece of land to be included within the settlement limits. These requests will not be considered as part of the Plan Strategy but will be held by the Council and considered as part of the next stage in the Development Plan process, the Local Policies Plan.
- Two representations were received which expressed concern over the lack of emphasis within the POP on protecting existing and ancient woodland. One such response made specific reference to the Pomeroy area and the “plated history” around the area while another response related specifically to ancient woodland in the Mid Ulster area and urged the POP to protect this important asset.
- Rural development – general agreement with the rural policy although a few minor changes were suggested such as the request that garages and small sheds should be considered as farm buildings in part of a cluster. Need for a balanced approach to rural development highlighted.
- Farm diversification schemes should be allowed to involve additional newly constructed buildings and should not be required to be run in conjunction with an existing farm business.
- Agreement expressed with policy being more flexible of economic development in the rural area although the 150sq. metre limitation on rural workshops is called into question.

- The limitations on 10 times the rotor diameter and 500m from a neighbouring dwelling should apply to all wind turbines and all developers must have the written consent of all nearby residents submitted as part of their application. Disagreement also shown with the idea to encourage the re use of existing turbines
- Minerals- preferred map for proposed ACMD's is map 3
- Killyman – A response to the Councils settlement appraisal for the village of Killyman.
- One representation disagreed with LDP objective to provide 11,000 new homes. They argue there has been no public interrogation of these RDS HGI figures and that Mid Ulster's position to adopt these figures is out of step with other Council's that are seeking to boost housing development. They highlight that Maghera is the most active town in the district in terms of house building and believe that the equitable split housing approach lacks the flexibility to allow some towns that show potential to grow such as Maghera. Disagree that there is adequate lands to meet housing need in Maghera over plan period and request that lands identified be included within the settlement limit of Maghera. Identifies a number of potential issues regarding deliverability of housing lands including lead-in times, site constraints. Suggests Council should prepare a detailed housing trajectory setting out how 5 years housing land supply will be met on a rolling basis over the Plan period.

Meetings have also been held with the following people / groups post POP consultation period. These persons / groups have not submitted a formal written representation. They have been informed that their comments are included within this summary report however that it will be the members decision as to whether these can be regarded as representations to the POP.

- Northern Counties Co-op Enterprises Ltd- 11th April 2017. They stipulated there was a need more housing and industrial lands zoned in Swatragh. Stated all houses in villages and commercial properties are fully occupied resulting in loss of people / businesses to Magherafelt. Very active cross community work on going in village, very community oreientated. Stated Swatragh well connected in terms of location and roads links therefore potential to expand. However concern that there is plenty of land around village not developed for one reason or another, i.e. land ownership issues.
- Drumullan GFC representatives- Queried whether Drumullan GFC grounds which is located immediately adjacent to Drumullan development limit (Cookstown Area Plan 2010) could be potentially included within settlement in the new MID Ulster LDP.
- Sean MacMahon (Kilcronagh Business Park) met with us on 30th May 2017 and made the point that he would like to see industrial lands at Kilcronagh being extended because he has been approached by a

group who require 100,000 sq. feet (roughly 2.3 acres) of land. He made the point that this land at present is simply not available. He made the point that Kilcronagh is well suited for such an expansion due to the existing road network being in place.

- EDEN (Enhancing and Developing the Edendork Neighbourhood) met with us on 15th August 2017. They would like us to consider redrawing the settlement limit of Edendork. They are concerned that part of Edendork is currently within the Dungannon Settlement Limit, notably the Edendork GAA pitch. They also disagree with Edendork being designated in two nodes, stating that the area currently outside the SL is heavily developed (chieftain trailers for example). As well as for the purposes of enabling them to plan for development and funding opportunities in their upcoming village plan, this was also an issue of identity for local residents who feel strongly that they are Edendork residents and not Dungannon residents.
- Northern Counties Co-op Enterprises Ltd- 11th April 2017. They stipulated there was a need more housing and industrial lands zoned in Swatragh. Stated all houses in villages and commercial properties are fully occupied resulting in loss of people / businesses to Magherafelt. Very active cross community work on going in village, very community orientated. Stated Swatragh well connected in terms of location and roads links therefore potential to expand. However concern that there is plenty of land around village not developed for one reason or another, i.e. land ownership issues.
- Meeting with Vinny Beggs on behalf of Portafill (Granville)- 6th October 2017. Stated his client was interested in the future direction of growth at Granville and would like to see industrial lands being extended. Lands discussed along Killyliss Road.

| MUPOP/673/16 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | SAID MINIMUM SEPARATION DISTANCE SHOULDN'T BE INTRODUCED BETWEEN TURBINE & OCCUPIED PROPERTY AS IT WOULD RESTRICT POSSIBLE LOCATION HENCE TURBINE UPTAKE. RNW1 POINT (IV) SPECIFIES CRITERIA WHICH MUST BE MET; ANOTHER LAYER ADDS NO VALUE TO THE ASSESSMENT. | Strategic | 0 | |
| MUPOP/673/17 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | SAID POLICY SHOULD ENCOURAGE/FACILITATE THE RE-USE, REFURBISHMENT, REPAIR& REPOWERING OF EXISTING RENEWABLE ENERGY DEV WITH COMMISSIONING/RECYCLING STRUCTURES A LAST RESORT AS THIS REDUCES IMPACT OF NEW DEV & EXISTING SITES HAVE INFRASTRUCTURE IN PLACE. | Strategic | 0 | |
| MUPOP/678/1 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | AGREES MINIMUM SEPARATION DISTANCE SHOULD BE INTRODUCED FOR ALL TYPES OF TURBINE INCLUDING SINGLE. 10 TIMES ROTOR DIAMETER TO OCCUPIED PROPERTY WITH MINIMUM DISTANCE OF 500M SHOULD ALSO APPLY TO ALL. ETSU GUIDELINES ARE OUT OF DATE & NEED REVISED. | Strategic | 0 | |
| MUPOP/678/2 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | SAID IN POLICY RNW1 THE WORDS 'GENERALLY APPLY' SHOULD BE REMOVED AS THEY WILL CAUSE AMBIGUITY. THE POLICY SHOULD APPLY WITHOUT THE WORD 'GENERALLY'. | Strategic | 0 | |
| MUPOP/678/3 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | DOESN'T AGREE THAT THE TURBINE NEEDS TO EXCEED 15M TO HUB HEIGHT TO REQUIRE SEPARATION DISTANCE FROM PROPERTIES. A TURBINE LESS THAN THIS HEIGHT WILL STILL CAUSE DISTRESS, NOISE AND LOSS OF AMENITY TO OCCUPIED PROPERTY NEARBY. | Strategic | 0 | |

Mid Ulster Local Development Plan 2030

| | | | | | | | | |
|--|---|---|---|---|--------------------------|---------------|--|----------|
| MUPOP/678/4 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | FOR ALL TURBINES DEVELOPERS SHOULD HAVE TO OBTAIN WRITTEN CONSENT FROM OCCUPIED PROPERTIES. THIS SHOULD BE PRIOR TO, THEN SUBMITTED WITH THEIR PLANNING APPS. LOCALS WASTE £1000'S DEFENDING HOMES AGAINST ERRONEOUS DEVELOPERS REPORTS SUBMITTED WITH APPS. | Strategic | 0 | | |
| MUPOP/678/5 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | POLICY SHOULDN'T ENCOURAGE REUSE OF EXISTING ENERGY DEVELOPMENT. MANY EXISTING TURBINES ARE IN WRONG PLACE DUE TO BAD POLICY, POOR DECISIONS & LOCAL PEOPLES CONCERNS NOT BEING ADDRESSED. | Strategic | 0 | | |
| MUPOP/678/6 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | POLICY SHOULDN'T ENCOURAGE REUSE OF EXISTING ENERGY DEVELOPMENT AS RECONDITIONED TURBINES COULD RESULT IN MORE NOISE FROM THE TURBINE. THE DATA DEVELOPERS USE RELATES TO NEW TURBINES NOT OLD NOISY TURBINES THEY COULD BE FORCED TO REUSE. | Strategic | 0 | | |
| MUPOP/678/7 | Opinion to Pop | Environmental Policies - Renewable Energy | RNW1: All Renewable Energy Development | TURBINES HAVE NO PLACE NEAR TO OCCUPIED PROPERTY. | Strategic | 0 | | |

|--------------|---|--|---|---|---------------|-------------------|-------------|
| MUPOP/684/5 | Opinion to Pop | Settlements - Villages | Killyman Settlement | Request for land to be zoned for retail use in Killyman as well as land to be protected for a community facility such as a village hall. | Site Specific | Killyman | Dungannon |
| | General Comment - Requiring No Further Action | | | | | | |
| MUPOP/684/7 | | Settlements - Villages | Killyman Settlement | St Brigid's church in the settlement limit should be listed. | Site Specific | Killyman | Dungannon |
| MUPOP/684/8 | Opinion to Pop | Settlements - Villages | Killyman Settlement | Rep welcomes the proposals to NOT extend the settlement limit of Killyman. | Site Specific | Killyman | Dungannon |
| | General Comment - Requiring No Further Action | | | | | | |
| MUPOP/684/10 | | Settlements - Villages | Killyman Settlement | Development has led to the loss of a public right of way. These should be protected and preserved for all residents. | Site Specific | Killyman | Dungannon |
| | | | | | | | |
| MUPOP/685/1 | Opinion to Pop | Settlements - Towns | Cookstown Settlement | Representation wants site included in settlement limit of Cookstown | Site Specific | Cookstown | Cookstown |
| | | | | | | | |
| MUPOP/686/1 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | Wants the site in question to be zoned as a Rural Industrial Policy Area (RIPA) | Site Specific | Torrent Rural | Torrent |
| | | | | | | | |
| MUPOP/686/3 | Opinion to Pop | Economic Policies - Economic Development | ENC DEV PA OPT 2: More Flexible Approach Tailored to Mid Ulster | SITE SHOULD BE CONSIDERED AS A RIPA DUE TO LARGE MASS OF LAND AVAILABLE, PROXIMITY TO MAIN TRANSPORT ROUTES AND PUBLIC TRANSPORT, PROXIMITY TO EMPLOYMENT BASE IN COLAISLAND AND DUNGANNON, PROXIMITY OF ENERGY INFRASTRUCTURE AND APPROPRIATE NEARBY LAND USES | Site Specific | Torrent Rural | Torrent |
| | | | | | | | |
| MUPOP/687/4 | Opinion to Pop | Settlements - Small Settlements | Creagh Settlement | Rep wants the site to be included in the settlement limit. It will not impact on rural character, is accessible to services, is convenient to transport routes and will encourage a movement pattern which supports walking and cycling. | Site Specific | Creagh | Moyola |
| | | | | | | | |
| MUPOP/690/1 | Opinion to Pop | Settlements - Villages | Drumullin Settlement | REQUEST LAND OUTLINED RED ON THE ATTACHED MAP BE ZONED WITHIN THE DEVELOPMENT LIMITS OF DRUMMULLAN. SAID THERE'S A LACK OF DEVELOPMENT LAND IN AREA & CURRENT LAND FOR DEVELOPMENT IN THE PLAN HASN'T BEEN COMMERCIALY UTILISED IN PAST 13 YEARS. | Site Specific | Drumullin | Cookstown |
| | | | | | | | |
| MUPOP/692/1 | Opinion to Pop | Settlements - Towns | Magherafelt Settlement | would like land at Aughrim Road zoned for commercial use so that Greer's Tyres could relocate from station road to this location, supporting evidence contained within the rep. | Site Specific | Magherafelt Rural | Magherafelt |
| | | | | | | | |
| MUPOP/693/7 | Opinion to Pop | Settlements - Towns | Maghera Settlement | Site marked in red on attached map to be included within Maghera settlement limit and zoned for housing. | Site Specific | Maghera | Carntogher |
| | | | | | | | |
| MUPOP/696/1 | Opinion to Pop | Settlements - Small Settlements | Dunnamore Settlement | Land to be included for housing within Dunnamore settlement limit | Site Specific | Dunnamore | Cookstown |

Mid Ulster Local Development Plan 2030

| | | | | | | | |
|-------------|----------------|---------------------------------|------------------------|---|---------------|-------------|------------|
| MUPOP/696/2 | Opinion to Pop | Settlements - Small Settlements | Killeenan Settlement | Land to be included for housing within Killeenan settlement limit | Site Specific | Killeenan | Cookstown |
| MUPOP/696/3 | Opinion to Pop | Settlements - Villages | Pomeroy Settlement | Land to be included for housing within Pomeroy settlement limit | Site Specific | Pomeroy | Cookstown |
| MUPOP/696/4 | Opinion to Pop | Settlements - Villages | The Rock Settlement | Land to be included for housing within The Rock settlement limit | Site Specific | The Rock | Cookstown |
| MUPOP/696/5 | Opinion to Pop | Settlements - Small Settlements | Gortacladdy Settlement | Land to be included for housing within Gortacladdy settlement limit | Site Specific | Gortacladdy | Cookstown |
| MUPOP/697/1 | Opinion to Pop | Settlements - Villages | Pomeroy Settlement | Requested inclusion of lands into Pomeroy Settlement limit. Lands located at Parkview / Cavana Linn / Pomeroy Football Grounds. Map attached. | Site Specific | Pomeroy | Cookstown |
| MUPOP/698/1 | Opinion to Pop | Settlements - Villages | Swatragh Settlement | Request to include 2 separate parcels of land within development limit. Has stated both parcels of land likely to be suitable for housing. Map attached. | Site Specific | Swatragh | Carntogher |
| MUPOP/699/1 | Opinion to Pop | Settlements - Villages | Donaghmore Settlement | The REP would like to see the site in question de-zoned as an area of open Space and recreation. He points out that the site has not been used for recreational purposes since 2002 and is now solely used for grazing purposes. | Site Specific | 0 | |
| MUPOP/699/2 | Opinion to Pop | Settlements - Villages | Donaghmore Settlement | The site has never been used as public open space in the past and its completeley separate from the nearby GAA grounds and the new housing at torrent view. The site is not located within the floodplain unlike a lot of other land around donaghmore. | Site Specific | 0 | |
| MUPOP/699/3 | Opinion to Pop | Settlements - Villages | Donaghmore Settlement | THE PROVISION OF OPEN SPACE IS A MATTER FOR COUNCIL TO PROVIDE, NOT RELY ON PRIVATE LAND. THE LAND WOULD BE BETTER ZONED FOR RESIDENTIAL DEVELOPMENT AS OPPOSED TO PUBLIC OPEN SPACE, WHICH IT HAS NEVER BEEN USED FOR. | Site Specific | 0 | |
| MUPOP/699/4 | Opinion to Pop | Settlements - Villages | Donaghmore Settlement | OTHER POINTS IN FAVOUR OF THE SITE; CLOSE TO EXISTING ROAD, REPRESENTS A ROUNDING OFF OPPORTUNITY, GOOD VEGETATION, INFRASTRUCTURE ALREADY IN PLACE, NO INCOMPATIBLE LAND USE NEARBY | Site Specific | 0 | |
| MUPOP/700/1 | Opinion to Pop | Settlements - Small Settlements | Carland Settlement | Land to be included within settlement limit and zoned for housing | Site Specific | Carland | Torrent |
| MUPOP/701/7 | Opinion to Pop | Settlements - Villages | Drumullian Settlement | request that land identified on representation map be included within Drumullian settlement limit for housing. See original rep for supporting statement. | Site Specific | Drumullian | Cookstown |
| MUPOP/702/1 | Opinion to Pop | Settlements - Villages | Killyman Settlement | request for lands identified in rep to be zoned for economic Development, supporting evidence contained in rep | Site Specific | Killyman | Dungannon |
| MUPOP/702/2 | Opinion to Pop | Settlements - Villages | Killyman Settlement | Request for land to be zoned as a Rural Industrial Policy Area. Supporting evidence contained in rep. | Site Specific | Killyman | Dungannon |
